The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES.,

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

For North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expense, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example :—

Articles.	Prices per ton.	Cash discount.
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Viee-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montre
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TO OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved imachinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.
Or A. McK. COCHRANE, Secretary-Treasurer, 388 St. Paul Street, Montreal. 30-

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETARY.

LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 75,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBE

ASSETS, $21,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid a single dollar of original capital.
SURPLUS ASSETS, $6,361,967—All profits divided among the members. Each policy holder is a member. There no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since orgauization, $4,397,142.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual inter alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $6,863,528.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 1

During its last fiscal year this Company paid to its living members, and to the families of deceased membe nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, the lowest of any.
ITS LIBERALITY—It accommodates the insured by giving credit for part premium, and grants insurance to m all the contingencies and wants to which Life Insurance is applicable.
It issues policies on a single life from $100 to $25,000.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family,* and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

VICTORIA MUTUAL FIRE INSURANCE COMPANY.

The sixth annual meeting of this Company was held at their office, corner James and Main streets, on Monday, 7th June. The meeting was called to order by Mr. George H. Mills, President, and the following Annual Report was read by the Secretary, Mr. W. D. Booker:

Report.

In submitting the usual Annual Report the Board of Directors congratulate the members of the "Victoria" on the continued increase of the business of the Company, and the satisfactory nature of the past year's operations. The financial arrangements are such that payments for loss may be made at once, after necessary proofs are furnished. Every claim against the Company during the year has been settled, as soon as its correctness was shown; and the total of assessments ordered has been less in proportion to the amount at risk than in any previous year.

The number of policies now in force in the "General Branch" (covering non-hazardous property only) is..	6,363	
Insuring the sum of...		$4,389,561
And in the Hamilton Branch...	218	
Insuring the sum of...		187,324
Making a total of...	6,581	
Insuring the sum of...		4,576,855
Last year...	4,789	
Insuring the sum of...		3,419,721
Showing an increase in No. of Policies ...	1,792	
And in amount insured of...		$1.157,164

The premium notes in hand after deducting all payments and assessments, amount to $76,817.13, making, with other securities a balance over and above all liabilities of $118,571.28, as available assets for the payment of future losses; 159 of the largest risks have been partially re-insured with other Companies to the extent of $124,085, making the average risk of the Company $671 92 in the "General Branch," and $813.41 in the "Hamilton Branch."

Two matters of importance, materially affecting the interests of the Company, have been decided by the Board during the past year; the one, regulating the annual collection of assessments; the other, the establishment of a Branch for the insurance of property in the City of Hamilton, within range of the hydrants.

Hitherto the books have been made up to the 31st May of each year, and all assessments ordered for that year, made payable on 1st October following. This system, however, has been found objectionable, inasmuch as in most cases it became necessary to make four collections upon a three years' policy; the first for part of a year, from date of policy to 31st May following; the second and third for full years; and the fourth, from 1st June to the end of the term of insurance; the last payment in some cases occurring many months after the policy had expired. To obviate this, and still to retain the strictly mutual character of the Company, it was decided that the assessments, to cover the losses of each year, should be made payable annually from the date of each policy, or as soon thereafter as notice, with particulars of the several amounts due, could be forwarded to members; but for existing policies, where collections have already been made for portions of a year (ending 31st May), the next notice would be deferred until one year from the end of the policy year already partially paid. Your Directors are convinced that this change will evidently prove satisfactory to all concerned.

The propriety of establishing a Branch Company to meet the requirements of property holders within the protection of the City Hydrants, having been frequently pressed upon the notice of your Board, after full consideration, it was determined (in January last) to establish such a Branch, subject to the following conditions: "That a scale of risks should be prepared for each department. That direct, separate and distinct accounts should be kept. That members should only be liable for claims against the department in which they are insured, and not the one for the other. That all necessary expenses incurred in the conducting and management of such departments should be assessed and divided between each, in proportion to the amounts insured in each. And that the business in all respects should be managed in like manner, and by the same officers as the 'General Branch.'"

The result has been that during the past four months 218 policies, covering property to the extent of $187,324, have been issued, and no loss has occurred.

The question of Cash Receipts in lieu of the Premium Note System, has occupied the attention of your Board; and the decision of your previous Board, in favor of the continuance of the latter system, has been confirmed. It is believed that the inconvenience of making a small annual remittance to cover the losses incurred during the year, is incomparably less than the danger attendant upon a business where all the assets of the Company are in hand, without a reserve fund to fall back upon in case of a succession of extraordinary losses. It is quite evident that a Company without any capital beyond its current receipts must either collect a larger sum than is required to cover the ordinary average of losses; or use the moneys received on new business to meet unusual losses; and thus weaken, if not totally destroy its ability to pay the ordinary average of claims arising from loss on property, for which such moneys were received. In relation to this important subject your Board would, in conclusion, call attention to an article in a recent number of the *Canadian Monetary Times and Insurance Chronicle*, as conveying a plain and full expression of their views: "The breaking loose from Premium Notes," (says this paper) "deprives the insured of that security for payment which he naturally looks for. In the absence of a Guarantee Capital, there is *no security* at all but the honesty and good management of the Directors. * * * In the Cash System there may be neither shadow nor substance. Under such circumstances (the writer concludes that) some remedy should be applied to a state of affairs manifestly wrong." The Mutual system, as understood and strictly adhered to by your Board, is perfectly safe, and

pliable enough to meet every exigency. In years of light loss the annual collections will be small; and when heavier losses occur the existing business will bear the whole, without sacrificing the interests of any member, and without affecting new insurances; as every policy must pay its own way, leaving the future to provide only for its own liabilities. Under these circumstances your Board could not advise any change in the system heretofore approved.

In moving the adoption of the Report, Mr. Mills gave a history of the establishment and growth of the Company since its formation, which showed the progress of the Company to have been steady and most satisfactory.

Mr. R. N. Law, as a policy-holder, had great pleasure in seconding the adoption of the Report. The success could not be otherwise than satisfactory, and reflected most creditably not only on the Board of Directors but on the executive of the Company as well. The motion was carried unanimously.

On motion of Mr. A. T. Wood, seconded by Mr. Stephen King, the President was requested to prepare a synopsis of his very interesting remarks for publication with the annual Report.

Mr. Cahill and Mr. R. N. Law were appointed as scrutineers, and reported the unanimous re-election of the old Board. They are: G. H. Mills, L. Lewis, Alexander Brown, Jas. Calder, P. Carroll James Cummings, J. H. Fisher, A. Gibbons, Thomas Lottridge, Geo. Murison, Thos. McIlwraith Joseph Rymal, S. B. Wylie and A. T. Wood.

Messrs. R. N. Law and J. J. Mason were appointed Auditors:

The meeting then adjourned and the new Board was constituted by the re-election of Mr. Geo. H. Mills, as president, and Mr. Levi Lewis, as Vice President.

Bank of Montreal.—The annual meeting was held at Montreal on the 7th; Senator Ryan in the chair. It appears from the Directors' report that the balance at the credit of profit and loss account on the 30th April, 1868, amounted to $71,749, and that the profits for the year ending 30th April, 1869, were, after excluding bad doubtful debts, and deducting charges of management, $1,120,979.88, making with the above the sum of $1,192,728.88. From this sum has been taken one five per cent. dividend amounting to $300,000, a six per cent dividend amounting to $360,000; and $500,000 has been added to the Rest, and the balance of $42,728.88 carried forword. The rest now amounts to $200,000. The profits of the past year are stated to have exceeded those of any previous year. A general statement of the banks position was subjoined.

Mr. Crawford moved, seconded by Mr. Esdaile: That the Transfer Books be opened to the inspection of shareholders within bank hours. In support of the motion he said, that unless this motion were granted he could not see how any director could expect the confidence of the shareholders. There were many reasons indeed why the transfer books should be open; and having brought this forward at other meetings of banks and companies it had been there conceded that it was a right which shareholders ought to claim. He did not doubt that the directors now present would do so too, after the question had been before them. The presidents of the City and of the People's Bank, and Mr. Allan, President of the Telegraph Company, had all conceded the principle. He asked whether, if directors of means were to give place to men of straw, it would not have its effect on the value of stock. If disastrous news came, was that a fact which should belong to the directors alone, or whether the shareholders should not be able to sell out before the price was precipitated by 10 or 15 per cent.

Mr. Thos. Cramp moved, seconded by Mr. H. Lyman: That the question of opening the transfer books of the bank for the inspection of the shareholders be referred to the directors for their consideration. The amendment was put and carried unanimously.

The following gentlemen were elected Directors: T. B. Anderson, T. E. Campbell, G. W. Campbell, M.D., E. M. Hopkins, J. G. Mackenzie, Peter Redpath, Hon. Thomas Ryan, Henry Thomas, David Torrance.

Port Hope Gas Company.—The annual meeting was held on the 15th inst.; the following Directors were elected:—J. Helm, Wm. Craig, sen., Robert Eerlandson, and C. Brent. The following is the eleventh annual report of the Directors:

The Directors of the Port Hope Gaslight Company beg to report that the past year has been a successful one; and in carrying out the policy adopted some time ago, to pay off the Bonds of the Company, they are happy to state, that at the present time but three of them remain unpaid, amounting to twelve hundred dollars, and they hope that in the course of a few months these also will be paid off, leaving the Company entirely free from debt, and allowing the profits to be paid in dividends to the Shareholders.

During the past year, the net amount received for gas, after paying all the expenses of manufacture and management, including two hundred dollars for new retorts, is about nineteen hundred dollars,

In addition to paying off two of the Bonds, there has been expended during the past year four hundred and twenty seven dollars for extensions.

For a fuller statement of the Finances of the Company, we would refer you to the Financial Report of the Manager.

Your Directors would respectfully submit that it is desirable that no further extensions be made, until not only the Bonds be paid off, but five per cent. be paid as a dividend on the Capital Stock of the Company. After that, all the proceeds with propriety may be expended on such extensions as would yield a reasonable return in revenue.

All the works are in good order, and in consequence of the increased consumption of gas, and the prospect of the Bonds being speedily paid off, your Directors are of the opinion that the Company is in a better position than ever before. All of which is respectfully submitted.

William Craig, President.

Insurance.

Fire Record.—Brockville, June 12.—A telegram states the loss on Messrs. Borst, Holliday & Co.'s old distillery at $50,000, and fully insured. The following are a portion of the insurances on the building:—London Assurance Corporation, $2,500; North British and Mercantile, 2,500; Lancashire, 1,500.- Total, $6,500. The machinery and fixtures were insured for the following amounts:—London, $2,500; Royal, $5,000; North British, etc., $3,000; Queen, $5,000; Lancashire, $5,000; Provincial, $2,500.—Total, $25,500. The stock was also covered to the same amount.

Magog, Eastern Townships, June 8.—The store owned by J. Webster and occupied by Webster & Willey, was burned with nearly all the contents. There has been no fire in the building for some weeks, and how it took, is a mystery. Loss in goods estimated at $3,000, and building $500 or $600. Insured on goods for $2,000 and on building $300 in Sherbrooke Mutual.

Barton Township, Ont., June 12.—Barn of Rev. G. A. Bull, was destroyed. The horses and carriages were got out and most of the things were saved. Loss about $400, insured for $100 in the Victoria Mutual.

Quebec, June 6.—Church of the Sisters of Charity caught fire from a suspended lamp. Loss about $10,000. Insured in the Quebec Fire Insurance Co., for $20,000.

Bronte, Ont., June 9.—House of Mr. Tolmie, with most of the furniture; said to be insured for $500.

—A new company is starting business in the State of New York—to be called the Merchants and Farmers' Life—which will receive its premiums weekly, on what is called, in England, the industrial plan, not heretofore tried on this continent.

Amalgamation of Insurance Companies.—The act for the union of the Beaver Mutual and the Toronto Mutual Insurance Companies provides that the name of the united companies shall be "The Beaver and Toronto Mutual Fire Insurance Company." The Board of Management of the Beaver Mutual become the Board of the united company, the Board of the other company ceasing to exist. The united company may take up the guaranteed stock of the two companies and may issue new stock therefor. The business may be divided into three branches, the Farmers' Branch, the Household Branch, and the Mercantile Branch.

Arson.—Some interesting disclosures have been made in reference to the Clifford Fire at St. Catharines. Clifford's wife has informed against her father-in-law and his daughter, charging them as accessories to the arson. She explained the whole infamous plot, stating that it had been planned sometime previously, and that the Clifords, father and son, had arranged the combustible material in the manner in which they were found. The information states that Mrs. Clifford herself applied the torch. Owen Clifford and daughter were immediately arrested.

ACT RESPECTING INVESTIGATIONS IN SHIPWRECKS, &c.

The Hon. Mr. Mitchell's Bill is substantially as follows:

1. Whenever any ship is lost, abandoned, or materially damaged on or near the coast of Canada, or any island or place adjacent thereto, or whenever any ship causes loss or material damage to any other ship on or near such coasts, island or place; whenever by reason of any casualty happening to or on board of any ship on or near such coasts, island or place, loss of life ensues; whenever any such loss, abandonment, damage or casualty happens elsewhere, and any competent witnesses thereof arrive or are found at any port in Canada; the principal officer of Customs residing at or near the place where such loss, abandonment, damage or casualty occurred, if the same occurred on or near the coasts of Canada, or any island or place adjacent thereto, but if elsewhere at or near the place where such witnesses as aforesaid arrive, or are found, or can be conveniently examined, or any other person appointed for the purpose by the Minister of Marine and Fisheries may make enquiry respecting such loss, abandonment, damage or casualty.

2. Such officer or person as aforesaid shall have the following powers: He may go on board of such ship, and may inspect the same or any part thereof, or any of the machinery, boats, equipments or articles on board thereof, the boarding or inspection of which appears to him to be requisite for the purpose of the enquiry he is required to do, not unnecessarily detaining any such ship when proceeding on any voyage. He may enter

inspect any such premises, the entry and inspection of which appears to him to be requisite for the purpose of the enquiry he is to make. He may, by summons under his hand, require the attendance of all such persons as he thinks fit to call before him and examine for such purpose, and may require answers or returns to any inquiries he thinks fit to make. He may require and enforce the production of all books, papers or documents which he considers important for such purpose. He may administer oaths, or may, in lieu of requiring or administering an oath, require every person examined by him to make and subscribe a solemn affirmation or declaration of the truth of the statement made by him in his examination.

Upon the conclusion of such enquiry the officer or person who made the same shall send to the Minister of Marine and Fisheries a full statement of the case, and of his opinion thereon, and such observations, if any, as he may think fit.

If it appears to the Governor, either upon or without such preliminary inquiry as aforesaid, or in any case of a charge of misconduct or incapacity brought by any person against any master or mate of any ship, that a formal investigation is requisite, the Governor may appoint any competent person or persons to be a court or tribunal for the purpose of such investigation. Such tribunal shall have the power of summoning before them any persons, and of requiring them to give evidence on oath, orally or in writing (or on solemn affirmation, if they be parties entitled to affirm in civil matters), and to produce such documents and things as such court or tribunal may deem requisite to the full investigation of the matters into which they are appointed to examine; and such court or tribunal shall have the same power to enforce the attendance of witnesses and to compel them to give evidence, as is vested in any Court of Law in civil cases; and any wilfully false statement made by any such witness on oath or solemn affirmation, shall be a misdemeanor punishable in the same manner as wilful and corrupt perjury; but no such witness shall be compelled to answer any question by his answer to which he might render himself liable to a criminal prosecution; and the proceedings of such court shall be assimilated as far as possible to those of ordinary Courts of Justice, with the like publicity.

And whereas it is enacted by Section 242 of Imp. Act, 17 and 18 V., c. 104 intituled, "An Act to amend and consolidate the Acts relating to Merchant Shipping," that the Board of Trade may suspend or cancel the certificate (whether of competency or service) of any master or mate of the Merchant Service, in certain cases, one of which cases, set forth in sub-section five of the said section, is as follows,—"If upon any investigation made by any court or tribunal authorised or hereafter to be authorised by the legislative authority of any British possession, to make inquiry into charges of incompetency or misconduct on the part of masters or mates of ships, or as to shipwrecks or other casualties affecting ships, a report is made by such court or tribunal to the effect that he has been guilty of any gross act of misconduct, drunkenness or tyranny, or that the loss or abandonment of, or serious damage to any ship, or loss of life, has been caused by his wrongful act or default, and such report is confirmed by the Governor or person administering the government of such possession;" and whereas it is further in effect enacted by Section 23 of Imp. Act 75 and 76 V., c. 63, that the power of cancelling or suspending the certificate of a master or mate conferred by the above cited 242nd section on the Board of Trade, shall in future vest in and be exercised by the court or tribunal by which the case is investigated or tried: Be it hereby further enacted that such court or tribunal authorised to be appointed by this Act, shall be held to be in all respects a court or tribunal under the hereinbefore cited sub-section of the Imperial Act.

Upon the conclusion of such investigation, the tribunal shall send to the Governor a full report upon the case, together with the evidence, and their judgment thereon, and such observations if any, as the court or tribunal may think fit to make, and shall state in open court the decision to which they have come with respect to any recommendation to cancel or suspend any certificate, or to cancelling or suspending any certificate.

Any such court or tribunal may, if they think proper, require any master or mate possessing a certificate of competency or service, whose conduct is called in question, or appears to them to be likely to be called in question in the course of any investigation before them, to deliver such certificate to them, and they shall hold the certificate so delivered until the conclusion of the investigation, and shall then either return the same to such master or mate, or, if their report is to the effect that they have cancelled or suspended a certificate, or is such as to enable the Board of Trade to cancel or suspend such certificate, shall forward the same to the Governor; and if any master or mate fails so to deliver his certificate when so required, he shall incur a penalty not exceeding *two hundred dollars*.

The Governor in Council may from time to time by warrant, order and direct that any expenses incurred, or to be incurred under the provisions of this Act be defrayed out of any moneys appropriated by Parliament for that purpose, or for the purpose of defraying unforeseen expenses.

Nothing in this Act contained shall be taken to affect in any way the jurisdiction of any Vice Admiralty Court in Canada, however the same may be acquired.

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

Business has been rather more active this week, especially in mortgages and Building Society stocks, the latter in particular being a favorite investment.

Bank Stock.—There are sellers of Montreal at 161½, 161, 160 and 159½, and there are buyers at the latter rate. No British in market. There were considerable sales of Ontario during the week at 94½, 95 and 95½; there are buyers at the latter rate. A large sale of Toronto took place at 122, and there are still buyers at that rate, transfer books closed. Buyers offer 45 for Royal Canadian, holders not disposed to sell at that rate. Small sales of Commerce were made at 104; little offering; transfer books closed. Gore is enquired for at 35, but no sellers under 36½. There were sales of Merchants at 111, 111½ and 112; still procurable at the latter rate. Par is offered for Quebec, none in market. Molson's sold at 108½, sellers now asking 109. Transactions in City occurred at 97¾ to 98, no sellers now under 99. Buyers offer 108 for Du Peuple, with sellers at 108½. Nationale is wanted at 107. For Jacques Cartier 105½ is offered, sellers asking an advance of one per cent. There were sales of Mechanics at 92 and 92½, it is still offering at that rate. No Union offering, 107 would be paid.

Debentures.—Canada sterling six per cents are offering at 104½. Sterling fives at 91, and Dominion stock at 108. There were large sales of Toronto at rates to pay 7 per cent interest. Some first class County are offering at high rates, but purchasers are unwilling to advance.

Sundries.—There are buyers of City Gas at 106½, little doing. Several sales of Canada Permanent Building Society were made at 125½ and 126, closing firm and in demand at the latter rate. Large sales of Western Canada were made at 121 and 121½; closed firm at the latter rate. Freehold Building Society has advanced since our last report to 115, at which rate there were buyers, but no sellers. Montreal Telegraph sold at 134½ and 135¼, sellers now asking 136. British America Assurance nominal at quotations. Little doing in Canada Landed Credit. Mortgages are more numerous than usual, several large ones have been placed at 8 per cent.

STOCK SALE IN HALIFAX.—At W. M. Gray's stock sale on the 4th June, by J. D. Nash, the following prices were realized: 10 shares, Union Bank, $54,50; 50 Peoples Bank, $26.75; 2 Bank of Nova Scotia, £68 5s.; shares in Bank B. N. A., £68; Casco Bay Copper Mining Co., 62½c.; 8 Union Marine Insurance; 12 do. £19 3s. 9d.; 2 Temperance Hall, £3 2s. 6d.

—At a meeting of the Board of Directors of the Bank of North America, held in New York city, on June 5th, Mr. Henry A. Kent was elected Vice-President of the Bank, in place of Mr. Charles M. Connolly, deceased.

—Mr. J. L. Beaudry, the President of the Jacques Cartier Bank, has resigned, and his resignation has been accepted.

—The annual meeting of the St. Catharines and Welland Gaslight Company is called for the 13th July.

Railway News.

GREAT WESTERN RAILWAY.—Traffic for week ending May 28, 1869.

Passengers	$31,349 13
Freight	36,799 27
Mails and Sundries	2,442 36
Total Receipts for week	$70,590 76
Coresponding week, 1868	63,978 34
Increase	$6,612 42

NORTHERN RAILWAY.—Traffic receipts for week ending June 5th, 1869.

Passengers	$3,461 87
Freight and live stock	14,492 81
Mails and sundries	679 04
	$18,633 72
Corresponding Week of '68.	15,187 63
Increase	$3,446 09

EUROPEAN AND NORTH AMERICAN RAILWAY.—The Traffic Receipts on the Railway for the month of May, 1869, compared with the corresponding month last year are as follows:—

	1869.	1868.
Passengers	$7,029 71	$5,830 82
Freight	9,559 51	8,504 72
Mails and Sundries	621 51	411 00
Totals	$17.190 73	$14,746 55
Increase	2,444 17	

—The Sherbrooke, Eastern Townships & Kennebec Railway Company was organized by the election of J. G. Robertson, Esq., President; R. D. Morkill, Esq., Vice-President. The Directors named in the charter are, Messrs. Galt, Brydges, Robertson, G. F. Bowen, Borlase, Morkill, Evans, Addie, Brodeur, and H. Caumrand. The Secretary is not yet appointed.

—The first sod of section five of the Intercolonial Railway was turned at Kamouski, on the 24th May, with great ceremony.

The Municipal Council of the township of Stoke has passed a By-Law authorizing the Mayor to subscribe for $15,000 stock in the Sherbrooke, E. Townships and Kennebec Railway. The meeting to obtain the sanction of the ratepayers is to be held on the 12th July next.

— We learn that 300 men, divided into 7 gangs, are engaged on the 24 mile section of the Intercolonial Railway between Campbellton and Eel River—Messrs Grant and Elliott's section. On the 24 mile section of J. Robin & Co., extending from Eel River to near Jacquet River, 100 are employed. The former are chiefly Irish just from Newfoundland, and the latter principally French Canadians.

THE CITIZENS' INSURANCE COMPANY
OF CANADA.

THIS Company formed by the association of nearly 100 of the wealthiest citizens of Montreal is prepared to transact every description of LIFE ASSURANCE; also, to grant Bonds of FIDELITY GUARANTEE, for Employees holding positions of trust.

Applications can be made through any of the Company's Agents, or direct to

EDWARD RAWLINGS, Manager.

Agent for Toronto: W. T. MASON | Agent for Hamilton: R. BENNER.

THE CANADIAN MONETARY TIMES AND INSURANCE CHRONICLE *is printed every Thursday evening and distributed to Subscribers on the following morning.*

Publishing office, No. 60 Church-street, 3 doors north of Court-street.

Subscription price—

Canada $2.00 *per annum.*

England, stg. 10*s. per annum.*

United States (U.S.Cy.) $3.00 *per annum.*

Casual advertisements will be charged at the rate of ten cents per line, each insertion.

Address all letters to "THE MONETARY TIMES."

Cheques, money orders, &c. should be made payable to J. M. TROUT, *Business Manager, who alone is authorized to issue receipts for money.*

☞ *All Canadian Subscribers to* THE MONETARY TIMES *will receive* THE REAL ESTATE JOURNAL *without further charge.*

The Canadian Monetary Times.

THURSDAY, JUNE 17, 1869.

THE CANADIAN CANALS.

NO. IV.

Hitherto the functions of the Canadian Canals have been but imperfectly argued, because much of the result to be attained has been a matter of theory. Indeed the basis of argument has been incomplete, from the confined character of our knowledge. Within the last few days the want has been supplied; and in place of venturing on conclusions from what is unknown and untried, we have the solid hypothesis of what has been effected. We have facts to guide us. Between Chicago and Montreal the route is known, for it has long been established. The limit of vessels navigating this distance, both as regards burden and time, is admitted beyond dispute. Thus, the question of what can be effected in this limit is not even raised. The moment, however, we propose to pass Montreal, we meet contradictory opinions. While experienced mariners of the lake and river navigation have argued that vessels should pass from Chicago to the Atlantic; that with the navigation developed to its maximum, a class of vessels would come into use fitted satisfactorily to serve the trade; the contrary view has been urged—and it is especially in favor in Montreal—that ocean going vessels are unfitted for river navigation. And the formula thus roughly couched, is confidently adduced as a sound reason why the depth of the Canals should remain unaltered. Consequently all improvements of locks is conceived in the direction of width and length, so as to admit of large river going vessels which are to discharge their cargo at the Montreal wharves, or to transfer it to one of the Allan steamers. It can easily be seen how the argument, if such it can be called, becomes interminable, and that assertion on either side is the great weapon of controversy according to the temper of the disputant. These days are now passed away for ever. We have the known experience of the propeller "Her Majesty," which returned from Halifax to Montreal harbor the last day of May.

We are now able to prove every anticipated result, and that which until now has been supposition, becomes positive. Accordingly we may say that a propeller on lake Erie in front of Buffalo harbor, is much nearer to New York in time and that its cargo, can be delivered at less cost, if the vessel continue its route by the Saint Lawrence, and pass by the gulf to Halfax and so to New York, than if it proceeded to Buffalo to one of the basins of the Erie Canal and transferred its cargo to barges, navigating that canal, and so follow its line to Albany, to be towed up to New York by the steam tugs of the Hudson. The time necessary for the trip may be set down at 13 days.

Proceeding to wharf and transfer of cargo,	1 day
Passage through the Erie Canal,	11 "
Proceeding to New York,	1 "
	13 "

Such may be taken as the average result established in practice. Equally, we have now the opposite condition satisfied, and the proof has been made by the last trip of "Her Majesty." The distances are as follows:—

From Montreal to Quebec,	180 miles.
" Quebec to Pictou,	500 "
" Picton to Halifax,	210 "
Total from Montreal to Halifax,	890 "

This distance was easily made by "Her Majesty" in six days, and such is the time counted upon and estimated as the basis, on which the arrangement of her trips is determined. She loads in Montreal with sufficient coals to carry her to Pictou, a voyage of four days—680 miles. Here she remains some 20 hours, and receives an additional supply to carry her to Halifax and back. Thence she takes one day to proceed to Halifax. On her return, this vessel again loads up at Pictou with coal, and if her cargo is entirely of coal, for it is here that the mines are situate, and coal is sold at $2 a ton, she retains enough to carry her back there. This place, indeed, is the coal depôt, and will ever be so on this route, and the importance of the fact is great. Vessels leaving for England, if ever such pass by the St. Lawrence, from Chicago, would take in a supply at some station on the Gulf laid down by tenders from Pictou. Why not make such vessels the means of supplying the wants of Gaspé? There, such a depôt could be economically established, and the circumstance of calling with regularity would ensure a moderate degree of freight, and give a great impetus to the district. But for vessels going from the West to Boston or New York, Pictou lies directly on the route, and furnishes at once a magazine, where fuel not only can be cheaply bought, but where it can be more cheaply obtained than elsewhere. Accordingly, so far as fuel is considered, it would be the starting point, whence the propeller would base its supply, taking in sufficient to proceed to New York, and return; or, on the other hand, sufficient to proceed to Toronto or Chicago, and return, as the case might be. Consequently, on the examination of this view, we at once get rid of all thought of fuel, simply stating that it can be more readily and economically obtained than on any other route.

It is proved that a vessel can reach Halifax from Montreal in six days, and it follows that a vessel going to Halifax can go anywhere else.

From Halifax to Boston, the distance is about 380 miles, which can be made in less than two days.

From Halifax to New York, by Cape Sable and passing within Long Island, the distance is about 625 miles, and it can be made in about three days.

Thus we have the trip from Montreal to Boston, including loading with fuel at Pictou, determined to be a matter of eight days.

The same trip from Montreal to Halifax and thence to New York, will not exceed 9 days.

To each of these periods must be added the time necessary to descend from the foot of Lake Erie to Montreal, a matter of 6 hours; that is, passing through all the Canals is equal to 2½ days.

Consequently, while we have a cargo of wheat transhipped at Buffalo, passing by the Erie Canal to New York, taking 13 days to arrive there.

We have by the St. Lawrence route the same result, much more economically effected—that is, of course, arguing on the base that the canals be deepened, and the navigation made a unity—in the space of 11½ days, and with a different class of propeller, enlarged to meet the altered navigation, the saving of many hours would, doubtless, be effected.

From Chicago to Montreal and back, the round trip is now made on an average in 18 days. From Chicago to Montreal, the descent, however, has taken even so short a period as 7 days. We may accordingly, with propriety, count on 8 days as a fair average; therefore, a cargo from Chicago would be delivered in New York in 17 days. Incident to the route is the cheapness of fuel as we have pointed out. In point of navigation there are no difficulties in the gulf or sea-board, specially to be considered. Generally it is well lighted. But there is one marked deficiency in this defect, to which we earnestly call the attention of the Executive. A light is needed in Northumberland Straits on the east coast of New Brunswick on Cape Tormentine, and if steps are not taken to supply this defect, we fear that some day a great disaster will notify the world of its necessity. We ask those who are in authority to place the map before them, and to consider what we are writing. They there can note that vessels going to the north-west are liable to run on the bad shore, the north shoals of Bay Verte. The call for this light will, we venture to say, be clearly seen, and with this addition there is nothing, we have been given to understand, to be desired.

In the foregoing few lines we have to our minds a convincing proof of the extent of commerce to which the St. Lawrence may aspire. As plainly as a truth can be set forth, it is evident that it is an outlet for the West preferable to any other, and that it opens out opportunities of trade not yet attempted. It is held back simply by the reason of an insufficient navigation. However, opinions may differ as to the extent, it is admitted, that the present navigation can be greatly improved. It is not asserted, at least anywhere that we have seen, that it is incapable of further improvement. Then if the present limit can be extended, the question is, how and how much it can be increased? Some special cases are named of what are held to be permanent obstructions, which cannot be overcome, except at fabulous expense, such as the entrance at Lachine to the canal, the entrance to the upper lock at the Beauharnois Canal from Lake St. Francis, a spot at the Galops' Rapids, and some other questionable shoal by one of the Williamsburgh Canals. But all these difficulties disappear when they are faced. For instance, at Lachine, if it be found that the bottom cannot be removed the construction of a lock, with a prolongation of the basin wall to it, will certainly be sufficient enough. But these special criticisms are beside the question. The point to be kept in view is, what is the maximum depth which can be attained in the St. Lawrence, between Chicago and Montreal harbor; how can it be attained and what will it cost. If we have this query satisfactorily answered, we have the opposite side very clearly before us. Given the satisfactory condition of the navigation of the great river, a unity, a known and acknowledged route; we have as a consequence, that it will immediately receive the whole commerce of the great West, and yet the politicians of the hour have not a thought on the subject. We hope soon to see what impetus public opinion will give to this inexplicable indifference.

THE ETNA OF DUBLIN.

We pointed out when the stock deposit of this company with government was seized by the Sheriff of Carleton, that it was within the power of government to prevent the judgment creditor obtaining an undue preference over the other creditors, under the forfeiture clause of the old insurance act. Subsequently, the Finance Minister with the object of securing the interests of all the policy holders declared the deposit forfeit. The deposit consisted of $10,000 consolidated Stock of the Province of Canada, and stood in the name of Baring & Glyn and of one of the Directors of the Etna. After instructions were given for the sale of the stock, it it was found that the Director had become an insolvent, and it was necessary to get a decree in Chancery to compel him to join Baring & Glyn in the sale, hence the delay.

It seems that the Finance Minister has determined not to proceed with his resolutions respecting Banking and Currency. It would have been the height of folly to legislate directly in the teeth of the firmly expressed wishes of the Province of Ontario, on a matter of such vital importance to its commercial interests, and we commend the discretion of the government in accepting the advice of its friends and bowing to public opinion. The resolutions referred to provoked almost unanimous opposition on the part of the largest and wealthiest Province of the Dominion. The opposition was not the result of party. Some of the best friends of the government were loudest in their condemnation of what all the business men of Ontario, and the bankers of Quebec, St. John and Halifax, considered a scheme fraught with the most injurious consequences. Our Boards of Trade petitioned against it; our most prominent merchants petitioned against it; and our banks, with a few interested exceptions, also recorded their protest. Such unanimity of sentiment produced its natural effect. The Finance Minister, doubtless, saw clearly that he could not hope to carry a measure which was so determinedly opposed, and submitted with the best grace to necessity. The greater number of bank charters expire in June, 1870, and some four or five in January, 1870. The government proposition is to extend those requiring extension, until the end of next session of Parliament, and then deal with all on the same footing. Meantime, it would be well for all parties to consider whether the time has not arrived for the repeal of the Dominion Note Act, as it has, according to law, fulfilled its alleged mission. It should now be dispensed with.

Victoria Mutual Insurance Company.—The annual report of this Company shows that the number of policies now in force is 6,581, covering risks to the amount of $4,576,885, an increase in policies over last year of 1,792. and in the amount of risks, $1,157,164. In the beginning of the previous year arrangements were made for the establishment of a branch for the insurance, at low rates, of property lying within the water limits of the city of Hamilton. This move so far has been attended with success, inasmuch as not a single loss has occurred in the Hamilton branch, with 218 policies out, covering property to a value of $187,324.

The Directors enter at length into a discussion of Premium Notes *versus* Cash Receipts and express their determination to adhere to the notes instead of cutting loose from the mutual system and taking cash only. This latter method of doing business is tolerably safe *in good hands*, but is liable to great abuse. When it is adopted some other form of security ought to be substituted for the Notes. We are not by any means in love with premium notes, but as they seem to be the kind of security contemplated by the Legislature they ought to be retained, or a guarantee to the public given in some other shape.

The Victoria is, without doubt, making steady progress and increasing in public confidence.

Report of the Chief Commissioner of Mines for Nova Scotia.—We have been favored with a copy of the official report for the 15 months ended 31st December, 1868. The Commissioner's statement is very full, and will be welcomed by all interested in the Nova Scotia mines. The principal facts respecting gold mining, embraced in the report, have been in the hands of the readers of The Monetary Times for some weeks. We, however, append a brief summary:

In the 15 months, some 40,000 tons of quartz was crushed, yielding 28,342 ounces of gold, which, at $18.50 per oz., shows a value of $505,327—or $12.50 to the ton of quartz. About 800 men and 40 to 45 crushers, on an average, were employed. The average yield per man for the

last 12 months was about $490.34. Of coal, the total quantity raised and sold for the year ended Dec. 31, '68, was 453,617 tons—of which all except about 40,000 tons was "round." Of the total, 117,624 tons went into home consumption, 102,761 tons were exported to neighboring Colonies, and 233,178 tons shipped to other countries, principally to the States. 2,639 men and boys were employed in the coal mines, and 69 engines of 2,382 horse power.

THE LIABILITY OF DIRECTORS.

In a previous article on the rights and liabilities of Directors we referred at length to the case of Turquand *vs.* Marshall, then recently decided by the Master of the Rolls. We chose that case, not only as being the most recent decision, but because in the arguments and judgment almost every leading case on the subject had been cited and commented on. It will be seen from the report which we abstract below, both of the case and the judgment, that on appeal to the Lord Chancellor, the rules of law which were enunciated by Lord Romily in his judgment, have been affirmed to their fullest extent, but the Lord Chancellor decided against the form of the application, and limited the time and mode within and by which shareholders can recover against negligent or fraudulent Directors.

This was an appeal from a decree of the Master of the Rolls. The suit was instituted by Mr. W. Turquand, the official liquidator of the Hereford-shire Banking Company, and it sought to render certain of the directors liable for various acts and defaults in the management of the company's affairs. The acts complained of commenced in 1846, from which time down to the termination of the business of the company, it was alleged, the directors annually presented to the shareholders false reports of the progress and proceedings of the company, and false balance-sheets, and recommended the declaration of dividends upon repeated false statements that profits had been earned; that they had failed to dissolve the company under the 108th clause of the deed of settlement: the whole of the surplus fund and one-fourth of the paid-up capital having, to the knowledge of the directors, been lost in 1846; and that one of the directors was improperly allowed to overdraw his account without the sanction of any resolution of the board. It was held in the court below that the directors were liable for all loss occasioned by continuing the business of the bank after the surplus fund and one-fourth of the capital had been lost; that in the absence of the shareholders who had received the dividends, and who therefore could not be compelled to refund them, the directors could not be compelled to repay the dividends paid out of the capital; that they were liable for loss occasioned by the allowing the directors to overdraw their accounts; but that they could not, in this suit, be fixed with liability for issuing false reports or balance sheets, the damage thereby done being caused to the shareholders individually and not to the company in its corporate character.

The Lord Chancellor said that, after looking carefully through the evidence, he entirely concurred with the opinion of the Master of the Rolls, that the managing directors were aware of the inaccuracy of the accounts, and that the other directors, who might not have examined the books, must be taken to be liable to all the consequences. The case alleged, however, was simply that the directors gave a favorable aspect to matters which they ought not to have done, but not that they obtained any advantage by so doing. This might or might not have injured any particular shareholder, and would require investigation into each particular case, but the extent of the injury was a matter which that court could never satisfactorily ascertain. It could not be the subject of a suit of this nature in which the court had only to consider whether the directors, in their character of directors, or quasi trustees, had committed breaches of trust against the shareholders which had injured the whole body alike. With regard to the non-stoppage of the company after the exhaustion of the surplus fund and one-fourth of the capital, the proceedings of the shareholders, in agreeing to receive dividends, fixed them with a knowledge of the fact. He had no difficulty in treating the directors as trustees in respect to the assets submitted to their charge, and with regard to those assets they must account. Under all the circumstances, his lordship thought the suit was not one in which it was possible for that court to give relief; but he would mark his opinion of the conduct of the directors by dismissing the bill and the appeal without costs.

MADOC GOLD DISTRICT.

(From our own Correspondent.)

BELLEVILLE, June 14th, 1869.

After a long interval of dormancy, interspersed with fleeting periods of spasmodic excitement, a few symptoms of returning activity are beginning to appear in the mining region of Hastings. It may be expected that whatever is done hereafter will be upon a surer and sounder footing than the rash and ill-considered enterprises which have resulted so unfortunately for their promoters. Many of those undertakings were based upon nothing more substantial than the *ipse dixits* of a few pretenders to practical skill or scientific knowledge, whose ability was unequal to the tasks they set themselves to perform; or whose honesty was like that of the celebrated Dr. Dousterswivel, in Sir Walter Scott's admirable tale of "The Antiquary," a tale which all who intend to go into mining should read before selecting their assayer or their operator. Another obstacle to the substantial development of the really valuable mineral deposits which exist in this district, arises from the multiplicity of cross titles and conflicting claims that encumber almost every lot or portion of a lot of land which promises to afford remuneration to the miner. These encumbrances have, for the most part, originated in the cupidity of speculators, and the simplicity of the farmers, mostly ignorant men, who granted long leases for hypothetical considerations, or made time bargains, *allowing the lessees to draw their own agreements*, and when the periods had elapsed for which they considered themselves bound, made new agreements with other persons, who when they attempt to develop what they consider they are the indisputed owners of, find themselves entangled into law suits, from which they can only be released by the tedious and expensive process of the Chancery Court. To such an extent has this practice prevailed, that I myself know several instances where responsible persons have been for some time, and still are ready to invest capital to a large amount, if they could be assured that the title of the property they propose to purchase is sound, and that they are not likely to be involved in legal proceedings. One of the best mines in the district, the ore of which has stood the test of repeated assays, yielding gold, silver and copper, to the amount of $300 to $500 per ton concentrated, is claimed by no less than four several parties, and is besides now in Chancery. If our Legislature is too timid or too supine to deal with these pseudo claims, by enacting that all time-bargains for mining rights which shall have lapsed, or which shall hereafter lapse, by reason of non-fulfilment of their respective conditions, shall become void and of none effect from the passing of such Act, or from the termination of the period over which they extend respectively, notwithstanding any omission or informality in the instruments by which they are evidenced and sustained; it would surely be better for the holders of such documents to agree among themselves to sell the properties in dispute, join in the conveyance to the purchasers, and divide the proceeds in a rateable proportion. If this course could be pursued in a few instances, several good mines might be brought into profitable operation before the close of the year.

The Merchants' Union Company, finding the machinery purchased by them from Mr. Daniels too small, and otherwise unsuited for the reduction of their ore, have advertised the mill for sale, intending to apply the proceeds to a more searching investigation into the worth of their mine. The vein looks well, and has given some fair and some inferior assays, but will require the working of a few tons to determine its real value; for which purpose the present time affords a favorable opportunity, as none of the mills are running upon their own ores.

It is pleasant to turn from the contemplation of these disasters and disappointments to an example of a more cheering tendency. The Mallorytown Company have got their mill (10 stamps) into working order, and have made two crushings. The first of 20 tons, 16 tons of surface rock, and 4 tons from the body of the vein, produced 8 ounces of gold of good standard. The second, four day's work with nine stamps running (I have not learned the exact quantity of ore crushed, but suppose from 25 to 30 tons) yielded 13 ounces; which fully bears out the assays on the faith of which the enterprise was undertaken.

I fully believe that, with similar good management, equal success may be had in this region; as a gentleman on whose judgment and veracity I can rely, informed me lately that he had visited some of the veins discovered last summer in the Township of Marmora, that he crushed and panned out some of the rock, and washed over some of the super-incumbent soil, and saw more gold than he had seen before in all his mining experience—and he was one of our earliest and most active prospectors. He also reports favorably on some of the veins in the vicinity of Bannockburn, Township of Madoc.

[We understand that the preliminary assays of the Mallorytown mine were made by Prof. Bell, of Albert College, Belleville.—ED.]

WHAT BECOMES OF THE PRECIOUS METALS.

The product of the precious metals throughout the world in 1853 (estimate of the Commissioner from California to the Paris Exposition) was $156,000,000 gold and $37,000,000 silver, or a total of $193,000,000. Of this total, $61,000,000 is credited to the United States, and $60,000,000 to Australia, the remaining $72,000,000 being apportioned to Europe, Asia, Africa, South America, Mexico, Russia and Siberia. According to the same authority, the aggregate for 1867 was $184,500,000, of which $130,680,000 was gold and $53,820,000 silver. Of this, the United States is credited with $87,000,000, viz: $56,000,000 in gold and $16,000,000 in silver. Thus while the product of the precious metals in the United States increased $11,000,000 in 14 years, according to this authority, the yield of Australia, the next largest producer, fell off about $29,000,000, and nearly all other foreign sources show more or less decrease. It is not probable that the limit of production of gold and silver in the United States will be reached during the present generation. The mines of California, Nevada, Washington, Idaho, Montana, Arizona, New Mexico, Colorado and Utah, are the strongholds of innumerable millions of precious metals, and to adopt the metaphor of the Executive in his inaugural, the Pacific and lateral railroads constitute the key that is being forged to release this treasure.

The answer to the question that is often propounded, as to what becomes of all the gold and

ilver, is found in recent statistics, showing that Asia has drawn from Europe and America the enormous aggregate of $650,000,000 in 14 years. This drain to the east has been going on from a period "whereof the memory of man runneth not to the contrary," and the curious feature of it is, it never returns. That the absorption of the thousands of millions of gold and silver by this Oriental maelstrom has been a leading cause of the convulsions to which the money markets of the world, (and especially that of England,) have been subjected, during the last half century, there would seem no reason to doubt. The necessity of checking this drain of the precious metals from the western world has long been felt, but all efforts that have been made to this end have been without satisfactory results. But a breach has at length been made in the barriers to freer commercial intercourse with China and Japan, and it is possible if not probable, that American and European trade with those countries will ere long be so enlarged and extended as to bring about a greater equalization of the exchanges, and thus greatly lessen, if not put a stop to the specie current to the east.

The following statistics of the export of silver from England to India, China, and the Straits, are of interest in this connection :

Year.	India.	China.	Straits.	Total.
1862.....	£6,890,810	£2,530,633	£639,987	£10,091,460
1863.....	5,971,632	1,935,909	295,470	8,263,011
1864.....	5,003,291	891,338	354,375	6,254,004
1865.....	2,738,762	560,026	299,270	3,598,058
1866.....	2,009,580	303,198	52,850	2,365,626
1867.....	370,231	265,766	6,915	642,912
1868	1,000,635	474,945	160,062	1,635,642
1869(to date)	548,800	85,211	nil.	634,011

It will be seen that there has been a marked decrease in the drain from England, but this is more apparent than real, and arises from the fact that the route to the east has been changed from the Peninsular and Oriental to the California and China steam line, the exports of silver from San Francisco to the east being nearly in the same proportion as the decrease indicated by the foregoing figures. Thus the exports of treasure from San Francisco to England fell from $34,436,423 in 1864, to $5,312,979 in 1868, while, from the same port to China, they increased from $2,660,754 in 1862, to $9,081,504 in 1867, though last year they fell to $6,193,995.

In the competition for the trade of the Orient, the United States has the advantage in steam communication ; in addition to which, the Pacific Railroad will contribute greatly in bringing the trade with China to and across the American continent, and in enlarging her commerce. In fact, that country occupies the most favorable position every way, for reaching and distributing the wealth of China, and for controlling its foreign trade.

The Profits of Lead Mining.—The Leeds' *Mining Circular* thus reviews lead mining in the United Kingdom:—"We have to report a considerable renewal of activity in the lead mining districts of the United Kingdom, due partly to the improved prospects of trade, which are slowly but surely sending up the prices of this metal, and partly to the greatly improved prospects of mining enterprise in almost all the lead mining districts. Cornwall, West Chiverton, paid last year £24,000 in dividends; close upon cent. per cent., upon the paid-up capital. In the Isle of Man, Great Laxey divided £30,000 profit; being at the rate of 50 per cent. per annum on the nominal capital. In Wales, Minera paid $27,000 for the year ; being at the rate of 60 per cent. per annum on the paid up capital. The Lisburne Mines, as usual, divided their cent per cent. ; and hosts of other important lead mines, such as the Snailback, Maes-y-Safn, Pheal Mary Ann, Herodsfoot, Wheal Trelawny, Van Erfin, Cwmystwith, Mining Company of Ireland, the mines of the London Lead Company, Middle, East Darren, Mr. Beaumont's mines, and some score or so of others, have given to their fortunate owners profits averaging on the whole about 60 per cent. on the invested capital. The new mines also are in all directions turning out rich. The Van mine and the Plynlimmon mine in Wales—Which have only come into existence quite recently, and are owned by private companies —are turning out magnificent successes; the former paying, it is said, between 200 and 300 per cent. profit on the capital expended. Indeed, in every direction lead mining is asserting its traditional character of being at once the most profitable and least uncertain of any branch of British industry; which is scarcely to be wondered at when we consider that England yields from a few mountain districts annually between one and a half and two millions, in ultimate value, of lead and argentiferous lead, at a cost comparatively trifling, as lead mines are rarely very deep or very expensive to work.

The Iron Ore.—The shipment of the Marmora Iron Ore has now commenced in earnest, about 4,000 tons having already been cleared from Cobourg. Mr. Munson has already delivered to the Company about thirty of the dumping cars which he has been building, and expects to be able to deliver the remainder of the fifty, the number contracted for, during the ensuing week. The ore is now coming forward as fast as it can be shipped.

—A valuable deposit of coal has just been discovered on the side of the Norton Mountain, near Ossekeag station, on the European and North American Railway. The seam was laid bare by a land slide from the side of the hill. Arrangements are making to commence work at once.

Law Report.

Subsequent Insurance without notice.—In a case of Obermeyer vs. the Globe Mutual Insurance Co., before the Supreme Court of Missouri, it appeared that the assured having been notified that one of his policies would be cancelled at a certain time, procured another insurance of an equal amount, intending to comply literally with the terms of his contract. But it turned out that the policy was not cancelled until about a month after the last insurance had been effected, thus making an over insurance for a period terminating more than two months before the loss. It was held that this was not such a violation of the conditions as to discharge the defendants. In giving judgment the Court said :—

The general doctrine that a previous or subsequent insurance without notice, in a policy requiring such notice, and with a clause of forfeiture like that of the defendant, discharges the obligation of the company that insures, is well settled and universally recognized. That this should be the effect of the concealment is not only a part of the contract, and obligatory upon that ground, but the forfeiture is reasonable and just. The insurer can never know the full extent of his risk unless he knows everything that bears upon that risk.

But there are some apparent, though not real, exceptions to this doctrine. The contract is to be enforced according to its spirit - not its letter merely. Thus it is also well settled, though perhaps not with the same unanimity, that if the second policy, against which the contract stipulates, is itself a void one, or one that cannot be enforced, it shall not avoid the first, notwithstanding the clause of forfeiture. The construction given such covenants fully accords with their object to take away from the assured any motive to destroy his property, or to be lax in saving it.

The Supreme Court of Illinois, in N. E. F. and M. Insurance Co., vs. Shettler, 38 Ill., 166, have applied the principle to another state of facts. The plaintiff in error had insured the defendant, with a proviso in regard to other insurance similar to the one under consideration. During the year the person insured, by the written consent of plaintiff's agent, moved his store, building and goods upon another building in town. Before and after he so moved, he had three other policies upon the property, of which the plaintiff had no notice. The Court held that the policy was not forfeited, for the reason that the removal of the store rendered the other policies worthless, and though there had been an over-insurance during part of the life of the plaintiff's (?) policy, yet, when the loss occurred it was the only subsisting one, and therefore valid.

Upon the effect of over insurance, the Supreme Court of Pennsylvania uses this language : "The over-insurance was attempted to be surmounted by the alleged invalidity of the subsequent policies. We think the Court adopted the proper distinction—if they were void at the time of the loss, they constitute no obstacle ; but if avoidable only by reason of some breach of condition enabling the insurers to avoid them, but which they had waived, the over-insurance undoubtedly existed." Mitchell vs. Mutual Ins. Co., supra.

These last two cases expressly require, one by statement and the other directly, that the policies relied upon to avoid the one containing the covenant of forfeiture, should exist and be in force at the time of the loss ; and upon an examination of the numerous authorities upon the general subject, I do not find one to contradict them. In the great body of the cases, the over insurance existed when the loss occurred, and the question could not be raised.

Analogous to the forfeitures for over-insurance, are those that arise from selling the property. Such sale ends the insurance, both because the insurable interest is parted with and because it is contrary to the usual terms of the policy. And yet a sale, in the ordinary sense of the word, has not that effect. The syllabus of Trumbull v. The Portage C. M. I. Co., 12 Ohio, 305, states the recognized doctrine : "When the assured has contracted to convey the assured premises at a future day, upon payment of the purchase money, and between the date of the contract and the day of payment the premises are destroyed by fire, this is not such an alienation as would defeat the policy ; that the plaintiffs had an insurable interest and the legal title, and an equity equal to the purchase money or the whole value of the premises, and, being in possession, they might recover upon the policy." In Kane vs. Maine M. F. Ins. Co., 3 Fairfield (Maine) 44, upon a policy expressly stipulating against sale, when, during the existence of a policy, a merchant sold the goods and leased the store, both of which were insured, and in about six months, and before the fire, took back both the store and the unsold goods, it was held that the policy was not forfeited. So, in Powers vs. Ocean Ins. Co., 19 La., 28, the Supreme Court of Louisiana held that if insured property were sold, and, upon non-payment of the purchase money, were taken back, and afterwards burned, the policy was good, notwithstanding the stipulation for forfeiture, and that "there was a suspension of the risk, but the risk revived as soon as the property reverted back to the plaintiff."

Thus it is seen that the rigid rules of the English Courts, in relation to express warranties, are not applied to stipulations for notices of subsequent insurances, or to subsequent sales. They are contracts, to be enforced, like other contracts, according to their true spirit.

There is an obvious distinction between a concealment or false statement of facts existing at the commencement of the risk and a neglect of duty in regard to a matter occurring afterwards. In the one case the policy never takes effect—the risk is never assured—while in the other it is only interrupted. I cannot find that it has ever been held that a temporary non-compliance with an express warranty, of itself works a forfeiture, unless it is simultaneous with the commencement of the risk. It must have been in view of this distinction that courts have held, as before quoted, that the operation of a policy might be suspended and the risk re-attached, which could hardly be

true if it never began to run, though in N. E. F. M. Ins. Co. vs. Schetler it does not appear that it attached until after the removal of the store.

Transfer of Policies.—This suit was on a policy of insurance, issued to Margaret Mann, covering a stock of millinery grods in store. The plaintiff avers that before the expiration of the policy the defendant consented, in writing, to the transfer of the policy by Margaret Mann to him. It appeared, further, that Mrs. Mann had removed her entire stock, and that the plaintiff put in a new stock of the same description of goods. The Supreme Court of Missouri, was of opinion, upon principle that the only identity of the subject of the insurance contemplated by a time policy upon a stock of goods in a store is that that it should be a stock of the same kind of goods owned by the insured in that store; that the removal of one stock by the insured, and replacing it by another of the same kind does not change the subject of insurance within the meaning of the policy; and that when defendant consented to the assignment to the plaintiff in this case, it must be taken to have consented to his stock of millinery and fancy goods in that store being covered by the policy in the same manner and to the same extent as a like stock of goods would have been covered if there had been no assignment. Under such a policy the change of goods is expected, and even the entire change, as in the present case, is not a material circumstance for the defendant to know.

—A case of Allingham vs. The Liverpool and London and Globe Insurance Company in which it was sought to recover $800 on a mill, was lately tried in St. John, N. B., and decided in favor of the defendants. The grounds of defense were fouud and false swearing.

Commercial.

As will be seen by a report elsewhere, the Corn Exchange Association have adopted a memorial to the Dominion Parliament, asking for the imposition of a duty on flour. We do not see that the advocates of this change in our tariff make out any better ease than can easily be made out for other interests; and were the Government to grant the prayer of the petition, it would find itself committed to a protective policy which would have to be extended to a large number of articles. Our commercial position is, at present, somewhat anomalous, and the whole question is worthy of a careful review at this stage.

Delegates have been appointed by the shareholders of the Royal Canadian Bank, in several of the country towns, to attend a meeting to be held in this city on the 25th instant, as specified by an advertisement in another column.

The crops are generally reported as making good progress. The weather has, however, been too wet and cold. By the way, there are accounts of damage by grubs in some places, but we believe their devastations have, so far, been limited.

The Insolvency Bill finally passed the House of Commons on Tuesday, having received several amendments at the third reading.

The annual meeting of the Toronto and Nipissing Railway is called for the 20th of July, as advertised elsewhere, for the election of officers. The subscriptions on the stock books now amount to $174,200.

Toronto Market.

There is no improvement in the tone of business whatever. A wholesale merchant remarked to our reporter, in this way; "There are so many shaking the bankrupt law in our face that we scarcely care to do business at all, and we positively refuse to sell to any body, until we have satisfied ourselves by enquiry as to his antecedents, his financial standing, and indeed until we know all about him; it is only throwing away our goods to sell them in any other way just now. Some look for an improvement in the fall, but we are not so sure about that." We give this as an instance of the tone in which the present position of trade is discussed every day. For ourselves, we do not take so gloomy a view of the situation. Credits have been granted so recklessly in the past, that the reaction is severe and sorely trying. We feel confident that the fall business will happily disappoint very many.

Groceries.—Prices remain very steady; sugars are easier at quotations.

Produce.—*Wheat.*—Receipts 16,000 bush.; stock in store on the 14th, 75,060 bush. The market is dull and tends downward under advices of a decline in England, and continued favorable reports of the crops from all quarters. Spring is nominal, at 92c. and fall at 95c. f.o.b. *Oats.*—Receipts 1,800 bush., stock on the 14th, 17,133 bush.; market dull with sales of 1,000 bush. at 50c., and two cars at 51c on Northern Railway track. *Barley.*—No receipts nor stocks; good car lots would bring 85 to 90c. *Peas.*—No receipts, stock on the 14th, 12,764 bush.; 2 cars sold at 86c f.o.b. *Corn.*—Sellers at 60c. by the carload.

Flour.—Receipts 1,100 brls. and 1,120 last week. Stock in store on the 14th 5,587 brls. No. 1 Superfine is weak at $4, several lots sold at that price; 800 brls. of Spring wheat extra brought $4.10 f.o.b. and 100 brls. sold at $4.05 in store; a lot of choice fancy, of a particular brand, sold at Malton for $4.30. Nothing doing in other grades. *Meal* unchanged.

Provisions.—There is really nothing doing in a wholesale way. *Butter*, in the absence of demand is flat and nominal. *Eggs.*—There is a fair supply and some business doing at quotations. *Cutmeats*, nominal.

Wool.—There is an active demand for wool and the receipts were pretty good: good fleece now brings 35c. readily, being an advance of 3c. on the quotations of last week.

Hides and Skins.—The market is very dull without any decline in prices.

Freights.—There is very little doing with vessels and rates are unchanged.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Belleville to Lynn, inclusive 25c; grain, per 100 lbs., 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c, gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Protective Duties.

A petition was laid before the Corn Exchange Association of this city, on Tuesday, which sets forth that the free admission into Canada of the raw and manufactured agricultural products of the United States, is a material injury to the agricultural and milling interests of the Dominion, for which no corresponding advantage is given by the United States; and that whenever the American markets are overstocked, our markets become at once over-crowded with their surplus, and the trade is deranged, and we are made to suffer from all the evils that a fluctuating currency imposes on the people of the States; that the free admission of American products into this country, while the States have levied a duty on our products going into that country, is a sufficient proof of our desire for free commercial relations; that in the face of this action, the American Government give us no reason to expect a renewal of the treaty, and that therefore the producing and manufacturing interests of this country ought to be protected, at least, until reciprocal relations with the United States are renewed on equable terms.

A motion for the adoption of the memorial was moved by Mr. Jas. Brown, Jr., and seconded by Mr. W. H. Howland; both of these gentlemen supported the motion with a speech.

Mr. Jas. G. Worts moved an amendment seconded by Mr. Rolph, which was lost; another amendment was also moved which shared the same fate, and so the memorial was adopted.

Demerara Sugar Market.

The following is from Sandbach, Parker & Co.'s Market Report, dated Georgetown, Demerara, 8th May, 1869:—

Sugar.—Very little has been offered for sale during the past fortnight. In many districts the want of water for navigation purposes, has been the retarding cause why so little produce has been made, in others, the Canes owing to the drought are so backward, the planters preferring giving them the benefit of the coming wet season to cutting it at present; all lots have been readily taken up at full rates, and a larger business would have been done if Sugar had been more plentiful. For the first four months of this year the shipments to America were double that what they were during the same time last season; from now until October Sugars will be very scarce, and although in this Colony we have not suffered to the same extent from the absence of rain, some of the Islands, yet we estimate that with an increase acreage under cultivation, the Crop will be fully twenty-five thousand hogsheads short of last year's total.

Molasses.—There has been an active demand and full prices realized for all good samples offered. Muscovadoes of the higher grades have realized better prices than Vacuum Pan owing to the competition for the British Provinces, the inhabitants of these localities preferring Muscovado to Vacuum Pan.

Rum.—Very little doing, holders prefer shipping to accepting the rates offered here, we have not heard of a single transaction of consequence.

Sugars (package included) sold by 100 lb. Dutch, 10 per cent. tare.

Muscovadoes, equal to No. 8 Dutch Standard $4.00 ₱ 100 lbs.		In hhds. of about 1800 lbs. each
No. 10 do. $4.50	"	
" 12 do. $5.25	"	
Vacuum Pan No. 12 do.	$6.50	
" " 14 do.	7.00	
" " 16 do.	7.40	
" " 17 do.	7.60	
" " 18 do.	7.80	

Molasses (package included, sold by Imperial gallon.)—

Muscovado, from 22 @ 36 cents, as to color and density	In puncheons of 100 gals.
Vacuum Pan from 25 @ 38 cents, as to color and density	
Rum (colored, package included, sold by Imperial gal. from 35 per cent, @ 38 overproof 40 cents.	Ditto
From 38 per cent. @ 40 overproof, 45 cents.	

Halifax Market.

Breadstuffs.—June 8.—We note no change in Flours during the past week. The receipts via G. T. have been light, and stocks are considerably reduced, awaiting the arrival of the Gulf Boats. Supers continue in good demand at quotations. No. 2 are active (at high rates comparatively) without stocks. Fancy in request at quotations. Strong Bakers is much sought with light stocks.

Imports from January 1st to June 8th, 1868 and 1869:

	Bbls. Flour.	Bbls. Cornmeal
1869	68,878	13,050
1868	77,006	25,401

West India Produce.—Sugar and Molasses continue dull with feeling in favor of buyer. Transactions continue in retail way, and though no great concession has been made the tendency continues downward. Rum is in good demand with light stocks.

Exchange.—Bank Drafts, London, 60 days 9 12½ per cent. Montreal sight 3¼ per cent. St. John, N. B. 3 per cent. premium.—*R. C. Hamilton & Co.'s Circular.*

LIFE INSURANCE COMPANIES.

STATEMENTS made by Insurance Companies in terms of the Act, 31 Vic., cap. 48, submitted in accordance with the Fourteenth Section of said Act.

(a) Cause—fraud.

W. G. & B. RAILWAY.—Active operations appear to have been commenced at last on this road. Mr. Lackey, takes a contract for the grading and fencing of two miles. Mr. Reynolds has a like contract on part of the line near Guelph, the remainder of the line has been let in small contracts to parties in Fergus, Hamilton, Drayton, and Elora. The grading on the road must be completed in four months, and it is expected that the locomotives will be running in Fergus by January next. It is asserted that Messrs. Robertson and Worthington have the contract for the construction of the road to the county line of Bruce.—*Mount Forest Examiner.*

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES,"

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

FOR North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expense, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example :—

Articles.	Prices per ton.	Cash discount.
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The lat st shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

Sole Agent for Toronto,

A. S. IRVING.

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ...Ottawa.
EDWARD A. C. PEW, Esq.,... ....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company. A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon. Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

sident—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

HIS COMPANY, with machinery now in working order and in course of constructiou, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can he produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed ageut of the pany in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.

EDINBURGH LIFE ASSURANCE COMPANY

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt,

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, and any of the Agencies which have been established in the principal towns in Canada.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 75,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS,

ASSETS, $21,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $6,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $4,397,142.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $6,868,528.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,836 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
ITS LIBERALITY—It accommodates the insured by giving credit for part premium, and grants insurance to meet all the contingencies and wants to which Life Insurance is applicable.
It issues policies on a single life from $100 to $25,000.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Insurance.

Briton Medical and General Life Association,

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family*, and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

ONTARIO BANK.

Proceedings of the Twelfth Annual Meeting of the Stockholders of the Ontario Bank, held at the Banking House, Bowmanville, on Monday, the 7th day of June, 1859.

The chair was taken by the Hon. John Simpson, President, who read the following Twelfth Annual Report of the Directors to the Stockholders.

The business transactions of the Bank for the year have been large, and the profits quite equal to the average of former years; while the losses, so far as ascertained, are less than usual.

The harvest of the past year was below an average, with perhaps the single exception of wheat. The extraordinary prices realized by our agricultural community for all their productions in the past, placed them in a position of comparative ease, and in many cases of affluence; the rapid decline in the prices of breadstuffs has not therefore seriously affected their position; and having but little indebtedness, they have been able to withhold from market a large proportion of the last year's wheat crop. The effect of this is, that the decline has been felt mainly by the producers, which, but for the fact already stated, would have been borne by the produce dealer, and would have entailed upon this class of the Bank's customers serious if not embarrasing consequences.

The prospects of an abundant harvest are everywhere indicated; and when the balance of last year's crop shall be brought to market, in addition to that now on the ground, a great impetus must be given to those branches of trade and commerce which are now in a somewhat languishing condition. While shrinkage in values have been going on in most of our cereals, the timber and sawn lumber interests—in the latter of which your Bank is largely interested—are in a healthy and flourishing condition; and your Directors are happy to be able to state that the present year promises to be more profitable than the past.

The renewal of the Reciprocity Treaty, on a fair and equitable basis, we trust may be effected during the present year; when, doubtless, this and other important branches of Canadian industry will be greatly stimulated.

Your Directors may, without exceeding their legitimate sphere, refer to a few facts in connection with our manufactures and importations. Canada requires, and must seek, new outlets for many articles now manufactured in the Dominion, (if our industries are to be continued or extended.) Prominent amongst these may be placed the productions of our woolen mills, the limited demand for which has not absorbed the supply. The importations of the past two or three years have been largely in excess of the consuming capacity of the country; these over importations, and the eagerness evinced to find purchasers therefor, have induced a large number of persons to engage in mercantile pursuits, many of whom were not possessed of sufficient capital, and lacked the business training and experience so necessary in these days of keen competition, to lead them on to success. The general dullness in trade has left many with stocks of goods on hand, for which they have been unable from their own resources to pay; and being pressed for remittances, has led a great number to go into bankruptcy, as the readiest way to get rid of their financial embarrassments. Your Directors would call the attention of importers and wholesale dealers to the necessity of looking more closely into the affairs of debtors, when their estates are being disposed of, as a means of preventing fraud and over-trading. The ease with which discharges have been obtained, has induced traders and others to avail themselves of our bankrupt laws, who, with more energy and economy, might have honourably met all their engagements. It is hoped that the Bill now before Parliament will effectually check the facilities at present so readily availed of, and deter many from entering into persuits for which they have no natural or acquired ability, and in which too many are already engaged. The result of this general over-trading has led to the withdrawal of a large amount of labor from agricultural pursuits, wherein it might have been more profitably directed, for their own advantage and the general good.

All the Bank Charters expire next year, and the question of their renewal is now engaging the earnest attention of Parliament and the country. If the Government scheme becomes law, the system now in existence, which has been productive of so much benefit to the country generally and particularly to the Province of Ontaro, will be so changed as to limit to a large extent the facilities now afforded to the public.

A large number of the Stockholders of the Bank having expressed the conviction that their interests, as well as those of the public, would be better subserved by removing the Head Office to one of the large commercial centres in Ontario or Quebec, petitions have been presented to Parliament, and a Bill will be immediately introduced, asking for a renewal of the present Charter, and also authority to be given to the majority of the Stockholders present in person or by proxy, to determine whether such removal shall be made, and if so, to what point; such meeting to be called specially for that purpose.

Your Directors determined last fall to close the Hamilton Branch. This is now being done, and this office will be finally closed within a few weeks. The Cashier, Managers, and other officers of the Bank, have discharged their respective duties with zeal and ability, and are, in our opinion, entitled to your thanks. The profits of last year, after the payment of all current expenses, and making provision for interest on deposits, and discount on U. S. funds, is..... .....$221,873,90
To which add balance at credit of profit and loss from last year..... 25,240 82

$247,114 72

Which has been appropriated as follows:—

To payment of dividend, 1st of December last...	$30,000 00	
To dividend payable 1st of June instant	80,000 00	
To Government tax on circulation.....	2,697 94	
To reduction on Bank property.....	4,000 00	
To add to reserve.....	20,000 00	$186,697 94
Leaving a balance at credit of profit and loss account.....		$60,416 78

J. SIMPSON, President.
JOHN J. ROBSON, Secretary.

D. FISHER, Cashier.

Moved by T. N. Gibbs Esq, seconded by James Dryden, Esq.,—Resolved: That the report of the President and Directors, together with the General Statement of the affairs of the Bank, now submitted, be received, adopted, and printed for the information of the shareholders.

Moved by C. J. Campbell, Esq., seconded by H. A. Massey, Esq.,—Resolved: That the thanks of the Shareholders are hereby given to the President and Directors, for their efficient management of the affairs of the Bank during the past year.

Moved by Dr. McGill, seconded by A. F. Wallbridge, Esq.,—Resolved: That Messrs. Massey, Draper and Turner be Scrutineers of this election, and that they report the result to the Cashier.

Moved by Wm. McMurty, Esq., seconded by J. W. Little, Esq.,—Resolved: That the balloting now commence and that it be closed at three o'clock; but if at any time ten minutes shall have expired without a vote being tendered; the ballot may be closed by the Scrutineers.

Moved by T. N. Gibbs, Esq., seconded by J. P. Lovekin, Esq.,—Resolved: That the Chairman do now leave the chair, and that C. J. Campbell, Esq., be requested to take the same.

Moved by Dr. Gunn, seconded by Wm. Sisson, Esq.,—Resolved: That the thanks of the meeting are hereby given to the President for his efficient services in the chair.

Moved by Henry Hopkins, Esq., seconded by Daniel Betts, Esq.,—Resolved: That the thanks of the meeting be given to Mr Robson, for his services as Secretary.

The following gentlemen were elected as Directors for the current year:—Hon. J. Simpson, T. N. Gibbs, J. Dryden, J. P. Lovekin, D. A. McDonald, Hon. W. P. Howland, Wm. McMurtry.

The Board of newly elected Directors reelected the Hon. J. Simpson, President, and T. N. Gibbs, Esq., M. P. Vice-President.

QUEEN INSURANCE COMPANY.

The annual general meeting of shareholders was held in Liverpool, England, on the 27th May, M. Bernard Hall, the Chairman of the Company, presiding.

The Chairman moved the adoption of the report (see last page) in a speech relating to the past and present position of the Company. Dealing, in first instance, with the life business, he announced that during the past five years it had more than doubled itself. The business of that branch for the quinquennial period ending in 1863 was, he said, £71[illegible],000, and in the five years just ended it was £1,412,466, and the life funds which stood at £29,000 in the former period, had been increased to £110,000 in the latter. The quality of the business, too, had been as satisfactory as its progress. The profits earned upon the life business in the five years had been $26,690, of which the shareholders would take one-fourth, and beyond that the policy-holders would receive a reversionary bonus of about 40 per cent. The valuations had been made upon a three per cent. basis, which was the lowest figure adopted by any life office, and it was to the difference between that and the 4½ per cent. at which the life fund had been improved that the large amount of profits was attributable. The position of the Company with regard to its life business was most satisfactory, and his colleagues and himself had no doubt that the searching investigation of their affairs under this head had attracted the large share of public confidence which was apparent in the amount of new business transacted. Passing from the life to the fire department, he regretted that he could no longer use the language of congratulation, but he considered that it was a kind of negative consolation that their misfortune had not been greater than those of many of the largest and oldest offices in the kingdom. They had made £1,000 or £2,000 by the fire business, so that it had not been a drag upon them. Their actual losses, he might mention, had been about 66 per cent. of the premiums. Directing his remarks to the question of expenditure, he expressed his gratification at the success which had attended the efforts of the Directors in the way of reduction. Their average expenditure for 1867 was 40 per cent., and for 1868 it was only 33¾ per cent., the difference representing a curtailment to the extent of about £8,000, and they intended further to reduce the expenses, if they found their desire to be consistent with the retention and development of the business. With regard to the general result of their operations, he remarked that they had a balance of £20,290, and the Directors proposed out of that to pay a dividend of 7 per cent., which would absorb £12,586; to carry to the reserve fund £4,571 (bringing that fund up to £80,000), and carry forward the sum of £3,133. He was sure the shareholders would concur in the propriety of forming a strong reserve, ensuring as it did the confidence of the public, without which they could not exist. The wish of the directors was, if possible, to create a fund which would admit of the equalisation of dividends, and enable the shareholders to look with confidence upon a steady return upon their investment. Returning to the subject of the life business, which he said was the backbone of the company, he told them that with its increase they would have a proportionate increase of profits. Life business could be conducted upon known and fixed principles, which was not the case with fire business, subject as it was to great fluctuations. However, even in the fire business, if they could only get the normal amount of losses which existed a few years ago, of something like 50 or 60 per cent., or less, they would have a very handsome profit from that source. Alluding to the London business, he said the fire losses in connection with it had been very great, but he was glad that the directors and secretary there was not blame, inasmuch as the risks undertaken were the same as those with which some of the most respectable offices in London were mixed up, and, besides, there was the gratifying fact that a great reduction had been effected in the expenditure. Dealing next with the company's investments, he began with the *Queen* Insurance Building, which cost $97,000. The net interest derived from them up to the year 1868, was 5 per cent., and that return would ultimately be increased to six per cent. The buildings in London cost £24,500, and they were yielding an interest of five per cent. They had invested in Canada £30,000, which at present prices exhibited a loss of £1,100. Their investments in the State of New York, where they were doing a good business, amounted to £33,000, the gain upon them being £2,100. The loan made in London was £20,000, against which they had securities valued at £23,000, and they had besides that a dividend from the General Estates Company of £3,000, so that they had against the £20,0[illegible] securities amounting to £26,000. They held [illegible] 372 shares of the company, which cost th[illegible] £10,460, or 18s. 4d. per share, the cash value [illegible] which they stood in the company's books be[illegible] 29s. per share. The entire amount of real prop[illegible] held by the company was £304,000, of wh[illegible] £124,000 represented buildings in London, Li[illegible] pool, and Southampton. There were loans u[illegible] real property valued at £83,000, the loans on [illegible] liamentary securities amounting to £44,000. T[illegible] had £23,000 in the hands of various brokers, [illegible] £38,000 in bonds and negotiable securities, wh[illegible] could be realized at any moment. The average [illegible] of interest on investments had been 4½ per ce[illegible], while the loss under that item since the comme[illegible] ment of the company, with an outlay of betw[illegible] £3,000,000 and £5,000,000 had not been more t[illegible] £300. The Chairman then stigmatised with m[illegible] severity what he termed the "injudicious in[illegible] ference of a few intermeddlers;" and, after hai[illegible] with satisfaction the proposed introduction [illegible] Parliament of a Bill prepared by Mr. McLa[illegible] M.P., on the subject of judicial inquiries into [illegible] outbreak of fires, concluded by assuring the sh[illegible] holders that the Company was in a thorou[illegible] sound position, and that its prospects were exc[illegible] ing hopeful in their character.

Mr. McLagan, M.P., (chairman of the Lo[illegible] board) on rising to second the motion, was [illegible] ceived with applause. His remarks were pr[illegible] pally devoted to an explanation of the ef[illegible] made by his colleagues and himself to cut d[illegible] the expenses. He announced, amidst cheers, [illegible] the expenditure, which stood at £11,691 in 1[illegible] when the old directors seceded, had been red[illegible] to £4,300, and with the able co-operation of [illegible] secretary (Mr. Rumford) he hoped to lower [illegible] amount by £1,000. With regard to the merca[illegible] risks, he said that owing to the diligence of [illegible] Swanton the superintendent of the salvage c[illegible] fires in bonded warehouse were much rarer [illegible] hitherto. He was glad to be able to report fav[illegible] ably of the business transacted during the [illegible] months of the present year. They had for [illegible] premiums £200 more than at the same last yr. [illegible] and in the life business the amount had [illegible] nearly quadrupled. Referring to the nece[illegible] of instituting judicial inquiries into the outb[illegible] of fires, he mentioned that the Home Seer[illegible] had requested him to draft a Bill which it w[illegible] be possible for him (Mr. Bruce) to take up [illegible] Government measure. It would be introd[illegible] either by himself or the Government next [illegible] and it would no doubt add greatly to the sec[illegible] of insurance companies.

The motion was then put and agreed to.

The following directors, retiring by rot[illegible] were re-elected (an amendment that Mr. Pag[illegible] not re-elected only finding four supporters)—H[illegible] C. Tunicliffe, Alfred H. Cowie, John Bing[illegible] John Bethune Thomson, and Charlton R. H[illegible] Liverpool; John T. Pagan, London; John S[illegible] Dundee; and Andrew Galbraith, Glasgow.

A cordial vote of thanks was accorded to th[illegible] chairman and directors, and £1,800 awarde[illegible] them for their services.

Votes of thanks were also awarded to the c[illegible] tors and officers of the branches at home a[illegible] abroad, to the actuary and manager, the sub-ma[illegible] ager, the company's physician, and the me[illegible] referees, the auditor, solicitor, and the office[illegible] the chief office.

The customary compliment to the chai[illegible] terminated the proceedings.

PRINCE EDWARD MUTUAL INSURA[illegible] COMPANY.

The annual meeting of this company was[illegible] in Picton, Ont., on the 14th June.

On motion, Mr. G. Striker took the chair[illegible] the Secretary of the company, Mr. Twigg[illegible] appointed Secretary.

The chairman called upon the President[illegible] L. B. Stinson, to read the annual report.

From this, the fourteenth annual report, we ondense the following general statement, refer- ng the interested reader to the report itself for articulars :

lo. of policies issued last year.....	319
mount of property insured.....	$287,913 00
" Premium Notes.....	7,262 81
" Cash Premiums.....	740 07
otal number of Policies in force...	1,544
otal amount of property insured..	$1,642,423 00
verage on each Policy.....	925 00

The number of policies now in force is about)0 in excess of last year. The losses paid dur- g the past year amount to $2,830.88. The Di- ctors report that they thought proper to refuse e payment for the loss sustained by Mr. King, Brighton. A suit was instituted thereon, hich resulted in favor of Mr. King.

The Treasurer's account shows a balance on and of $26.48.

The general statement of the Company's affairs ows the total amount of assets to be $57,637.26, ing in excess of the total liabilities by $52,- 9.71.

It was moved by Mr. S. P. Niles, seconded by r. R. Clapp, and resolved, that the annual re- rt, as read, be adopted.

The qestion as to the advisability of issuing licies of three years as well as five years, was ought up, and a motion favorable to it was ad, but upon being put to the meeting, was lost.

The election of Directors was proceeded with. essrs. John B. Solmes and John Abercrombie re appointed scrutineers, who, by their report, clared the following gentlemen elected, viz. : essrs. D. B. Stinson, W. A. Richards, James ven, David W. Ruttan, William Delong, H. McFaul, and James Johnson.

A vote of thanks was given to and suitably knowledged by the chairman for his services, d the meeting closed.

After the close of the general meeting, the new irectors met at the Secretary's office, and ap- inted L. B. Stinson, Esq., President, ond Wm. elong, Esq., Vice-President for the present ar ; also, committees on finance and printing re appointed, and they adjourned.

Eastern Townships Bank.—The annual meet- g was held at the bank on Monday, 7th inst., wis Sleeper, Esq., in the chair. The report presents the business of the past year as having en profitable. A dividend of four per cent. for e last six months was declared, and $6,000 ded to the rese ve fund, which now amounts to 6,000. The directors condemn the new bank- g scheme of the Government, as well as the bill restrict the rate of interest now before the gislature. The net earnings of the bank for the st year, after providing for losses, was $43,531. e capital paid in, $400,000 ; bills in circula- n, $108,163 ; due to other banks, $7,297.79 ; posits not bearing interest, $77.818.71 ; bearing erest, $81,137.05 ; profit and loss account, 2,000 ; balance of profit for the year, $27,023.18. e resources of the bank are : Coin and provin- l notes, $62,748.42 ; bills and cheques on other nks, $28,048.29 ; due from other banks, $51,- 3.64 ; Government securities, $67,833.33 ; sil- , $516,343.65 ; real estate, $16,500 ;—total, 3,439.73, The old board of directors was re- cted, viz: B. Pomroy, Charles Brooks, A. A. iams, J. H. Hope, R. W. Heneker, G. K. ster, and H. L. Robinson. At a meeting of directors, Major B. Pomroy was re-elected esident, and C. Brooks Vice-President.

—Mr. W. P. Street, for nearly thirty years nager of the Bank of Montreal-agency at Simcoe retired from it to take a position of trust in milton. His numerous friends in the County Norfolk, have presented an address to Mr. eet.

Financial.

ROYAL CANADIAN BANK.

The following is a summary of the evidence given before the Commons Committee on Banking and Currency, on considering the Act respecting the affairs of the Royal Canadian.

Mr. Woodside.—In January, 1868, there were 30,000 shares of subscribed stock; some had been subscribed, in certain localities, upon the condition that agencies should be opened there; and where this condition was not carried out, the subscriptions were considered as null. There was also some stock subscribed for by individuals, and not paid up; but we did not enforce the payment of calls. The amount of stock on which payments have actually been made is 27,488 shares; the amount paid on these shares up to the 5th June last, was $1,168,828.34.

The statement of assets and liabilities on 5th June embraces the whole of the liabilities. With the exception of $50,000, held by the government of Ontario, as security, $146,625.52 of coin, &c., are actually on hand. The landed property consists of furniture and chattels, at its agencies. The government securities have never been pledged. The notes and bills of other banks are all available assets. The estimate of loss on the discounts is $300,000. Between $500,000 and $600,000 is over-due paper. Very little of current paper is bad. Losses have been chiefly sustained at Kingston, Cobourg, and Seaforth, and resulted from the culpable misconduct of the agents. The notes discounted are generally of small amounts of legitimate character, and diffused over twenty-two agencies; the largest is a lumber account of $50,- 000, which is secure. We have not written off any paper. The accommodation afforded to directors has never exceeded $100,000, or thereabout, at any one time. The largest amount of paper on which the names of directors appeared at any one time in the year 1866 was about $80,000, but in addition to this there was a liability on the part of a director on a Sterling Bill of Exchange for $40,000 endorsed by him, which was cashed by the bank and was subsequently paid off. Ordinarily the amount of discounted paper done for the directors was very small, less, I think, than prevailed in any similar institution in the country. Some transactions in stock took place, but without the knowledge of the Board. It was believed to be in the interest of the shareholders to prevent the stock being forced on the market. During the year 1868, stock to the amount of $19,200 was purchased by the President, Mr. A. M. Smith, from a number of parties, and was held in the name of his brother, Mr. John Smith. From October, 1868, to February, 1869, stock to the amount of $14,700 was transferred to the name of Mr. Alexander Campbell, an employee of the bank. The stock held in these names cost respectively $16,102.87, and $11,973.61. The funds of the bank were used to pay for it. When these transactions came to the knowledge of the Board, they (on 31st May last) passed a resolution declining to recognize them. I am not aware that any director, other than Mr. A. M. Smith (then President), and the Hon. Donald McDonald, who is now Vice-President, were engaged in these transactions.

James Metcalfe, President of the Bank.—To the best of my knowledge and belief, the statement of the 5th June is correct. My impression is that there will be a loss of nearly $300,000 on the paper in default, and on that respecting which there is already some doubt. Although I consider the residue of the paper held by the Bank to be good, it is of course possible that upon so large an amount outstanding there may be some further loss. I think the loss would be considerably increased by a forced liquidation. I do not think that any of the assets are pledged, with the exception of $50,000 to the Ontario Government. I think the accounts were generally proportionate to the means of the parties, with the exception of the Brown case. I believe that stock has been purchased to a small extent, though not directly by the Board, or with its sanction. I only know positively the particulars of one case. I refer to the purchase of stock to the extent of several thousand dollars by the Hon. Donald McDonald, when the market price was about 80. He bought it in his own name, and gave cheques on the Bank for the purchase money, stating to me and Mr. Manning, another director, that he did it to keep the stock up in the interest of the Bank. The stock subsequently advanced about 3 per cent, when he said he would keep it, but he afterwards transferred it to Mr. Campbell, the accountant, on behalf of the Bank, and, as I believe, got the money from the Bank for it. I do not think the purchases of stock by directors or others in the interest of the Bank, would amount to $15,000 during the last year. The Board had no knowledge of the transactions. I never bought any myself for the account of the Bank, nor did I sell any. The directors had usually very small accommodation. I never had any myself, though I was once endorser on a Bill of Exchange for about $40,000, which was brought to the Bank at my instance, for the purpose of supplying them with foreign exchange. It was not long since withdrawn from the Bank.

James Michie, Assistant Cashier.—The subscribed capital is $1,500,000. Stock was taken at various agencies, and different arrangements as to payment were made. About $1,168,000 has been paid up; and about $300,000 remains to be paid, of which $100,000 to $150,000 is in default. The statement given in embraces the whole of the liabilities. Of the Government securities £2,500 sterling of these are in Toronto, and the balance in the hands of the Union Bank of London, and is available, that Bank being indebted to us. This asset is unpledged. The balances due from other banks are all available. Very little of the current discounts can be considered bad. All the paper on which the names of directors appeared was about $80,000, $45,000 of which consists of indirect liability as endorsers for others. A very small proportion of the discounts is for accommodation of a permanent nature, as the cashier has always objected to it. A large amount of the discounts is secured by real estate, including part of the overdue paper. The collaterals have been taken on renewals. Very little of the discounts is without endorsers. About 3500 shares have been subscribed, on which no payments whatever have been made; but no stockholder has been pressed for payment who has not voluntarily paid the calls. I estimate the overdue paper as worth about 10s. in the pound. The only paper in default bearing the name of a director, is for some $500 or $600. There has been stock purchased by one of the directors for, I think, $18,000 or $19,000; the purchase money was advanced by the bank, and charged to account standing in the name of the party in trust. This transaction took place more than a year ago. I do not know under what authority the advance was made. I am not aware whether the party in question is held personally liable for the stock, or whether the bank is held responsible for it.

Hon. Donald McDonald.—I have been on the Board since July, 1865, and Vice-President since July last. With regard to the four first items, "Coin and Bullion, &c.," "Real Estate, &c.," "Government Securities," and "Notes of other Banks," I have no reason to doubt the value of these. I believe $50,000 of the securities were pledged to the Ontario Government as security for their balance, but cannot say whether they are deposited with the Government or with the Montreal Bank. I did not know of the transaction at the time. It was admitted to me by the directors at the Board that the aggregate of losses on discounts amounted to $200,000. My own estimate of this loss is larger. I should say that very few of the accounts reached $5000; they were generally of moderate amount, though in many instances large or excessive in proportion to the

means or resources of the individuals. I have reason to believe that the funds of the bank were used to purchase stock, from an early period, without, so far as I know, the formal sanction of the Board. Some stock appeared in the published statements, as standing in the name of Mr. John Smith, Mr. A. M. Smith acting as his attorney. I was never able to discover who this John Smith was, and believed him to be a myth. I think there is some stock in the name of Mr. Campbell, the Accountant, held for the benefit of the Bank. I am under the impression that the amount of paper on which directors' names appeared exceeded 1-20 of the entire discount in 1866, though I cannot state so of my own knowledge. The total amount of discounts on 30th April, 1866, as shown by the official returns, was $628,328, and if my information be correct, a Bill of Exchange for $40,000 was discounted about that time, on which the name of one of the directors appeared.

Statement of Stock.

Amount of stock subscribed.....	30,973 shares.
Amount of stock subscribed, on which payments have been made.....	27,488 50
	$1,374,400
Amount of Stock paid..	$1,168,828.34
" still to pay	$205,571.66

The calls upon the above 27,488 shares have all been made and are therefore past due with the exception of about one hundred shares.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

The business of the week has been somewhat restricted in consequence of the number of transfer books now closed, in anticipation of July dividends. Transactions that have taken place, however, have generally been at an advance on last weeks' quotations.

Bank Stock.—Montreal closed with buyers at 160; sales occurred at 159½ to 160. There are buyers of British at 106; books closed. Ontario has been in good demand at advancing rates, buyers now offer 96¼ and sellers ask 97½. Sales of Toronto have taken place at 118¼, ex-dividend, buyers would advance. Royal Canadian has been freely dealt in at from 45 to 47½, buyers now offer 48 but there is little stock in market. There are sellers of Commerce at par, ex-dividend. Gore sold during the week at 37½ and 38, there are buyers at 37½. The last sales of Merchants were at 111½ and 112. Buyers offer 99½ for Quebec with sellers at par. No Molson's in market, it could be placed at 108. There are buyers and sellers of City at 99 and 99½ respectively. Small sales of Du Peuple were made at 108 and 108½. Buyers offer 107 for Nationale. Jacques Cartier sold at 106, at which rate there are buyers. Nothing doing in Mechanics', buyers offer 91½.

Debentures.—Canada currency six per cents are offering at 105, and sterling sixes are asked for at 104½. Dominion stock is heavy at 107½. There were small sales of Toronto at rates to pay 7 and 7¼ per cent. interest. There are considerable lots of County on the market at par.

Sundries.—City Gas is wanted at 107. There were small sales of British America Assurance at 56½ and 57, it is still offering at the latter rate. The books of the Canada Permanent and Western Canada Building Societies are closed; last sales at 126 and 121½, respectively. Freehold Building Society is in demand at 115 and 115½, none on market. There are sellers of Montreal Telegraph at 136¼ and buyers at 136. There were small sales of Landed Credit at 78 and 78½. One or two large mortgages have been placed at 8 per cent.

BANK OF UPPER CANADA.

Mr. McKenzie having inquired of the Government whether they had decided on any course relative to this Bank.

Mr. Rose replied that the Government had made up their minds that the time had arrived when less expense was necessary.

There had been notice issued by the trustees for a meeting of shareholders to take place at an early day, to see what steps could be taken. If they agree to pay up the Government, they will give up all claim to the arrangement of the bank, and if not the Government will then reduce the expenses by placing the affairs in the hands of two executive officers to wind them up.

If the legal right existed in favor of the Crown over all the assets, it is quite impossible for him, or any other member of the Government, to say he would give up that priority. All that he could say now was, that he could certainly endeavor so to do, so that the process of liquidation might be made as rapid as possible.

AN OPINION ON THE BANKING SCHEME.—The *Paisley Advocate* has from time to time devoted a good deal of attention to the banking scheme. Here is something from the last issue:—What the Canadian people want, is the National Greenback system of our neighbors, without the excrescence of the so-called National Banks; and with the added security that Canadian Bonds, bearing six per cent. gold interest, may always be obtained for the notes. This would give the notes a gold value, and prevent their depreciation beyond a trifling extent; and would leave gold to rise and fall in price like any other commodity, as it should. Mr. Rose would then be able to discard his forty or fifty resolutions and replace them by half a dozen. By adopting this simple plan, the country would not be flooded with currency notes more more than it needed. These would seldom be much under par value in relation to gold, and would always pass at their face value in Canada. The country would also be saved a few million dollars yearly in taxation—there would be plenty of money to build railroads and carry on other public enterprises– the Finance Minister would be able to meet all demands on him without borrowing from England—and the bankers, while losing their special privileges, would share in, and rejoice in the general prosperity.

THE BANKING SCHEME.—The following extract from a letter, written by a gentleman of high position in Canada, to a merchant of this city, is very complimentary to our friend, Mr. Jack, of the People's Bank: "Mr. Rose's Banking Resolutions have apparently been abandoned for the present, and is not likely they will again be brought forward in their present shape. This result has been greatly aided by the strenuous exertions of Mr. Jack, of the People's Bank of your city, whose able letters on the subject of Banking and Currency, were printed in pamphlets and distributed among the members of both branches of the Legislature. His arguments against any such radical change in our banking system, as that proposed, were very convincing, and were read with much interest and good effect. His replies to the queries propounded by the select committee on Banking and Currency, are considered here to be the ablest of any that were sent in. Your banks acted wisely in sending Mr. Jack to Ottawa to represent them, as his thorough knowledge of the subject enabled him, in his personal interviews with prominent members of both Houses, to fully explain what the evil effects of the proposed sch[eme] would be, and his indefatigable exertions, w[hich] here, did much to strengthen the opposition to [the] measure. The ability displayed by Mr. Jack in his writings on this banking question, as also in his letters on the assimilation of the Curre[ncy] reflects credit on your Halifax bankers, and [is] entitled to the thanks of your mercantile trading community for the assistance he has rendered in defeating a scheme, the adoption of w[hich] would be much more injurious to them tha[n] the banks."—*Halifax Chronicle.*

BILLS PASSED.—The following bills are an[nong] those passed the House of Commons last wee[k]. To amend the Act to Incorporate the Union B[ank] of Lower Canada; to amend the Act to Incorporate the Quebec Bank—Mr. Simard; to amend [the] charter and increase the capital stock of the N[orth] Shore Transportation Co.—Hon. Mr. Carling; to amend the Act Incorporating the Royal Can[adian] Bank, by extending, if necessary, the time for [the] resumption of specie payment, and also to au[thor]ize the amalgamation of the said Bank with [any] other Bank or Banks, and for other purposes—[Mr.] R. A. Harrison; to amend the Charter of the [Up]tario Bank—Hon. J. H. Cameron; to amend [and] extend the Acts Incorporating the Bank of To[ron]to—Hon. J. H. Cameron; to amend the Act [to] Incorporate the British America Fire and [Life] Assurance Company—Mr. Street.

BANK CHARTERS.—A bill has been introduced by Mr. Rose to extend the following bank charters: Quebec Bank, City Bank of Montreal, Banque du Peuple, Bank of Toronto, Commercial Bank of Canada, Ontario Bank, Bank of Brantford, Canadian Bank of Commerce, Royal Bank of Canada, Banque Nationale, Bank of Nova Scotia.

—At a meeting of the Banking Committee of the House of Commons, the Gore Bank Amendment Bill was passed, giving permission for a reduction of the number of Directors to five, and of the capital stock from $800,000 to $500,000. Permission is given to change the name of the Bank to the Bank of Hamilton.

GRAND TRUNK.—A body of gentlemen interested in this Company met in London, on the [4th] May, and organized themselves into a committee with power to add to their number, with the object of bringing about a change in the management both in England and Canada. The 8th June was appointed for a meeting to take steps to accomplish that object. A circular was addressed to a large number of the bond and stockholders setting forth the views of this committee and asking their co-operation.

—The Chatham Council lately passed a by-law granting $30,000 to the Southern R. R. Co., but it was lost on a vote of the people.

THURSDAY, JUNE 24, 1869.

THE CANADIAN CANALS.

IV.

here is a phrase used by American poli- ns and writers which, in one sense, has h meaning, but, on the other hand, with- explanation, is entirely without force. s, at the meeting of the New York Cham- of Commerce of the 3rd June, in the lution submitted by General Wallbridge upport of the proceedings of the Comit- of Ways and Means of the House of Rep- ntatives of the 23rd March, he sets forth necessity of securing to the citizens of United States "the freedom of the St. rence." Unaccompanied by any explan- n, this does not convey the meaning of eral Wallbridge and those who think him. At this moment, the St. Law- e is practically "a free navigation." sels loaded at Chicago pass through the land Canal to Oswego. This principle entical with a propeller proceeding from igan to Massachusetts. The difference is simply in the length of voyage; a voyage not now made, because it is not profitable. One vessel has already made the trip from Chicago to Liverpool. So far as "free" navigation is concerned, there is, accordingly, nothing to be asked or granted. The point of General Wallbridge's remarks is apparent when he adds, "and the enlargement of the canals to a capacity of floating vessels of 1,000 tons." We think it would simplify matters if the public men of the Western States and of New York would adopt a phrase fully setting out their views, such as—The development of the St. Lawrence navigation to the attainable maximum of depth, free to all flags. One of the arguments urged against increased depth will be met by the very action we recommend. When the few who have pressed the question have dwelt upon this necessity as an act of justice to Western Canada, the somewhat specious objection has been raised, that scarcely a Canadian harbor has twelve feet of water—certainly none on Lake Erie—and that any increase of such depth must be unnecessary. The reply is simple enough. The harbors themselves could be improved; indeed, it is part of the scheme to include such work. But the main argument must lie in the necessity for opening a sufficient channel for vessels from the West to the seaboard;—that is to say, the establishment of a route more advantageous than any other, and which will extend all the necessary inducements for trade to leave its accustomed channel in order to pass through it.

The Americans themselves point to the fact that alone of the canals they control, the Sault Ste. Marie, about a mile in length, and the size of the locks has been considered typical of American requirements. The question is not worth argument. Science so extends our operations and increases our resources, that what a few years back was in advance of what was then known, in many cases falls so entirely behind modern requirements as soon to become antiquated. Our wants increase by the very facility with which they are supplied. In no direction is the axiom more plain than in the conveniences for locomotion. In a navigation they are determined by the objects attainable; and the Sault Ste. Marie locks, 350 feet long, 70 feet wide, and 10 feet deep, were suggested by the large paddle steamers of Lake Erie, and by freight steamers loaded with ore from the Lake Superior mines. The successful working of the propeller has substituted a totally different class of vessels, the characteristic of which is length and depth, with but moderate width of beam. When we have satisfactorily determined what can be effected in respect of depth, we can at once decide what proportion the remaining characteristics must assume. We shall then be able to name the width of the lock, and it will be very different from that of the one American canal.

In the speech in which General Wallbridge addressed the New York Chamber of Commerce, he states that "Canada has officially "offered to enlarge her canals, and give us "their freedom." We should like to know the form in which this proposition has been made. He says: "In 1866, the Provincial "Commissioners, before a Committee of the "House of Representatives, stated their "willingness to embark in this outlay." We do not ourselves know any proposal of this character freighted with the weight of Ministerial responsibility, and sustained by the sanction of a Parliamentary vote. Some negotiations have certainly been carried on by Mr. Young, a known advocate for the development of the St. Lawrence navigation, who proceeded to Washington in the time of Mr. Sandfield Macdonald's Government. Mr. Galt has also visited the United States capital in connection with the Reciprocity Treaty. The question is, has the Dominion Government ever made any offer to the United States Government with regard to the canals? and if so, what are its terms? It is certain that nothing will satisfy the West—or, as the General puts it, will be of "substantial service"—unless the improvement be extended. He speaks of vessels of 1,000 tons burden. We think that the argument should not be limited by figures, which cumber rather than assist. There is, within moderate effort, a certain depth attainable, to be determined by examination. It is a safe phrase to call it a maximum development, and it is on this term that the advocates of the improvement should meet. If there be any difference of view, or divergence of thought, it can be battled out when the detail comes up for consideration. There seems, however, to be an error in one direction. It is assumed that the canals are large enough for Canadian purposes. Those who so think appear to have been led by the opinions expressed in Montreal, where, with a class, the western propeller is looked upon as a tender to the Allan steamer. Western Canada is dissatisfied with the capacity of the canals. The argument of Wisconsin and Illinois is the very language we use. We desire to deal directly with the ocean. It is true that we are not cramped in the way of tariffs, as the Western States are. The importer of Chicago must now break bulk at Boston or New York. He cannot transfer his cargo at Montreal to a lake-going vessel, for he would increase the duty, the cargo being valued by a Custom House regu-

lation, not at the value at the place of manufacture, but at the place of river shipment. So, independently of the duties on the true value of the goods, he would have to pay a duty on all the incidental charges added to that value. In Western Canada we are not sufferers, as the Western States are; but, with this exception, we anticipate the realization of the same advantages they look to receive from canal development.

Are these advantages theoretical? or, to use a word which is now finding a recognized place in the academy of politics, are the complaints which are preferred merely sentimental? On the other hand, can any practical results, promising profit, be said to loom in the future as dependent on this policy? We reply: It is a matter of experience, that a cargo of wheat can be carried more rapidly and more economically from the foot of Lake Erie by the St. Lawrence, than by the Erie Canal to Boston, to New York, to the West India Islands, and to Europe. The saving in the cost of freight and the removal of the charge for brokerage tend to swell the profits of the producer, and, as such, to give an increased value to real estate. The increased annual receipts of the owners and workers of land are divided among all classes of the district by the commercial supply of the wants increased with the means of gratifying them.

We must bear in mind that the St. Lawrence is the only channel capable of improvement. The Erie Canal has reached its greatest extent of development, or at best, but little can be done to increase the tonnage of its boats. The complaint has long been its want of water. It must be remembered that the supply from Lake Erie goes no further than Port Byron, 158 miles; at that point the level ascends, and is supplied by other sources than those of Lake Erie. Therefore the whole hope of the West turns to the Canadian Government. It is evident that if negotiation on this policy is to be a matter of diplomatic intercourse, the Government should in no way leave a link of the canals out of their control. This theory was virtually acted upon when the original Welland Canal proprietors were bought out, and that canal made the property of the Province. Indeed, this principle should be clearly laid down, and one would conceive that all applications for private control over enterprises of this character would at once be met by the Government with the assertion that all canal enterprise must remain under the superintendence of the Dominion. Without such regulations, how is it possible to enter into any treaty with the United States with regard to the St. Lawrence? A private company holding a link of the navigation may enforce a tariff of tolls in every way objectionable, and institute a series of by-laws oppressive and in opposition to the true interests of commerce. In our judgment, the Dominion Government should lay down a broad plan for the improvement of the river, and, while carrying it out with vigor, allow no interference with it. They should not only not countenance any private scheme, but they should veto it on the principle above set forth. It is a policy necessary to effect what is due to ourselves, and certainly indispensable when we think how the contrary line of action may affect ourselves with the United States; and it is the only one by which we can hope to carry out that which we are striving to establish—viz., "the development of the St. Lawrence navigation to "the attainable maximum of depth, free to "all flags," and, we will add here, the whole chain of canals being under the direct ownership and control of the Dominion.

THE COMMERCIAL SITUATION.

The grumbler is a kind of animal not peculiar to any country or climate; he is indigenous everywhere. His croakings have been observed to be unusually loud for a while back; and with perverse ubiquity he is met with everywhere, in city and country. The "hard times" have been the chief subject of his bemoanings of late, the wail proceeding mostly from the direction of Montreal. Many in Toronto, also, give vent in piteous tones to their grievances endured for six months past, and point with ominous finger to the indications of the future.

While it must be admitted that there is a cause for all this, yet the adverse influences to which it owes its rise have been greatly over-estimated. The cry of "hard times" began with the importing interest, and to that it is mostly confined. The country correspondents of the importing houses have sent in money very slowly; hundreds of them have sent none, but gone, instead, into bankruptcy, and the winding-up process has proved much more prolific of discharges than dividends. Losses succeeding losses have swept away profits, in some cases entrenched upon capital, and so left the aggregate result in the neighborhood of zero. Over-supplies of goods and bad debts are leading results of the six months operations. This ailment of the importing trade has proved epidemical; it has infected more or less every other branch of commerce and industry.

Having stated these facts, the gloomy part of the story is pretty well exhausted. In no other department is there any real ground of complaint. Labor is abundant. This is apparent in Toronto, at least, from the extensive building operations that are going on in every part of the city. If the country were from any cause impoverished or panic-stricken how would it be possible to place the thousands of emigrants, that have arrived quite recently, in good positions for earning a livelihood? Labor is not only abundant, but is well paid. An immense number of mechanics flocked to Toronto at the opening of the present season, enough to build a town at short notice, and have been mostly kept profitably employed.

In consequence of the condition of the importing interest, and the outcry thereat, capitalists have become cautious, some of the timid and fearful, resulting in a good deal of hoarding. This, with a large demand at the same time, has kept the money market close and slightly raised the rate paid by borrowers. But it will not be denied that there is as much money in the country as a year ago. There is no diminution of the deposits in savings banks—demonstrating the prosperity of the industrial classes; the funds placed by the public in the chartered banks are untouched. The greatest willingness has been shown to subscribe no less a sum than $400,000 to the two proposed railways entering here, a thing which would be impossible of accomplishment if the city was not really prosperous. To this may be added, the instructive fact, that the suspension of the Royal Canadian Bank, locking up or withdrawing some millions of circulating capital, has not produced a single failure. In any other than a really healthy state of business affairs, we should not have this pleasant fact to record.

Our importers who feel so gloomy just now may as well remember, that "it is a long lane which has no turning." They are passing through an ordeal, which, trying though it is for the time, will put the trade on a healthy footing. It will prune away the rubbish of the retail trade, and impress so deeply, the lesson that selling goods on credit is not necessarily making money, that it will not be soon forgotten. It will tend to lessen competition and give those who do sell goods, in future a chance to make fair profits, and lessen the danger of losses. It will prevent their trusting rogues and honest men alike, which has been so much the custom. It will induce diligent enquiry into the antecedents, character and position of every applicant for credit. These wholesome lessons were much needed; and we may rest content that the severely practical way in which they are being taught, has been attended with no real disasters.

A careful survey of the whole situation leads to the conclusion that matters with us are not nearly so bad as has been represented. The present commercial dullness was to a

extent necessary, and from its nature must be only temporary. The Intercolonial Railway is now giving employment to a great number of men. In a month or so contracts will have been given out and work commenced on the Toronto and Nipissing Railway; labor will soon be in demand for the construction of the sister enterprise. The Wellington, Grey and Bruce Railway is also being pushed forward. The opening up by a railway of the Great North West, is in the immediate future. With these, and perhaps other important works to be completed within a brief period, and with an abundant harvest in prospect the country cannot fail to prosper. If dry goods merchants import more than they can sell, that is their own affair. No one in the country can regret it more than themselves, for the reason that they suffer most. The evil carries within itself an infallible cure. From the statement given in another part of this paper, it will appear that imports of dry goods have received a decided check; the total value entered at Montreal for the first six months of the year being $3,285,136, against $3,028,277, showing a decrease of $256,859, and affording the best kind of proof that the trade is fully competent to take care of itself.

OFFICIAL INSURANCE STATEMENTS.

For confusion worse confounded commend us to the Statements furnished by the Insurance Companies to the Finance Minister in supposed accordance with 31 Vic. c. 48. Some companies have refused to make any returns; some have given partial returns; some have given such returns as only mislead, and some have mixed figures in an abominable manner. Fire and Life business are jumbled together, and Inland and Ocean Marine seem to have shared a like fate. Of course it is impossible under such circumstances to arrive at any reliable result respecting the extent of business done in any one Department of Insurance in Canada. Taking the return of such Fire Companies as have given an intelligible statement and accepting as correct, the estimated figures for such companies as have not made returns we have,

Premiums	$1,972,602
Losses	1,203,156
Difference	$ 779,446

or a per centage of loss to premiums of 66 per cent. In Life these figures stand,

Premiums	$966,247
Claims	491,834
Difference	$474,413

or a per centage of claims to premiums of 51 per cent. The Marine business of four companies gives an aggregate of,

Premiums	$ 207,721
Losses	119,123
Difference	$ 99,598

or a per centage of 57¼ per cent.

But we warn our readers against accepting these conclusions as reliable. Some Canadian journals and some foreign ones, too, have published the totals as above figured up with the idea that they were giving the aggregate insurance business of Canada. An examina- of the tables first given to the public in our issue of last week and the week previous, will serve to correct such a misapprehension.

The absurdity is manifest of expecting anything like intellegible statements when each company is allowed to furnish returns according to its own ideas or to withhold statements at its pleasure or to jumble up what should be distinct and clear, as interest dictates. If we are to have statements at all we should have such as would be of some value. It were far better to avoid putting companies to the trouble of preparing them, if the result is to be not only valueless, but absolutely injurious in giving false ideas respecting the extent of business done in Canada. If anything be wanting to prove the necessity that exists for the employment of an Insurance Supervisor or Commissioner, these statements supply it.

We cannot see on what principle the premiums of the Mutual Fire Companies which have not made returns are estimated at $150,000. In 1866 there were 19 local mutual companies in Ontario, whose aggregate income was $224,819.

Queen Insurance Company.—The report for 1868, which we copy from the *Post Magazine*, shows on available balance of about one hundred thousand dollars, out of which a dividend of seven per cent. was declared to the shareholders. A sum of between four and five thousand pounds was alloted to the reserve fund, raising it to £80,000 sterling, and the balance carried forward. The life business shows good results; a large increase appears with a decreased expenditure of about forty thousand dollars on the whole business. In the fire branch the losses were heavy—reaching the high average of 66 per cent.—a large share of which occurred in Loudon; still a small balance of profit appears in this department. In the matter of investments the Queen has been very fortunate. On a total investment, of from three to five millions of pounds, producing the average rate of 4½ per cent. interest, the losses ever since the commencement of the company have been merely trifling. The investment of £30,000 in Canada seems to have resulted in a loss of £1,100 at present prices of our securities, while a slightly larger sum, invested in New York State, where the company does a good business, shows a a gain of £2,100

The favorable position of the Company, as shown by the report, has led to an advance in the shares to a premium; and not only retained but increased the measure of confidence reposed by the public at home and abroad, in its present soundness and future success.

Ontario Bank.—In the annual report of this Bank the position and prospects of trade are reviewed, and the causes of the present dullness pointed out. It is proposed to remove the Head Office to Toronto or Montreal; the former city will no doubt be selected, as there are many weighty reasons why the headquarters of the Bank should be located here. The profits of the year, after paying expenses, were $221,873; out of this, with the balance from last year, two half-yearly dividends of $80,000 each were paid, and $20,000 was added to the reserve fund, a balance of over $60,000 being carried forward. The profits were quite equal to the average of former years, while the losses were less than usual.

Insurance.

Fire Record.—Brantford, June 23rd.—A fire broke out in the furniture store of Adam Burgy, caused by the explosion or boiling over of benzine varnish, and spread rapidly. The following, as far as can be ascertained, are the sufferers:—Burgy, insured on building for $1,200 in the Gore Mutual on stock, $1,000 in the Provincial, and $500 in the Royal—nothing saved; loss about $4,000 on stock. John Welsh, shoemaker, shoe store and dwelling; no insurance; loss about $300. Enos Bunnell, grain buyer, insured on building and scales $500 in the Hartford. S. Simons' grocery, adjoining Burgy on east, got very little out; insured in the Home on stock and furniture for $1,000. John W. Downs, owner of building, insured for $1,000 in London Assurance. William Calder, grain dealer, saved most of his stock; insured in Hartford $800, and Liverpool London and Globe $400. Mr. Wilks, on building in the Hartford, $600.

The fine four-story row of brick, called Victoria buildings, was totally destroyed. Owned by the Trust and Loan Company, and insured in the Royal. It was occupied by J. Sayles, saloon keeper, who saved his furniture. J. Hunter, grocer, not much loss. J. Wilkes, insurance agent, got out his papers. Mrs. Wilkie, milliner and dressmaker, suffered a slight loss, and Robert Gorman, boot and shoe-dealer, saved the greater part of his stock; all damage fully covered by $1,200 in the Liverpool & London & Globe, and $800 in the Hartford. On the corner of Colborne and King streets, Mason & Hamilton, druggists, cleared out the bulk of their stock; insured for $2,000 in Commercial Union. The Orange Lodge, on the 3rd floor lost everything. Wesley Howell, grocer, saved a portion of his stock; insured for $2,000 on stock in the Provincial. His loss is about $3,200; the building is owned and insured by Mrs. Wallace for $2,000. A. S. Hardy, barrister, saved his dockets and valuable papers, losing his books; the loss is covered by insurance. The Brant Lodge of Free Masons and Royal Arch Chapter, did not get out a single article, being in the third floor; insured on the organ and furniture for $800 in the Western of Canada, and the Chapter for $350. Hugh Spencer, grocer, dwelling over his store, lost everything, not saving even the wearing apparel of the family. Insured on stock in the Home for $1,000. Alfred Cox, watchmaker, got out a good deal of his stock. Loss covered by $400 in the Liverpool, London and Globe. Mr. Craig, grocer—portion saved; no insurance. Mrs. Nolan, milliner; insured for $300 in the Commercial

Union; will cover loss. Hon. E. B. Wood's office was cleaned out, and his valuable library only saved by hard work. No insurance. Building owned by Bank B. N. A. destroyed; insured in Royal for $2,500. The splendid building occupied by Cleghorn & Co., hardware dealers, is a total ruin. They got out a portion of their stock, damaged; insured for $3,000 in Hartford, and $6,000 in Home. Brooks & Wilkes, barristers; insured on library $250; saved a good deal of it, lost their office, furniture and papers. Mr. McKenzie & Griffin, barristers, got out their things without much loss. No insurance. The fire was stopped here; but considerable damage was done to B. G. Tisdale, adjoining, whose loss is covered by insurance. William Ryan, grocer, J. A. Aldred, tailor; Thos. Tune, confectioner; and J. B. King, hatter, occupying the four stores east of Tisdale's, all packed up and moved out. In King street, John Brooke, liquor dealer, stock was got out; he had no insurance, nor had the owner of the building, Mrs. Wallace. Two old wooden buildings, nearly opposite the Brant House, were pulled down; they were occupied by Joseph Wright, shoemaker and George Aird, butcher. Stock insured in Hartford for $200.

National Life Insurance Company of the U. S.—It is now about ten months since the establishment of this company, with a capital of a million dollars fully paid up, and we find that the magnitude of business that it transacted in the first nine months of its operations, is altogether unprecedented in the annals of life insurance corporations. The first three months must have been almost wholly sacrificed in preliminary arrangements, and yet at the end of three quarters of a year the company had issued 5,120 policies, insuring the immense sum of $14,537,600, on which the annual premium is $592,128,53. It is confidelity expected that by the end of the company's first year[the 1st of August] that it will have issued 2,000 more policies, thus adding about $3,009,000 more to the sum insured, and $250,000 more to its annual income, an achievement which no other company in the world has ever even remotely approached in the first year of its existence.—*N. Y. Insurance Journal.*

A Comparison.—The following is an interesting comparative table on Prussian and American insurance facts, which we find copied into the *Monitor*, from a Prussian paper:

1866.	All Prussia.	N. Y. State.
Value covered by Ins.	$5,440,000,000	$3,929,000,000
Premiums paid	12,054 924	32,282,000
Fire losses.....	8,639,268	23,962,000
Pre. pr. mille of value cov'd	2.22	8,22
Loss pr mille of value cov'd	1,59	6,10
Percentage of loss to pre...	71,07	74,20
Paid up capital.....	5,581,200	19,357,000
Nominal capital..	26,173,400	29,357,000

It will be seen that the average rate of premiums in Prussia is '22, while in New York it is '82. The losses on $5,440,000,000 of property covered were $8,639,208; and in New York, $23,962,000, on a value of only $3,929,000,000, or about three times as great.

—The steamer Her Majesty met with an accident to her hull, at Pictou, on her down trip to Halifax from the anchor of another vessel. The damage was soon repaired, and, with the consent of the underwriters she proceeded on her voyage.

—The barque Niagara from Greenock to Montreal and Hamilton, with a cargo of iron is reported abandoned at sea. She was owned by Mr. McAllister, of Windsor, and is said to be insured in the Provincial for $5,000.

—The following is a correct list of the insurance on the ill-fated Queen of the Lakes, which was destroyed by fire at Marquette, Lake Superior: Underwriters, $8,000; Security, of New York, $5,000; Home, of New Haven, $2,500; Roger Williams $2,500; National, of Boston, $2,000; total insurance, $20,000.

—Chatham has decided to purchase a steam fire engine.

Commercial.

—The following quantities of dry goods were imported into Montreal in the five months ending June 1st: -

	1868.	1869.
Carpets, &c.....	$67,493	$5,563
Cottons.....	1,494,811	1,481,543
Hats, Caps, &c.	150,526	123.282
Linen	193,701	199,273
Parasols, &c.....	25,898	20,181
Shawls.....	2,726	3,882
Silks, Satins and Velvets..	217,280	202,243
Woollens..... ...	1,127,701	934,310
	$3,285,136	$3,028,277

The total imports at Montreal from the 1st Jan. to the 1st June were $9,001,939, against $7,997,984 last year, an increase of $1,003.955.

—Mr. Isaac Briggs, of Gananoque, an extensive manufacturer of steel springs has absconded to the States, having liabilities of some $200,000. Great confidence was reposed in his integrity, and this he seems to have basely betrayed by getting the endorsement of his friends on his paper, many of whom it will probably bring to ruin. He owed the Bank of British North America some $55,000.

—It is not generally known that wool-growing in South America has grown into such mammoth proportions as it really has. Even the Australian breeders have cause for alarm from this competition. It is reported on good authority that the number of sheep shorn there exceed 70,000,000. The exports of wool to Europe and this country amounted to about 230,000,000 pounds.

—The estimated tobocco crop for 1868-'69 says the *St. Louis Journal of Commerce*, in Kentucky, Tennessee, Missouri, Indiana and Illinois, is 120,000 hogshead. The foreign requirements for the same year are estimated as follows: England, 25,000 hhds; Spain, 10,000; France, 9,000; Italy, 10,000; North Germany, 15,000; Belgium, 4,500; Mediterranean, 4.000; Portugal, 1,000; other countries, 3,000—a total of 82,000. The home consumption will be about 132,000 hhds.

Toronto Market.

Produce.—An advance of about 2 shillings in flour in Liverpool, has not only given a firm tone to our market, but caused a sharp upward turn in prices, the advance in flour being 40 to 50c., and in wheat 5 to 10cts. The rise is attributed to unfavorable weather in Europe, causing very serious apprehensions respecting the wheat crop. We copy elsewhere from the *Mark Lane Express*, an account of prospects up to a late date. *Wheat.*—Receipts—17,600 bush. and 16,000 bush. last week; stock in store on the 21st June, 69,909 bush. The market opened nominal at 93c. and sold up to 97½ and is held for an advance on that quotation; cars of fall sold at $1, it is firm at that prices. The total business of the week was unusually large. *Barley.*—Receipts and stocks very light; a car sold at quotations, but the market is now lower and cannot be quoted reliably. *Peas.*—Receipts light, stock on the 21st 13,300 bush., car loads are worth 74 to 75c. there being buyers at these quotations. *Oats.*—Receipts light, stock on the 21st 12,700 bush.; car loads sell at 52c. and are firm at that figure. *Corn.*—Nominal at 60c. in car loads.

Flour.—Receipts 2,200 brls., and 1,100 brls. last week. Stock in store on the 21st, only 5,930 brls. The market opened quiet at $4.00 to $4.10 for No. 1 superfine, with considerable sales within the range of these quotations, but subsequently sold up to $4.40 and $4.50, closing firm. Extra sold early in the week at $4.35, but advanced to $4.60 and $4.65. Nothing doing in the other grades, but are nominally higher.

Provisions.—*Butter*—is dull and nominal; stocks are accumulating in the country. *Pork*—is firmer, which has led to considerable importations. *Eggs*—are in fair demand for the home trade and for export at quotations. *Cheese*—lit doing; prices nominal.

Wool.—The market has been fairly suppli and the demand is quiet at 33 to 34c.; some sal of round lots were made at the latter figure; t market closes rather dull.

Hides.—There is a better feeling this week l no change in prices.

Freights.—The nominal rates are 3c. U. Currency, for grain to Oswewo; 2c. gold to Kin ston, by vessels; grain to Montreal, by steame 6c.; flour 20c., with a good deal going. The Gra Trunk rates to Liverpool are now as follows: flour, 4 shillings sterling; wheat, 8s. 9d. per q boxed meats, 55s per ton.

The following are the Grand Trunk Railw Company's summer rates from Toronto to the u dermentioned stations, which came into force the 19th ult. :—Flour to all Stations from Bel velle to Lynn, inclusive 25c ; grain, per 100 l 13c ; flour to Prescott, 30c ; grain 15c ; flour all stations between Island Pond and Portland, i clusive, 75c ; grain, 38c: flour to Boston, 8 gold ; grain 40c ; flour to Halifax, 90c ; flour St. John, 85c.

Halifax Market.

Breadstuffs.—June 15.—In consequence the reduced state of our stocks of Supers, hold are realizing an advance of 10c. on last wee quotations. The demand continues active, a the markets are quite bare of this descriptio White Wheats continue in good supply. Sales a effected in small way only at low rates. Consig ers would do well to consult their agents he before shipping Extras, as there is no outlet f them, the demand being merely a small local on and stocks are generally in excess. Fancy tak the place of Supers, and is in demand at quot tions. Stocks of No. 2's continue light, with go demand. Cornmeal in demand at quotatio Oatmeal—Stocks are large, without inquiry, a tendency still downward. We quote White Whe Extra $5.75; Fancy $5.50. Supf. $5.30 to $5.4 No. 2, $4.75. Imports from January 1st to Ju 15th. 1868 and 1869 :—

	Brls. Flour.	Brls. Cornme
1869.....	70,562	14,880
1868.....	80,607	27,343

West India Produce.—Sugars continue in tive at nominal rates. On Tuesday, at auctio a cargo of Demerara Molasses realized 36, 35 a 33, for bbls., tierces, and hhds. (duty paid) respe tively, other sales met with no bidders and t general tone of the market is unchanged. Ru is in demand, stocks light.

Fish and Oil.—We note the arrival of a car of Codfish, and expect to see the new crop comi forward in a few days, and be enabled to hav quotations on new transactions. Codfish are i active request for local wants. Herring in deman stocks of fat, small. Oils continue nominal, n new lots being offered; the markets are unopene Stocks of old are very much reduced.

Exchange.—Bank drafts, London, at 60 day at 12½ per cent. Montreal, sight, 3½ per cen St. John, N.B., 3 per c. prem.—*R. C. Hamilt & Co.'s Circular.*

Review of the British Corn Trade.

Although the aspect of the wheat varies co siderably, it is generally too strong for much cor without some thoroughly dry and warm weathe Should this set in the plant would soon lose i yellow aspect, and we might expect an averag yield. In some parts of France the ear begins t show itself, and more rain is greatly feared prices, therefore, both of wheat and flour, hav advanced somewhat in Paris, and still more i some other places. Belgium, Holland and man parts of Germany show the same state of thing brought about it would seem, from reports o injury by frosts in Hungary. Whether they wi seriously reduce the corn crop we shall be abl shortly to judge; but rapeseed has certainly re ceived damage enough to diminish the yield

Reasoning from the past, there seems a probability that the character of this season is likely to be extremely variable; and, if our blooming period should be caught by driving rains or frost, we may fare even worse than in 1867, from the circumstance of the great abundance of plants. The pastures, too, from want of warmth, do not promise as well as they did, as no growth can be made at night at such a low temperature. There is enough therefore, in the present, to check any idea of plenty, while, in the event of serious failure, there is nowhere such an accumulation of stocks as to make the British public independent of home supplies. California and the Western States would then be our principle granaries, but they would not suffice to fill up the want incurred by one great national failure. Algeria is in full harvest, with fairer prospects as to quality than ever. The arrivals off the coast since May were twenty-five cargoes, of which six were wheat, fourteen maize, five barley,—*Mark Lane Express, May* 24.

Nova Scotia Coal.

We give the following statements of the coal raised and sold in the Province during the years ending September 30, 1866, 1867, and 1868:

	1866.	1867.	1868.
Cumberland Co..	16,449	9,819	10,470
Pictou County...	205,730	132,609	125,034
Cape Breton.....	379,124	349,649	276,754
Total Tons.....	601,303	492,077	412,258

—*Eastern Chronicle.*

Cotton.

The following is a statement showing the stocks of cotton in Liverpool and London, and also the stocks of American and Indian produce ascertained to be afloat to those ports:—

	1868.	1869.
Stock in Liverpool,...bales	648,820	392,130
" London	37,360	71,170
American cotton afloat.....	110,000	140,000
Indian "	441,470	608,850
Total.....	1,237,650	1,212,150

—*Financial Chronicle.*

Petroleum.

The Titusville *Herald's* report on the Pennsylvania region for the month ending May 31st, says:

Under a large falling off in the product of the wells in the other districts, and but a moderate degree of success in the development of new territory, there was a considerable decrease in the period under review, and the daily average, as shown by the difference between the stocks at the beginning and the close of the month and the shipments meantime, was 10,153 barrels or about 900 barrels less than the daily average during April, and an increase of about 375 barrels over the average for March. The decrease in the oil districts was caused by the gradual failing of the wells, and by but few of the old wells having been torpedoed and rescusitated.

The number of wells in process of drilling increased during May, and on June 1st the total number in all parts of the region was 345, against 333 on the 1st May. There was a decrease in the Pleasantville District, where about 25 wells were completed, while operations were commenced on only about 8. On Cherry Tree Run there was also a decrease, but in other parts of the region there was no great change.

The stock of petroleum did not undergo any important change during May. The amount in iron tankage was decreased about 10,000 barrels, and the stock at the wells about 6,000, while the stock in wooden storage tanks in the hands of refiners, dealers and pipe companies was enlarged about 16,000 barrels. The last named stock aggregated about 22,850 barrels, and was situated as follows: At Oil City 300 barrels, on the Rynd Farm 1,100, on Cherry Tree Run 1,800. at Petroleum Centre 3,400, on the Story Farm 2,850, at Miller 2,100, on Bull Run 1,000, at Titusville 1,400, and at Pithole 2,900.

Of the amount of unmerchantable oil at the wells, 3,000, barrels, which were included in the stock on May 1st, were not reported on June 1st. There is still eight to ten thousand barrels of the the above quality of oil at the wells, and about 30,000 barrels in iron tankage.

Crops in the States.

With regard to the next cotton crop, the increased area of cultivation, the improved implements and better conditioned animals now employed by the planters, and the larger means at the disposal of the latter, leave little doubt that the aggregate attained will approach 3,000,000 bales. Along the Mississippi, from the Red River, through, and in upper Louisiana, a backward season, and protracted cold rains, of which we are having our full share at the North, somewhat darken the prospects of cotton, but it is believed that the augmented planting elsewhere will compensate for the deficiency there. Near Baton Rouge, La., the planters have already begun to scrape out their cotton, and the crops in the adjacent section are very promising. In Georgia, they are rapidly reviving, and the negro laborers, having had their fill of politics, are again heartily at work. In fine, none are likely to be disappointed excepting speculators, who have been counting upon a deficient yield for this year, at the South. This favorable return is accompanied by glowing accounts from the cereals in all quarters. The wheat harvest will be particularly fine both at the South and the West, and the harvest has already commenced in several counties in Texas. In California, the corn was 18 inches high about the 1st of June. The fruit crop in all parts of the West will be large, and of very fine quality. In New York and Ohio, the apples are thriving admirably, and in Maryland and Deleware peaches are promising. In New Jersey, the crops look well.—*N. Y. Mercantile Journal, June 17th.*

WESTERN CANADA

Permanent Building and Savings Society.

DIVIDEND NO. 12.

NOTICE is hereby given, that a Dividend of Five per cent. on the Capital Stock of this Institution has been declared for the half-year ending 29th inst. and that the same will be payable at the Office of the Society, No. 70 Church Street, on and after THURSDAY, the EIGHTH day of JULY next.

The Transfer Books will be closed from the 20th to the 30th June, inclusive.

By order of the Board.

WALTER S. LEE,

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES.

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

FOR North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expense, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example:—

Articles.	Prices per ton.	Cash discount.
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscriptiou is 52s. or $13 (gold) per annum, payable in advance.

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:

HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ...Ottawa.
EDWARD A. C. PEW, Esq.,..... .....Welland.

TRUSTEES OF THE LANDS:

PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:

CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:

MESSRS. CAMPBELL AND CASSELLS,.....32 King Street Toronto.

SOLICITORS:

MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:

JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company. A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon. Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.

May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.

Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved imachinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.

Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (35-1y) DAVID HIGGINS, SECRETARY.

ZEPHANIAH PRESTON, VICE PRESIDENT.
LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 75,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $21,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.

SURPLUS ASSETS, $6,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.

ITS DIVIDENDS—Have averaged over 50 per cent. aunually. Total amount of dividends paid the members since its organization, $4,397,142.

ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $6,863,523.

ITS RESPONSIBILITY—For every $1 0 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,836 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.

The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.

ITS LIBERALITY—It accommodates the insured by giving credit for part premium, and grants insurance to meet all the contingencies and wants to which Life Insurance is applicable.

It issues policies on a single life from $100 to $25,000.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Insurance.

Briton Medical and General Life Association,
with which is united the
BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :
Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family,* and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

ANNUAL REPORT

AND

QUINQUENNIAL LIFE INVESTIGATION.

THE REPORT AND ACCOUNTS for the year 1868, presented to the Shareholders at the ANNUAL MEETING, on Thursday, 27th May, 1869 at which BERNARD HALL, Esq., Chairman of the Company, presided, showed, in the

LIFE BRANCH,

That 565 POLICIES had been completed and issued, insuring the sum of	£235,246
Yielding in NEW PREMIUMS	6,697
That there was ADDED TO THE LIFE FUND a sum equal to 69 per cent. of the Net Premiums, viz.	25,313
Increasing that FUND from £84,840 to	110,153

The Actuary, in his Report to the Directors on the results of the last five years, remarks as follows :—

"As in the case of my investigation for the period ending in 1863, the calculations were based upon the Carlisle bills of mortality, and upon th assumption that not more 3 per cent. interest would be realized on the Life Premium accumulations. Further, all loadings were discarded, the pur Premiums only being taken into consideration ; and when extra rates had been charged, for foreign residence or any other cause, the office ages wer fixed accordingly.

"It is, I believe, mainly owing to the publicity given to the searching nature of our first investigation that, during the period under review, th new business transacted by the Company has attained its present magnitude. The amount assured was £1,412,466, as compared with £718,385 assur during our first quinquennium ; and the new Premiums were £40,400, as contrasted with £21,292, while the life fund, which at the close of the firs quinquennium stood at £29,339, had increased at the close of the second to £110,153."

IN THE

FIRE BRANCH,

That the PREMIUMS for 1868, after deducting re-insurances, amounted to	£122,129
Being an INCREASE of	18,141

on the Net income of 1867.

A portion of the Balance at the disposal of the Shareholders was appropriated in payment of a Dividend of 7 per cent.
The Fire Reserved Fund was increased to £80,000 by the addition of £4,571.
And the sum of £3,133 was carried forward to next year's Accounts.

A Bonus averaging 40 per cent. of the Premiums paid was declared to holders of ordinary Participating Life Policies.

THE INCOME OF THE COMANY WAS SHOWN TO BE	**£217,876**
AND THE FUNDS IN HAND	**433,464**

Insurance.

FIRE RE-INSURANCE FUND.

The following is from advance sheets of Superintendent Barnes' report on the Insurance business of the State of New York, for 1868:—

One of the most flexible items in Fire Insurance statements has generally been the re-insurance reserve. Before the organization of the Insurance Department, many sanguine officers were accustomed entirely to ignore the future probable loss on their existing policies as creating any kind of liability to be recognized on the debit side of their accounts; and the unearned premiums received, as well as the funds applicable to the payment of fixed and absolute debts, were cooly set down on the credit side as surplus assets. The Comptrollers' Insurance Reports for the years 1853, 1854, 1855, 1856 and 1857, were all made on this theory. In 1855 the Superintendent, as a special Commissioner under Comptroller James M. Cook, examined several fraudulent organizations in the City of New York; the special reports in these cases first introduced the practice of charging among the liabilities the unearned premium or sum necessary to re-iusure all outstanding risks. In the Comptroller's Insurance Report for 1858, this liability was recognized for the first time, and was fixed at an average of forty per cent. of the premiums received on unexpired risks. The same rule was necesarily pursued in the Superintendent's first annual report for the calendar year 1859.

In the Superintendent's Reports for the years 1860, 1861, 1862, 1863 and 1864, re-insurance was carried inside (as a check) at fifty per cent. of the premiums on unexpired risks, but was carried outside and into the column of Liabilities, at the sum estimated therefor by the officers, which was generally forty per cent. of unexpired premiums. Some companies, however, especially those with impaired capitals, estimated this liability at less than this standard, and considerable dissatisfaction was created in consequence of allowing this discretion to the officers, resulting, as was evident, in several under-estimates. Under these circumstances, and an Act having been passed inhibiting the declaration of any dividend without a reservation of at least fifty per cent. of the premiums on unexpired risks, the standard for re-insurance was fixed at this percentage, throwing inside for information the company's own estimate. The Insurance Reports for the calendar years 1865, 1866 and 1867, were made upon this rule. The fifty per cent. uniform standard, however, failed to give entire satisfaction. The Executive Committee of the National Board of Fire Underwriters, at their Chicago meeting in October, 1868, recommended to the Supervising insurance officers of the several States the adoption of forty per cent. of the gross premiums received on Fire risks during the year as a proper Fire re-insurance reserve.

This rule operates well in many cases, but in others it is grossly erroneous or insufficient. In order to show its practical effect, and to compare the re-insurance funds of the different companies, a Table has been prepared showing the application of the forty per cent. premium-income rule, the company's own estimate, and the amount charged to each company by the Department standard, as per the statements for 1868. In revising the Fire blank last year, it was determined, after considerable examination and consultation with insurance officers, to fix the standard at one-half of the premiums received and receivable on Fire risks running less than one year, and at *pro rata* rates for longer Fire risks, inland risks to be charged at one-half the premium, and Marine risks at the full amount of premiums thereon. This mode of estimating re-insurance is considered the best yet devised, as being the most accurate and well adapted to the peculiar situation of any and all companies. In addition to the percentage of the deposit or principal returnable on perpetual fire risks, one-half of the interest premium or sum received or receivable thereon for the current year is charged to the company.

PRUDENTIAL INSURANCE COMPANY.

Hon. Elizur Wright has supplied a paper to the *Insurance Times* on British Life Insurance, in which he takes the above company severely to task. "Their advertisement," he says, "which expatiates with much rose-color on the advantages of their *new* style of policy, is signed by Henry Harben, Sec. This is the same irrepressible gentleman, and the same *prudential* society which received, in 1864, a first-rate notice from Mr. Gladstone. In that remarkable speech of Mr. Gladstone, I find the following words in regard to the balance-sheet of this society, in addition to those quoted in my report :—'As it stands, it presents a balance of £41,000 in favor of the society, but it has been examined by actuaries, and these gentlemen, proceeding upon principles which are no more open to question than a proposition in Euclid, say, that instead of a balance of £41,000 in favor of, there is one of £30,000 against the society. There was, it is true, a capital of £45,000 not paid up, and which, if paid up, would undoubtedly more than liquidate this balance ; but all I can say is, that in 1861, when its balance-sheet was published, it did not appear to be in contemplation to demand that it should be paid up, and the account stands as I have said.'

"According to their highly delusive balance sheet, the balance in favor of the society has arisen to three times that claimed in 1861, and is entered in this curious and peculiar phraseology:

"Surplus available for future bonus, subject to revaluation of policies.....£124,515 8s. 7d.

The cause of the queer little cloud of uncertainty which is left hanging over this interesting item, will be explained by and by.

"The directors' report informs us that besides swallowing up 'a small but most respectable company,' with a premium income 'amounting to £15,375 15s. 9d. per annum,' the society has realized a premium income on its own business of £220,978 0s. 10d. during the last year, and has paid claims during the year amounting to $67,181 10s. 5d., 'raising the total disbursed under this head since the establishment of the company to £480,986 18s. 3d.;' yet it does not state the amount of the policies outstanding, neither can I find that statement in the company's advertisement or in the enthusiastic report of its annual meeting. A company dealing principally in ordinary whole-life policies, and receiving premiums, which, as it appears from this report,

are, on the whole, equivalent to the Carlisle net at 3 per cent., loaded 21.77 per cent. to the amount of £220,978 per annum, would necessarily have about £7,500,000 insured, and with a pretty regular growth from 1848, receiving by Carlisle 3 per cent., should have a premium reserve of about £600,000, probably more rather than less. The whole actual fund which it claims to have is £241,361 12s. 4d. It is true that outside of the 'balance-sheet,' the directors speak of a 'Proprietors' Fund Account, amounting to £45,449 14s. 6d.,' which swells the 'assets' to £286,751 6s. 10d.; but if this fund had any existence, it must have been 'paid up' since Mr. Gladstone's speech, and it would appear on both sides of the 'balance-sheet.' This remarkable sheet, omitting the details of investment in some dozen kinds of antipodal securities, is as follows :

Assurance Fund Accounts, 31st Dec., 1869.

Dr.			
To present value of sums assured as per Actuary's valuation (at Carlisle 3 per cent.,) as on 31st Dec., 1868	£542,033	0	0
Bonus on Policies	16,852	3	9
[Sundry guarantee funds, &c.]	3,045	0	0
Surplus available for future bonus, subject to revaluation of policies	124,515	8	7
	£686,445	12	4

Cr.			
*By present value of pure net premiums receivable as per Actuary's valuation (at Carlisle 3 per cent) as on 31st Dec., 1866	£445,144	0	0
[By investments and cash]	241,311	12	4
	£686,445	12	4

"Now, supposing the figures of this 'balance-sheet' all perfectly honest and correct, it could not show the condition of the company on the 31st Dec., 1868, because the valuation of the policies was for Dec. 31, 1866, two years earlier, when the premium income, according to Mr. Harben's statement, was £154,000. A very good reason why the authors of such a trick should make the 'surplus' alleged 'subject' to another valuation. But the figures cannot possibly be *all* honest. If Mr. Harben spoke the truth when he told the annual meeting that the premium income in 1866 was £154,000, and if the relation stated between the premiums and loading in the balance sheet and its note is at all near the truth, it follows that if the policies had all been entered for life at the age of 60, the insurance outstanding Dec. 31, 1866, must have been £2,185,000, and the net present value of it, even if we suppose it all entered that year, could not be less than £1,454,000. If it had all been entered at 40, the sum insured would have been £4,864,000, and its present value at the least £2,274,000. Or, if we suppose it all entered at 20, the sum insured was then £8,468,000, and it present value, by Carlisle 3 per cent., was at least £2,870,000. But the balance sheet debits, as by an actuary's valuation for Dec. 31, 1866, the society, with precisely £542,033 as the present value of the sums assured, with £16,852 3s. 8d. as the present value of the bonus additions. As to the actuary's calculations of the present value of the sums assured, it is pretty obvious that if Mr. Harben gave him the data of policies having a premium income of £154,000, to operate upon, the only mental faculty he could have exercised to reach his result was the will. The Carlisle 3 per cent. table is as stubborn as any other fact, and it proclaims that Mr. Harben and this actuary cannot be reconciled without either dividing the figures of the former or multiplying those of the latter by about 4. In short, and in plain Saxon, somebody has lied for the purpose of converting a huge and fatal deficit into a surplus of £124,515 8s. 7d.

"The false debit of £542,033 is offset by a credit of £445,144 as present value of the 'pure premiums.' Of course the difference £96,889 should be the net value of the policies, and it is curious to observe that this is also within two shillings the 'present value of the loading' as given in the note to the directors balance sheet. The Society in 1866, when this marvelous valuation was made, had been running some 18 years, and, according to Mr. Harben's statement, had received during the 10 years immediately preceding, to say nothing of the previous 8 years, £606,297 in premiums, of which it appears that about £497,163 must have been 'pure premiums' and out of all this the valuation tells us only £96,889 needs to be on hand! Mr. Harben says in 1869, on the strength of this valuation in 1866, "we have more than we want." The directors accordingly voted a dividend of 5 per cent to the pure water of the stock, and one of the stockholders, a Mr. Cheffereil, whose name would seem to imply that he had faith in figures, argued stoutly that it should be more."

*The pure net premiums only were valued, the present value of the loading not taken into account, is £95,867 3s., which is reserved for future bonuses and expenses.

NON-FORFEITURE.

A bill before the New York Legislature providing, in imitation of the admirable example of Massachusetts, for the prevention of forfeiture of policies in any case, was finally rejected. The *Weekly Circular* says that "the money power of the companies opposed to abolishing forfeiture was too strong for the virtue of the promoters of the bill. Some report that the bill was only brought forward by parties who speculated on being bought up."

Be this as it may, the fact remains that the opposition arrayed against the bill was sufficiently strong to prevent its passage. Companies which have made hundreds of thousands by the lapsing of policies are loath to give up, and evidently will not give up, without a struggle, so fruitful a source of surplus revenue. The Mutual Life added millions to its coffers from Southern policy-holders who were cut off by the war from communication with the office or its agents, and thereby was enabled to declare immense dividends to those who were in no sense equitably entitled to them. But an opportunity for plunder and robbery on a scale of such unusual magnitude is not likely to occur again for generations, and those who, instead of insuring for the sake of insurance, invest simply for dividends, as if dividends were the end, aim, endeavor, and all in all of insurance, must henceforth lessen their expectations, or prepare for disappointment.

Except those who have given some attention to the statistics of cancellation of policies by lapsing, no persons have any conception of the large per centage of policies allowed to lapse, as shown in official records. In many cases the losses incurred by policy-holders in this way result from misfortune and consequent inability to make renewal payments, but in a general proportion of instances it is found that the applications were originally obtained through deceptive and illusory promises, or wrested from the hands of unwillingness by ceaseless importunity. In either of these cases if there is any sum remaining over and beyond the amount actually required to keep up the risk, its retention by the company is a wrong which conflicts with the tone and temper of the present age. The party insured is entitled to a full equivalent for every dollar paid in, and the Company is morally, at least, if not legally bound for this equivalent.

The State of Massachusetts enjoy the signal honor of requiring by its statute law that policies be kept in force until the premium is exhausted. The net value of a policy allowed to lapse must be used as a single premium to purchase a term assurance. Some of the New York companies, impressed with the equity of this arrangement, and also as a politic measure, have adopted a similar plan. What they lose by thus surrendering to the assured the amounts which under the old regime they would have appropriated to their own uses, they gain in the confidence and respect of the business community.

What yet remains for these progressive companies to do is to convince the public that a dividend is an incidental or supplementary affair, and n the primary object of Insurance, as might be i ferred from the everlasting harping of some of t agents. When the non-forfeiture feature comes be generally adopted, dividends will proportio ately diminish, but all right thinking policy-hol ers will enjoy the satisfaction which will a from the consciousness that they are not fatteni upon the misfortunes of others.—*Baltimore Und writer.*

FIRE RECORD.—The Chaudiere, June 17. H. McCormick's grist mill was destroyed; part the machinery was saved. The building was i sured for $4,000 in the Ætna. McCormic stock was insured, says a local paper, for $7,5 in Liverpool & London & Globe, and $1,500 another company. Value of property destroy estimated at $14,000.

Oakville, June 20.—The Presbyterian ma was consumed; insured in Provincial for $300.

Granby, June —The residence of Peter B has been destroyed by fire. Insured for $275.

Dalhousie, N. B., June.—A fire partly destr ed a house belonging to the estate of P. Hay insured for $800.

St. Catharines, June 26.—A two-storey fra building on the corner of Ontario street a Cherry Alley, occupied by several families, v destroyed by fire. Loss about $800.

St. John, N.B., June 23.—Hon. McSeely's s mill was totally destroyed by fire; loss estima at $300,000, insurance at $10,600.

—The Norwegian barque *Glenter*, bound Quebec, iron laden, from Greenock, and consig to Winn & Hallard, Montreal, has been lost Bird Rock. All hands were saved and have rived at Montreal.

THE AVERAGE CLAUSE.—The form of Aver Clause as laid down in Hine's Form Book, be form No. 64, runs as follows:—"It is understo and agreed that claims under this policy shall o be for such proportion of the whole loss as amount of this insurance bears to the whole va of the property insured."

A set of policies has recently been issued which the clause reads "amount of the insuran instead of "this insurance."

The value of the property is	$200,
The whole insurance is	100,
And the loss is	10,

The question is what would be the limit claim upon a $10,000 policy, with the ave clause reading "the insurance" instead of " insurance." Each contract is, from one poin view, sole and separate, and if it agrees to liable for such proportion of the loss as the in ance bears to the value, it could certainly, un that reading, be made to answer for one-hal any loss not exceeding the sum it insured, beca the proportion of "the insurance" is, to the va of the property just one-half ; and for a par loss such an average clause would be practic inoperative, and the insured could collect whole claim up to the amount of $100,000, be it is so written in the bond.

Had the average clause been written "this surance" it would have applied as Underwri always iutend that clause to apply, and amount of claim would have been limited to s proportion of the whole loss as the whole v bears to the particular policy. This is a very portant distinction and should be thoroughly derstood by all who use that clause.—*Monitor.*

COMPANY LIABLE FOR ACTS OF AGENT.— doctrine has been again affirmed in a case dec May 14, against the St. Marks Fire Insur Company. This action was brought in the C of Common Pleas, of New York, part 2, term, to recover $2,500 on a policy of insur against fire, issued to E. S. Green. The plai applied for insurance on property in Trenton, Jersey, to an insurance agent named Phillip Trenton. Phillips applied to Mr. Smith, a York agent, who procured the policy from

ompany and transmitted it to Phillips, who delivered it to plaintiff, and received from him his ote for the amount of the premium, which was fterwards paid. Phillips never transmitted the ioney to Smith, and Smith never paid the Comany, though there was some testimony tending show that the Company might have charged e amount of the premium to Smith's account. he policy contained a receipt for the amount of e premium, and the Court held that the Comany having placed it in the power of the agent deliver the policy to the plaintiff with such ceipt attached, the Company became bound by , and the plaintiff was entitled to recover. The ry was directed to find for the plaintiff the full nount claimed. It is observable that the term gent is used instead of Broker, and it may be at this decision is based upon facts dissimilar those that have held the broker procuring suranee to be the agent of the insured and not the Company.

Losses by fire in the States.—The losses fire throughout the States for the month of ay, not under $20,000 in value, or upwards of ,830,000, or upwards of $2,000,000 more than ose of the corresponding month of 1868. Notthstanding this great disparity of figures the schief of the fires of 1868 is still greater than e destruction of 1869 by $467,000, as will apar by the following statement:

	1868.	1869.
sses in January	$5,494,000	$3,294,000
February	4,399,000	2,637,000
Mareh	2,405,000	2,892,000
April	2,890,000	3,880,000
May	1,812,000	3,830,000
	$17,000,000	$16,533,000

Thus the advantage received in the first three nths of the current year was lost in the last), for whilst there was a differenee in January, ruary, and March of $3,471,000, that favore balanee has been reduced to $467,000 by the ater losses of the last two months, whieh toher amount to $7,710,000.—*N. Y. Insurance rnal.*

Proxies.—It is a practiee with the offieers of ie companies to ask of poliey-holders their xies to vote eleetions, and to instruct the nts to procure them when issuing policies. y are thus enabled to put in their own friends directors, and control the entire assets of the pany. The power thus obtained is often sed. A correspondent suggests as a remedy, enaetment by the Legislature, of a law that tates should be east by the officers to solicit xies themselves or through others. It would vell, also, to have the following questions d by a committee of the Legislature of the ers of the several companies in this city: at amount has been paid sinee the establishnt of this Company to the offieers of the Com, or their relatives, as eommissions on future niums, giving names, dates, and amounts to eaeh? What proportion of the votes for ctors were east by offieers or their friends ing proxies?

Duldn't be Fooled Twice.—A certain Dutehn, owner of a small house, ha l effected an Inance on it of eight hundred pounds, although d been built for much less. The house got t down, and the Dutehman then claimed the amount for which it had been insured; but ffieers of the company refused to pay more the actual value—about 600 pounds. He essed his dissatisfaction in powerful broken ish, interlarding his remarks with some ehoice onie oaths. "If you wish it," said the ac- of the insuranee ecmpany, "we will build house larger and better than the one burned , as we are positive it can be done for even han six hundred pounds." To this proposithe Dutchman objected, and was at last compelled to take the six hundred pounds. Some weeks after he had received the money, he was called upon by the same agent, who wanted him to take out a policy of life insurance on himself or on his wife. "If you insure your wife's life for £2,000," the agent said, "and she should die, you would have the sum to solace your heart." "You 'surance fellows ish all tiefs!" said the Dutchman. "If I insure my vife, and my vife dies, and if I goes to the office to get my two thousand pounds, do I gits all de money? No, not quite. You will say to me, "She vasn't vert two thousand pounds; she vas vert 'bout six hundred. If you don't like de six hundred pounds, ve vill give you a bigger and better vife!"

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

The business of the week has been large considering the many transfer books that are closed, and there is a good demand for nearly all securities at quoted rates.

Bank Stock.—There were small sales of Montreal at 161½ and 161¾, closing with buyers at 161¼. British is quoted at 104 ex-dividend. There were large sales of Ontario at 95½, 96 96½ and 97; stoek was offering on the 29th at 96¾. Toronto has advaneed, sales have been made at 120½ ex-dividend, which rate could readily be had. No sales of Royal Canadian. Commerce sold to a considerable extent at 100 and 100½ ex-dividend, and there is a fair demand at the latter rate. Buyers have advaneed their offers for Gore to 39; little in market. Merchants' has advanced with sales from 108 to 110 ex dividend; there are buyers at the latter rate. Quebec is offering in small lots at par. Buyers offer 108½ for Molsons', no late sales. There are buyers and sellers of City at 98½ and 99 respectively. Sales of Du Peuple were made at 108 which rate eould still be obtained for small lots. There were sales of Jacques Cartier at 107, and the stock is in demand. Other banks nominal.

Debentures.—Dominion Stoek is offered at 107½ and Canada currency six per cents at 105; no sterling bonds in market. Toronto offeriug to pay about 7⅛ per eent. interest. There were sales of County at 99½ and 100 for small lots.

Sundries—There are buyers of City Gas at 107, none in market. British America Assurance is offering at 57 with buyers at 56. There were small sales of Canada Permanent Building Society at 120½ ex dividend, books closed. No sales of Western Canada Building Society, books elosed. No Freehold Building Society in market, buvers have advaneed to 116. There are buyers of Montreal Telegraph at 135½ and sellers at 136½. Considerable sales of Canada Landed Credit were made at 78, 78½ and 79, it is asked for at the latter rate. One or two large mortgages were offering at 8 per eent.

ROYAL CANADIAN BANK.

A meeting of delegates appointed at the rural agencies, and of the Toronto shareholders, was held in this city on the 25th June. The President of the Bank, Mr. Metcalfe, occupied the chair. There was a large attendance of delegates and Toronto stock holders.

The Chairman, in opening the proceedings, said the object of the meeting was that those interested in the affairs of the Bank might have certain statements laid before them, from which they might be able to judge of the condition of the concern, and to come to some conclusion as to what should be done in the future.

The Chairman then read the following report of the state of the financial position of the Bank up to the 19th of June, 1869:—

Capital authorized by Act	$2,000,000 00
" paid up	1,172,613 00
Promissory notes in circulation bearing interest	505,430 00
Balance due other Banks	33,248 94
Cash deposits not bearing interest	202,102 40
Cash deposits bearing interest	422,869 97
Total liabilities	$1,163,711 31

ASSETS.

Coin, &e	$173,220 91
Real Estate, &e	13,464 65
Government Securities	128,911 10
Notes on other Banks	47,453 99
Balances due from other Banks	51,939 49
Notes and Bills discounted	1,853,308 82

The Chairman then made a lengthened statement, showing the transactions of the various agencies, from which it appeared that the losses were to the following amounts:—

LOSSES.

Bowmanville	$1,000 00
Brampton	2,000 00
Chatham	1,500 00
Clinton	1,104 53
Cobourg	89,084 00
Fergus	250 00
Galt	Nil.
Goderich	1,952 00
Hamilton	4,493 09
Kingston	32,331 00
Montreal	3,900 00
Newmarket	3,119 29
Paris	14,322 00
Perth	1,497 00
Peterborough	1,160 00
Port Hope	Nil.
Port Credit	Nil.
Seaforth	58,624 00
St. Catharines	Not known.
Stratford	2,600 00
Whitby	2,851 00
Woodstoek	7,000 00
Toronto	70,087 00
Ottawa	2,084 61
Total bills diseounted	$41,960,598 00
Total loss	300,962 00
Total profit	704,078 00
Total Stoek paid up	1,170,438 00
Expenses	236,244 00
Net Profits	467,834 00

The proceedings were very lengthy, occupying most of the afternoon, and were continued in the evening. In answer to an inquiry, the President stated that the overdue bills discounted were now $497,779. It was stated also that the liabilities are being redueed, sinee the suspension, at the rate of $150,000 a week. The discussion was mostly relative to the affairs of some of the agencies, especially those at Kingston, Seaforth, and Cobourg, and to a large number of personal matters of little eousequence to the public. A committee was appointed, which proposed the following gentlemen as the future directors of the company: Peleg Howland, President; J. H. Dumble, J. Crombie, K. Chisholm, J. Taylor, Jos. Gould, J. McGee. The motion for the adoption of the report in favor of these gentlemen was carried by 31 yeas against 23 nays. The proceedings then terminated.

Post Office Savings Banks.—The returns for May show $729.303.22 to have been in the hands of the Receiver-General on the 30th April. Amount received during May from depositors $84.831; interests paid on closed accounts $519.72; withdrawals during May $43,269.11. In hands of Receiver-General 31st May $771,389.83. The sum of $435,409.05 bears interest at 4 per cent and $333,000 at 5 per eent; bearing no interest $2,980.78

—The Bank of Commerce has opened a branch at Simcoe,

MR. SMALL'S DISMISSAL.

The following is a summary of a correspondence published by Mr. J. C. Small, late Inspector of the Royal Canadian Bank. On the 15th July, Mr. Small received this notice from the Cashier: I am instructed by the Board of Directors to notify you that your service are dispensed with from this date.

Mr. Small considered this short notice and decided to stand on his rights. The Cashier replied, admitting his right of applying to the courts for redress if he thought himself improperly used. On the 27th, Mr. Small addressed the Board as follows: Having consulted my legal advisers, Messrs. Cameron & McMichael, as to the best course to pursue to obtain redress for my summary and wrongful dismissal from the office of Inspector of the Royal Canadian Bank, by the Cashier, Mr. Woodside, under the authority of an alleged resolution of the Board of Directors, I am advised that although an action at law may lie, my covenant to the Bank, will stand in the way of the recovery of substantial damages, and that my best course will be to appeal to a special general meeting of the shareholders of Bank, called in accordance with the 9th Section of the Act of Incorporation. But before taking the necessary steps to procure that meeting, I am advised to state my case for the reconsideration of the Board —and first let me premise, I am not aware of having failed in the slightest degree in the faithful discharge of my duties to the Bank—but without being favored with any official intimation of the ground or cause for my dismissal, am informed by letters of the Cashier, without any previous notification whatever, that my services are no longer required, and so go forth to the world to seek employment with the brand of a discarded servant upon me, and the difficulty of getting employment thus greatly increased. It ought not, therefore, to be matter of wonder, if so deprived of the means of living, I endeavor to set myself right with the shareholders whose interests I have tried to protect, and to manifest that the interests of the Bank are not safe in the hands of those who will dismiss a faithful servant for the discharge of his duty. Not, as I said before, being favored with the ground of my dismissal, I can only look for it in the rumors that are current on the subject, and in the acts of duty I have performed which may have given offence to some of those who sit at the Board of Directors. First, then, as to the rumors—it is said my dismissal was owing to the fact that I had exerted myself to secure the re-election of some members of the Board, and to defeat others. The truth of this rumor I deny. I did not interfere in the election; but, if I had done so, I am advised as a shareholder, I had a perfect right to do so—that I owed no duty to the Directors personally, but was bound to obey their orders as the managing body of the Corporation, which, in all things, I believe, I did —that Directors are only annual trustees, whom to endeavor to change does not amount to treason or breach of duty to the Bank, and would not prevent the efficient discharge of my official duty.

Secondly—it is said—that I connived with the late President, Mr. Smith, to bring about the removal of the Cashier, Mr. Woodside, and to take his place. This, I most emphatically deny—it was never in the remotest degree hinted between Mr. Smith and myself that I should get the Cashier's place, and it did not enter my head. If these rumours had anything to do with the action of the Board in common fairness, and as a matter of business, I should have been informed of them and asked for an explanation then. In the discharge of my duty, has there been anything to give offence to the Directors? I can only recall two things,—my inspection of the Cashier's cash, under the direction of the President, which, if wrong, ought not to have attached any blame to me; but to the President who ordered me to make it—and secondly my report, showing among other things the amount of accommodation enjoyed by individual directors upon the security of notes without endorsers. This report was made as part of and in the discharge of my duty. If the facts stated in it were known to the directors collectively, no harm could be done thereby—if they were not known, then they ought to have been reported, because the accommodation received was in direct violation of sections 5 and 10 of the By-laws of the Bank; and under any circumstances, it was my duty in making my report upon the condition of the affairs of the Bank at the head office, and its management to report the unusual state of things I found existing.

The existence of the matters reported must have been wrong, or the report ought not to have given offence. But was it an offence against the interests of the Bank? If not, why should it have led to my dismissal? And who will boldly affirm that in making that report one thing was stated that in the interests of the shareholders, the depositors, and the public dealing with the bank ought not to have been stated? If an Inspector is not allowed to discharge his duty fearlessly, what use is he? Had his salary not better be saved to the bank? Having done my duty while in the bank faithfully, and having done nothing except this, that I can imagine, that could have given annoyance to the directors, I may fairly be pardoned for adopting it as the reason why I was dismissed, and if so, I have strong and just cause to appeal to a special general meeting of the shareholders from your unjust and harsh treatment of me. I am advised by my legal advisers above referred to, that my dismissal on this ground, and the discounts in favour of directors reported by me as well as other matters referred to in said report, was a mal-administration of the affairs of the bank —properly the subject for a call of a special general meeting—that such meeting must be called by public notice, setting forth the cause of the call and the names of the directors taking part in the mal-administration, and having no feeling of hostility against any member of the Board, and no desire to give publicity to the dealings of any of the directors other than in the way in which my duty called upon me to do; but determined that I shall not be turned upon the world as a man who had misconducted himself, with prospects blighted. I make this statement to you, in the hope that you will right the wrong done me, to some extent, by giving me a certificate under the hand of the Inspector, that I have faithfully and efficiently discharged the duties of Inspector while I was in the employ of the bank—and an additional quarter's salary—and I would request the Board, while considering this proposition, not to forget that my conduct is approved of by members of the Board pecuniarily interested in the bank as shareholders, to an amount greater than the whole stock held by those passing the resolution for my dismissal; and I wish it to be understood that I am writing nothing with the view of giving offence to any. I am merely stating my case, and basing it upon the facts, as I believe them to be in self-justification, and in advocacy of my own rights.

This receipt of the epistle not being acknowledged, Mr. S. on the 30th wrote—"I presume you do not deem the same of sufficient importance to notice; nevertheless, I take the liberty of sending you a copy of the notice which it is my intention to submit to certain of the shareholders with the view of getting their signatures thereto, and for which purpose I will leave town this afternoon."

This stirred up Mr. Metcalfe, who telegraphed— "See me in Toronto before you do anything, and I will endeavour to make things satisfactory."

Mr. S. replied— "In refrence to your telegraph to me of Saturday, on the strength of which I returned from Stratford to Toronto, I have only to say that I can make no arrangement to stay my contemplated action, except that indicated in my letter of the 27th ult, viz; that I am to receive from yourself, as President of the Bank, with the authority of the Board, a certificate that while inspector of the bank I discharged the duties of the position faithfully and efficiently, and the payment of an additional quarter's salary and the sum of fifty-nine dollars, to cover my legal and travelling expenses incurred in the matter."

THE SUMMERSIDE (P. E. I.) BANKS.—There appears to be some difficulty between the stockholders and directors of this bank. A number of the stock holders have signed a call for a general meeting to be held on the 15th of June, "to investigate all the affairs of the said Bank, in order to close and wind up all its affairs, or continue the same, if found to be for the benefit of the Shareholders." The President and Directors have issued a notice setting forth that whereas certain stockholders, including some of the late directors of the Summerside Bank, are circulating false reports prejudicial to the interests of the said Bank; and whereas the financial condition of the Bank has of late improved and is now much more satisfactory than at the period of the last annual meeting, and the undersigned President and Directors, convinced of the stability of said Bank, and desirous of challenging the fullest enquiry into its affairs and into the conduct of the present Board of Directors, give notice of a general meeting to be held on the 23rd of June, "with a view of satisfying all persons interested, that the reports above referred to are wholly unfounded and false."

BANK OF ENGLAND.—The return for the week ending 9th June, shows the following changes compared with those of the previous week:—

	£
An increase of Public Deposits of.....	381,937
An increase of Other Deposits of.....	65,038
An increase in Government Securities of....	50,000
A decrease of Rest of.....	5,97[illegible]
A decrease of other Securities of.....	551,91[illegible]
An increase of Bullion of	809,86[illegible]
An increase of Notes unemployed.....	1,487,03[illegible]
Total amount of Notes in circulation.....	22,842,4[illegible]
Ditto of Bullion and Gold and Silver Coin..	28,630,8[illegible]
Bank minimum rate of discount since June 10, 1869.....	4 per cent.

—A writer advocates in the Montreal *Gazette* the adoption of a plan of banking, the counterpart of the Bank of England. He proposes that the Bank of Montreal and the Bank of British North America should amalgamate under the title of the Bank of Canada, with a capital of twenty-five million of dollars, three-fifths of the stock to be owned by private proprietors and two-fifths by the government of the Dominion, the latter to be paid for by the deposit of 5 per cent. debentures. The bank to be the sole bank of issue for the Dominion, the notes to be legal tender except at the counters of the bank at the chief place of business, where they shall be payable on demand in gold. The bank to be a bank of issue and deposit, but not of discount except to the other chartered banks and government of the Dominion, or on deposit of government securities.

—A counterfeit has appeared on the notes of the Government Issue. It is in the shape of a $1 bill cleverly changed to represent a $4. The word and figure of the original amount are altered to the larger denomination. There are no $4 notes of the Provincial currency.

—A friend who has just returned from a visit to Cape Breton, informs us that the only place on the whole island where mining operations is actively is Port Caledonia. The Caledonia Company have expended between $200,000 and $300,000 in the construction of a new harbor at Glace Bay, and a railway to and from their works a distance of about four miles. The place has been declared a port of entry under the name of Port Caledonia. The company are doing a large business in shipping coal to the States, chiefly to Boston.—*Chr.*

—A St. John paper says: The prospectus of a company called the "New Brunswick and Cape Breton Gold Mining Association," is published. The association propose to work at the Waganbrook Gold District, Victoria County, N. B.

THURSDAY, JULY 1, 1869.

THE CANADIAN CANALS.

VI.

The promoters of the Caughnawaga Canal have a clear and distinct end in view, attainable at a cost which cannot be regarded as excessive. The scheme stands prominently forward in connection with the St. Lawrence navigation. Its leading advocates are men of weight and character, who have carefully studied the question, and whose opinions are entitled to respect. Up to a certain point, there can be no difference of opinion as to the results looked for, and possibly they are sufficiently strong to exact general support for the work. That is, even the limited benefits attainable—if the phrase is not too strong, we will add, by common consent—appear to mark out this work as an actual necessity. The question is, if the line is not drawn somewhat in advance of what really is feasible. The object of the canal is to connect the waters of the St. Lawrence, at Lake Champlain—itself the head waters of a tributary of the great river, the Richelieu which debouches at Sorel. The connection is now made by the Chambly Canal. Lumber for the Albany market, from the Ottawa, now passes to the north of the island of Montreal, and proceeds by the St. Lawrence to Sorel, at which point it ascends the Richelieu river. One lock only occurs in this navigation before the Chambly basin is met—a beautiful sheet of water, at the base of which, a quarter of a century ago, stood the old fort, constructed under the French domination. It was then in good order, and was used as a garrison, having been kept in repair by the Imperial Government. It passed into Provincial keeping, at once to fall into ruin. We mention the site to assist the memory of those of our readers whose geography needs to be refreshed. It is here that the Chambly Canal has been constructed to overcome the rapids which impede the navigation between this spot and St. John's. The length is 11½ miles; the locks are not large—120 by 24 feet, with a depth of 6 feet. The proposed Caughnawaga Canal from Lake St. Louis to St. John's would pass over ground, being the base of the triangle, having its apex at Sorel. A comparison may thus be made :

	Miles.
From a point in the St. Anne's basin of the Ottawa, by the channel north of the island of Montreal, to the St. Lawrence, and by that river to Sorel.....	60
By the Richelieu River to Chambly.....	45½
Chamby Canal to St. John's.....	11½
	117

On the other hand—

	Miles.
From the above-named point in St. Anne's basin to the Lake St. Louis, at the point proposed as the entry to the Caughnawaga Canal, opposite entry of Lachine Canal.....	15
Length of proposed canal.....	25½
	40½

Accordingly, by this important water connection about 78 miles of navigation would be saved. This saving of distance would lessen the freight of lumber destined from the west to the New York market. In that fact alone, therefore, an argument may be said to lie for the necessity of the canal. It would appear that the most feasible plan is to commence the canal above the tier of locks at the Beauharnois canal. The reports speak of this work as a navigable feeder. But the term is a misnomer, and tends to mislead, and the sooner it is rejected the better. In round figures, Lake St. Louis—that is the water at the head of the Lachine canal—is about 30 feet lower than the level of Lake Champlain. Accordingly, the proposed canal, taking its origin in the reach of the Beauharnois canal, and supplied by the waters of the St. Lawrence, would have its main level 37½ feet above the water of Lake Champlain, to which it would descend by three locks; whereas five locks will be needed to fall to the level of the St. Lawrence, identical, indeed, with the sortie of the Beauharnois canal. With this location we have the supply of the St. Lawrence as the fountain head, the canal itself following a line of country suitable to it, a line sufficiently direct, a connection given in the most feasible mode both with the St. Lawrence proper and with the Ottawa, at a cost estimated, and we believe fairly, at from four and a quarter to four and a half millions of dollars. We are quite prepared to concede the importance of this work, even its necessity, but when we come to the consideration of the view that it ought to take precedence of the development of the St. Lawrence, we fear we must differ from some with whom we should prefer to agree.

The present Chambly canal would by no means be superseded by the proposed canal, but it would necessarily lose a portion of the traffic now passing through it, that of the Ottawa. The Chambly Canal is essential to the region of the St. Maurice, having its outlet at Three Rivers which is yearly becoming of more importance. The misfortune is, that it has not been well managed, and it is one of those things in which men of astute intellect and honest intentions are likely to be over-reached. The limits have fallen into too few hands, and this monopoly has worked the usual result in impeding the progress of the district. We trust, however, that this will be the fact but for a time. As the Chambly Canal can receive, without delay, all that may be sent through it, extraordinary facilities are offered for the transport of lumber.

Agreeing thoroughly with an anticipation of the favorable influence the Caughnawaga Canal would work in the lumber trade, either from Ottawa, or by the St. Lawrence with Boston and Albany, it remains for us to consider, this larger and more commercial side of the question· It is urged that vessels freighted with grain, from the Western States, will descend the Saint Lawrence, and passing by this canal to Lake Champlain, will connect with the Boston Railway at Burlington. There the transfer of cargo will take place to supply the necessities of the Eastern States. The return trip will be freighted with New England manufactures. Further, it is considered that this water communication will be followed to Whitehall, and thence by the canal to Albany, superseding the Erie Canal. We must leave for a future occcasion, the former view, *i. e.*, the bearing of the proposed Caughnawaga Canal, on the trade

with the Western States, and Canada, on the one side, with Boston. We will now endeavor to examine the extent of the influence to be exercised over the New York trade.

It must be remembered, in the examination of the canal question, that the end in view of the advocate of a given policy must not be lost sight of. Thus many of the advocates of the Caughnawaga Canal, cannot be brought to contemplate a direct connection between the west and the seaboard. There ever remains the transhipment at Montreal, the break in the navigation, the assumed necessity of a difference of build in vessels navigating the lakes, and vessels sailing on the ocean. We see this view plainly in the reports of the engineers who reported on the project. They name the locks as 230 feet by 36 feet by 10 feet; that is, of course, for a purely river navigation. While consistently advocating the construction of this canal, we would lay down, as a principle, that its locks should be identical with those of the Saint Lawrence Canals. To argue on the capacity suggested, is to some extent to weaken our case; still, for the moment, we are quite content to do so. The readers of these articles must have seen that the connection between Lake Erie and Albany, is by the Erie Canal, or by the Welland Canal to Oswego, by the branch Canal to Syracuse, where the Erie Canal is joined, the time of transit being 11 days. It is argued that the propeller having a new and sufficient connection to Lake Champlain, would abandon this old route. We have only to suppose such a vessel in Lake Champlain, to see how little chance there is of such a consequence. All would be plain sailing until the propeller, needing a lock 230 feet in length, came to the Whitehall Canal. This canal is 67 miles long, and unless the locks have lately been enlarged, they are 90 feet by 15 feet, with 4 feet water. Moreover, we believe, that it is impossible to enlarge this canal to any extent. It is supplied by a feeder from the upper waters of the Hudson, at Glen's Falls; and it is a question whether the supply will admit of any great additional tax. Nothing positive can be said on the subject, without examination of the capabilities at the engineer's command, but we believe that very little additional enlargement can be counted upon. But even were it otherwise, there is every reason to expect great opposition in the State of New York, to such an improvement, especially in the cities of Buffalo, Syracuse, Oswego, and we will add, even Troy, and Whitehall, and Albany, because such propellers, would sail through the entire distance without having any business to transact in these cities. There would be great disinclination to create a rival to the Erie Canal, a State work, bringing in a certain income, and which has cost upwards of $32,000,000. There is the expense of enlarging the present Canal, some ten or fifteen millions of dollars. These various reasons, each one powerful in itself,—in one case to the extent of shewing that the improvement called for is itself impossible,—all tend to establish the view that the Caughnawaga Canal would have no bearing on the New York trade; and, indeed, if that end be put prominently forward as a reason for the construction of this Canal, it may be added that no step should be taken until a satisfactory capacity of the Whitehall Canal be assured by the New York Legislature. But even if it be developed to the theoretical requirement and we have the route perfected to all that fancy can suggest, there is the St. Lawrence, itself, the waters of the river passed over by the propeller *Her Majesty*, furnishing a known result. With a developed navigation and a class of vessels, fitted to it, the propeller could proceed directly to the harbor of New York from Montreal in 9 days. The distance by the Canals and Lake Champlain may be estimated from 6 to 8 days. But we conceive that, practically, all the advantages lie on the side of the longer sea route; because there is no break of bulk, no canal dues, while a larger cargo would be taken than the more contracted vessel could carry, with perfect freedom from charge of brokerage. Moreover, the passage by Nova Scotia, would give the chance of purchasing fuel cheaply. If all this be correct, the advantages of a passage through Lake Champlain to New York, cannot be said to be in any way great.

THE ROYAL CANADIAN BANK.

The next worst thing to indifference is unwise zeal. Neither is commendable; but, perhaps, the latter produces the greater variety of ill consequences. The shareholders of the Royal Canadian are fast proving this. They are, naturally, provoked at the loss of their money. We cannot quarrel with them for displaying some irritation, and we can find excuse for their striking about wildly, hitting many heads in an endeavour to bruise the right one. But the question arises, is such conduct wise; is it calculated to restore the public confidence in their bank? For our part, we are inclined to think that recriminations and abuse are very poor substitutes for earnest work, judicious pruning and the determination to inaugurate a proper state of affairs. Hence we are bound to condemn as unwise in the extreme the recent exhibition of temper at the meeting of delegates in Toronto. Hon. Mr. McDonald allowed himself to be carried away by a desire to avenge himself of his colleagues, and we know with what applause his name was struck from the list of those nominated for the presidency of the bank. This action is an indorsement of our view. The delegates should have applied the same rule to themselves, and restrained their vituperative tendencies, for the sake of appearances, at least. We have no desire to take sides in the quarrel, for it is essentially one of their own making, but we have an interest in its result. The existence of an important institution is at stake, and the loss of a large amount of capital is threatened. If the annual meeting is to be but a repetition of the recriminations and abuse which characterised the meeting of the 25th, the longer it is postponed the better for all concerned.

It must be very gratifying to the Cashier to know, that amidst so much suspicion, doubt and turmoil, his integrity stands unimpeached. In answer to any charge of participation in mismanagement, he may reasonably urge that he has not had a fair chance. We have, indeed, reason to believe, that most of the losses were made through not following his advice. However, as executive officer he has to bear an equal share of blame, and should be afforded an opportunity of setting himself right with the shareholders.

Apart from these objectionable features of the present crisis, there are sufficient reasons for a careful examination into the bank affairs, and a cool estimate of the bank strength.

The figures furnished by the Board of Directors show the following :—

Total profit	$704,078	say 60·17 p. c. of present capital
Expenses.....	236,244	" 20·19 p. c.
Net profits.....	467,634	
Supposed loss..	300,962	" 25.77 p. c.
Net profits.....	$166,882	" 14·25 p. c.

The total profit has been equal to about [illegible] per cent. of the present capital, the expenses to 20¼, the losses equal to 25¾, and the net profits, according to their own estimate of losses, 14¼. The expenses were equal to [illegible] per cent. of the gross profits, the supposed losses 42¾ per cent., and their net profits equal to 23¾ per cent. of their gross profits.

Total Liabilities (ex. stock).....	$1,163,711
" Assets, as shewn.....	2,268,298
Apparent surplus.....	$1,104,587
Admitted loss.....	300,962
Available.....	$803,625

Taking this as a basis, we find that [illegible] $1,170,488 of paid up capital has an apparent value of $803,625, or about 68 per cent. If the losses be $600,000, instead of $300,0[illegible], the stock would have an apparent value of 49 per cent.

Of course it is impossible to tell exactly how affairs stand, without such a thorough investigation at the various agencies as will be free from the bias of an interested scrutiny. The necessity for such investigation has been

seen ; it has been acknowledged also by the appointment of a Committee of outsiders whose instructions are, we take for granted, to satisfy themselves fully. We would have been better pleased if a banker or a professional accountant were on the Committee. Perhaps it is not yet too late to procure the services of such. If so, we know no one whose name would be more generally acceptable than Mr. Morton of the Bank of Upper Canada. He has had just the experience which is now required to guide and direct a systematic inquiry.

The proposition to fill the Board with persons resident outside the city seem to us to savour of absurdity. Of course, the shareholders outside the city should have their representatives at head-quarters ; but to say that the majority of the Board should be outsiders, is to show a very limited acquaintance with the management of Bank affairs. At the same time, we admit that a change should be made in the Board. In fact, we cannot see why the present members should decline to retire. The great object to be sought is the restoration of public confidence, for without that confidence a resumption would be of no avail. If a change in the Board be demanded, it is expedient that even a sacrifice should be made.

Various names have been mentioned in connection with the presidency, among others that of Mr. Crawford, M. P. While we think that Mr. Crawford would make a trustworthy head for the institution, we find in his multiplicity of engagements, as a lawyer and a politician, very serious objections to his election, for upon the president and cashier necessarily devolves the largest share of the bank management, and a president should not be absent for long periods. Mr. P. Howland also has been named. We know of no objection that could be made to him. Mr. Gordon, of the firm of Gordon & McKay, is also spoken of. Both of these gentlemen would hold the money bags tightly and either would make a good president. However, the selection of a president is a matter for the shareholders themselves to adjudicate upon But there is no occasion for faction fights. The creation of parties is to be deprecated. If the shareholders divide themselves into antagonist bands, whose sole object is to secure supremacy, the bank had better be wound up at once. It has had to contend with the intrigues of presidents and vice-presidents, the threats and dictation of underlings, private quarrels and public disputes, and we know the result. A new era of larger disturbances and more extended thwarting may be entered upon, but it will assuredly soon cease. Unless all unite in furthering the interests of the bank, resumption will be an act of folly.

Since the above was in type, we have been informed that Mr. Gordon has expressed his intention to refuse the Presidency, if tendered him. A strong party is working vigorously to secure the election of Messrs. P. Howland, Wm. Gooderham, Junr., and John Macdonald, as City Directors, the remainder of the Board being selected from the names put forward at late meeting.

Our attention has been drawn to the fact that the Western of Canada separated their Inland from their Ocean Marine business in the official returns. The Provincial certainly did not do so, as we find in their last annual report, presented on the 8th June, 1868, the item of $100,366.16 set down as "marine premiums received during the year, ended 30th June, 1868."

The unfortunate policy-holders in the International Life which was swallowed up by the Hercules and both, afterwards, by the Prudential, will derive little comfort from the *expose* of the affairs of the latter company given by Elizur Wright, the able Insurance Commissioner, of Massachusetts. The "non-forfeitable, unconditional and unchallengeable" policies of the Prudential, have had the gloss rudely rubbed off them by Mr. Wright's actarial analysis of the Company's position.

GEORGIAN BAY CANAL.

A Select Committee of the House of Commons has reported on this project. The committee was composed of the following members :—Robt. A. Harrison, West Toronto, Chairman ; Chas. Connell, Carleton, N.B.; Charles Tupper, Cumberland, N. S.; J. H. Gray, St. John, N. B.; J. G. Blanchet, Levis, P.Q. ; James Beaty, East Toronto ; James Metcalfe ; Amos Wright, West York ; G. H. Simard, Quebec Centre ; L. H. Masson, Soulanges ; Thos. D. McConkey, Simcoe; J. P. Welles, North York ; W. C. Little, South Simcoe ; George Jackson, South Grey ; Thomas R. Ferguson, Cardwell.

After recounting a number of matters with which the public are already familiar, the Committee state that they have no doubt as to the expediency of the proposed canal. They are satisfied that, if constructed, it would be of immense value to the commercial and general interests of the Province of Ontario, and of the whole Dominion of Canada. The interests of Ontario would be greatly promoted by the local expenditure and the development of the extensive region of unoccupied land north and west of the canal, and the interests of the Dominion would be advanced by the introduction into the country of the large amount of capital, estimated at forty millions of dollars, required for its construction ; by the encouragement of emigration, and by the completeness of a most important link in the chain of through communication between the great West and the Old World. The canal, if constructed, as it would be wholly within British territory, would be a most important key to the trade of the West, and greatly conduce to the establishment and continuance of reciprocal trade between the Dominion and the United States of America. Independently of these important national, commercial, and social considerations, it is obvious to the committee that a large accession of revenue must accrue to the Dominion exchequer from the construction of this work, as out of an expenditure of forty millions of dollars, chiefly for imported labor, a large amount would flow into the public chest through the customs and excise. The testimony adduced before the committee has satisfied them that the work is practicable in an engineering point of view, but that unless a liberal grant of land be given in aid of the company, the work, in the opinion of the committee, cannot be accomplished.

The following statement of comparative distances by different routes, shows the great saving that will be effected by this canal when constructed :—

Chicago to Quebec.

Via Lake Erie, the Welland Canal and St. Lawrence	1,550	miles.
Via Huron and Ontario Ship Canal and St. Lawrence	1,180	"
Making a saving of	370	"

Chicago to New York.

Via Lake Erie and Erie Canal	1,504	miles.
Via Lake Erie and Welland Canal and Oswego	1,500	"
Via Huron and Ontario Canal and Oswego	1,225	"

Chicago to Liverpool.

Via Mississippi and New Orleans	6,000	miles.
Via Erie Canal and New York	4,000	"
Via Welland Canal and St. Lawrence	4,180	"
Via Huron and Ontario Canal and St. Lawrence	3,736	"

And it is shown, in the report of the Canal Company's engineer, Mr. Sykes, that by the saving of transhipment, a cargo of 1,000 or 1,200 tons shipped at Chicago for Liverpool via the Huron and Ontario Canal, would, under ordinary circumstances, reach Liverpool before a similar cargo shipped at the same time via the Buffalo and Erie Canal could reach New York.

The relations of the proposed Canal to the North West Territory, and the development of that extensive and valuable portion of the Dominion, are also, in the opinion of the Committee, adpitional reasons for the undertaking of the work.

THE OTTAWA SHIP-CANAL.

In the House of Commons Mr. Wright (Ottawa) presented the first report of the select committee on the improvement of the River Ottawa.

It states that the waters comprising the proposed line of navigation are as follows:

Ottawa River, Montreal to Matawan	305	miles
Matawan River and Summit Ridge	46	"
Lake Nipissingue	30	"
French River	48	"
Total distance from Montreal to Lake Huron	430	"

In the year 1856, the Commissioner of Public Works obtained from the Legislature an appropriation for the purpose of exploring and surveying the route, a task which they entrusted to Mr. Walter Shanly, civil engineer, who made a general exploration of the entire line of communication, and actual surveys of the Mattawan River and of those portions of the Upper Ottawa where the greatest difficulties in the way of improvement are to be encountered. The appropriation having been insufficient to meet the expenses of a complete survey of the whole route, an order to suspend the work was issued in May, 1857; but a further appropriation having been asked and obtained the following year, the survey was resumed under Mr. T. C. Clark, civil engineer.

The reports of Messrs. Shanly and Clark are on record, and the facts they establish may be summed up as follows:—

That the distance from the mouth of French

River to Montreal is 430 miles. That the saving in distance by this route, as compared with that by the Welland Canal, between Chicago and Montreal is 368 miles. That it is possible to obtain a continuous navigation throughout with a depth of water according to Mr. Shanly's report of 10 feet; and according to Mr. Clark of 12 feet. That the Bay of the French River affords safe and accessible harborage for the largest vessels navigating the Upper Lakes. That an abundant supply of water for all possible purposes can be obtained at the summit. That the total ascent and descent to be overcome by lockage is 698 feet. That the total length of canal required to improve the several obstructive portions of the route, and including the enlargement of the Lachine Canal, will not exceed 58 miles; and the highest estimate (Mr Shanly's) for the completion of the whole scheme of navigation, providing for locks of 250 feet in length, by 50 feet in width, with 10 feet depth of water, is $24,000,000; while the lower estimate (Mr. Clark's) places the entire cost for a 12 feet navigation at not much over half that amount. It is also shown by the engineering reports referred to, that the saving in time in the round trip of a propeller between Chicago and Montreal, would be about ninety hours less than by the circuitous lake route; and that the cost of transport, not taking into account the great saving in insurance, would be less by fully 10 per cent. on the Ottawa route than on that by Lake Erie.

It is also satisfactorily established that there are no extraordinary engineering difficulties to be overcome in constructing the several canals needed as connecting links between the long stretches of deep water which form the leading feature on the entire length of the chain. At the summit dividing the upper waters of the Matawan from those of Lake Nipissingue, a cut of twenty feet depth and scarce three quarters of a mile in length, would cause the former now tributary to the Ottawa, to change their course and flow through the French River to Lake Huron.

Another feature deserving of remark is that the improvements required are made up of a number of small canals no fewer than 21 separate links in a total of 58 miles; the largest link in the chain being the Lachine canal, 8½ miles long; and while it is admitted that in some places the excavations will be of hard rock. It is also shown that there are no very deep or long cuttings and that the dams which will enter largely into the system of construction can be generally constructed without damage to the surrounding country.

Railway News.

GREAT WESTERN RAILWAY.—Traffic for week ending June 11, 1869.

Passengers	$31,497 22
Freight.....	39,711 93

UNION PACIFIC.—It is reported that at the meeting of the Union Pacific Railroad Company, held at Boston recently, the balance of the first mortgage bonds of the Company, and also $10,000,000 of land-grant bonds, were taken by the stockholders. The proceeds of this sale will enable the Company to pay all their floating liabilities, build a branch toad to Denver, and fully equip the maic track with all the rolling stock needed, and have a balance in the treasury.—*U. S. R. R. Journal.*

—Mr. C. D. Fox, the engineer of the Narrow Gauge Railway Companies arrived here on the 25th June from England. The survey of the Toronto and Nipissing line has commenced.

— About forty navvies on the Frederickton branch railway struck for 5 cents advance per day increase in wages.

Law Report.

MARINE INSURANCE—NON-DISCLOSURE OF DESTINATION.—In a case of Harrower vs. Hutchinson before the Court of Q. B., in England, the following facts appeared. The plaintiffs are merchants of Glasgow, and the defendants are underwriters in Glasgow and Liverpool. The policy of insurance was effected on goods in a ship to sail at and from Buenos Ayres to a port or ports of loading in that province, and to discharge in the United Kingdom. The ship went to Buenos Ayres, and then to Laguna des Corrientes, and on her way back to Buenos Ayres she was lost. The underwriters refused to pay, as the port of Laguna des Corrientes was not within the meaning of the policy of insurance. Mr. Cohen urged for the defendants that "a port or ports of loading" did not include a port at which there was no custom house, and from which the ship could not clear for a port in Europe. It did not include an entirely new and unknown port, such as Laguna des Corrientes. The insurers had shown a want of good faith in not disclosing the name of the port, in which there would have been charged a much higher rate, as the risk had been greater. On the other hand, Mr. Baylis (with Mr. Milward, Q. C.) argued that underwriters were supposed to know geography; and if they did not know, they ought to make inquiries, as the insurers are not bound to communicate anything. The Court gave judgment in favor of the plaintiffs. It was not necessary for merchants to disclose to underwriters those things which the latter were presumed to know. In this case the underwriters undertook to insure the goods at and from a port or ports of loading in the province of Buenos Ayres, and it must be presumed that along the coast of a large province there may be ports of which the underwriters had no knowledge, as to which there may be particular risks; but, if they did not intend the full scope of the words they used, it was there duty to make inquiry as to what port the plaintiff intended to go. The underwriters not having done so, the plaintiffs were not bound to communicate anything. The judgement must therefore be for the plaintiffs.

TELEGRAPHY IN SWITZERLAND.—The reduction from 1 franc to 50 centimes, which was made at the beginning of last year, has on the whole proved a success. Without counting the 44,805 despatches relating to the telegraph service, there were 1,596,353 inland telegrams sent during 1868, against 794,666 in 1867, an increase of 801,687 despatches in favour of 1868. The number of international despatches sent in 1868 was 282,627, against 245,154 during the previous year, an increase also in favour of the former of 37,473 despatches. The receipts during 1868, as compared with those of the previous year, were as follows:

	1867. frs.	1868. frs.
Gross receipts.....	832,538.61	921,182.45
Expenditure	748,976.46	846,900.60
Net receipts.....	74,562.15	74,281.85

Although the net receipts during 1868 were 280 frs. 30c. less than those of the previous year, it cannot be attributed to the lowering of the price for telegrams, but rather to the extraordinary expenses incurred by the telegraphic administration in the laying of new lines.

—The annual meeting of the Huron Copper Bay Company will be held in Montreal on the 5th July.

—Stock of the People's Telegraph Company is quoted in the Quebec stock lists at 101 to 105.

Commercial.

The Messrs. Beard, of this city, have made such arrangements with their creditors as to enable them to resume possession of the estate. It was returned into their hands early in the present week.

Bills of the Royal Canadian Bank are much inquired for and very scarce. The principal brokers have orders for many thousands of dollars, but can only get a small supply. This is probably owing in a great measure to a general impression in the country that the bank will shortly resume.

Since the commencement of the present month there has been an extraordinary movement of wheat, &c., in the principal American markets. For the four weeks ended June 19th, the receipts at five western lake ports were 458,268 brls. of flour and 54,664,910 bush. wheat, against 230,758 brls. of flour and 1,693,937 bush. of wheat, last year; being more than three times as much wheat and nearly three times as much flour as last year. A Buffalo paper estimates the wheat movement as follows:—

	Bush.
In store at Chicago and Milwaukee 21st...	1,200,000
Afloat on lakes for Buffalo & Oswego 21st..	1,024,000
Afloat on canal, destined for tide water...	1,800,000
In store in New York 21st.....	528,836
Total (not including stocks at Buffalo and Oswego).....	5,552,836

The total stock of tea in London, June 11, was 0,928,942 lbs., against 76,003,365 last year; and n Liverpool 1,145,716 lbs. this year against 1,-97,108 last year.

The Western *Tobacco Leaf*, published at Cinnati, says: We are in receipt of information om the various sections of the West and South n regard to the present condition of the coming bacco crop. From some sections reports are loomy, while in the majority of cases, we are appy to say, the prospects for a good crop are right.

The London *Produce Markets' Review* says of ne sugar trade: The stocks in Europe and the nited States are largely in excess, and the quan-ty of land sown for beet root in the Zollverein said to have increased from 5 to 6 per cent. In rance and in other countries a large increase in ne sowings has also taken place—and Messrs. aruchson look for an increased European pro-uction of 100,000, or perhaps 125,000 tons, this ason, which is sufficient to fill the void which ould be caused should the most extreme estimate loss in the Cuban crop be realised.

In the exports of cotton piece goods, from the nited Kingdom, in the first four months of the rrent year, there was as compared with the cor-sponding period in 1868, an increase of 1,500,-00 yards in those to the Hanse Towns, 4,650,000 rds to France, 11,400,000 yards to Italy, 3,700,-00 yards to Egypt, 14,480,000 yards to the United ates, 33,000,000 yards to Brazil, 2,000,000 yards Uruguay, 500,000 yards to the Argentine Con-deration, 1,780,000 yards to Peru, 2,550,000 rds to China and Hong Kong, 740,000 yards to pan, and 450,000 yards to Canada. On the her hand, there is a diminution of 90,000,000 rds to the East Indies, of 2,400,000 yards to e West Indies, of 1,800,000 yards to the Philip-ne Islands, of 1,500,000 yards to New Granada, 6,650,000 yards to Mexico, of 5,900,000 yards Syria and Palestine, of 10,000,000 yards to rkey, of 4,750,000 yards to Portugal, and of 570,000 yards to Holland.

It is stated that the Russian Government have anted to certain parties in London the conces-n of the right of laying a submarine cable, th a monopoly for forty years, from the mouth the River Amoor, in Eastern Siberia. The ble is to run to Japan, and thence to Shanghai, e Government undertaking to complete as far the mouth of the river the land line of tele-aph wire, which already crosses the greater part Siberia, up to a point within 608 miles from e coast. In connection with this affair it is d to be proposed to make arrangements for taining the co-operation of the Telegraph Con-uction and Maintenance Company.

Sales of Petroleum.

At Petrolia the price of crude oil, up to the 26th tant, remained unchanged. The Wyoming *ws Letter* reports a sale of 1,500 barrels to Mr. C. Dunean Clark, of Toronto, for exportation the crude state at $1.25 per barrel. There was meeting of the Crude Oil Association on the rd inst., ratifying the sale made by the com-ttee to Mr. Berringer, of 10,000 brls. at $1.25 per rel. We understand Mr. McMillan has just eived an order from the old country for 2,500 rels of crude oil.

Toronto Market.

PRODUCE.—At the commencement of the pre-t week, the market for breadstuffs was firm l active, under the influence of less favorable rices from Europe respecting the crops; but ce then there has been a steady falling off, so t flour closes 25c. lower, and wheat in propor-n. It is, indeed, rather remarkable that prices p up so well in the face of the enormous re-pts of wheat at all the principal American rkets, and it is not quite certain whether the ge volume of this movement has yet had its l effect on the market. In this Province the n fall has been abundant, if not excessive, so that some warm and dry weather would now be acceptable. In the present state of matters our market could not be otherwise than dull and the week closed without any animation, prices being purely nominal, *Wheat.*—Receipts 16,812 bush., and 17,600 bush. last week. The market closed dull, with sellers at 97c., f.o.b., for lots of Spring. Fall is held for $1.00, but there is no demand. *Oats*—Are quiet at 51 to 54c. for car loads; little doing. *Peas*—Nominal, at 70 to 75c.; no transactions during this week. *Barley*—Out of market.

FLOUR.—Receipts, 3,275 brls., and 2,200 brls. last week. No. 1 Superfine is offering at $4.25, without demand. Sales of several lots occurred during the week at $4.30. Nothing doing in other grades.

PROVISIONS.—The large receipts at the country stores has tended to depress the market still further, and no wholesale movement has yet taken place; the indications are for continued low prices. *Cheese*—Nothing doing in the new crop yet, except in a small way. *Cutmeats*—Nominal. *Pork*—Mess is rather firmer at quotations.

HIDES—The market is very dull and unchanged.

WOOL—Receipts are light for the season; lots sell at 32½ to 33c.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Bellevelle to Lynn, inclusive 25c; grain, per 100 lbs., 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c, gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Exports of Petroleum from the United States from January 1 to June 22.

	1869.	1868.
From New York...galls.	27,916,772	21,656,146
Boston	1,173,772	1,132,603
Philadelphia	10,698,428	14,874,201
Baltimore	579,890	855,695
Portland	.....	153,131
Total Export from the U. States	40,389,782	38,671,775
Same time 1867	.....	26,717,653
Same time 1866	.....	23,631,440

The Cotton Trade.

Advices from the cotton crop in the Southern States continue favorable; this is the most critical period on the growing crop. The stocks of Indian and American cotton in Liverpool and London, on the 12th, and the quantities afloat for the same ports at that date were 1,198,835 bales this year, against 1,201,247 bales last year.

Petroleum.

The stocks in and afloat for the five leading markets of Europe, at the dates indicated, compare as follows:

	bbls.	Jan. 1st. bbls.
Stock in London May 31	18,841	10,800
Afloat for London	5,886	3,300
Stock in Bremen May 26	48,813	88,000
Afloat for Bremen	26,725	.....
Stock in Antwerp May 31	85,900	53,000
Afloat for Atwerp	30,000	28,000
Stock in Rotterdam May 29	15,063	13,500
Afloat for Rotterdam	4,500	14,500
Stock in Hamburg May 27	27,373	35,000
Afloat for Hamburg	13,615	5,000
Totals	...276,717	253,100

The total amount in and afloat for the ports at the latest dates is, it will be seen, about 25,000 barrels greater than on January 1st. In the table the cases have been reduced to barrels of forty-five gallons each.

A bill to levy a duty on petroleum imported into the Zollverein was rejected; it has all along been admitted free of duty.

The completion of the Lake Superior and Mississippi River Road, the *New York Evening Post* thinks, will effect a material reduction in the price of wheat by furnishing a channel for the surplus of Minnesota, Dakota, Northwestern Wisconsin and Northeastern Iowa, to reach the market. Last year Minnesota raised a surplus of twelve million bushels of wheat. Thirty miles of the Lake Superior road are in operation; eighty miles are under contract, and the remaining 30 will be let next month. Men are at work on the 80 miles, cutting out and grubbing the track. The company has in use and under construction six locomotives and 100 freight and passenger cars. At Du Luth, the Lake Superior terminus of the road, two immense grain elevators have been contracted for, and a large hotel and two churches are now building by the company. Owners of propeller lines on Lake Ontario and Lake Erie are negotiating for the carriage of the grain from the elevators at Du Luth. The Danville (Pennsylvania) rolling mills are turning out large quantities of rails, spikes, &c., for the road.

—A telegram from Hong Kong, dated June 12th, gives the total exports of tea from China and Japan up to that date as 139,500,000 lbs.

Royal Canadian Bank.

THE ANNUAL GENERAL MEETING of the Shareholders of this Bank will be held at the Banking Office here, on MONDAY, the FIFTH DAY OF JULY NEXT, at NOON.

By order of the Board.

T. WOODSIDE, Cashier.

Toronto, June 23, 1869.

WESTERN CANADA

Permanent Building and Savings Society.

DIVIDEND NO. 12.

NOTICE is hereby given, that a Dividend of Five per cent. on the Capital Stock of this Institution has been declared for the half-year ending 29th inst., and that the same will be payable at the Office of the Society, No. 70 Church Street, on and after THURSDAY, the EIGHTH day of JULY next.

The Transfer Books will be closed from the 20th to the 30th June, inclusive.

By order of the Board.

WALTER S. LEE,
Secretary and Treasurer.

Toronto, June 15, 1869.

The Canadian Bank of Commerce.

DIVIDEND No. 4.

NOTICE is hereby given that a Dividend of Four per cent. upon the paid-up capital stock of this institution has been declared for the current half year, and that the same will be payable at the Bank and its Branches on and after FRIDAY, the second day of JULY next.

The Transfer Books will be closed from the 16th to the 30th days of June next, both days inclusive.

The Annual General Meeting of the Stockholders will be held at the Banking House in this city, on MONDAY, the fifth day of JULY next. Chair to be taken at twelve o'clock, noon, precisely.

By order of the Board.

R. J. DALLAS, Cashier.

Toronto, May 22nd, 1869 42-td

Bank of Toronto.

DIVIDEND No. 26.

NOTICE is hereby given that a Dividend of Four per cent. for the current half-year, being at the rate of Eight per cent. on the paid up capital of this Bank, has this day been declared, and that the same will be payable at the Bank or its branches on and after

FRIDAY, the 2ND DAY OF JULY NEXT.

The transfer books will be closed from the fifteenth to the thirtieth of June, both days inclusive.

The Annual Meeting of the Shareholders will be held at the Bank on Wednesday, the twenty-first day of July next. The chair to be taken at noon.

By order of the Board.

G. HAGUE, Cashier.

Toronto, May 16th, 1869. 41-td

STATEMENT OF BANKS

By order of the Board.

J. HERBERT MASON,
Secretary and Treasurer.

Toronto, June 10th, 1869. 44-td

Niagara District Bank.

DIVIDEND No. 31.

NOTICE is hereby given, that a DIVIDEND OF FOUR PER CENT. on the paid up capital stock of the Institution, has this day been declared for the current half-year; and that the same will be payable at the Bank on and after THURSDAY, the first day of July next.

The Transfer Books will be closed from the 20th to the 30th of June, both days inclusive.

By order of the Board,
C. M. ARNOLD, Cashier.

Office of the Toronto and Nipissing Railway Company.

A GENERAL MEETING of the subscribers to the Capital Stock of the Toronto and Nipissing Railway Company will be held at the office of the said Company, No. 46 Front street in the said City of Toronto, on TUESDAY, the 20th day of JULY next, at twelve o'clock noon, for the purpose of electing Directors and organizing the said Company.

By order. CHAS. ROBERTSON,
Secretary

Toronto, June 16.

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES"

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS

Published Weekly for despatch by the Mail Steamers

THE EUROPEAN MAIL.

FOR North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and geueral community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been and will continue to be, taken by the Proprietors to obtain regardless of expeuse, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles stated not generally noted in ordinary lists, of which the following is an example :—

Articles.	Prices per ton.	Cash discount
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per cent.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, aud Medical news, of interest given in detail.

We publish a list of Military and Naval Stations, and changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who thiuk it of importance that the Old and New World should be more closely associated in those reciprocal ties resulting from a mutual furtheran of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

Dec. 10, 1868. 17-1 L

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ...Ottawa.
EDWARD A. C. PEW, Esq.,... ....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved imachinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing
ISAAC C. GILMOR, 58 Colborne Street, Toronto.
Or A. McK. COCHRANE, Secretary-Treasurer, 383 St. Paul Street, Montreal. 30-35t

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETARY.

WOODBRIDGE S. OLMSTEAD, SECRETARY, EDWIN W. BRYANT, ACTUARY, | JAMES GOODWIN, PRESIDENT, ZEPHANIAH PRESTON, VICE PRESIDENT.

LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 75,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS,

ASSETS, $21,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.

SURPLUS ASSETS, $6,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.

ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $4,397,142.

ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $6,868,528.

ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.

The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.

ITS LIBERALITY—It accommodates the insured by giving credit for part premium, and grants insurance to meet all the contingencies and wants to which Life Insurance is applicable.

It issues policies on a single life from $100 to $25,000.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Meetings.

MERCHANTS' BANK OF CANADA.

The annual meeting of this Bank was held in Montreal, July 5th, Mr. Hugh Allan in the chair.

The following report of the Directors to the Shareholders of the Merchants' Bank of Canada, at the annual meeting, 5th July, 1869, was then read:

The statement of the affairs of the Bank now submitted are evidence that its progress during the year has been very satisfactory.

In the face of the numerous bankruptcies that have occurred during the past year, it must not be supposed that this Bank could have escaped scatheless. So far from this being the case, it is a fact that the Bank sustained several not inconsiderable losses, but the Directors determined at at once, and without hesitation, to write off from the profits a sum that after the severest scrutiny satisfied not only themselves, but their principal officers, would meet and cover every probable shortcoming.

The Shareholders may therefore accept the assurance that so far as can be seen at present, the assets of the Bank are good value for what they represent.

Fair progress continues to be made in the realization of the assets received from the Commercial Bank. The apparent result of the arrangement of amalgamation continues to encourage the belief that the original expectation will be realized.

The statements on the table show the present position of the Bank. The rest has attained the respectable figure of $700,000, and there seems every prospect that it will continue to increase.

During the late sitting of the Legislature, several measures came before it materially affecting the interests of the Banks.

The Directors regarding the continuance of the Act relating to Insolvency as a great and nearly unmixed evil, petitioned the Legislature for its total repeal. This was not acceeded to, and the act was amended, but not in the opinion of the Directors materially improved.

The Banking and Interest measures introduced had fortunately to be withdrawn, the latter being of such a retrogade character, as to excite surprise that in this age of financial knowledge, any party could be found to support it.

The Act of Incorporation establishes the Capital of the Bank at $6,000,000—of this only $4,000,000 has been offered for subscription or taken up.

The Directors now invite the Shareholders to subscribe the remaing $2,000,000, and with this view a series of resolutions will be submitted for your approval.

In conformity with the Act of Incorporation, the following Directors retire at this meeting: Messrs. Damase Mason, Andrew Allan, Adolphe Roy, and Hugh Fraser, all of whom are eligible for re-election.

The By-laws of the Bank have been remodelled and are now to be submitted for your consideration.

All of which is respectfully submitted.

HUGH ALLAN,
President.

The President then moved, and it was carried unanimously, that the report just read be approved of and printed for circulation among the Shareholders of the Bank.

The proposed By-Laws for the government of the Bank, were then read by the President, all of which were approved and adopted by the meeting.

A series of resolutions relating to the increase of the capital of the Bank were then submitted, all of which were approved and carried by the Shareholders.

Messrs. W. B. Cumming and George Templeton were requested to act as scrutineers to receive the votes of the Shareholders.

To Jackson Rae, Esq., Cashier Merchants' Bank of Montreal.

SIR:—We, the undersigned scrutineers, appointed this day by the Shareholders of the Merchants' Bank of Canada, declare the following gentlemen duly elected Directors for the ensuing year:—Damase Masson, Hugh Fraser, Andrew Allan, Adolphe Roy. Signed, W. B. Cumming, Geo. Templeton, scrutineers.

Subsequently at a meeting of the Board Mr. Hugh Allan was elected President, and Mr. Edwin Atwater, Vice-President, respectively.

ROYAL CANADIAN BANK.

The annual general meeting of the shareholders of the Royal Canadian Bank, was held in this city on the 5th July, inst., Mr. Metcalfe, President of the Bank, occupied the chair. There were present about two hundred shareholders.

The chairman in opening the meeting said that he exceedingly regretted that any display of temper had been shown by any of the delegates at the last meeting held in that room. Mutual recriminative language certainly was not, nor would be productive of any good effect. He hoped that the proceedings of this meeting would show a marked improvement in that respect over the former one. As for himself he would announce that he was not a candidate for, nor did he desire re-election. All he wanted was that the best men might be elected to take care of the interests of the shareholders for the ensuing year. The chairman then proceeded to read the following annual report:—

Fourth Annual Report of the Directors of the Royal Canadian Bank.

The Directors of the Royal Canadian Bank beg leave to present, to the shareholders, their fourth annual report.

The year just closed has been one long to be remembered in the history of the Bank. Business, notwithstanding some difficulties, commenced under favorable auspices, and at the end of the first half of the year showed very favorable results, as a reference to the following figures will show:—

Net profits for half year ending Dec. 20, were	$89,201 72	
From this was deducted the semi-annual dividend, at the rate of 8 % per annum	44,416 20	
And there was left to be added to reserve	$44,785 52	
The circulation at the last annual meeting was	$1,095,452 00	
The circulation at the end of the first half of the past year as	1,569,611 00	
Showing an increase of	$474,159 00	
The Deposits at last annual meeting	$1,398,050 60	
The deposits at end of half year	1,684,388 00	
Showing an increase of	$286,337 40	
Paid-up capital at last annual meeting was	$1,071,260 00	
Paid up capital at end of half year.	1,140,183 34	
Showing an increase of	$63,923 34	

The above comparison discloses for the first half-year a steady increase of business and puublic confidence, affording good grounds for the belief that the second half of the year's business would be equally satisfactory.

During the month of January, however, the Vice-President of the Bank made a demand for accommodation to the extent of nearly one-tenth of the paid-up capital of the Bank. This demand was unanimously refused by the rest of the Board. A series of malevolent attacks by the Vice-President upon the management of the Bank, in connection with mischievous rumors, industriously circulated by those who were interested in its downfall, caused the withdrawal of public confidence to an alarming extent, as the following figures evince:

Circulation on 31st Dec. was	$1,569,611 00	
" on 21st May was	902,198 00	
Showing a reduction of	$667,413 00	
Deposits on 31st Dec. were	$1,684,388 00	
" on 21st May were	828,868 69	
Showing a reduction of	$855,519 37	
Specie, etc., on 31st Dec. was	$1,163,343 04	
" on 21st May was	126,033 09	
Showing a reduction of	$1,037,309 95	

The Directors, in this emergency, applied to some of the local banks for a re-discount of commercial paper to a limited extent by each. Their application for assistauce having been declined, the necessity for the suspension of specie payment was, after much anxious deliberation, absolutely forced upon the Directors, and the doors were closed on the morning of the 21st day of May.

That the Directors have not since been idle in their efforts to realize the assets of the Bank and reduce its liabilities, the following table will prove:

Paid-up capital on May 21st	$1,163,728 34	
" " June 30th	1,176,973 34	
Increase in 40 days	13,245 00	
Total liabilities on May 21st	1,766,934 40	
" " June 30th	1,066,069 81	
Decrease in 40 days	700,864 59	
Total assets on May 21st	3,169,100 70	
" " June 30th	2,178,218 47	
Decrease in 40 days	990,882 23	

The latter decrease includes $297,000, bad debts written off.

While every effort was thus being made by the Board and Cashier to enable the Bank to resume specie payments within the sixty days allowed by the charter of the Bank, they deemed it prudent to look forward to the worst possible contingency, and obtained from the Parliament of the Dominion, during the last session, an Act extending the time for the resumption of specie payment to ninety days from the date of the passing of the Act, providing also for amalgamamation with any other bank, if necessary, and for liquidation, if unavoidable.

The assets of the bank, both at the head office and agencies, have been estimated as carefully as possible, within the limited time between the date of suspension and the day fixed for the annual meeting. The result has been that about $300,000 of notes have been actually written off as bad. This amount, so far as at present ean be ascertained, includes all losses sustained by the bank since it went into operation on an aggregate of discounts of over forty-two millions of dollars, being about five-sevenths of one per cent. loss—a result not so disastrous by any means as has been stated by the enemies of the bank.

Considering the amount of good this bank has done in advancing the material interests of the country, the large amount of business it has transacted throughout the Province, and its present solvent state, the Directors, in resigning their trust to the shareholders, venture to hope that their successors will accept office with a determination to resume speeie payments at as early a day as possible.

The Directors, as on previous occasions, bear willing testimony to the great attention of the President and Cashier to the interests of the bank during the past year.

Subjoined is the usual annual general statement of the affairs of the bank, as required by the Act of Incorporation to which the shareholders are referred for further information regarding the bank's affairs.

Statement for the year ending June 30th, 1869.

The following is the report of the special Committee appointed to examine the paper at the Head Office:—

TORONTO, July 3, 1869.

To the President and Directors of the Royal Canadian Bank, Toronto:

GENTLEMEN:—The very limited time placed at our disposal, rendering it apparent that it would be a matter of impossibility for us to comply with the terms of the resolution of your Board, first submitted to us, viz:—"That we should make an examination into the affairs of the Royal Canadian Bank." We were disposed to decline entering upon so arduous a task, when it was suggested that we might perform a temporary serviee by examining and reporting upon the paper discounted at the Head Office, in Toronto, and our duty was consequently so limited by another resolution to that effect.

The bills and notes submitted to us for examination amounted to the sum of $283,725.77, and we have estimated the same as worth the sum of $228,941.37.

Of the paper valued, the whole was examined and inspected by us, with the exception of paper to the amount of $50,783.34, which, being payable out of Toronto was, therefore, not produced.

The paper considered entirely bad, amounted to the sum of $18,250. The remaining deductions were made from paper considered weak and slow a fair per centage from which we struck off for reasons satisfactory to us.

We have not made any estimate as regards paper in suit, being of opinion that the solicitors of the Bank are better qualified than we are to form a proper judgment of their value.—(Signed) Samuel B. Harman, John Crawford, William Thompson.

The reports from the different agencies were then read by the President, amidst a good deal of interruption, which showed the results indicated in the subjoined table:

Agency.	Stock paid up.	Total Dis'cts from Commencement.	Total profits	Total Expenses.	Nett Profit.	Total Losses.
Bowmanville	$104,490 00	$2,293,645 02	$38,042 43	$7,784 21	$30,258 22	$1,000 00

Total amount of dividend, paid, $186,527 98.

Mr. Craig stated that there were reports in circulation to the effect that quite recently some of the directors had over-drawn their accounts. This he stated on the authority of Mr. A. M. Smith.

Mr. Smith acknowledged having made the statement that one of the directors had got a large advance when the bank was in its death-throes; that he had over-drawn his account to the extent of $16,000. (Sensation.)

Mr. Manning admitted having got $14,000, but said the bank had as good security as any in the city. He then charged Mr. Smith with having granted a cheque to a friend of his to the amount of $50,000, who had not a dollar of interest in the bank.

Mr. Smith, in reply, said that the cheque referred to was granted to Messrs. Gooderham & Worts, and the cheque was paid to the hour; a statement which fully satisfied the meeting, as the expressions of approval indicated.

Mr. Donald McDonald then rose and commenced, amidst hisses, the delivery of a somewhat lengthy address, referring to his past action in reference to the bank, and charging upon the other directors, the Cashier and the President and ex-President, the entire blame of the bank's misfortunes. We cannot attempt even a summary of his speech. It contained nothing which is not already before the public, except that the directors had refused him all access to the books and documents of the bank since the 12th of May.

Mr. J. Ham Perry reviewed the speech and the conduct of Mr. McDonald during the years of his directorship, and showed effectively the inconsistency between the statements put forward in the annual reports and those made in Mr. McDonald's circulars, and contended that that gentleman had proved himself to be entirely unworthy of confidence.

Mr. Manning followed in a lengthy review of Mr. McDonald's course. He read a letter of Mr. A. M. Smith's, which had been partly published by Mr. McDonald. The suppressed portion contained the statement that Mr. McDonald was a "donkey," and with this part of the letter he (Mr. Manning) fully agreed. He recounted the circumstances relating to Mr. McDonald's application for a loan of $100,000, and read a resolution of the directors to prove that the loan had been positively refused. A threat of calling a meeting of the shareholders to oust the President was then made by Mr. McDonald, and subsequently his first circular, which was printed in the United States, was issued. Before issuing the second circular, he, on being implored not to do it, as it would ruin the bank, offered to withhold it if the directors would take his stock and that of a friend of his off their hands, and stated further that his lips would be sealed. The directors refused to do this. The speaker dwelt at length on the history of the bank, recounting the difficulties which it had to contend with, and he (Mr. Manning) thought it questionable if any other bank in the Province would have stood under the same circumstances. He read letters proving that the arrangement with W. R. Brown was made by Mr. A. M. Smith, without the knowledge of the directors, to give Brown a credit of $25,000. A letter was also read from Mr. W. C. Chewett, in which that gentleman gave a "continuing guarantee" to the bank on behalf of Brown to the extent of $25,000.

Mr. Smith defended his action in the matter, and charged that the loss that resulted to the bank from this account was owing to new arrangements made by the Board subsequent to his retirement from the Presidency.

Mr. Dumble defended himself from charges made against him respecting the Cobourg agency and the account of the Marmora Company, of which he was President. He showed that the account of that company was quite safe, and very profitable. The advances made in Cobourg, in connection with which losses were made, were without his consent or approval.

The meeting then adjourned, collecting again at 4 o'clock p.m.

Mr. Harrison, M.P., stated that the law required the new Board to be elected on that day, and he therefore moved that a ballot be opened.

Hon. J. H. Cameron advised that if any votes were cast after 12 a.m., they should be kept separate, as he doubted the legality of voting after that hour.

The scrutineers for the election of directors then to take place were, viz.:—W. B. Phipps, F. Shanley, Dr. Wright, and A. Fletcher.

The sum of $2,000 were then voted to the President, for his services during the past year.

The result of the voting was declared at half-past five, on the morning of the 6th July, to be as follows:—Hon. Jno. Crawford, 4,752; Wm. Thomson, 4,660; J. McGee, 3,061; J. Crombie, 2,736; W. Barber, 2,656; W. McGivern, 2,474; J. H. Dumble, 2,125; Alex. Manning, 1,992; W. H. Howland, 1,955; J. Trow, 1,916; T. Griffith, 1,585; T. C. Chisholm, 1,098; Dr. Patterson, 1,022; Jos. Gould, 167; W. C. McLeod, 127; J. D. Merrick, 103; J. E. Smith, 76; R. A. Harrison, 76; H. H. Meredith, 57; J. Medcalf, 41; A. M. Smith, 30; C. W. Bunting, 16.

The seven first on the list, Hon. John Crawford, barrister; Mr. William Thomson, of Thomson & Burns, hardware merchants, Toronto; Mr. McGee, lumber merchant, King Station; Mr. Crombie, Galt; Mr. Wm. Barber, manufacturer, Georgetown; Mr. Wm. McGivern, hardware merchant, Hamilton; and Mr. John H. Dumble, Cobourg were therefore re-elected.

At a subsequent meeting of the Board, Hon. Jno. Crawford was elected President and Wm. Thomson Vice-President.

Toronto, Grey and Bruce R. R.—A meeting of shareholders and others was held on the evening of July 1st, to hear the report of a delegation sent to Montreal, to procure subscriptions to the stock. The delegates reported that a number of the leading citizens had been called and some subscriptions obtained. Mr. E. H. King, General Manager of the Bank of Montreal, had subscribed $10,000. A statement of the share-list was then made by the Secretary, from which it appeared that the total subscriptions taken up amounted to $276,300; balance of subscriptions still to be raised in order to the closing of books, $23,700.

It was then stated by the Secretary, that there were $2,300 of subscriptions out, not entered in the books, which reduced the balance to $21,400. This amount was then promptly made up by the gentlemen on the spot. The notice convening the meeting for the election of directors will appear in next Saturday's *Canada Gazette*.

Insurance.

Fire Record.—There have been very few fires in the country for some weeks past, which is owing chiefly to the unusually frequent and heavy showers of rain.

Iroquois, Ont., June.—A telegram states that the stave mill of Mr. James Armstrong was burned last night. Loss $6,000.

Hibbert Township, Ont., June 26.—Residence of Robert Gardner, Deputy Reeve of Hibbert, was entirely consumed by fire. The fire caught accidentally. No insurance. Mr. Gardner is a heavy loser.

Weston, Ont., July 4th.—J. B. Gracey's brewery was burnt down. The fire is supposed to be the work of an incendiary. Insured for $4,000 in the Western of Canada.

Toronto, July 5th.—A stable in rear of the building 460 King Street West. It was occupied by a cabman named Clark.

Port Colborne, July 3.—The captain of the propellor Prairie State reports passing a barque sunk, with her top masts out of water, between Fairport and Ashtabula, supposed to be the barque Garryowen, of Toronto, loaded with coal from Cleveland to Toronto. It is reported that all hands were saved.

The ship Sunbeam, bound out, has gone around in Lake St. Peter.

—The California Insurance Commissioner has just issued his first annual report.

—The farmers of Sydenham Township, Grey County, are taking the preliminary steps towards the formation of a farmers Mutual Insurance Company.

—The Underwriters of New York are circulating a petition for the appointment of Superintendent Barnes as one of the representatives of the United States, in the Statistical Congress to be held at Hague, in September.

—The promoters of the National and Provincial Union Assurance Society, started some time ago in London, England, by certain footmen and butlers, an account of which was given in *The Monetary Times*, have come to grief, two of them, Reid and Jones, being sentenced, the former to five years penal servitude, and the latter to twelve months imprisonment.

English Insurance Companies in the U. S.—The following figures indicate the business of the Companies named in the year 1868, in the State of New York (U. S. cur'y):—

Liverpool, London and Globe, Liverpool	$709,345 54	$427,373 96
North British and Mercantile, London, Eng.	202,108 49	79,084 44

BOGUS INSURANCE COMPANIES.—The London *Insurance Record* says: The amalgamation of the Progress and the United Ports and General Assurance Companies is announced as having been completed, and the joint business will be henceforth conducted under the title of the latter. The subscribed capital of the united companies is £550,203, of which £127,661 is said to be paid up. We presume that before the public have time to breathe after this announcement, the other venture which comes of the same parentage will be brought into the swim; and whether the strength of the three—or rather, the four or five,—new schemes will be sufficient to make one decent company time will show. By the way, how much does a certain official net by this little piece of business?

FIRE INSURANCE DUTIES.—In the year 1867, farming Stock in the United Kingdom was insured against fire to the amount of £79,643,401; in the year 1868, to the amount of £83,768,784. There was, and is no duty or tax on these Insurances. Other property has hitherto been liable to duty on insurance against fire; but in 1865, the duty was reduced from 3s. to 1s. 6d. per £100 insured. The amount insured was at that time increasing at about 40 millions sterling a year; in the year ending the 31st of March, 1866, it increased to £1,-59,893,000, and in the next year it was £1,-133,481,000, an increase of 73 millions, or nearly 6 per cent. But this rate of increase did not continue; in the year ending the 31st March, 1868, the increase was but about 13 millions, or very little more than had become usual under the higher duty. The Inland Revenue Board stated in their last report that, so far as they could then judge, there would not be a larger amount insured in the year ending the 31st of March, 1869, which, by the present budget, will be the last complete year of fire insurance duty.

INSTITUTE OF ACTUARIES.—The London *Insurance Record*, in commenting upon an article in the *Journal of the Institute of Actuaries*, of which the Thirteenth Annual Report of the Insurance Commissioner of Massachussetts is the subject, remarks as follows:

That the Americans have succeeded in striking out new ideas and methods to which we, in this country, are entire strangers, there can be no doubt at all. "These ideas and methods are not simply fantastic devices, but the product of sober reason and practical sense, and are directed not only to the developement of the Assurance principle, but also to the regulation of Assurance practice." It would probably be well for us to take a lesson or two from our American cousins, who have managed to develop Assurance to an extent unknown in any other part of the world.

Probably one of the principal causes, if not the greatest of this large developement, is the compulsory publicity of the assets and liabilities of the Assurance Companies. Legislation has at last come to be regarded in England as necessary, and although it is not intended to set a Commissioner in authority over the Companies, we believe that, with the passing of a moderately strict bill, Life Assurance will take a fresh start, and become more popular in our own country than it is at present.

The discussion of the great "bonus question" as to the comparative merits of the "percentage" and the "contribution" methods of dividing surplus—has been carried on for a considerable time, and with great warmth in America, until one would almost imagine that the subject had been exhausted, but we think that much new light has been thrown upon it in the present article. Whatever the comparative merits of the different methods may be, we concur with the author of the article in considering that "bonuses have worked a moral mischief, by withdrawing the attention of the assured from the safety of his office, in which it should be chiefly fixed, and concentrating it on the accident of gain. We are inclined to think that nothing would purify and benefit the cause of assurance so much as a well-considered reduction of the premium. By circumscribing the area of chance, the arts of prudence and caution would succeed the contrivances of reckless ambition."

A LIFE POLICY OR A MORTGAGE.—At a recent meeting in London, Mr. Edward Butler, Secretary of the Reliance Mutual Life, made the following comparison between the result of investment in a Life Policy and in a Mortgage. We find it in our London Exchanges:—

We will take a sum of money just within a ready grasp; you can multiply it as many times as you please, but for the sake of following the argument we will say that a man agrees to invest £5 every year at 4 per cent. upon mortgage. At the end of five years he will find that his investment, with the interest and compound interest—that is, interest upon interest—will amount to £33 3. 4d. He will have paid £5 every year for five years, and at the end of the time he will find that it amounts to the sum I have stated. At the end of ten years he will find that it amounts to £60 and a few pence, within twenty years he will find that it amounts to £148 18s. 1d., and at the end of thirty years it amounts to £280 9s. 3d. Supposing that the gentleman who made the investment was at the age of thirty when he agreed to pay £5 per annum, he will have reached the age of sixty at the time when his investment amounts to £280 9s. 3d. But you must bear in mind that there are very important conditions to this result. It means that the man should be always able to invest readily both the principal and the interest he receives, and also that he shall live long enough to make the investment. Of course a man at thirty contemplates that he will live to reach the age of sixty. I think there are few who hear me, aged thirty, who are not of that opinion. Brown, Jones and Robinson, who are also thirty, may be differently situated. For instance, you may say—"Brown is rather plethoric," "Jones seems a bit consumptive," "Robinson does not sufficiently take care of himself." Therefore you will say that Brown, Jones and Robinson may not last another thirty years, although you don't contemplate that any such result will happen to yourselves. But you know, ladies and gentlemen, as well as I do, that none of us can be sure of life, and that very often in our experience we find the healthiest lives—those lives which have received unimpeachable certificates from medical men—are the lives that become claims first. Our experience frequently shows this to be the case. Now, let us just see how many lives may be calculated to last until sixty, starting, for instance, at the age of thirty, and basing our calculation on the fact that there are one thousand children born in the same year. We will take these thousand children and judge them by the standard of the Carlisle table, because that is least favorable to my observations. By the Carlisle table, it appears that at the age of thirty, there are 564 of these thousand infant lives, the rest being dead. Now, at the age of thirty-five, there are only 536 alive; so that in these five years, twenty-eight lives have fallen in. At the age of forty, there are only 508 of these lives to be found in existence; and at the age of sixty three are only 364; so that you see this gentleman, who makes these investments of £5 a year, believing and hoping that he will live to realize the sum I have spoken of, may have his expectations put an end to by his decease. Now, there is another kind of investment to which I would call your attention, and which provides against the advent of death. We do not affect to tell you that if a man is living in the full expectation of a long life, that life assurance is the best investment he can make. It is not so; not altogether so. Let us look at the comparison. If a man assures his life at the age of thirty in a respectable office—for I will take none in particular—he pays £5; and that £5, in the event of his death, will realise £200. By our system, we have profits or bonuses added to the policy; and I have here a table which estimates the rate of bonus additions. Now, at the age of sixty, this policy, which was taken out for £200, with these bonuses, is worth £302 8s. 4d. Therefore, you see, an investment in life assurance is not an unprofitable one.

THE ENGLISH LIFE ASSURANCE BILL.

The Bill to amend the law relating to life insurance companies now before the House of Commons is a very good example of the timid and hesitating manner in which English legislation is conducted. The object of the bill is to secure the solvency of life insurance companies. Probably no one will doubt that this is a most desirable object, although there is much difference of opinion as to the best way of obtaining it. The principle of the bill apparently is to require life insurance companies to make official returns of the income, expenditure, mode of doing business, &c., which may be to some extent a guide by which the solvency of the company may be ascertained. The way in which it is proposed to carry out this idea is, however, very faulty and incomplete. The provisions do not go far enough. The companies are required to make a return every year of their income and expenditure, of their balance sheet, and of the new business transactions during the past year. Also an actual return once in every ten years showing the principles on which the business of the company is conducted. These returns are to be deposited with the registrar of Joint-stock Companies in certain forms contained in schedules to the bill. There are also special provisions for the deposit of copies of accounts, &c., with the Registrar of Joint-stock Companies on an amalgamation between two companies, or when the business of one company is transferred to another. A neglect or refusal to comply with the requirements of the bill is made a misdemeanour punishable by fine. The chief defects in this bill are—first, it appoints no officer to examine and check the accounts required from the companies (and without such a person the giving of accounts would be almost wholly nugatory); secondly, it makes no provision for the separation of accounts between different classes of business in those companies which are engaged in marine and other insurance business as well as in life insurance; thirdly, it is not rendered necessary that there should be any fixed amount or proportion of capital actually paid up in cash before policies are granted. These omissions are such serious defects in the bill that it may perhaps be doubted whether it is desirable that the bill should pass at all. The object of the bill is, however, so desirable, and the probability of anything approaching complete legislation on this or any other subject is so small, that it would probably be best that the bill should pass, and thus become a nucleus round which subsequent and more efficient legislation may be collected. It is something to have made a step in the right direction, however little may at first be directly achieved thereby.—*Solicitors' Journal.*

—Col. J. W. H. Rowley, of Yarmouth, has been appointed Collector of Internal Revenue at that port. He is Cashier of the Yarmouth Bank.

THURSDAY, JULY 8, 1869.

AMALGAMATIONS.

It is possible for one insurance company to swallow another without bursting, unless, perhaps, the devourer be actually hide-bound. Modern experience, however, prepares us for receiving with equanimity these gastronomic feats. In too many cases they have proved merely conjuring tricks, intended to deceive. They bring money into the pockets of the principal performers, and leave their dupes confused and robbed. In the case of the International and the Hercules, it appears that a raw company of mushroom growth bought out a company of over thirty years' standing, the transaction being of the most disgraceful character. The two companies had no sooner completed the arrangement than they were forced into Chancery, and their life policies passed over to the Prudential. For a knowledge of this last-named company's affairs, those interested may refer to the paper by Hon. Elizur Wright, which appeared in last week's number of this journal. In these transactions, not a few Canadians are interested to their sorrow. We know at least two or three persons who have been paying premiums to the International on life policies for over a quarter of a century. In the Lower Provinces the number of policy-holders is, we believe, considerable. The last series of amalgamations which has affected us in Canada is the purchase of the Etna's business by the United Ports, and the subsequent purchase of the United Ports by the Progress. One has followed the other so rapidly, that a policyholder can hardly tell where he is to look for payment in case of loss, or what is the condition of the company to which he is trusting for indemnity. So that we have had some experience of amalgamations, both as regards life and fire business, and we have no hesitation in saying that such experience is anything but pleasant. In the case of life assurance, a great deal of distress of mind has been caused to policyholders. It is a hard thing for the innocent victims of successive swindles, who have paid out money for a series of years, in the expectation that they were making provision for their families, to discover now, when past the prime of life, that their forethought has been in vain, that their savings have been thrown away, and that they have built upon the sand. Nothing could be more disheartening to the careful and industrious man, who, appreciating the benefits of life assurance, had sought, in good faith, to partake of them.

We know amalgamation is fashionable in life assurance. In twenty years, two hundred transfers of business took place in England, some of the companies, parties to such transfers, being of great age and of the highest character. In 1868 there were eight transfers. Much may be said in justification of the practice, and we do not consider that amalgamation is necessarily to be objected to. But there is a class of men known as promoters, who start insurance companies (and many other kinds of companies, too,) for the express purpose of having a finger in amalgamation. Whoever loses, they win. They draw pay for floating a company, and when their creation is about to sink, as many of the ephemerals do, they set their wits to work to bring about an amalgamation, and, if successful, draw a second commission. In the case of the Hercules and International, one gentleman, who had influence, received £8,000 for using it, and another, who happened to be Secretary, was paid £15,000 as compensation for his loss of office. So that amalgamations are not without profit to somebody.

We do not say that the fact of one company purchasing the business of another is, of itself, sufficient to beget suspicion; but we do say that certain recent amalgamations have a suspicious look. The only safeguard against untoward contingencies, so far as the public is concerned, is the selection of sound companies in which to place insurance. The man of ordinary intelligence, who takes out a life policy in a company of whose affairs he is ignorant, is little better than a fool, and deserves any misfortune that may result from his absurd action. He need expect no sympathy. *Caveat emptor* applies just as clearly, whether a horse, a cow, or so much insurance be purchased. Some imagine that there is magic in the name company, and go blindfold to their own destruction. Insurance companies are no exception to the general rule, that good and bad herd together. Yet we cannot help feeling surprised, although it is hard to be surprised at anything now-a-days, that so many intelligent and shrewd men are indifferent as regards the insurance companies they trust to for indemnity in case of loss. Year after year they continue to pay premiums, and, if asked as to the financial condition of the particular company they do business with, will unblushingly confess their total ignorance of the subject. We know this to be the case, and can point to individuals who never thought of informing themselves, as to the financial state of their insurers, until the matter was brought home to them, directly, by disaster. These self-same men would not have loaned a few hundred dollars on mortgage security, without a full examination of title being first had, and every possible provision made against even remote contingencies. This carelessness and neglect in the selection of an insurer has been the real table on which the calculations of some companies have been framed. Swindlers have waxed fat, and incompetency has feasted luxuriously, upon it. It is to be hoped that the lessons, few, comparatively, though they be, which Canadians have learned through a bitter experience, will not be without fruit, and that more discrimination will be exercised in the matter of insurance, than has hitherto prevailed among us. The soundest companies in the world are represented here, so that there is little excuse, for accepting, and paying for a doubtful or valueless policy of insurance, when the best may be had. The man who takes his policy without acquainting himself with its conditions, acts about as sensibly as the one who applies for insurance without first satisfying himself that his vendor is reasonably solvent. The insured is bound in duty to himself, (more especially if he holds a life policy,) not to rest content with satisfaction at the outset, but to inform himself, from time to time, whether that solvency

continues, and whether there is a reasonable prospect of his annual expenditure in premium proving of some avail, else he may find that he has been but pouring his money into a sieve, or into the pockets of swindlers.

THE ROYAL CANADIAN BANK.

The proceedings at the annual meeting of the shareholders of the Royal Canadian Bank were an improvement upon the mere noise and abuse which prevailed at the meeting of "delegates." For the future, those connected with public institutions will see the expediency of having as little as possible to do with delegates; and, we are sure, delegates' meetings will receive small encouragement. Delegates are too apt to imagine that their delegated duty is to bicker; that their appointment is equivalent to the conferment of an illimitable right to talk. Those who undertake to set a large monetary institution to rights, and to win back public confidence, must vary the monotony of abuse, hisses and cheers, with the exhibition of a little common sense, before they can hope to attain their object.

In looking over the directors' report, we find that the first half of the year just closed showed an increase in circulation of $474,159, in deposits of $286,337, and in paid up capital of $68,923. With the second half year began the bank's troubles. The Vice-President, through motives now clearly seen to have been of a very unworthy character, attacked his colleagues, and the result was the withdrawal of public confidence from the institution. Between the 1st of January and the 21st of May, the circulation ran down $667,413, and the deposits were reduced by $835,519. A depletion of specie to the amount of $1,037,209 rendered a suspension necessary. According to the statements now furnished, it appears that the capital is impaired to the extent of only $71,608 or six per cent.

The report of the gentlemen appointed to examine into the affairs of the bank was confined for the reasons set forth, to the valuation of the paper discounted at the head office. The four agencies at which the principal losses occurred were Cobourg, $89,084; Kingston, $32,331; Seaforth, $58,624; and Paris, $14,322. These losses are so enormous in proportion to the business done at each place, as to bear on their face the true explanation of their occurrence, namely, wholesale fraud. On the other hand, the profits at Bowmanville, Peterborough, Whitby, Montreal and Toronto, stand out in bold relief.

From what came out at the meeting, we conclude that Mr. McDonald, the virtuous Vice-President, is not a fit man to be on a bank board; that Mr. A. M. Smith, arrogated to himself a power in management which he was incompetent to use aright; that Mr. Dumble's explanation of the Marmora matter was perfectly satisfactory; that the advance to Mr. Manning, no matter how well secured, was ill-timed, and open to the gravest suspicion; that the directors made an indiscreet use of the information they acquired in the Board room; and that the astutest and most self-willed Cashier in the world could not have fought successfully against such odds as Mr. Woodside had against him. The great wonder to us is, that he has come so well out of the ordeal.

The new President, as we have said, is a gentleman in whom all have the greatest confidence. As a member of Parliamentary Committees, he proved himself to be a hard working man, conscientious and shrewd. If he will devote the necessary time and labour to his office, the best results may be anticipated. Mr. Thompson, the Vice-President, is a merchant of more than average capacity, who stands well with the community. Of the other members of the Board, nothing need be said, as they are well known. They have now before them experience dearly purchased, and if they avoid the shoals and quick-sands on which the old Board was wrecked, they may not only repair the errors of the past, but also evoke a new era of prosperity and confidence.

MERCHANTS' BANK OF CANADA.

From the annual report it appears that the directors have determined to avail themselves of the entire capital authorized by the Act of Incorporation—$6,000,000. Hitherto only $4,000,000 has been offered for subscription or taken up. The shareholders are, therefore, invited to take up the $2,000,000 yet to be subscribed, and as they will have the opportunity of getting this stock at par, they will no doubt very generally avail themselves of the privilege. A telegram from Montreal informs us that on the announcement being made public, the stock went down from 111½ to 105, in consequence of the anticipated increased supply in the market. The bank's rest has been increased to the handsome sum of $700,000. Fair progress is reported in the work of realizing the assets of the late Commercial Bank, and it is believed the original anticipations respecting the amalgamation will be realized. The business of the Bank continues to make satisfactory progress.

—It is stated, in Montreal, that Mr. Reekie has got the contract for the Toronto, Grey and Bruce Railway.

We are not sensitive on the score of infallibility, but we prefer that those who assume the responsibility of setting us right should not magnify our mistakes, if such there be, or misrepresent our language. The Toronto *Leader*, in referring to the affairs of the Royal Canadian Bank, assures its readers that we made "the serious mistake of deducting the $300,000 of losses from the amount of the paid up capital, and reason upon the assumption that the capital has been impaired to that extent." Unfortunately for the *Leader's* sagacity, we neither deducted $300,000 of losses from the paid up capital, nor reasoned on the assumption that the capital was impaired to that amount. Our contemporary must have been groping about in the dark when it tumbled over the mistake referred to. We deducted the $300,962, admitted loss, from the difference between assets and liabilities, excluding the capital altogether, and then found that $366,863 represented the amount by which the capital was impaired. The mode by which we arrived at this result was quite correct; but we did fall into a trap. Mr. Woodside stated before the House of Commons' Committee, that no paper had been written off. In dealing with the bank balance sheet, we proceeded on the assumption that the $300,962 of losses had not been written off. It now appears that $297,247 were written off subsequently, and that, in ignorance of the fact, we duplicated the work of the directors. This new light, of course, makes the way clear to some results different from those at which we arrived.

Toronto, Grey and Bruce Railway.—The entire amount of subscriptions necessary to the complete organization of the company, under the charter, has now been obtained, and the meeting for the election of officers will take place as soon as practicable. Great credit is due to some of our leading citizens, for the enterprise and public spirit displayed by them in connection with the project, and that of the Nipissing Road, since their inception. We hope no unnecessary delay will be made in putting both Roads under construction.

—Arrangements are nearly completed for the purchase of the telegraph companies by the English Government, and it is expected that a money bill will be introduced before long for the purpose of acquiring the business of the various undertakings. The sum needed will be about £7,000,000, of which the Electric and International Telegraph Company will claim nearly £3,000,000. Under the management of the Post Office, much greater facilities are anticipated for the transmission of messages from and to the various towns and villages of the kingdom. At the present the system with regard to the smaller towns and to the villages in particular, is very imperfect; but it is expected that in the course of a few years every town and village in which there is a Post Office, will be connected with the metropolis by wire.

Financial.

THE GOLD MARKET.

The following table exhibits the fluctuations in gold, from January 1862 to May 1869.

Date.	1862. Lowest.	1862. Highest.	1863. Lowest.	1863. Highest.
January	par	105	134	160¾

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

We have to note considerable sales of Stocks ex dividends, and at high rates. The feeling of investors seems to be more in favor of Bank Stocks than for some time past.

Bank Stock.—There were small sales of Montreal at 161 and 161½, the market closing with sellers at 161 and buying at 160. Sellers ask 104½ ex dividend for British America. Sales of Ontario were made at 96 and 96½, closing with sellers at 96½. Toronto has been dealt in at 118½ and 120½ ex dividend and there are still buyers at the latter rate. Royal Canadian is nominal at last week's quotations; no sales since annual meeting. Commerce has been largely dealt in at 100 and 100½, and a small sale was made at 101; buyers freely offer 100½, but there are no sellers under 101. There are buyers of Gore at 38; none in market. Merchants advanced to 111½ ex dividend, but closed lower in consequence of the increase of the issue of stock. There were small sales of Quebec at par. Buyers offer 108½ for Molson's; none in market. There are buyers and sellers of City at 98 and 98½ respectively. Small sales of Du Peuple were made at 108. Sellers offer Nationale at 107. Nothing doing in Mechanics. Union is quoted at 104 ex dividend.

Debentures.—No transactions to report in Currency and Sterling Canada Debentures. Dominion Stock is lower, there are no buyers over 106½. Toronto are offering at rates to pay 7⅛ to 7¼ per cent. interest. County are offering at 99 to 99½.

Sundries.—Large sales of British America Assurance were made at from 56 to 57; the books are now closed for dividend due on the 10th inst. City Gas is in demand at 107 to 107½; none in market. Small sales of Canada Permanent Building Society were made at 121½ ex dividend, and it is in demand. Western Canada in demand at 116½ to 117 and a slight advance on these quotations would be paid. There were sales of Freehold at 116, 116½ and 117, in demand at the latter rate. Buyers offer 136 for Montreal Telegraph, with sellers at 137. Sales of Canada Landed Credit were made at 79 and 79½. Fair average Mortgages can be placed at from 8 to 9 per cent. interest.

— A fall in Merchants' Bank stock from 111 to 105, is in consequence of the increase of the stock from $4,000,000 to $6,000,000.

—Very well excuted counterfeit five dollars on the Bank of British North America are in circulation in St. John N.B.

—Aecording to the report of Treasurer Boutwell, the total debt of the United States exhibits a decrease during the past month of $16,410,132.

—By the amended charter of the Bank of Commeree, the day for holding the annual meeting has been changed from the first Monday to the second Tuesday in July.

—The Directors of the Commercial Bank, N. B., having taken steps for the release of Mr. Sancton, that gentleman is now at liberty. It is understood that the bank folks were pretty well "salted" by their New York lawyers by the time proeeedings against Mr. S. were stopped.—*St. John Telegraph.*

The Usury Laws.—The Usury Laws of several States are now being revised. New Hampshire provides that the lender may receive as high as nine per cent., by special contraet, the legal rate remaining at six unless otherwise specified. The usuary bill pending in the Connecticut Legislature is substantially a copy of the Massachusetts laws, providing that six per cent. shall continue to be the legal rate where no rate is mentioned, but borrowers and lenders may agree in writing to any other. The House hesitates to interfere with the aneient usuages of the State in this respeet, but its hesitation will hardly affect the practiee of business men.

Prices of Specie.—The following are the quotations for specie in New York :

American silver	95¾ to 96
Mexican dollars	103¼ " 104½
English silver	475 " 480
Five francs	95 " 96
English sovereigns	486 " 488
Twenty francs	384 " 386
Thalers	70 " 70¾
Spanish doubloons	16.30 "16.45
Mexican "	15.50 "15.65

Bank of England.—The return from the Bank of England for the week ending 16th of June, gives the following results when compared with the previous week :

Rest	£3,142,205	Increase £10,640
Public deposits	7,139,111	Increase 189,210
Other deposits	17,455,401	Increase 286,082
On the other side of the account :		
Gov. securities	£14,173,667	Increase £25,391
Other securities	16,986,400	Decrease 344,944
Notes	10,465,500	Increase 838,265

The amount of notes in circulation is £22,577,720, being a decrease of £264,765 ; and the stock of bullion in both departments is £19,153,625, showing an increase of £522,742, when compared with the preceding return.

Subjoined is a comparison of the present position of the Bank of England, and the prices of Consols and French Rentes with the corresponding week of last year :

	At present.	Same week last year.
Bullion	£19,153,625	£22,571,045
Reserve	11,575,905	14,046,310
Notes in circulation	12,577,720	23,524,735
Rate of discount	4 per cent.	2 per cent.
Consols	92½	95
French Rentes	70f. 22e.	70f. 17c.

By telegram from London, dated July 1st, we learn that the regular weekly statement of the Bank of England, published yesterday, shows that the amount of bullion in vault has increased £185,000 since last week.

Railway News.

Northern Railway.—Traffic receipts for week ending June 26th, 1869.

Passengers	$2,513 72
Freight and live stoek	14,920 45
Mails and sundries	303 44
	$17,737 61
Corresponding Week of '68.	13,771 63
Increase	$3,965 98

Great Western Railway.—Traffic for week ending June 18, 1869.

Passengers	$30,374 61
Freight	36,862 77
Mails and Sundries	2,083 67
Total Receipts for week	$69,321 05
Coresponding week, 1868	58,633 63
Increase	$10,687 42

—A large portion of the iron for the first section of the Wellington, Grey, and Bruce Railway, arrived at Quebec lately.

—A novel law-suit is to be tried in the London Division Court. Mr. J. M. Cousins bought a ticket for Stratford, marked "Good this day only." but the conductor collected his fare because he did not travel on the day so marked. The plaintiff sues for the sum of ninety cents.

—The St. Catharines Revision Court last week added $35,000 to the personal property of Mr. S. D. Woodruff, Canal Superintendent, because it was asertained he held United States bonds to the amount of $50,000.

NOTES ON PEAT—ITS MANUFACTURE AND USES AS FUEL.

In many parts of the country the process of peat-formation has been for ages, and is even now, going on. Mosses, and, to some extent, other plants usually found in low, swampy localities, grow, die, and accumulate before destructive decomposition takes place. To that incessant operation of nature are due the immense deposits of a substance which may be considered in a certain degree a rudimentary lignite, and perhaps even coal. But little attention has been paid to it in this country until within a very few years. But the abundance of wood and the comparatively low price of coal account for this fact. However, the demand for fuel, which seems to increase in a greater ratio than the usual avenues for procuring it, has, in many localities, drawn attention to the necessity of seeking a substitute or auxiliary to ordinary combustibles. Peat has been utilized for many years in Ireland, Scotland, Belgium, and other European countries, mainly for household purposes. The process of manufacture usually resorted to in such instances, was confined to merely cutting square pieces of the deeper layers and allowing them to dry upon the ground until required for use. Under such a method of treatment, peat is, except in very few cases, light and porous, burns rapidly, emits a good deal of smoke, and cannot withstand the blast of iron-furnaces, or the strong draught of locomotives. Many efforts have been made to increase its density, and thus extend the range of its usefulness. But the difficulty of overcoming the resistance of water, which constitutes from fifty to ninety per cent. of its volume in the natural state, and the cost of the different devices to which inventors have had recourse, in order to deprive the crude peat of that element, have, in numerous instances, presented great obstacles in the way of the attainment of the end in view. Of late years, several contrivances have been adopted, having for their object the cutting or grinding and moulding of peat into bricks of different sizes and forms. These have met with more or less success. In the works of the "Central Peat Fuel and Machine Company, of Connecticut," the several desiderata looked for by those who have studied the subject, seem to have been attained in a very simple and economical manner. The machinery used is free from complication, and yet accomplishes its work in a thorough and rapid manner. The peat is simply dug out of the bog by hand labor, which is considered, after all, as the cheapest in view of its adaptability to local changes and circumstances. It is thrown directly into ordinary dumping-cars, running upon tracks laid in the space already excavated. It is then hoisted by steam-power, and thrown into a large hopper leading to the machine. This consists of a horizontal cylinder, to the interior surface of which are fastened knives of different shapes. These cut, grind, and reduce to pulp the crude peat, which is then expelled by means of the rotary action of a central drum, to the periphery of which other knives and grinding projections are affixed.

The cylinder or shell is constructed of boiler plate, and is in three sections, which can be quickly and easily taken apart, and again put together. The whole interior portion of the machine can thus be readily inspected. At one end of the cylinder is a wide spout, through which the peat is expelled in the form of pulp, and from which it passes into moulds underneath. These moulds are propelled by means of an endless chain, furnished with catches. One man attends to the feeding of these moulds, which are conveyed to him from the returning car in a trough filled with water. The moulds are simply oblong boxes, with tapering sides and moveable bottoms, furnished with cross projections. They are carried away in cars, running upon wooden rails and drawn by horses, to the drying grounds, which are either an adjacent field or the surface of the bog itself. The moulds are upset upon the grass, and the peat allowed to dry without any further attention or cost. In the process of drying, the mass breaks into pieces of different sizes and forms—the lines of separation being usually those of the indications made by cross-pieces on the bottom of the moulds. These pieces have, indeed, many of them, almost the hardness and density of bituminous or anthracite coal. The total cost of the manufacture of peat by means of this simple process is found, from actual tests, not to exceed one dollar and fifty cents per ton of peat ready for market; the lowest wages paid to men being two dollars per day. Of course the cost of manufacture will vary with that of labor, which constitutes the largest expense attending it. The works of the above company are proportioned so as to produce one hundred tons of dry peat per day, and including steam-engine, moulds, cars, trucks, etc., cost, we are informed ten thousand dollars. Peat when thus prepared seems to be of a very uniform consistency; constitutes a very convenient, useful, and economical fuel, either for household or manufacturing purposes, for generating steam, and for many metallurgic operations.

It burns with a far reaching flame, almost without smoke. The combustion is kept up in the form of glowing coals, the heat of which can be carried to a great degree of intensity without running the risk of covering the grate-bars with clinkers, or it may be reduced to a very low point without being extinguished. This latter property, it may be remarked in closing, renders it very useful for warming greenhouses, drying lofts, dwellings, etc. Cooking stoves in which this fuel was used have continued in operation for a whole year without the necessity of relighting the fire.—*The Engineering and Mining Journal.*

INSOLVENTS.—The following insolvents are gazetted.—M. T. Rogers, Napanee; John Durham, Montreal; William Kennedy, Ottawa; Edward Welsh, Perth; James Delahey, Walkerton; George Wilson, Napanee; Wm. Snellgrove, Woodstock; R. P. Street, John Peacock, Hamilton; Anathas Cavan, H. Smeaton, C. Corcoran, Quebec; H. Stichler, Galt; T. McLean, Toronto; H. Tibbit, Ottawa; Widmeyer and Schroder, Ayton.

—The annual meeting of the Port Burwell Harbour Co. will be held at Port Burwell on the 14th inst.

—The Patent law of last session came into force on the 1st July inst.; also the act passed by the Ontario Legislature, last session, providing for the registration of births, marriages and deaths.

—It has been ordered that the manufacture in Canada of benzine, and other light products of petroleum, which will not stand the prescribed fire-test of 115 degrees of Fahrenheit be authorized.

Commercial.

Toronto Market.

PRODUCE.—*Wheat*—Receipts, 4,665 bush.; stock in store on the 5th inst., 42,799. Owing to an advance in the English market, prices here have tended upward, and though there is scarcely enough business reported to establish prices, an advance of a few cents may be quoted. Car-loads of Spring sold at 95c. to $1, and Fall at $1 to $1.02 f.o.b. Though the weather has been too wet the accounts received respecting the crops in Ontario are uniformly favorable. The certainty of a large yield of wheat over the greater portion of this continent is now established almost beyond doubt. The markets fluctuate with every change in the weather in Europe, so that the course of prices for the next month or so is as uncertain as the movements of the clouds. *Oats.*—Receipts, 609 bush; in store on the 5th, 5,500 bush. There are scant supplies in market but prices keep steady at 53 to 54c., with very little doing. *Barley.*—No receipts; market nominal. *Peas.*—No receipts; in store on the 5th, 5,800 bush. Lots are held at 80 to 82c., without buyers. *Corn.*—Two cars sold at 65c. on the track.

FLOUR.—Receipts, 3,089 brls.; in store abou 5,000 bbls. The market is firm and more active and closed at an advance of 20c. on last week' prices. Several lots of No. 1 Superfine sold from $4.30 to $4.55. A lot of 400 bbls. Extra sold at $4.45 at Weston and 100 bbls. at the same price here. Fancy, nominal. *Oatmeal*—Nothing doing except in small lots, at $5.75 to $6. *Cornmeal.*—Small lots are worth $3.50 to $3.75.

PROVISIONS—*Butter*—Is arriving more freely and is taken on speculation at 13 to 14½c. There is no shipping movement of consequence, as the weather is too warm, but a small lot has been sent forward to New York, by way of experiment. The crop is generally understood to be large. *Cheese*—Stocks are accumulating pretty fast., holders seem more inclined to realize, but owing to the high prices paid for the May product they do not care to sell at the figures named by shippers; it is selling in small lots at 13¾ to 14½c. *Pork.*—The last of the stock was cleared out to supply the gangs at work on the government road, above Lake Superior, so that there is now no stock in market the last sales were made at our quotations. *Cured meats.*—There is a light stock of bacon in market rough 12½c; cumb. cut 13c; shoulders 11½c; hams canvassed, are selling more freely at 15 to 16c. and there is a fair supply in market. *Eggs.*—are scarce and worth our quotations. *Lard.*—There is but a small demand owing to the decline in butter, holders are firm and stock light, selling 16 to 17c.

WOOL.—The market is again a little easier at 31c. Some of the leading dealers report their receipts in excess of last year.

HIDES—Dull and unchanged as quoted.

FREIGHTS.—Rates for grain to Kingston and Oswego, remain unaltered, at 2c gold, and 3 greenbacks, respectively. There is less demand than at the date of our last weekly report. Rates by steamers also remain unchanged at 20c. for flour to Montreal, and 6c for grain. The rate of grain from Kingston to Montreal is 4c and tolls. There is not as much freight offering as was the case last week; but the steamers are still kept pretty busy. Rates for lumber are still $1.50 per M., greenbacks, but some parties predict a rise for coal $1.30 is paid.

The steamer *Her Majesty*, is expected to sail on her next trip on the 14th prox. Her cargo is already completed.

The Grand Trunk rates to Liverpool are:—Flour 4s. stg. per bbl.; wheat 8s. 6d. stg., per quarter and boxed meats 55s. per ton.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Belleville to Lynn, inclusive 25c; grain, per 100 lbs 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Halifax Market.

BREADSTUFFS.—June 29th.—We have to report an active speculative feeling for flour during the past week. Reports of improvement abroad, reduced stocks here, and uncertainty as to the result of injury to *Her Majesty*, created an exciting feeling and speculative demand. Sales at $ for Supers. were reported; but the demand has been supplied, to a large extent by State Extra and as buyers are unwilling to operate at the advanced rates, the demand has subsided, and stocks are quite equal to requirements. Extra and Fancy are dull, at improved rates. No. 2 in request, with light stocks. We quote White Wheat Extra (fall) $6.25; Fancy, $6; Superfine @ $5.75; No 2, $5.

Imports from January 1st to June 29th, 186 and 1869:

	Bbls. Flour.	Bbls. Cornmeal.
1869	74842	15945
1868	91227	28755

PROVISIONS.—We note no particular activity in this branch of trade. In pork and beef there is the usual local consumption; but no speculative enquiry exists. The same remarks are applicable to butter; the feeling for which is decidedly downward. Last week 22 @ 23c. was realized for good new. To-day, 19c. was accepted: the supply is in excess of demand. Cut meats are in request at quotations. Cheese in demand. Stocks light. We quote: Pork—P. E. I. Mess, $24 @ $25; N. S., $22; Prime Mess, $20; Prime, $6; Butter, 19c.; Beef (mess), $8 @ $10; Prime, $6; Butter, 19c.; Cheese 16c.; Hams, $15; Lard, 16c.

WEST INDIA PRODUCE.—Sugar and molasses, as usual, at this season are dull. Holders are pressing small lots, on the market, at nominal rates. Rum is in good demand, with moderate stocks. Coffee, inactive at quotations. The recent movement here was confined to Jamaica; other grades unchanged.

FISH AND OIL.—Continue in active request, at quotations.

EXCHANGE.—Bank drafts, London, at 60 days, at 12¼ per cent. Montreal sight, 3¼ per cent. St. John, N.B., 3 per cent prem.—*R. C. Hamilton & Co.'s Circular.*

The Cottons of the World.

Our esteemed fellow-citizen, Wm. F. Herring, of the established house of Claghorn, Herring & Co., has obtained from Liverpool, the great centre of the cotton trade, a collection of cotton samples of the cotton producing area of the world, tributary to European wants, arranged and classified according to Liverpool standards by Liverpool experts. This collection the owner designs to present to the Board of Trade of Augusta to be held as the standard for reference in the adjustment of classifications in the Augusta market. It has been acquired through the well-known Liverpool house of Messrs. Robert Lockhart, Dempster & Co. Neither pains nor expense have been withheld to make the collection accurate in classification, and to represent faithfully Liverpool values. Several months of time have been taken to make the collection, and six of the leading Liverpool cotton brokers have each severally furnished the samples, determining each upon his own judgment the respective classifications.

This collection comprises specimens of cotton grown in the United States, South America, Africa (or Algeria), Egypt, Asia Minor (Turkey, Smyrna, &c.), the West Indies; from the valleys of the Mississippi, the Nile and the Ganges; all parts of the world furnishing cotton as a surplus for export. Accompanying the collection is a tabular statement made by Messrs. Robert Lockhart, Dempster & Co., from which we collate some items of general interest. Cotton grown in the South is denominated American cottons, and described in the Liverpool market as Sea Island, uplands and New Orleans, and the standard grade which regulates their relative values, above and below it, in market is good middling for uplands and New Orleans. Cotton grown in South America receives the denomination of Brazils. These cottons comprise Pernams (or cotton from Pernambuco) Maranham and Maccios; and the standard is good fair.

Cotton grown in Egypt is described and denominated Egyptian; the standard grade for which is good fair.

Cotton grown in Asia Minor is denominated as Smyrna (Turkey cottons, &c.—) and is described as Smyrna cotton—the standard grade of which is fair.

Cotton grown on the West India Islands is denominated and described as "West Indias," and the staudard grade is fair, also Tahiti, ranking with our Sea Island.

Cotton grown in British India is denominated Surat, and described as Dhollerah, Saw-ginned Dhawar, known and described by these respective names. The standard grade for India cottons is fair.

Imports of 1868.

Denomination.	bales.	av. weight of bales.
American	1,267,060	443
Brazil	636,897	155
Egyptian	188,689	500
Smyrna	12,758	380
West India	100,651	180
Surats	1,038,925	380
Madras	243,949	300
Bengal	169,198	300
Total	3,660,127	354

Of Brazilian cotton, Pernams and Maranhams are noted in the Liverpool market for good color and staple, but it is a coarser cotton than Egyptian. The staple of Maccios is generally good, but the cotton seedy and color dull; the supply of this cotton is increasing. Smyrna cottons are of fair color, and staple "pretty strong but short."

Of the various descriptions of East Indian and Surat cottons, Dhollerah is generally received as the great standard in the Liverpool market; but the saw-ginned Dhawar, grown from American seed, is fair in color and staple, and the better grades come into competition with American cotton "and are much liked;" while the "McAuthur-ginned broach" is put down as giving less waste in manufacture than any other East India cotton; and Bengal is the "poorest cotton on the Liverpool market, a good deal of which is exported to the continent of Europe."

Our readers will not fail to observe that while the average weight per bale of American cotton is 443 pounds, Surats average 380 pounds; the average weight of all bales received at Liverpool in 1868 being 354 pounds.

Our cotton merchants are examining this collection of samples with great interest. It would be of advantage if our farmers should examine them also, not, perhaps, with the same view as that which governs the merchant, but to form a correct idea of the kinds of cottons which is to compete with their labors. We submit a resume of the opinions expressed by some of our experts in the cotton line at such an examination made lately.

American Cottons.—The samples, six of each grade of American cottons, comprise Orleans and Texas and Uplands, valued and classified on the 24th of April, 1869, to wit:— Orleans — Good Middling, 12½d.; Middling, 12¼d.; Low Middling, 11⅝d. Georgia—Upland, Good Middling, 13¾d.; Middlings, 12d.; Low Middling, —. It was agreed that the classification of uplands was not fully up to the standard of the Augusta market. The sample Orleans good middling exhibited a finer staple but no stronger fibre, and was not superior to Augusta classification of the same grade of uplands in color and cleanliness. The same judgment was pronounced on the sample of middlings, while general concurrence made the low middling of the uplands superior to the same grade of Orleans.

South America Cotton.—The samples of these cottons comprised:—Pernams—Good Fair, 12⅝d.; Fair, 12⅜d. Maccio—Good Fair, 12⅜d.; Fair, 12⅛d. —valuations, as with the American cottons, being made on the 24th of April, and this holds true of the valuations of all the samples. The Pernams possess a longer staple than either Orleans or Texas cotton, but is similar in other qualities. The appearance of good fair Pernams is similar to Augusta good middling; in cleanliness, ginning, &c., no better than Georgia uplands of the grade indicated above, color hardly so bright; would be classed here middling Orleaus. The grade fair is similar in appearance to Georgia low middlings, but the staple is better. The other samples of South American cottons are Maranhams. Grade, fair; value at 12¼d. These cottons assimilate to Georgia middliugs in ginning, color, &c., with no perceptible difference, except as to staple, which is not so good.

West India Cottons.—West Indian grade, good fair, value 12¼d. This cotton has a superior staple; color is not good, having a yellowish tinge; looks very much like our commonest Sea Island. The staple has a fine silky feeling, and the samples were deemed equal, but not superior, to Georgia Zipporah.

The Tahiti, the samples of which were classed as fair, and valued at 30c., ranked with our best Sea Islands.

Asia Minor Cottons.—The standard grade of these cottons is fair, and they are denominated Smyrnas. The sample of this collection is classed and valued at 10⅝. The staple is short and brittle, and such cotton would be classed as to appearance in the Augusta market as ordinary, but as having an inferior staple and body. Good fair of this cotton valued in Liverpool at 10¾d per pound was classed as to appearance with low middling Georgia uplands of inferior staple and body.

Egyptian Cotton.—The samples of these were: Good fair, valued at 13¼d.; Fair, valued at 13d.; Good Middling, valued at 15d. The sample of good fair is not so handsome in appearance, but not equal in staple to our Moina and Zipporah, and is deficient in color, cleanliness and ginning. The good middling has the appearance of our low ordinary, but possesses a better staple.

African Cotton.—This cotton is from Algeria—sample classed as fair, and valued at 10¾d. This cotton is coarse in staple and brown in color, having somewhat the appearance of Augusta low middling, but is shorter than this grade of uplands in staple.

India Cottons.—The highest priced sample of the India cotton is Broach, which is grown from American seed. The sample of this collection is classed "good to fine," and valued at 11¾d This cotton could be elassed in the market ordinary uplands, which it resembles very much in appearauce. But the standard cotton of India is Dhollerah. The sample of this collection are as follows: Good Fair, valued at, 10½d.; Fair, do. 10⅛d.; Middling Fair, do. 9¾d. The sampless of good fair Dhollerah's are short and brittle in staple full of trash, deficient in color and badly ginned. It has the appearance of some of our damaged repacked cottons and might be classed low ordinary upland. The "fair," after the forgoing description, could only be classed as very low ordinary, while the "middling fair," is lumpy, stringy, and trashy, looking more like inferior warehouse sweepings than anything that can be found in the United States. The samples of fair Madras, valued at 9¾d. per pouud, are not so good as those of middling fair Dhollerah's, looking like very badly damaged cottou of the most inferior grade repacked. The staple is weak and brittle. Fair Bengal is represented the poorest cotton shipped to the port of Liverpool.—*Georgia Chronicle and Sentinel.*

Petroleum.

The following shows the exports of Petroleum from the United States, from January 1 to June 29:

	1869.	1868.
From New York.....gals	29,064,896	22,733,445
Boston	1,192,540	1,265,060
Philadelphia	11,536,832	15,137,736
Baltimore	699,993	1,047,546
Portland	.....	152,131
New Bedford	.....	.....
Cleveland	.....	.....
Total Export from U. S.	42,394,261	40,276,917
Same time 1867		27,782,570
Same time 1866		25,350,065

The Tobacco Crop of 1869.

Estimates of the crop of 1869, put down for Kentucky, 70.000 hhds.; Tennessee, 23,000; Indiana and Illinois, 19,000; Missouri, 8,000; total, 120,000. Stock in the West, 8.000; stock at the seaports, 19,000; total, 147,000.

Foreign countries take the tobacco crop in the following proportions:—England, 25,000 hhds.; North Germany, 15,000; Spain, 10,000; Italy, 10,000; France, 9,000; Belgium, 4,000; the Mediteranean ports 3,900; countries not specified 5,500; total 82,400.

The United States demand is put as follows:—

For the West, 35,000 hhds.; for the East, 15,000; total, 50,000. Add foreign demand, 82,400; total, 132,400—a total which would exceed the crop of the year by 12,400 hhds. It must be remembered, however, that the foregoing are the estimates of the trade as represented at the tobacco fair recently held at Louisville.

It is stated that the governments of Austria; France, Spain and Italy, countries where the manufacture is conducted under stringent rules, have permanent agents in the West for the purchase of tobacco.

English Sugar Duties.

It appears that the memorandum which accompanies the North German Sugar Duties Bill, to which we alluded last week, suggests that the saccharine strength of the sugar exported should be ascertained by the polariseope, and the drawback allowed accordingly. In remarking upon the proposition before the Customs' Union Parliament, Messrs. Rueb & Sons, of Rotterdam, make the following remarks on the question of graduated Sugar duties, and their argument seems to us irrefutable:—"We welcome this Bill still more for its good sense in imposing a single duty on all Raw Sugars, of whatever shade or quality, and for establishing a draw back aecording to intrinsie quality. This step is the more remarkable, as Cologne was the town where the four Governments made the experiments on Sugar, which resulted in the disastrous Drawback Convention. The project explains why the German delegates last year were wise enough to refuse to enter the league formed between Holland, Franee, Belgium, and England, to resist the progress of industry and science, and to proteet laziness and imperfectly-made goods, by differential duties on each grade of Sugar. This unfortunate Convention, which yields no more revenue than a single duty would give, without any fear of giving bounties to refiners, is extremely prejudicial to the true interests of commeree and of the eolonies. Let us hope that the lesson given by Germany to the delegates of the four nations, will not be lost, and that it will bring them back to rational principles. If, with the assistance of scienee and of industry, No. 15 is what the Cane and Beetroot naturally yield, it is evident that Nos. 10 and 6 deserve no protection. The Dutch are now suffering the consequences of their joining a false system. Java, the finest Sugar colony in the world, is affected, and White Sugar, in consequence of the Convention, actually fetches less money than brown kinds. Government, thinking of nothing but its receipts, forgets that is materially injuring the colonies. And we are tied to such a system till 1875!—*Produce Markets Review.*

Morton & Smith,

ACCOUNTANTS, REAL ESTATE AGENTS,

AND VALUATORS,

48 AND 50 CHURCH STREET,

TORONTO.

B. MORTON. 47-1y J. LAMOND SMITH.

NOTICE.

Office of the Toronto, Grey and Bruce Railway Company.

A GENERAL Meeting of the Subscribers to the Capital Stock of the Toronto, Grey and Bruce Railway Company will be held at the office of the said Company, No. 46 Front Street, in the City of Toronto, on TUESDAY, the 10th day of August next, at TWELVE o'clock noon, for the purpose of electing Directors and organizing the said Company.

W. SUTHERLAND TAYLOR,
Secretary.

Toronto, July 7, 1869.

Montreal Telegraph Company,

NOTICE is hereby given, that a Dividend of FIVE per cent. for the half-year ending THIRTY-FIRST MAY, has been declared upon the Capital Stock of the Company, and the same will be payable at the offices of the Company, on and after FRIDAY, the NINTH JULY.

The Transfer Book will be closed from 1st to 9th JULY.

By order of the Board,

(Signed)
JAMES DAKERS,
Secretary

Insolvent Act of 1864.

PROVINCE OF ONTARIO, }
COUNTY OF YORK, }

In the County Court of the County of York.

In the matter of HENRY S. LEDYARD, an Insolvent.

THE undersigned has filed a consent by his Creditors to his discharge, and on Monday, the Thirteenth day of September next, he will apply to the Judge of the said Court for a confirmation thereof.

Dated at Toronto, this Third day of July, A.D. 1869.

46-10t. H. S. LEDYARD.

The Canadian Bank of Commerce.

DIVIDEND No. 4.

NOTICE is hereby given that a Dividend of Four per cent. upon the paid-up capital stock of this institution has been declared for the current half year, and that the same will be payable at the Bank and its Branches on and after FRIDAY, the second day of JULY next.

The Transfer Books will be closed from the 16th to the 30th days of June next, both days inclusive.

The amendment to the Charter of the Bank, recently sanctioned by Parliament, changes the day for holding the Annual General Meeting from the first Monday to the SECOND TUESDAY IN JULY.

Stockholders will therefore please note that the meeting this year will be held on Tuesday, the THIRTEENTH PROX.

Chair to be taken at Twelve o'clock, noon, precisely.

By order of the Board.

R. J. DALLAS, Cashier.

Toronto, June 23rd, 1869. 42-td

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq., ... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ... Ottawa.
EDWARD A. C. PEW, Esq., ... Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing
ISAAC C. GILMOR, 58 Colborne Street, Toronto.
A. McK. COCHRANE, Secretary-Treasurer, 383 St. Paul Street, Montreal. 30-35t

3-

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon. J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETARY

NATIONAL LIFE INSURANCE COMPANY

OF THE

UNITED STATES OF AMERICA.

THE CONNECTICUT MUTUAL
LIFE INSURANCE COMPANY,
HARTFORD, CONNECTICUT.

WOODBRIDGE S. OLMSTEAD, SECRETARY,
EDWIN W. BRYANT, ACTUARY,
JAMES GOODWIN, PRESIDENT,
ZEPHANIAH PRESTON, VICE PRESIDENT.
LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS,

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $6,000,000.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
$140,000 deposited in Canada for the benefit of Policyholders.

12-1y Assistant Managers for Ontario.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family*, and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

CANADIAN BANK OF COMMERCE.

Proceeding of the second annual general meeting of the shareholders, held in the Banking House, Toronto, on Tuesday, 13th July, 1869 :—The chair was taken at noon by the Hon. William McMaster, the President, at whose request the Cashier read the following

Report.

The directors beg to present to the shareholders their second annual report, and they do so in the belief that the accompanying statement of the result of the year's business, ending 30th June, will give general satisfaction.

The net available profits for the past year amount to		$141,236 07
To which add balance at credit of profit and loss account of last year		362 01
		$141,598 08
From which have been taken—		
Dividend No. 3, paid 1st January, 1869	$38,393 79	
Dividend No. 4, paid 2nd July inst	39,728 58	
Transferred to "Rest" account	60,000 00	
		$138,122 37
Leaving a balance at credit of profit and loss account of		$ 3,475 71

It will be seen that after paying a dividend of eight per cent. for the year, the surplus profits amounted to $63,475 71, of which $60,000 has been carried to the "Rest" account, making that fund $100,000, and the remaining $3,475.71 is at the credit of the profit and loss account.

The sound business principle of writing off annually all debts that appear bad, has been scrupulously observed. The branches have been recently inspected, the assets were thoroughly examined, and the directors regard every item therein as being perfectly good.

Numerous applications for the establishing of branches in various sections of the Province were received during the year, but none of them were entertained except those from Woodstock and Simcoe, where the business of the Gore Bank was offered to the directors under circumstanecs which, in their judgment, rendered its acceptance not only expedient, but desirable, in the interests of the bank.

The Directors, after mature consideration, eame to the conclusion that it was advisable to increase the capital of the bank from one million to two millions of dollars ; and acting on the discretion given to them by the shareholders at last meeting, they applied to Parliament for the necessary power to make the increase. An Act for this purpose was carried through the Legislature, and is now on the Statute Book.

The decision to extend the capital having been arrived at, the Directors deemed it advisable to anticipate a portion of the proposed new stock by the issue of provisional receipts to those who desired to obtain it. $409,200 was taken up in this way, and paid in full. $190,800 has been alloted to those of the original proprietors who responded to a circular inviting them to send in applications.

These arrangements had the effect not only of furnishing means to meet the demands of a constantly increasing business, but also prevented the old stock from being materially affected in price, which is usually the case when a large amount of new shares has to be placed on the market.

A considerable portion of the remaining stock could have been readily disposed of to applicants other than the present shareholders, but in view of the valuable business established, and the fact that a reserve of $100,000 has accumulated in two years, the Directors are of opinion that the $400,000 stock still on hand, which it may not be advisable to dispose of for some time, should be held at a premium.

(Signed) WM. MCMASTER, President.

(Signed,) R. J. DALLAS, *Cashier.*

Canadian Bank of Commerce,
Toronto, 30th June, 1869.

The following resolutions were then put and carried unanimously :—

Moved by Joseph McKay, Esq., of Montreal, seconded by Æmilius Irving, Esq., of Hamilton —That the report of the directors now read be adopted, and printed for distribution among the shareholders.

Moved by T. D. McConkey, Esq., M. P., of Barrie, seconded by D. Buchan, of Toronto—That the by-laws made and enacted by the Board of Directors, numbering from one to twenty-two and which have been now read by the Cashier, be confirmed, and that by-law No. 6, relating to the

remuneration of the directors, be applied retrospectively to the past year.

Moved by Hon. J. G. Currie, of St. Catharines, seconded by James Campbell, Esq., of Toronto—That the directors be authorised to apply to the Dominion Parliament at its next session for an extension of the charter of the bank, with such alterations as experience, the action of the other banks, and possible Government legislation on the subject of banking, may render desirable.

Moved by T. D. McConkey, Esq., and seconded by E. A. Rutherford, Esq., of Toronto—That the thanks of the meeting be tendered to the President, Vice-President and directors, for their services during the past year.

Moved by A. T. McCord, Esq., of Toronto, and seconded by W. J. McDonnell, Esq., Toronto—That the ballot-box be now opened, and remain open until 3 o'clock this day, for the receipt of ballot tickets for the election of directors and that Messrs. James Brown and Henry Pellatt do act as scrutineers—the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered.

The following is the report of the scrutineers: We, the undersigned scrutineers, appointed at the general meeting of the shareholders of the Canadian Bank of Commerce, held this day, hereby declare the following gentlemen duly elected directors for the ensuing year:—Hon. William McMaster, Messrs. H. S. Howland, William Alexander, James Austin, William Elliot, T. Sutherland Stayner, and John Taylor. (Signed,) James Browne and Henry Pellatt, scrutineers.

At a meeting of the newly elected Board of Directors, the Hon. Wm. McMaster was elected President, and H. S. Howland, Esq., Vice-President, by a unanimous vote.

R. J. Dallas, *Cashier.*

WESTERN EXTENSION RAILWAY COMPANY.

The annual meeting of the stockholders of the European and North American Railway Company for extension westward, was held on the 16th June, in St. John, N.B. The report states the total length of the road, from the west bank of the river St. John at the Suspension Bridge to the State of Maine, at about 88 miles. Nearly the whole of this distance is graded and ready to receive the rails as soon as they arrive from England. The directors believe that by the end of July, or early in August, the track will be laid so that a train can proceed from the station at Fairville to the junction of the Fredericton Branch Railway. Sleepers sufficient for laying the track on the whole line have been delivered, and 41¾ miles of double fencing has been put up. The rails for the whole length of the road have been purchased, and it is calculated that it will require about 9,000 tons. Of this quantity about 4,020 tons were received during the season of 1868, about 1,830 tons have already arrived this spring, and the balance, about 3,205 tons, are reported afloat. Two vessels loaded with iron for this company were unfortunately lost, one off the coast of Nova Scotia and the other off Cadiz. Information of these disasters was immediately telegraphed to England, and the parcels have been repeated; so that the delay of the receipt of these cargoes is the only loss that the company will sustain. Three locomotives and fifty flat cars for ballasting and other purposes have been procured, and are kept constantly occupied in the construction of the road. Temporary bridges have been constructed, or are in course of construction, over all the large streams, and will be used only until the permanent superstructures can be brought from the United States. All bridges over 40 feet pan are to have iron superstructures. Stations buildings have been erected in a number of places.

At a special meeting of the stockholders, held on the 2nd of November, 1867, the directors of the company were authorized and empowered to execute a mortgage on the road, and to procure and issue first mortgage sterling bonds, by the sale of which bonds they would procure means to complete the road. The bonds were to be like the form submitted, and an issue of about $2,000,000 was ordered. The mortgage was duly executed, and 2,055 first mortgage sterling bonds, of £200 each, amounting in all to £411,000 sterling were prepared.

On the 3rd of December, 1867, Wm. G. Case, Esq., of Columbia, Pennsylvania, U.S., was appointed the agent of this company to proceed to England and negotiate and sell these bonds. On the 6th of May following he concluded an agreement with Messrs. J. S. Morgan & Co., bankers, London, to introduce these bonds in the London Stock Market, and under this arrangement Messrs. J. S. Morgan & Co. disposed of £38,800 for the net sum of £26,431 15s. 6d., and £41,000 were subsequently sold by Mr. Case for £27,913 6s. 2d. stg. On the 12th of December last, the directors of this company sold and transferred to the International Railway Construction and Transportation Company, an association organized in the United States, £180,000 of these bonds at 71 per cent. of their par value, for which this company were to receive £40,000 stg. in cash, by monthly instalments, 5,000 tons of railroad iron, and the balance is to be paid by them in two years from the date of the same. £11,400 of these bonds have been used in procuring rolling stock, and £6,600 of them have been paid on account of station buildings on the road. Of the whole amount of bonds authorized, only £278,200 have been issued, which leaves £132,800 still under the control of the directors.

By the provisions of the Act of Assembly, 27th Vic., cap. 3, intituled, "An Act to aid in the Construction of Railways," a subsidy of $10,000 per mile is granted to assist in constructing this line of railway. The whole length of this road is about 88 miles, so that the total amount arising from this source is about $880,000. Twenty instalments, or $500,000, of this amount has been called for, which leaves a balance of $380,000 still available.

The total amount of stock subscribed for and owned by individuals principally resident in St. John is $193,750. Of this amount $116,760.55 has been collected, leaving a balance of $76,989.45 due and unpaid. The Treasurer's accounts were duly audited by the Hon. A. McSeely and James U. Thomas, Esq.;—the Treasurer's account showing the total cash receipts of the company, up to 31st May last, to be $1,131,517.88, and the total expenditure up to the same period to be $1,130,476.15, and also a general business sheet of the company's accounts are also submitted. All of which is respectfully submitted.—Wm. Parks, President; A. Jardine, Wm. B. Robinson, Lewis Carvell, Directors.

THE INTERNATIONAL BRIDGE CO.

The American and Canadian International Bridge Companies each held its annual general meeting on the 5th, the former at Buffalo, the latter at Fort Erie. Beyond the election of Directors, no action was taken at either meeting, except the passage of a resolution declaring void the contract for building the bridge held by James McHenry of London. The meeting was one of mere formality, and the two companies, for ten years have been repeating this annual ceremony.

In both companies, the directors elected are almost entirely gentlemen in some way connected with the Grand Trunk Railway Company, so that the bridge organization is wholly controlled and possessed by that corporation.

The following are the Directors of the Canadian Bridge Company, chosen at the Fort Erie Meeting:—C. J. Brydges, Managing Director of the Grand Trunk Railway; John Bell, Solicitor of the G. T. R. Company; R. Easton, Mechanical Superintendent of the G. T. R. Company; J. Ferrier, President of the G. T. R. Company; J. Hickson, Secretary of the G. T. R. Company; A. Walsh, M. P. Commissioner of the Intercolonial Railway; P. R. Jarvis, connected with the G. T. R. Company at Stratford, Canada; H. Yates, ditto at Kingston, Canada; E. G. Spaulding, of Buffalo.

For the American Company, the same Directors as the above were elected, with the exception of Messrs. Eaton and Yates, in whose places were chosen Adam Brown, of Hamilton, Canada; and E. Carlton Sprague, Buffalo.

Mechanics' Bank.—The annual meeting was held in Montreal on the 5th July. The directors submitted to the shareholders the following annual statement of affairs:—The business for the year ending 30th June, 1869, has been conducted with caution, and has proved remunerative in its results, while losses and doubtful debts are more than covered by the amounts written off. Balance at credit after last annual meeting $12,736.35; the profits of the year, after deducting bad and doubtful debts, and crediting contingent fund, are $35,041.16; making $47,771.41; from which have been deducted—dividend 4 per cent. 1st November $11,828.75; dividend 4 per cent. 1st May 12,752.85; working and other expenses $4,188.55; making $28,770.15; balance $19,007.26.

The system of conducting the affairs of the bank in former years has been adhered to in that which has just closed, viz.:—"City Accounts," "No Branches," and "No Circulation." All transactions are made in Government Legal Tenders and the Notes of other Chartered Banks, and in view of the important changes in the Banking system of the country, which the next few years may possibly bring about, the Directors believe it it to be for the interest of the Mechanics' Bank, that for the present, at all events, there should be no departure from a mode of doing business, which so far has been attended with success.

The following gentlemen were elected to serve as Directors for the ensuing year:—Walter Shanly, M.P., C. J. Brydges, Alexander Molson, John Aitkinson, William McNaughton.

General Statement.

	$549,301 5

Merchants' Bank.—The following resolutions were passed at the annual meeting on the 5th and referred to in the annual report published in these columns last week:—

1. That, with a view to carry out the intention of the Shareholders in establishing the Bank, and to keep faith with the public by realizing the representation on the notes in circulation, it is expedient to increase the subscribed capital stock to the total sum of $6,000,000.

2. For this purpose the Directors be authorized and empowered as soon as convenient to open Books of subscription, and under such regulations as they may see necessary.

3. Each shareholder as shown by the books of the Bank on the last day of the month of June

shall be entitled to subscribe at par an amount equal to one half of what he may have held, at that date, or in other words, to add fifty per cent to his stock.

4. An instalment of ten per cent on the amount of new stock thus subscribed will be payable at the time of subscription, but no further calls will be made on it unless it should seem to the Directors that the interests of the Bank require it, and then only in instalments of ten per cent with at least three months interval between the payment of each instalment.

5. No transfer in the Books of the Bank of the New Stock will be permitted unless the whole amount of the shares desired to be transferred is previously fully paid up, with accrued interest from date of last dividend.

6. Shareholders may at any time make such payments as may be convenient for them on account of this New Stock, provided such payments be in equal instalments of ten per cent., and may pay up in full from time to time such number of shares as they may desire, with interest from date of last dividend.

7. Such shares on being paid up in full with interest may be transferred to the credit of the Shareholders in the Stock Books of the Bank and will then carry full dividend.

8. Pro rata dividends will be paid at the regular period on all stock partially paid up.

9. Such shares of this new stock as may not be subscribed within the time and under the regulations prescribed by the Directors, may be disposed of by them as they shall see fit for the interests of the Bank.

10. The Directors will advertise in one or two newspapers the dates when the Books of subscription to the new stock will be opened, and will also intimate the same to the Shareholders by sending to their address printed notices through the post office.

To the first resolution Mr. Crawford moved an amendment to the effect that the consideration of an increase in the stock should be deferred. This was seconded by Mr. Fraser and lost on a division by a large majority.

Mutual Insurance Company of Nichol.—The annual meeting of this company was held in Ennottville, Ont., on the 7th June, Mr. A. W. Flewwelling in the chair. The chairman having briefly explained the object of the meeting, the Secretary read the following report of the Directors for the past year:—Your Directors in presenting their tenth Annual Report have much pleasure in stating that another year has passed without any loss having been sustained by fire—being the third year in succession that the company has been so fortunate. The unprecedented dry season of 1868 very materially increased the risk of fire amongst farm buildings, and many companies insuring this description of property sustained heavy losses, although our institution escaped. One hundred and seventy-eight policies, including renewals, have been recorded during the past year —covering property to the amount of $200,160. There are 385 policies now in force, covering property to the amount of $305,720. The available premium notes amount to $7,944.76, and the balance at credit of the Company is $402.79. A portion, however, of this balance ($85.32) is represented by promissory notes, &c. Of late several mutual insurance Companies have abandoned the premium note system and collected the whole premium in cash. It is not the province of your directors to criticise the management of other companies, but they deem it their duty to warn their brother farmers that there is not so much safety in the cash system as appears at first sight. The following extract from an editorial in the *Monetary Times* shows very clearly the danger of the system:—"It appears, therefore, that the various mutual companies have been gradually leaving the premium note system. There is no doubt that there is on the part of the insured a preference for the cash system and its exemption from liability and in order to compete successfully for business, the Mutuals have been compelled to depart from the true mutual principle. But this breaking loose from premium notes deprives the insured of that security for payment which he naturally looks for. In the absence of a guarantee capital, there is no security at all but the honesty and good management of the directors. It may be said that they confine their business to narrow circles, but the contrary is becoming the case, and we find Mutuals branching out in all directions and competing successfully with Stock Companies. We know the note system may have abuses attached to it, such as in one case we have heard of, where the agent taking risks gets $2 a policy and the company gets nothing until an assessment is made. But that is no sufficient answer. Where the note system prevails there is a show of security, at the least, but in the cash system there may be neither shadow nor substance. Under such circumstances, we conclude that some remedy should be applied to state of affairs manifestly wrong." The report was adopted and the members of the late board were all re-elected, viz. —Messrs. David Allan, Alexander Watt, William Robinson, Francis Cassidy, Alexander Burnett, J. Bonnalie and A. F. Sherratt. The board met the same evening and re-elected David Allan, Esq., president.

Union Bank.—The annual meeting was held in Quebec on the 5th July, Charles E. Levy was called to the chair, and N. H. Bowen acted as Secretary. The directors report the result of the business of the past year as follows:—The profits after the payment of all charges and provision for losses amount to $105,445.04; to which is to be added the balance of the account of profit and loss brought from the former year $1,567.95; making 107,012.99; which has been thus appropriated:—To two dividends of per cent. each $80,390.22; vote to President at last annual meeting $1,000; reserve for doubtful debts $8,000; reduction of the account for preliminary expenses $2,000; addition to reserve profits $15,000; total $106,390.22; leaving $622.77 to be carried forward to the account of profit and loss.

The directors are glad to report that the operations of the year have been attended by very little loss. Ample provision has been made for this, and a further sum of $8,000 has been reserved to meet a possible but it is hoped improbable loss on a claim, the value of which cannot now be ascertained.

The directors thought it well to procure during the last session of the Parliament of the Dominion an amendment of the charter of the bank affecting the election of Directors in the case of vacancies at the Board. The act is now submitted to the shareholders, and will take effect only after their approval.

The following directors were elected for the ensuing year:—Charles E. Levey, Hon. Thos. McGreevey, Hon. Geo. Irvine, Colonel Rhodes, Jas. Gibb, John Sharples and Geo. H. Simard. And at a meeting of the newly elected Directors, held the same day, Messrs. Charles E. Levey and Thos. McGreevey were elected respectively President and Vice-President for the ensuing year.

Canada Company.—The ordinary general meeting of this Company was held in London, England, June 24. The report stated that the net profit for the half-year had been £32,932, of which £15,299 was made applicable to the repayment of capital, leaving £17,633 available for distribution, out of which the Directors recommended a dividend of 30s. per share, free of income tax. The chairman, in moving the adoption of the report, said that the business of the Company had fallen off during the last half-year, consequent upon the commercial depression in the colony, but from the last accounts received the Directors anticipated that in the current half-year business would again be restored. The Directors had felt it their duty to aid the emigration movement, and had subscribed £100 from the Company's fund to the East-end Emigration Committee. They had also directed their agent in Canada to expend a similar sum in providing for the emigrants on their arrival. He thought the recent discovery of gold on the Company's estate might prove valuable to them.

Insurance.

Fire Record. — Kincardine July 2. — A telegram says, the planing mill and factory and a block of three frame tenement buildings, belonging to Messrs. McKerricker & Evans, builders, were totally destroyed by fire. Mr. Rastall's new frame building in the course of erection was considerably damaged, and a large quantity of lumber destroyed. Loss about $4,000; insured for $1,500.

Carleton, N. B., July.—Fire broke out in John Hanna's three story house, opposite Clarks mill, Carleton, and it was speedily burned to the ground There was $1,000 insurance upon it.

Kentville, N. B., June 30.—A despatch says a fire broke out in a building owned by Daniel Moore, and occupied by T. L. Dodge as flour store. Store and goods entirely destroyed. No insurance. The fire spread itself to the adjoining house of Geo. E. Masters, and notwithstanding all efforts made to subdue it, the house and part of the furniture were consumed. No insurance. The further progress of the fire was stopped by the pulling down Lockhart's blacksmith shop. The goods of W. H. Tighe & Co. were considerably damaged by hasty removal from fear of the fire spreading. A correspondent at Kentville states that the loss is about $10,000.

Woodstock, July 10.—The boiler of Clarke & Davidson's steam grist mill, at the east end of the town, exploded, damaging property to the extent of two or three thousand dollars Fireman John Eddy was badly burnt and had the back of his head cut. No lives were lost, and the doctors think the fireman will recover. The windows in the mill were nearly all smashed, and the windows in the Woodstock Hotel across the street were broken. The mill was stopped at the time. No damage was done to the chimney.

St. Catharines, July 13.—About one o'clock this morning, a fire broke out in the stable attached to Edward McCarthy's blacksmith shop. The stable and a horse in it, owned by Mr. E. Goodman, was burnt. The shop and a new dwelling in the course of erection by Mr. McCarthy, was injured by the fire. The stable was insured for thirty-five dollars. The fire was evidently the work of an incendiary, it having broken out in the manger at the horse's head.

St. John, July 10.—An obliging correspondent writing under the above date says:—In your paper of the 1st inst., the Hon. A. McL. Seely's mill is valued at $360,000 instead of $30,000. The insurance is stated to be $10,000, should be $16,000, viz: $12,000 in the "Liverpool, and London, and Globe," and $4,000 in the "Royal." The cause of the fire arose from the common practice, in this Province, of placing the boilers, &c., in a wing, with a low slanting, unprotected roof. The constant heat, after some years, seems to cause some chemical change in the nature of the wood, so that a single spark will set in flames. This was seen to occur in a mill burnt about 2½ years ago. The watchman tried to put it out, when the fire was only about the size of his hand, but the fire ran away from him. A high roof, over the boilers, protected with sheets of zinc, would, I am convinced, save mills from being burnt in the way I have described.

Insurance Stocks in Hartford.—These have somewhat advanced under the stimulus of handsome July dividends, which have been declared as follows: The Ætna quarterly of $6 per share; the Phœnix $5 and the City $3. The Hartford and Merchants have each made a semi-annual dividend of $10 per share, and the Connecticut of

$6. The others, at this writing have not been heard from. All of the Fire Companies are understood to have done a successful business the last six months, and to have added somewhat to their surpluses, besides saving the handsome dividend just declared. The following are the latest quotations of Insurance stocks in Hartford:

Fire Insurance Companies.

	Bid.	Asked.
Ætna	217	220
Hartford	230	...
Connecticut	140	...
Phœnix	230	...
City	167	180

North American	125	130
Merchants'	220	...
Putnam	92½	95

Life Insurance Stocks.

Ætna Life	210	225
Travellers' (Accident)	103	106
Hartford Life & Ann	75	82
Continental	128	130
Conn. General	98	99½

Amalgamation.—An extraordinary general meeting of the shareholders of the Progress Assurance Company was held in London on the 24th June, when the transfer of the business to the United Ports and General Insurance Company was unanimously confirmed, as was a resolution to wind up the company voluntarily under the supervision of the court.

The Passport.—This steamer, in making the down trip, passed the first rapid, and was about entering the second, when the chain attached to the rudder gave away. Control of the vessel was for a moment lost. She made a wide sweep to the right, but was brought to again by the men at the tiller, four men being always at the wheel and four at the tiller. The engines were immediately reversed, and both anchors let go. Finding that it would be impossible to repair the chain before dark, the Captain very wisely determined to remain there all night. She arrived in port next morning, 5 o'clock.

Longevity in Marriage.—It appears that between the ages of 20 and 25, the number of deaths among bachelors is double those that occur among married men. This inequality of mortality diminishes during subsequent ages, but always remains on the side of the married men. The average age attained by married men, from the age of 20 to the end of life, is 59½ years, while that of the bachelor is only 40. In other words, a young man after the age of 20 unmarried, is likely to live 20 years longer; but married, 39½ years longer. After the age of 25, the average age reached by married men is a little over 60, while it is not quite 48 for bachelors. This curious fact shows that the chances of life vary with every age, and that the mere fact of one's having attained a certain period is an earnest of sufficient vital powers to carry us to a later age. It is an indisputable fact, that one-half the bachelors die before reaching the age of 30, while, on the contrary, an immense majority of married men live to between 60 and 80 years. Among females, the difference in the duration of life between the married and unmarried woman is not so great as among the other sex: nevertheless that difference is very largely in favor of the married. In wedlock, it is true, females are more subject to premature death than otherwise, from 15 to 30, but they find ample compensation between the ages of 35 and 45, when spinsters in their turn die in much greater numbers; and beyond the age of 50, the advantage is constantly in favor of the married woman.—*Ins. Journal.*

Condition of Limitation in Policies as to Suits thereon.—The Supreme Court of the United States, in a case of Riddlesburger vs. Hartford Fire Ins. Co, has affirmed the validity of the condition in policies, "that no action against the company for the recovery of any claim upon the policy shall be sustained, unless commenced within twelve months after the loss shall have occurred," &c. The condition is not even affected by the fact that an action which was dismissed, had been commenced within the stipulated period. A stipulation to refer all disputes to arbitration stands on a different footing, as an attempt to oust the courts of jurisdiction.

—A despatch from Plymouth, Eng., of the 6th July, says:—The ship Cavalier, Capt. Manson, of Aberdeen, which cleared from Quebec, Canada, on May 31st for London, has arrived at this port waterlogged, having been run into by a Bremen mail steamer.

—The schooner Lafayette Cook, with a cargo of lumber for Kingston, stranded in the Saginaw Bay, Mich., on the 10th July. Insured in the British America and Ætna for $6,000. Steam pumps and wrecking material have already been dispatched to her assistance.

Railway News.

Northern Railway.—Traffic receipts for week ending July 3, 1869.

Passengers	$4,942 54
Freight and live stock	13,125 18
Mails and sundries	2,248 39
	$20,316 11
Corresponding Week of '68.	15,916 79
Increase	$4,399 32

Great Western Railway.—Traffic for week ending June 25, 1869.

Passengers	$31,736 72
Freight	33,094 22
Mails and Sundries	2,076 87
Total Receipts for week	$66,907 81
Coresponding week, 1868	57,282 84
Increase	$9,624 97

Great Western Railway.—It is stated that the Company have received applications for the whole of the unissued portion of their new 5 per cent. stock, which is issued at 80 per cent., and which up to the year 1880 is convertible at the option of the holders into ordinary shares of the Company. The 6 per cents. of the Company, which have no such convertible rights, being at par, 5 per cents., with the option of conversion, must be worth more than 80, especially if the line prosper as it seems likely to do. This week ending June 18th, 1869, there is a very large increase in the traffic. The Great Western of Canada is a line in good condition, with a good traffic on it, and with excellent prospects, and if in a few years' time it pays 10 per cent. dividend we shall not be surprised.—*Herepath's Journal.*

Port Whitby and Port Perry Railway.—The Whitby *Gazette* furnishes us with a report of the proceedings in the Council of that town on the occasion of the introduction of a by-law to authorize the corporation to take $10,000 of stock in the railway. Mr. Draper said it might be asking too much for the town to take so much stock after granting a bonus of $50,000. But in 1857, he went on to say, the rate-payers were called upon to vote for a bonus of $300,000 for a railway which they did almost unanimously. The annual interest to meet the sinking fund would amount to $22,000, and there was a larger debt hanging over Whitby at that time, than at present. Taking all matters into consideration, he thought it was his duty to lay the question before the council, and endeavour to make the first link of the road to Lake Huron, for he believed if 20 miles were built, the extension would only be a matter of time. He said that $60,000 of the private stock had been subscribed, and that $40,000 had been subscriaed for by the gentlemen who proposed to build the road. The contract was let to them conditionally, they were to pay 10 per cent., as other shareholders, and to give a line suitable to the directors. The reason the contract was given to them was that they had taken a larger amount of private stock than other contractors. Of course, there were other tenders; but the directors thought that if the contractors took stock, they would build a good road. Had the contractors, he said, paid the instalments of the stock, the work probably would have been going on. A month was given them to raise funds, but they failed. Mr. Draper went on to say: if the town felt in '57 that it could assume the responsibility of giving $300,000 with nothing to oppose its interests, should it not be able to give a good sum, with opposition? But the town was not asked to give more, only to take stock, and he believed it would be good stock. On the east we were cut off by Port Hope road, on the west by the Toronto narrow guage; what was to follow but a division of the county? Take a map of our county, and it would be seen that the county, long and narrow, would have to be divided, and that before many years. If half or one-third of assessed property be taken from the county, so much would be taken from the ratepayers, and every man's taxes in the county would be raised in proportion. If the road were constructed to Beaverton, the county would be bound with an iron band, and would do away with all talk of a county division. If the by-law were passed our taxes would only be slightly increased. Where a ratepayer paid $14 taxes last yaar, his rate would be $15 this year, and for one taxed $28 last year, the rate this year would be $30, &c., or only one dollar increase for every fourteen. He referred to the prospects of similar by-laws in Reach and West Whitby.

After some further discussion, the motion was carried.

Railway Iron.—From South Wales it is stated that all the great iron masters are of opinion that prices of railway iron must advance before long, as the requirements of the United States and Russia are known to be large, and, as at the same time, there is little, if any, competition with Belgium and other continental markets. Considerable activity is evinced in the shipment of rails at the local ports of South Wales for the United States and the Southwest coast of America, and it is expected that with fine weather large quantities will be sent away. As compared with last year the increase in the shipments will be very important.—*London cor. Financial Chronicle.*

Grand Trunk Traffic.—The aggregate increase (from Jan. 1st to June 5th, 1869) appears to be only £7,197, but it is really about £16,000, the period this year being 2 days less, and 2 days traffic is equal to more than £8,000. There are three weeks more to the end of the half year and if in these three weeks there be no increase (but doubtless there will be increase) the traffic account will stand well. £16,000 increase in half a year when the most severe snow storms ever known have occurred, and over a period last year remarkable for its very considerable addition in traffic receipts, must be considered good progress. The traffic this year will probably be little short of £1,500,000. A great authority in Grand Trunk matters has stated his opinion that when the line is fully stocked and fairly developed in traffic it will have a gross revenue of £50,000 a week, or upwards of £2,500,000 a year, a million a year more than it has.—*Herapath.*

An Aerial Ship.—There is little reason to doubt that a successful attempt has been made to float an aerial engine by a mechanic of San Francisco. We are informed that "the ship rose in the air, and was propelled backward and forward, and guided in any desired direction by the steering apparatus. The engine and boiler weigh less than one hundred pounds." This is a great success, and we hope that important results may flow from it.

THE CANADIAN CANALS.

VII.

There is an additional argument advanced in favor of the Caughnawaga Canal, on the ground that the Erie Canal presents constant delays to the passage of freight. It is held that a water communication by Lake Champlain would admit a full laden propeller to Whitehall, where the process now observed at Buffalo (to pass to Albany) would take place, viz: the transfer of cargo to barges. It is fair to say that is not impossible that a certain quantity of the freight might take that route. As an incidental argument it is not without value; but to place such reasoning in the first rank, is to give the Caughnawaga Canal no higher claim than that of an experiment. For it is just as possible, that on the route being tried, it would be found not to answer, and hence in no way would be followed.

Independently of the facilities gained for the Ottawa timber trade, the strongest reasons for the construction of this work are said to lie in the direction of the New England States, which must ever be large consumers of Western cereals. There are now four routes traversed by the cargoes which supply this want, two of which are tributary to the Erie Canal, at Albany. The first by the Hudson River to New York, and thence to the sea ports convenient for its distribution, Boston standing first in the list. The second, by railway, the freight crossing the Hudson to Greenbush, opposite Albany, whence it follows the railway to Boston, a distance of 200 miles. The third is found on the main railway lines at Buffalo, the New York Central and the New York and Eric. Both have established western connections, and the former runs on to the Boston railway, so that freight once placed on the cars, is carried undisturbed to its destination. The amount received at Buffalo is about one-half of the whole movement of the western freight. To be more precise, it may be said to vary from nine to eleven twentieths. At Oswego, it ranges from one-eighth to one-fifth, while at Montreal it is from one-eighth to one-eleventh. The quantity passing by Buffalo is divided between the Erie Canal and these two railroads. Owing to the imperfection of the figures at the service of the writer, no reliable comparison can be made of the relative quantities. According to the report of the Auditor of the Canal Department of the State of New York, dated March 12, 1869, the "tons arriving at tide water by way of the Erie Canal, products of Western States and Canada," are as follows: [p. 161.]

Products of the Forest	891,071	Tons.
" Agriculture.....	1,183,816	"
Manufactures	4,354	"
Total.....	2,215,222	"

and the difference between this amount and the total passing east from Buffalo, will give the quantity carried by railway, whereas compared with the quantity taken by railways, we have the following [p. 38] total movements for 1868:—

New York Canals	6,442,225	Tons.
" Central Railway....	1,846,509	"
Erie Railway	3,908,243	"
Total.....	12,197,067*	"

that is up and down, giving a rude approximation, that half the total passes by the Canal.

The fourth connection between the Western waters and the east has been dictated by the principle on which the Caughnawaga Canal is advocated; that, as a railway connection, is indispensable to bring freight inland—(this peculiar side of the problem must be borne in mind)—to New England, from the Albany terminus of the Erie Canal,—why not seek that connection without the geography of the canal? Ogdensburgh, on the St. Lawrence, furnishes exactly that point. It is 223 miles distant by water from the Ontario mouth of the Welland Canal, and by railway 158 miles from Burlington. This distance, added to the railway interval, between Burlington and Boston, 248 miles, will give a total distance of 406 miles between Ogdensburgh and Boston. It was held, and the theory seems so perfect that it stands out as a warning against indulgence in *a priori* reasoning, that the Welland propeller, with its 4,400 bbls. of flour, would leave Chicago and passing through the Welland Canal in place of depositing its cargo at Oswego, a distance of 138 miles on Lake Ontario, could go on to Ogdensburgh, 85 miles farther. At Oswego the cargo actually and positively was known to be from 11 to 15 days from Boston. At Ogdensburgh, by every fair calculation, it was 30 hours. The line was accordingly built by Boston capital. The result has totally disappointed expectations; in round figures only five per cent. of the quantity carried from the west having passed by this line. It may be explained, to some extent, by the fact that a certain portion of the grain destined for Boston never enters lake Ontario at all. For, conceding in any way the necessity of railway connection, it was open to apply the principle at any point, and practically it has resulted that it has been appealed at Buffalo itself, and grain once placed on the railway cannot be profitably moved from it, except under very special circumstances.

The effect of the water connection of the St. Lawrence with Boston by Burlington, viewed by the light of the experience of the Ogdensburgh Railway, to our mind is not encouraging. If we suppose a propeller at Burlington quay, and inquire what has been achieved, what attained, by passing the St. Lawrence and entering Lake Champlain, the answer can be given categorically. The propeller is 158 miles nearer (railway distance) to Boston than it was at Ogdensburgh, with the identical necessities of transhipment to the railway cars, and in the expectation of receiving back a cargo of a like character, having traversed the distance,

From Ogdensburg to the Beauharnois Canal.....	97	Miles.
Through the Beauharnois Canal and the Caughnawaga Canal to St. Johns	41½	"
From St. Johns to Burlington...	75	"
Total	213½	"

* The writer begs leave to quote the words of the Auditor of New York, Mr. James A. Bell, to show that this imperfect comparison is beyond the reach of individual industry. "The important exhibit of these tables might be rendered "doubly so, if the railroads would consent or the Legisla- "ture would compel them to make their returns to con- "form more nearly to those of the Canals."

The distances are mentioned as a matter of comparison, not from the belief that great weight is to be attached to them. Indeed we have too many opportunities of observing what fallacious deductions can be drawn from comparative distances. Nevertheless, they do form a portion of the whole problem, more or less minute, more or less governing the conclusions. It is in the application of a fact of this character, that the judgment and ability of men come to the surface. The danger of their misapplication is seen in such schemes as the Georgian Bay and Ottawa Canals, and not one of the least effective modes of considering them is to place them side by side. For as both cannot be essential, so on examination of the arguments by which both are sustained, it will be seen how in each case they are identical, viz: the saving of distance, blended with the patriotic assurance, that each passes through Canadian territory. As in these instances, so in every other, the real inquiry must lie in the effect produced. In this case, are we not asked to expend from four to five millions of dollars, so that a propeller may do at Burlington, that which can be done at Ogdensburg, with the addition of 158 miles of railway. It must be remembered, too, that the Ogdensburg route has drawn only one-twentieth part of the freight, when it was fairly reasoned it would bring a very large proportion of it. Fortunately the examination of this matter is not encumbered by considerations of custom houses, for both points lie within the domain of the United States. Certainly it is fair to ask that when it is assumed that great changes in the direction of trade will result from a policy, that some special reasons will be given for the assumption. We must say, with great respect to the gentlemen who advocate this Canal, that we can hardly recognize this assurance in the theory of the forwarder adhering to the water as long as he can or that this saving of distance is a warranty that a propeller carrying from 7,000 to 10,000 barrels of flour, will succeed, where a propeller carrying 4,400 barrels, with the distance additional by railway has failed. On the other hand, it is quite possible that it would practically prove so, if the whole system of the Canals were increased, so that a vessel capable of carrying the larger cargo could pass by the Welland Canal direct to Burlington. We are even prepared to assert that this proposition is not the same as that offered by the more limited cargo at present taken to Ogdensburg. Therefore, the argument is not without a certain possibility, that the ends sought by the advocates of the Caughnawaga Canal may actually be attained; still no one can pretend that they are matters of certainty, leading up to a known deducible consequence.

It seems then the fair mode of summing up the merits of the Caughnawaga Canal is to make the starting point, the enlargement and development of the St. Lawrence navigation. Certainly without such development, it may be said that no additional trade will seek Lake Champlain. The lumber which follows the present circuitous route would pass by the new canal, but the facilities extended to it, would have no appreciable influence on the quantity manufactured. If we understand the advocates of the route, they themselves demand, in conjunction with the new canal, an equal navigation throughout, and the size of the lock as named is longer and deeper than that of the St. Lawrence lock. The doctrine then may with propriety be enunciated that it is secondary to that great work, and that it not only ought not to take precedence of it, but that as a project, it should be held to be subordinate to it. The great cost of deepening the St. Lawrence, precludes the hope that the five millions necessary to construct the canal, will be at once at our command. On financial grounds, therefore, it may be advisable to defer any consideration of the undertaking until the motive for so doing no longer exists. With this proviso, it may be said that the canal would—

1. Extend very great facilities to the lumber trade.

2. That it is not impossible that Western produce would seek its waters, and cargoes be discharged at Burlington.

But on the other hand—

3. That little is to be hoped from it in opening up a communication through Lake Champlain to New York.

As it is now known practically that a vessel can reach Boston from Montreal in eight days, and New York in nine days, it is a perfectly open argument to suggest, that with a properly constructed propeller, the route through the St. Lawrence—developed, it must be understood—from Chicago to the sea-board, may prove more economical than any other. That such vessel can carry freight at the cheapest rate, and deliver it with regularity in the shortest period, at the same time finding a market, where fuel can be the most economically purchased.

If all this be determined in favor of the sea-going route, where will be the special benefit of the Caughnawaga Canal?

THE ROYAL CANADIAN.

It is announced that Mr. Yarker, of the Bank of Montreal, has been assigned the task of investigating the affairs of the Royal Canadian Bank. That gentleman is, we have no reason to doubt, fully competent to discharge the duty in a thorough and business-like manner; but while making this acknowledgment, we must express our dissent from those who selected him. The Royal Canadian has complained, time and again, that the Bank of Montreal exhibited hostility towards it, and we cannot see, after such complaints, the expediency or wisdom of placing the fate of the institution at the mercy of an alleged persecutor. Mr. Yarker, without necessarily being biassed by his position under Mr. King, might insensibly be swayed by prejudices acquired naturally in the discharge of his duties as a Manager of the Bank of Montreal. Suppose the interest of the Bank of Montreal lay in closing up the Royal Canadian, and Mr. Yarker chose (we do not by any means say that he would do so) to give the Royal its death-blow, what is to prevent his doing it? Suppose Mr. King wished to buy out the Royal, could he not bring some pressure to bear on Mr. Yarker? We merely suppose such a state of affairs for the sake of showing the folly manifested in selecting one whose interests are bound up with the Bank of Montreal to say whether the Royal shall continue to exist or not. If Mr. Yarker report that the condition of the Royal is bad, or even throw out hints of unsoundness, what position will Mr. Crawford and the new board find themselves in? There is another side to the case. Is not the selection of an officer by the Bank of Montreal calculated to beget the suspicion in the minds of the people, that the Bank of Montreal has some mysterious, irresistible power which brings all the other bankers on their knees before it, deprecating its amnesty and asking its permission to live?

Again, suppose Mr. Yarker's report to be unfavorable to the Royal, though the Board may be bound by it, will the shareholders be satisfied that the interests of the Bank of Montreal have not prevailed. The shareholders may refuse to recognize it as a trustworthy exhibit. If so we shall have the shareholders and the directors again at cross purposes with an additional burden to bear. The Bank of Montreal will undoubtedly accept the report of its own officer, if such report be against the soundness of the Royal.

As we have said the general opinion is that Mr. Yarker is an efficient officer, but it would have been well, both for Mr. Yarker and the Royal, to have associated with him in the investigation some other well known banker. There are, Mr. Hague, Mr. Fisher, Mr. Dallas, Mr. Bethune, Mr. Moat and Mr. Morton, all gentlemen of good repute. Why not ask the assistance of one or more of these? Perhaps it is not yet too late to do so. If not, we think it will be generally conceded that such a course is likely to be more satis-

factory than risking the existence of a western banking institution on the opinion of an officer of the Bank of Montreal.

CANADIAN BANK OF COMMERCE.

The past year's business has resulted in a net profit of $141,236, out of which dividends to the amount of $78,122 have been paid, the sum of $60,000 added to the rest, and a balance of $3,475 was carried forward. The rest now amounts to $100,000. Such a statement at the end of the second year of the bank's existence, cannot fail to gratify every friend of the institution. It gives the firmest assurance that the high anticipations formed of its success were well grounded. For the results achieved, the shareholders are largely indebted to Hon. Mr. McMaster, the President, who, we know, has made the welfare of the bank a subject of constant solicitude, and has not spared vigorous and persistent efforts, indoors and out, to extend the bank's connections and prosperity. The Cashier, Mr. Dallas, and the Directors have shown uncommon zeal in doing what they could.

Of the $1,000,000 additional capital authorized by an amendment to the charter, obtained last Session, six hundred thousand dollars have been taken, and the balance is reserved to be held at a premium, and to be disposed of as the directors find to be expedient. Two new agencies were opened at points from which the Gore Bank had withdrawn, whose business at these places was taken up under favorable circumstances. The retiring directors were re-elected, and the meeting passed off with the greatest unanimity.

Citizens' Insurance Company.—This Company, whose Directors are well known men of position and influence, whose Manager is trustworthy and energetic, and whose share list embraces some of the best names in Montreal, has taken the place of the European Assurance Society, in Canada, and assumed the very successful business which Mr. Rawlings had gathered during the four years of his agency. But the Citizen does not confine itself to a guarantee business. It has entered the field of competition with life companies, local and foreign. It bases its claims to public support on the character of its proprietory, the low rate of mortality and the high rate of interest in Canada. The indisputability of its policies after five years, their practical non-forfeiture; their facility of renewal after lapse; the absence of excessive restriction on travel; the recognition of the services of volunteers, and the advantage of commanding the security of the Company through its guarantee branch to a proportionate extent to the assurance, are all set forth as inducements to Canadians to patronise this local institution.

MADOC GOLD DISTRICT.

(From our own Correspondent.)

Belleville, July 12th, 1869.

The event of the week has been the land sales on the part of the Commissioner of Crown lands. Mr. Richards must feel very much disappointed by the result of his policy, which has realized the old Scotch proverb of "great cry and little wool."

Paying twenty-five or thirty thousand dollars for an untried mining lot is a fine thing to brag about in promiscuous conversation, or to write sensation paragraphs upon in newspapers; but when it comes to bidding such amounts as a matter of business, with the assurance that the money is to be paid down in legal tender on the nail, these bold orators lapse into solemn silence. On the day of sale, the attendance was not numerous, and the bidders were but few. The chief interest centered, of course, in the famous lot "nine in the ninth" of Marmora, which was put away at one dollar per acre, the area being 100 acres. The contest for this lot lay between Mr. Cook, of Toronto, and Mr. Morton, of Mallorytown. After a spirited competition, it was knocked down to the latter gentleman at the rated price of forty dollars and ten cents per acre, making a total of $4,010. The purchaser, however, failing to pay in the money according to the conditions of the sale, the lot was set up again on Friday, and finally knocked down to his former competitor, Mr. Cook, at the rate of twenty-six dollars per acre, or a total of $2,600, or about one-tenth of what Mr. Richards was assured could be easily obtained for the lot.

"The next lot to it," viz., No. 8 in the 9th, was sold to a Mr. Maxwell for $12.50 per acre. A few lots possessing minor attractions were also bought by Mr. Cook.

The fact is, that the action of the Government, or rather of successive Governments, in this matter, as in mining matters generally, has been ill-advised, and prejudicial throughout to the interests both of the Province and of the miners. In the first place, regulations, restrictions and taxes, which were only suitable for rich places or alluvial diggings, were remorselessly imposed upon those who undertook to develop the poor and refractory rocks of Hastings. Next, a heavy license fee was imposed upon reduction works, regardless of the fact that such works were necessary for the development of the prospective riches to be derived *in the future* from as yet untested veins, and that the true policy of the ruling powers would have been to offer premiums for the introduction and erection of such works; and exorbitant taxes were collected from men who were deriving, and who could possibly derive, no benefit whatever from their labors, until they made such substantial discoveries as might induce capitalists to enter into the business, and invest their means in its prosecution: after which, if it proved remunerative, it might become a legitimate subject for taxation. Had such a wise and far-sighted policy been adopted at first, I have no doubt, though the country is far from being so rich as men, in the first glitter and dazzle of anticipated wealth, were fain to imagine, but a few remunerative mining adventures might have been in operation long enough to have returned to the exchequer a much larger total sum than has been exacted (including the sales of last week) from the district at the expense of a long delay, if not total extinction of its prospective prosperity. To use another proverb "they have killed the goose that laid the golden eggs." Let us hope that the eyes of the Commissioner may be opened, and that he will conceive and carry out a more liberal and a more beneficial policy hereafter, and that Government will come down to Parliament, early in the next session, with a well-digested mining law, which may undo, so far as may be, the mischief which has resulted from their former crude attempts at legislation, not only in this district, but throughout all the mining regions of the Province, and which may help to foster and encourage honest and well-conducted enterprise, and at the same time sternly and strongly repress the rascality and deception which exercise so baneful an influence, not only on mining, but on all other commercial and industrial pursuits into which they are introduced.

Mr. Gilbert has got his mill in work upon ore from lot No. 6, in the same concession. I have not heard of his cleaning up as yet, but a gentleman who visited the mine a few days ago told me that a fine amalgam was gathering upon the copper-plated shoot which conveys the ore from the stamps to the pans, which is a good sign of success.

The next subject of interest on the cards is the sale of the Richardson Mine, which is to take place on August 14th; after which we may expect to arrive at something like a true estimate of the mining capabilities of this region, which, as it was without doubt enormously over-rated at first, I believe to be considerably under-rated at the present time.

THE SILVER MINES ON THE NORTH SHORE OF THUNDER BAY.

Silver was discovered on the north shore of Thunder Bay in 1867; and since that time large tracts of land have been surveyed and taken up by men of capital, and two companies are now quietly at work mining for the precious metal. The Thunder Bay Mining Company, composed of some of the heaviest capitalists of Montreal, have been working their vein for over a year. They have all the machinery necessary for mining on a large scale on the ground, and are now erecting their stamp mills. They have about one thousand tons of ore ready for crushing. It was hauled down last winter from their shaft, which is two and three-quarters miles from the Bay, where they have built a fine dock, at which a vessel drawing from twelve to fifteen feet of water can land. The company seemed determined, however, to keep their business entirely secret, and all the information concerning their doings must be obtained (if obtained at all) from the miners or outside parties. I was told that they had barrelled and shipped about twenty-five tons of ore, which would yield 20 per cent of silver. I was shown a specimen of 200 pounds in weight, which would yield fully 50 per cent of pure silver; and I succeeded in obtaining a specimen of that kind myself, which I am satisfied will yield from 40 to 50 per cent of silver. Their gentlemanly superintendent, Mr. McDonald, did all in his power to make my stay pleasant and agreeable as possible; but positively refused to give me any information as to what they were doing; neither would he let me have any specimens of their rich ore, as he said it was positively forbidden by his company. Mr. McDonald was manager of the silver mines in Norway for about twelve years, and was brought from there by the company about one year ago. He expressed himself highly pleased with the prospect of this vein.

The Shuniah Mining Company, composed of gentlemen from this side of the line, commenced to mine on their property in the summer of 1867, and had sunk a shaft sixty or seventy feet deep, from which they have taken some very fine ore. Their vein is from twenty to twenty-three feet in width, and native silver, I am told, has been found on the surface wherever the earth and moss have been removed from the back of the vein, which in most places is not more than two or three feet in depth. I made a small opening myself with an explorer's pick, and took out a small piece of ore, weighing only 3 ozs. from which I extracted 1 oz. 3 pwts, of pure silver, which I have since had made into a teaspoon.

It is a matter of surprise to me that men of capital in New York and elsewhere in the United States have not given more attention to this country instead of sending their money to the almost in-

accessible regions of Nevada, Colorado, and Montana, especially since the heretofore short-sighted policy of the Canadian Government has been changed in regard to mining for the precious metals By an act of the last Parliament of Canada, the imposition of all royalty, tax, or duty on gold and silver was repealed, and now the country is open free to all, on the payment of one dollar per acre (the Government price) for the land. It is my opinion that persons seeking investments of capital can find no more promising opening, and it only requires an inspection of the country to convince any reasoning man of the correctness of my assertions.

New Brunswick Gold Discoveries.—A St. John paper says: the Eel River gold discoveries are likely to prove of no account. We were this morning shown a telegram from a most reliable gentleman in Woodstock who had visited the ground, and who is conversant with gold mining, sent to a friend in this city in reply to an inquiry. It was as follows:—"*Do not come up. Investigations unsatisfactory. Circumstances suspicious.*"

—At the annual meeting of the De Lery Gold Mining Company, Mr. Joseph, of Quebec, was elected president, Mr. Guacen, of New York, vice do, and Mr. Vezina, treasurer.

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

The stock market has been active during the week. Building Society stocks have especially been in large demand, and at advancing rates.

Bank Stock.—There were sales of Montreal at 159 and 160, the market closing with buyers at 159 and sellers at 159½. Small sales of British are reported at 104½, sellers now ask 104¾. Ontario has slightly declined, closing with no buyers over 95. Sales of Toronto was made during the week at 120½, sellers now hold for an advance. Large sales of Royal Canadian were made from 50 to 55, the latter price, however, was not maintained and at the close there were no buyers over 50. We have to report a steady advance in Commerce, sales have been made at 103½, 103¾, 101 and 101½, there is a good demand at the latter rate. Gore would command 39. Merchants' which sold before the meeting at 111 and 111½, suddenly declined to 103; but has since revived, with sales at 104, 104½ and 105, there are now buyers at 105½ and no sellers; the capital stock of the bank is to be increased from $4,000,000 to $6,000,000. Small sales of Quebec were made at 100½, at which rate there are still buyers. There were sales of Molson's at 109, and that price could still be paid. Some sales of City are reported at 98½, with buyers at this rate and sellers at 99. There is a demand for Du Peuple at 108 and 108½, and for Jacques Cartier at 107½. No transactions in Union, buyers would give 105. Nothing doing in Mechanics' or Nationale.

Debentures.—Canada sterling five per cents are asked for at 92, nothing doing in other issues. Toronto have been sold to pay 7 and 7½ per cent. and some short dated bonds were sold at 7¼ per cent interest. County are in fair demand at 99.

Sundries.—There were sales of British America Assurance at 53, ex-dividend. City Gas is in good demand at 107½, no stock has been offered for some time past. There were sales of Canada Permanent Building Society at 122, 122½ and 122¾, buyers freely offer the latter rate. Western Canada Building Society sold at 117½, 117¾ and 118, and is in demand at the latter rate, but very scarce. No Freehold has been offered during the week; 117¼ would be paid. No transactions in Montreal Telegraph. Canada Landed Credit has been sold at 89 for stock carrying the July dividend. Mortgages are asked for to pay 8 per cent.

New York Money Market.—An excessive stringency has been the leading feature of the market for a week past; on this account borrowers were placed at the mercy of lenders, and rates ranging from ⅛ to ⅜ per cent. per day, additional to 7 per cent. per annum, have been exacted. At the close of last week, the feeling was somewhat easier. It is confidently stated, that the late stringency stands unequalled in the history of Wall street. The *Financial Chronicle* says of last week's business: "Discount operations have been confined almost entirely to the accommodations of the commercial banks to their customers. On the street there has been no market for the best paper, at even 10 to 12 per cent. The banks have been unable to discount grain paper, with much consequent inconvenience to the west; and paper sent here in considerable amounts from Boston has been returned as unsaleable." A decline in gold from 137⅝ to 134 was in consequence of a large amount of gold being thrown on the market.

Statement of the Revenue and Expenditure of the Dominion of Canada, for the month ended 30th June, 1869.

Revenue—Customs	$616,567	25
Excise	236,771	65
Post Office	222,11	75
Public Works, inluding Railways	88,124	36
Bill Stamp Duty	6,317	41
Miscellaneous	60,927	57
Total	$1,030,919	99
Expenditure	$598,437	50

Bank of England.—Statement for week ending Wednesday, June 23, 1869:—

ISSUE DEPARTMENT.

Notes issued	£33,412,150
Government debt	£11,015,100
Other Securities	3,984,900
Gold Coin and bullion	18,412,150
Silver bullion	
	£33,412,150

BANKING DEPARTMENT.

Proprietors' capital	£14,553,000
Rest	3,147,807
Public deposits (including Exchequer, Commissioners of National Debt, Savings Banks, and dividend Accounts)	7,498,189
Other Deposits	16,972,956
Seven day and other Bills	448,456
	£42,620,408
Government Securities (including Dead Weight Annuity)	£14,239,874
Other securities	16,465,014
Notes	10,731,710
Gold and Silver coin	1,183,810
	£42,620,408

Intercolonial Railway Loan.—Mr. Aytoun called attention to the application of the Government loan to the Canadian Intercolonial Railway, and moved a resolution, that in the opinion of the House such an application of public funds was contrary to the terms of the Dominion Act authorizing the road, and that no further guarantees should be given except in such form as will insure direct application to its construction. Messrs. Baring and Hunt opposed the resolution. Mr. Gladstone said that in his opinion no case had been presented which called for the interference of the House, and recommended the withdrawal of the resolution. The resolution was then withdrawn.

The Fall in Merchants' Bank Stock.—The *Montreal Herald* says:—Since the annual meeting of the "Merchants" the shares have been heavy at a decline of about 8. Numerous sales were made up till Monday at 111 to 111½, and to-day the transactions were at 103, 103¼ and 103½, buyers continuing to offer the latter rate. The sale of a large number of shares, while the books were closed, is likely to lead to trouble which may not be easily settled. Those who sold the stock in question refuse to transfer the new stock, and, in assuming this position, they are fortified by the action of the Directors, in determining that the list of shareholders entitled to the new stock, should be those registered in the books on the 15th ult. The point may be a very fine one, but it strikes us that, in equity, the purchasers should enjoy any advantage arising out of the purchase. This, we think, is only reasonable and just, because, had the condition of the bank been unsatisfactory and the stock below par, the sellers would naturally have declined the new shares, and properly too, since the stock virtually had passed out of their hand, with no reservation except the collection of the dividend. The following is one of the clauses in the resolutions passed at the annual meeting.

3. Each shareholder as shown by the Books of the Bank on the last day of the month of June, shall be entitled to subscribe at par an amount equal to one half of what he may have held at that date, or in other words to add fifty per cent to his stock.

The purchasers of stock prior to the last day of June would we infer according to the above be entitled to any advance or profit of whatever nature. We notice, however, that although at the general meeting of the shareholders this was assented to, the Directors have changed the date establishing the right of those who should rank and be entitled to subscribe for new stock. This may not alter the position of those who bought while the books were closed, but it would have been better, we think for all concerned if the change had not been made.

—A branch of the Bank of Montreal is to be established at Newcastle, N. B.

—Peterborough paper says, that D. S. Eastwood, of that place, has been promoted to the management of the Ottawa agency of the Ontario Bank.

—An investigation into the affairs of the Summerside, P. E. I., Bank has resulted in the shareholders voting confidence in the Directors and the institution.

Commercial.

Hon. John Rose has gone to Washington, but the political papers seem to be much in doubt as to the precise object of his mission. It is supposed that the question of Reciprocity will come up in some shape during his visit there. We have no faith in the success of any negociations for a new treaty just now. The San Juan question, and matters relating to the Hudson's Bay Territory are more likely to engage attention.

We are in receipt of detailed accounts of the condition of the growing crops throughout the States. In the West there are numerous complaints of "drowning out" by the late rain; corn has been materially injured from this cause. For the same reason, it is almost impossible to get off the crop of grass in a condition to keep. The report of the Agricultural Bureau says that the returns show a high average condition of wheat, and indicate a good prospect of an abundant crop, if no casualties occur before harvest. The "lodging" or "laying" of the stalk is reported as somewhat serious in parts of the South and West. There is an increase of about 6 per cent. on the average under wheat. The department estimates the acreage in wheat in 1868 exceeded 18,000,000 acres; the returns of correspondents indicate an aggregate increase of more than 1,000,000 acres in California, Iowa, and Minnesota, and elsewhere. Full returns from the Pacific have not been received, but the following estimates of increase are warranted by a careful analysis of returns:

	Acres.
Iowa	224,000
Indiana	130,000
Minnesota	145,000
Tennessee	130,000
Ohio	140,000
Missouri	96,000

A considerable increase has also been made in Pennsylvania, Virginia, West Virginia, Michigan, and other States. No increase can be shown either in New York, Illinois, or Wisconsin, among the larger States. A decrease is apparent in Louisiana, South Carolina, and Texas. In Illinois a small increase in winter wheat is balanced by a reduction of spring wheat acreage. Other grains are in fine condition. The largest increase is in barley, and in the States west of the Mississippi, particularly in California, while an enlargement of area is reported in the Ohio valley, in New York and elsewhere. Oats in the Ohio valley have scarcely been sown to the usual extent, but a greater area has been put in elsewhere in the West, as in Michigan, Wisconsin, Iowa, Missouri, and Kansas. The crop is not quite in average condition in some parts of New England, and in parts of Ohio, Indiana, Illinois, and Minnesota, while in the more Southern States the low temperature of the spring months has effected a decided improvement in a crop that generally suffers in those latitudes by sudden and extreme elevation in temperature at the season of heading.

Toronto Market.

PRODUCE.—Our market has been irregular and unsettled throughout the week past, prices fluctuating, mostly, according to the tenor of the advices respecting the growing crops. The week opened with a firm market for wheat and flour, which soon beeame strong, and a rapid advance followed, but during the last two or three days the feeling has been quiet and the tendency, if anything downward; prices are about 5 cents higher on wheat and 15 cents on flour. With us the weather has been uncommonly wet, unless there is a change to dry, warm weather, the consequence must be rather serious. A fortnight or three weeks hence, will unfold a tale as to the future of prices, the nature of which can now only be guessed at. *Wheat.*—Receipts 5,340 bush. and 4,665 bush. last week. Stock in store on the 12th inst., 42.740 bush. There was a fair demand and sales as follows: 8 cars midge proof at $1.06 f.o.b.; 2 cars of spring at $1.05; 14 cars at 98c. at Lucan; 400 bush. at $1.05. A cargo of fall sold on p.t., and 2 cars at $1. *Oats.*—Receipts very light and demand good; eastern oats sold at 52 to 52½c. on the track, and western at 56 to 57c. Stocks very light. *Peas.*—No receipts, the market is firm but nominal, holders asking 83 to 85c. *Barley.*—No receipts or stocks, selling on the street at 60.

FLOUR.—Receipts 1,425 bbls. and 3,080 bbls. last week; stock in store on the 12th, 4,700 bbls. against 4,799 on the 5th inst. The market opened at about $4.55 for No. 1 Superfine and advanced to $4.75 and $4.80, holders asking as high as $5. During the last two or three days the market has been weak and nominal and tending downward; at the close there were no buyers over $4.65 to $4.70 and little demand. In other grades nothing doing.

PROVISIONS.—*Butter*—has been more active, there being considerable disposition to buy on speculation; there is no shipping movement yet. *Cheese*—is quiet with an easier feeling. *Pork*—out of the market, there is some enquiry. *Eggs.*—are scarce and under the influence of the local demand, have advanced.

WOOL.—The stringency of the United States money market, acts as an efficient check on speculation and tends to keep prices down. The course of the market since the opening has not been favorable to profitable operating, as there has been a steady movement downward since the receipts become of any consequence.

FREIGHTS.—Rates by vessels to lake ports remain unchanged, at 3c U. S. cy. on grain to Oswego and 2c gold to Kingston. Lumber to Oswego $1.50 per M.

The Grand Trunk rates to Liverpool are:—Flour 4s. stg. per bbl.; wheat 8s. 6d. stg., per quarter; and boxed meats 55s. per ton.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Belleville to Lynn, inclusive 25c; grain, per 100 lbs., 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c, gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Halifax Market.

BREADSTUFFS.—July 6th.—We have to report an inactive market for Flours, during the past week. Transactions have been based on immediate requirements—buyers expressing a want of confidence in present prices, and are operating with great caution. Holders are not pressing the market, knowing that large sales could not be effected at any reasonable reduction on quotations. About 1,500 bbls. (damaged), ex "Her Majesty," were offered at auction, and realized $4.25, upwards; affecting the regular trade, to some extent. Fancy is in limited request, at quotations. No. 2 has been superseded, by damaged lots, and is without enquiry.

Imports from January 1st to July 6th, 1868, and 1869:

	Bbls. Flour.	Bbls. Cornmeal.
1869	76244	17945
1868	92470	3-814

PROVISIONS.—Pork and Beef continue unchanged, at quotations. We note the shipment of of 100 bbls. Mess pork, per S. S. "City of Washington," for Liverpool, last week, which is very expressive of the dullness of our market, with its present reduced stocks. Butter continues inactive, with accumulating stocks.

WEST INDIA PRODUCE.—Molasses continues without quotable change. Holders express confidence in present prices, on the ground that stocks are not in excess of requirements for Fall Trade. Sugars are giving way gradually; the disposition being to realize. At Auction last week, part of a lot 60 hhds. Porto Rico, realized 8¼c.; being from ½ to ¾c. less than market rates; but no speculative feeling existed at the reduction. Rum is in request, with fair stocks.

EXCHANGE.—Bank Drafts, London, at 60 days, 12¼ per cent. Montreal sight, 4 per cent. St. John, N. B., 3 per cent. prem.—*R. C. Hamilton & Co.'s Circular.*

Petroleum.

The following were the exports of Petroleum from the United States, from January 1st, to July 6th:—

	1869.	1868.
From New York...galls.	30,677,540	24,040,672
Boston...	1,285,940	1,214,838
Philadelphia	12,234,081	15,608,639
Baltimore	751,103	1,047,546
Portland...	.....	177,771
Total Export from the United States	44,948,664	42,089 467
Same time 1877		29,509,108
Same time 1866		26,432,748

Profits of Manufacturing.

The Manufacturing Corporations of Boston do not show so profitable a business as during the previous six months, several companies passing their dividends, and others decreasing the per centage. Three companies, however, have increased their dividends—the Androscoggin from 5 to 6 per cent., the Langdon from 8 to 10 and the Middlesex from 5 to 8. The other changes are as follows: The Appleton decreases from 10 to 8 per cent.; the Atlantic from 4 to 3; the Chicopee from 25 to 15; the Contocook, from 5 to 4; the Everett from 5 to 3; the Hill from 10 to 6; the Manchester Print Works which paid 5 per cent. in January, now passes; the Nashua decreases from 8 to 3; the Naumkeag from 10 to 5; the Newmarket from $70 to $40; the Salisbury from 7½ to 5; the Salmon Falls from 5 to 4; and the Stark from 10 to 5. The Dwight Company has made $40,000 profit for the past six months, and $70,000 the preceding six months; but as they are making some improvements in their mills, the Directors concluded to pass the dividend at this time. The Hill Mill pays its dividend on $1,000,000, the capital being increased from $700,000. The Franklin also increased its capital on June 1st, from $600,000 to $1,000,000. The Naumkeag also pays on $1,500,000—$300,000 having been added since the 1st of January.

Vessels Built in Thirteen Years.

The Chicago *Tribune* publishes the following table, giving the total number of American and Canadian vessels built in each year on the lakes.

	Strs.		Props.		Tugs.		Sailing.	
	A.	C.	A.	C.	A.	C.	A.	C.
1856	4	3	24	1	9	1	137	24

Receipts of Breadstuffs.

The receipts at the ports of Chicago, Milwaukee, Toledo, Detroit and Cleveland, from the 1st of January to the 3rd July, in the years indicated, were as follows:—

	1869.	1868.
Flour, brls	2,667,600	1,626,100
Wheat, bush	15,627,600	7,838,400
Corn	16,197,500	16,590,300
Oats	5,484,100	4,881,100
Barley	398,200	394,700
Rye	533,600	197,700
	37,241,200	29,902,200

Manchester Market.

A report by last mail says—

Prices are unchanged since Tuesday, but the tone of the market has been quieter, and producers are rather more easy to deal with than they were in the beginning of the week, although they adhere very firmly to the quotations. The upward movement, however, has been checked. On Monday and Tuesday there was some excitement in the cotton market, which compelled spinners to put up their prices, and some were indifferent about giving quotations. When it was found that the merchants here would not support the upward movement, spinners gave over buying cotton in excess of their wants, and a quieter feeling came over the cotton market. The general feeling, however, is that the position of cotton is inherently very strong, and that the market is liable to speculative movement any day. Consequently producers are chary about selling a long way in advance, being apprehensive that a possible rise in the raw material might put them in even a worse plight than they are at present.

In the early part of the week there were rumors of failures, which gave some uneasiness, but they appear to have been only idle reports, and any effects which they have produced have passed away. The reduction of the Bank rate of interest is a favorable feature in maintaining the stability

of prices, but it has had no perceptible influence here. Buyers resolutely set their faces against higher prices; and, unless better advices arrive from abroad to stimulate things here, it is probable they may desist from buying until producers hold more stocks than they do at present.

Beef Cattle from Toronto.

A St. John paper says,—Thirty three fine oxen have been brought from Toronto by Mr. P. Dean and M. Caulin of this City. Many of them were by far the finest ever seen in this market.

—The Montreal Telegraph Co. have extended their wires, and opened offices at Aylmer, Ont., Exeter, Ont., and Listowell, Ont., all of which offices are now in full operation and ready for business.

A telegram from Hong Kong, dated 26th May, gives the total exports from China and Japan up to that date as 140,000,000 lbs.

ROSSEAU AND MUSKOKA CANAL.—The Barrie *Advance* says, the work of constructing a lock to connect Lakes Rosseau and Muskoka is commenced at last. The impediment which existed to navigation will soon be overcome, and steamers and sailing craft can pass to and fro from one lake into the other without difficulty. The completion of this lock, will not only materially assist through navigation, but also greatly contribute to the general advancement and settlement of the country contiguous to Lakes Rosseau and Joseph, as well as the lands in the vicinity of the Nippissing line. The removal of this obstruction, which has hitherto caused considerable delay and inconvenience to freight *in transitu* to the different points northward, will confer a boon on the inhabitants around this chain of lakes, who kindly and properly appreciate the efforts of their representative in their behalf. Arthur Robinson, Esq., C. E., of Orillia, is appointed to take charge of the works. The canal will be about 200 feet in length, solid rock composes the obstruction, this will have to be blasted and removed, which will occupy considerable time. However, the work will be prosecuted with vigor, and it is expected to be finished ere navigation closes.

—There is a family living near Brockville, of which seven brothers are of the following ages, respectively, 72, 71, 70, 66, 64, 63 and 58—total 464.

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES."

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

FOR North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expense, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example :—

Articles.	Prices per ton.	Cash disconnt.
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq.,.....Ottawa.
EDWARD A. C. PEW, Esq.,..... .....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.
Or A. McK. COCHRANE, Secretary-Treasurer, 383 St. Paul Street, Montreal. 30-35t

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, E

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq, H J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Co pany. They have invested a large amount of money on securities in this country, and the Toronto Local Boa have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without re rence to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the pa year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses th accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETAR

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $6,000,000.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
$140,000 deposited in Canada for the benefit of Policyholders.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Br ton Medical and General Life Association,

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family,* and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

BANK OF TORONTO.

The Annual General Meeting of the Bank of Toronto (being the thirteenth since the commencement of business), was held in pursuance of the terms of the Charter, at the Banking House of the Institution, on 21st July. 1869.

William Gooderham, Esq., President, being called to the chair, the Cashier then, at his request, read the following report:

The Directors of the Bank of Toronto have pleasure in rendering to the Stockholders a statement of the operations of the Bank for the year just closed.

In following the example of the Joint Stock Banks of England, by placing the statement in the hands of Stockholders before the Annual Meeting, they desire to afford them such information as will enable them to form an opinion upon the position of the institution before they are called upon to take any action thereupon. This course they trust, will commend itself to the judgment of Stockholders.

The business of the Bank during the year has been well maintained in every department both at the Head Office and Branches, and although circumstances have rendered it desirable to keep larger reserves of available funds than formerly, and consequently to curtail discounts to some extent, the net result compares very satisfactorily with that of former years.

Owing to continued over-importations in the commercial centre of the Province, with its inevitable consequence of unreasonable competition in the wholesale trade, along with the temptations incident to the working of a defective insolvent law, the number of failures for some time back has been far larger than usual. Your Board, knowing the condition of affairs, have exercised more than ordinary vigilance and caution in this branch of business, and they are happy to state that the losses suffered by the Bank will be of a trifling character.

The gradual and continuous fall in the price of grain during the last few months has occasioned less of loss to parties in the trade than might have been feared under the circumstances. Farmers have held back their grain in many parts of the country, and the depreciation, to some extent, has fallen upon them. The customers of the Bank have fully appreciated the advice given them to operate with extreme caution, and the consequence is that the casualties of the year in this important branch of business have been very few and of small amount.

All losses were provided for before the closing of the books. Every bad debt was written off in full, and provision made for such as are doubtful; and to enable this necessary part of their duty to be discharged, the Directors subjected the loans and discounts of the Bank to a rigid scrutiny, and by personal conference with the Managers of Branches, satisfied themselves as to the operations of the Bank at distant points.

After making provision for losses as above stated, the net profits of the Bank, deducting expenses, interest on current and permanent deposits, and rebate of interest on notes discounted amounted to..... $140,423 66

Add balance at credit of Profit and Loss account, brought forward from last year..... 5,003 91

$145,427 57

This sum was appropriated as follows:—

Government Tax on circulation.....	$2,580 15
Dividend No. 25 of four per cent., paid 2nd January last.....	32,000 00
Dividend No. 26 of four per cent., payable 2nd July, instant.....	32,000 00
Added to "Rest".....	75,000 00
Balance carried forward to next year.	3.847 42
	$145,427 57

The accounts, securities, and cash of the Bank, both at the Head Office and Branches, have been frequently examined by the Inspector, and found correct.

In the report of last year the expectation was held out that the securities and collaterals held to cover the contingencies of certain accounts would realize sufficient, with appropriations, to guard the Bank against loss. The Directors are happy to state that this expectation has been more than realized. Profit and loss account has been credited during the year with various sums received on account of debts which have been written off or provided for.

In pursuance of the policy indicated in the same Report, the amount of Government Securities held by the bank has been increased by the sum of £10,000 sterling, making the total amount of such securities $147,155.

In view of the approaching termination of the Charter of the Bank, your Board petitioned Parliament during its late session, for a renewal of the same with amendments. An Act was passed, which has received the Royal assent, empowering the capital stock to be increased during the next three years to any sum not less than one million or more than two millions of dollars, and also changing the time for holding the Annual Meeting from July to June. This last will take effect for the first time next year, but no action can be taken representing an increase in the Capital without the concurrence of the stockholders. By a general act the charters of several banks, and this among the number, were renewed until 30th June, 1870, and the close of the next following session of parliament.

Your Board, along with a majority of the banks of the Dominion, have petitioned against any fundamental change in the currency system of Canada, and they trust that the unanswerable reasons urged against this course will have due weight with the legislature. Your directors conceive that the maintenance, under all circumstances, of a specie basis for the currency, is a matter of fundamental importance, and as the change proposed has a tendency, in their judgment, to undermine that basis, and entails other serious disadvantages, they trust that legislation may be in the direction of amending and perfecting what already exists, rather than in that of radical and undesirable change.

The Directors, in conclusion, have pleasure in bearing testimony to the very satisfactory manner in which their respective duties have been dis-

charged by the Cashier, Assistant Cashier, Managers, and other Officers of the Bank.

The whole respectfully submitted.

(Signed,)

WM. GOODERHAM, President.

The foregoing having been read, it was moved by Hon. J. H. Cameron, seconded by John Wickson, Esq., and

Resolved.—That the stockholders concur in the propriety of placing the report in the hands of stockholders before the day of the annual meeting, and that the report for the last year be adopted.

Moved by Judge Gowan, seconded by J. D. Armour, Esq., and

Resolved,—That the cordial thanks of the stockholders are due and hereby tendered to the President, Vice-President, and Directors of the Bank, for the care and attention they have bestowed upon its interest during the year.

Moved by Joseph Gould, Esq., seconded by Wm. Matthews, Esq., and

Resolved, That Messrs. W. J. Macdonell, and Henry Pellatt, be appointed scrutineers of the election about to take place, and that they report the result to the cashier.

Moved by W. J. Macdonell, Esq., seconded by Amos Bostwick Esq., and

Resolved,—That the poll commence at once and that it be kept open till one o'clock this day, except in the event of five minutes elapsing without the tender of a vote in which case it shall be closed.

Moved by Wm. Fraser, Esq., seconded by A.T. Fulton, Esq., and

Resolved,—That the thanks of this meeting be presented to the chairman for his able and impartial conduct in the chair.

Report of the Scrutineers.

Wm. Gooderham, Wm. Cawthra, Wm. Fraser, A. T. Fulton, James G. Worts, Wm. Cantley, Hon. Asa A. Burnham.

We, the undersigned Scrutineers, appointed at the annual meeting of the stockholders of the Bank of Toronto, held this day, declare the gentlemen above named unanimously elected Directors for the ensuing year.

(Signed), W. J. MACDONELL,
HENRY PELLATT,
Scrutineers.

The new Board met the same afternoon, when Wm. Gooderham, Esq., was unanimously elected President, and James G. Worts, Esq., Vice-President.

By order of the Board,

(Signed), G. HAGUE, Cashier.

GORE DISTRICT MUTUAL INSURANCE COMPANY.

The annual meeting of the members of the Gore District Mutual Insurance Company took place in Galt, on the 12th inst.

The President, John Davidson, Esq., took the chair, and Mr. Thos. M. Simons, the Secretary of the Company, read the following:

Thirtieth Annual Report.

The following is a summary of the transactions of the Company for the year ended 31st May, 1869.

The number of policies issued was 1,200—insuring $1,065,700, and the amount of premium notes thereon was $66,796.11. The number of policies in force at the end of the year was 2,597, insuring $2,117,875, and the premium notes thereon amounted to $151,250.85. The average risk was $815.51. The amount of cash premiums received was $3,635.28. The number of claims during the year 34, amounting to $18,101.44. The Inspector's report on claims and policies in force in each class of risk contains ample information concerning them and accompanies this. The claim to which allusion was made in the report of the Directors for the year ended 31st of May, 1868, yet remains unsettled. At the last spring assizes in Hamilton, the plaintiff was again non-suited and the matter referred to the Judges in term on a point of law. After this claim shall have been finally disposed of the precise grounds upon which the Directors decided to resist it will be published, and the facts then brought out will be found fully to justify their decision.

In regard to the cost of insurance within the period embraced by this report, it has for many months been maintained at twenty per cent. less than what the cost would have been in an ordinary Proprietary Company, and past experience warrants the assumption that this average will not be materially exceeded.

Based upon this experience, the promise is again repeated to the insurer for a period of three years, provided he will pay each year in advance twenty per cent. of his premium note that no further call shall be made upon him unless at the end of three years, it shall have been ascertained that the cost of his insurance shall have exceeded the amount paid by him, when he will be required to make up the deficiency. If, however, he shall have paid more than was required, a result which is not unlikely—the surplus will be returned to him. Moreover one year's interest will be allowed him on each payment made in advance. An assessment of twenty per cent. on the premium notes of this Company is equivalent to a saving of twenty cents in each dollar charged by an ordinary proprietary company. The system of daily assessment inaugurated by this Company has now been fairly in operation for two years, and very great benefit has resulted from it as the following statement will prove.

The liabilities of the Company for the year ended 31st of May, 1867, amounted to $13,483, and could have been paid had the Company had no other source of revenue such as cash premiums and first payments from assessments alone by the 31st January, 1868. Between that date and the 1st of September next thereafter, the date of which under the old system, assessments would have been levied, assessments amounting to $19,79 had been received in daily instalments, of which under the old system not one cent would have been received before the 1st September. A similar result is gradually unfolding itself this year. Aided by the system of cash premiums which this Company has adopted, it is confidently anticipated that the system of daily assessment will at no very distant period enable the Company to pay claims upon it as soon as established without the aid of borrowed money. Your Directors deem that it would be out of place in their report to enter into any discussion concerning the propriety of Mutual Insurance Companies adopting the cash system, nor would they allude to the subject had it not recently been assailed. However the fact that during a series of years the cost of insurance in any well managed Mutual Fire Insurance Company will maintain a certain average, should certainly justify such a Company in offering to insure at rates which shall exceed that average and to return to the insurer a portion of the profits so realized. Cash premiums may moreover be regarded as so many assessments paid in advance but without that risk or trouble and cost in collection which is unavoidably incidental to the premium note system, or all credit systems.

That this Company has experienced considerable benefit from the system of cash premiums during the past year, it is simply necessary to say that while the premium notes are but $1,874 less than they were on the 31st May, 1868, the amount of cash premiums received was $3,635, which sum represents at least $16,000 in premium notes.

The option to insure in either the premium note or cash system is freely offered by the agents of this company, thus enabling the applicant to select that which he conceives is best suited to his means. It is peculiarly gratifying to your Directors to be enabled to report that, while the receipts of the company have, during the past year, exceeded those of the preceeding year by nearly $2,000, its expenditure has been less by over $300; and of more importance still, that the amount of the company's liabilities is less at the date of this report by $8,000 than it was twelve months ago. Nor is it a matter of small gratification to the Board to be enabled to assert that the company has now one thousand policies more in force than it had in July, 1865, and that the value of its assets has increased in like proportion. Connected with this subject, the Board cannot but refer to the assistance which they have received from their agents. It were almost invidious to particularize, but the Messrs. Doyle and Mr. Hadden certainly deserve special mention.

The importance of united action on the part of mutual insurance companies has long been apparent, not only to the management of this company, but to others, who have felt that their interests generally would be enhanced could an uniformity in rates, so as to facilitate reinsurance operations, one uniform statute governing all alike, and uniform rules and regulations generally be adopted. With this end in view, a convention of the managers and representatives of all the leading mutual companies in Ontario was

called in April last. It was well attended, and matters affecting mutual insurance companies were fully and ably discussed, the result being unanimously in favor of an uniform tariff, uniform regulations, and one general statute; and your Directors have to report that when the minutes of the convention were laid before them, its proceedings met with cordial approval.

The election of Directors will take place to-day, the previous Board retiring; each Director is, however, eligible for re-election.

JOHN DAVIDSON, President.
THOS. M. SIMONS, Secretary.

Galt, 12th July, 1869.

On the conclusion of the report, Mr. McLean, Inspector, read the following statement as to the losses, etc., of the company for the past year:—The number of claims made against the company for loss or damage by fire during the past year, ending 31st May, 1869, is 37, amounting to $22,-886.16; last year the number of claims was 49, amounting to $35,707.50. All but three of the claims of the past year have been satisfactorily adjusted, and such as have matured have been paid. Of the three claims above referred to, one policy had become void for months previous to the fire by the non-payment of assessment, in terms of the statute. In another, the assured had effected an additional insurance on his property without the knowledge or consent of this company, thus rendering the first policy void. The third case—that of Todd & Co.—is as clear a case of fraud as ever was perpetrated. One of the partners acknowledged under oath that the real value of the property insured had been misrepresented in the application, the value stated in such application being more than double the real value of the property. No company would be justified in paying such a claim as that of Todd & Co. I have prepared a table showing the different kinds of risks insured by the company; the number of each kind, the total amount insured in each class, and the average amount of each risk, together with the loss sustained last year on each class of risk. I also append a statement showing the number of applications taken at each agency for the past two years, and the losses at the agencies for the same time; and lastly, a schedule of losses during each month of the past year, the cause of fire, if known, the name of the party insured, the number of the policy, amount paid in each case, and the nature of the risk.

Then followed an analysis of the causes of fire, &c., &e.

Before the passage of the report a general discussion took place regarding the general expenses of the Company, and amount of working expenses of the Company. Mr. Strickland asked, "What per centage of the receipts of the Company does it require to pay the working expenses of the Company?" Upon investigation it was answered that the gross working expenses of the Company were $8,766, of which sum it required about $3,000 for office expenses.

The election of the Board of Directors was then proceeded with and resulted as follows: John Davidson, R. S. Strong, James Crombie, Adam Warnock, James McTague, Samuel Richardson, M.D., A. T. H. Ball, Chas. Magill, M. P., Wm. Turnbull, John Watson, John Quarrie, James Young, M.P., and Hugh McColloch.

At a meeting of the newly elected directors, held on the 19th, John Fleming, Esq., Warden of the County, was elected President and R. S. Strong, Esq., Vice-President.

CITY BANK OF MONTREAL.—The annual meeting of this bank was held in Montreal on the 7th June; the President, Mr. Wm. Workman in the chair. Messrs. Wm. McDongall and Henry Mulholland were appointed scrutineers to the meeting. The report states the losses of the year to have been trifling.

The balance at the credit of the Reserve Fund last year was.....	$134,777	17
The net profits on the business of the year just closed, after deducting expenses and allowances for bad and doubtful debts, are.....	102,062	98
	$236,840	15
Deduct two dividends of four per cent. each paid during the year.	96,000	00
Balance at credit of Reserve Fund...	$140,840	15

This reserve, which is about 11½ per cent. on the capital, the Board believe to be sound and reliable.

The Directors enter at length into the consideration of the Bankrupt and Usury Laws, and Mr. Rose's Banking scheme. We have not space for the opinions and arguments expressed on these important subjects, or even a summary of them.

The following is an abstract from the books of the City Bank, exhibiting a general statement of the affairs of the institution, Monday, May 10th, 1869:

DR.

To Capital stock all paid up.....	$1,200,000	00

Notes and bills discounted, and other debts not otherwise included.....			2,502,386 19
			$3,246,263 47

F. MCCULLOCH, Cashier.

The following directors were elected for the current year:—William Workman, Joseph Tiffin, Wm. McDonald, Champion Brown, John Grant.

QUEBEC AND LAKE SUPERIOR MINING ASSOCIATION.—The Annual General Meeting of shareholders in this Company, was held, in Quebec, on the 12th inst. The following Report was read by the Secretary:—

It is with feelings of deep regret that your Directors have to report the death, since the last annual meeting, of their much esteemed colleague, the late J. B. Forsyth, Esquire, one of the first Directors of the Company, for twelve years its Vice-President, and for six its President, whose interests were so thoroughly indentified with the Company, that he has been present at *every meeting* since its formation. His zeal for the success of the Company was not less than his *unbounded faith* in its resources. Your Directors trust that the Shareholders, animated by a like spirit, will cheerfully come forward and furnish the necessary funds to enable them, not only to pay the government tax of 2 cents an acre, (now past due,) but also to have their valuable property surveyed and reported upon by a practical mining Engineer next summer, as without such a *data* for their guidance, your directors find it impossible to induce capitalists even to entertain the idea of purchasing. Your Directors feel the more justified in making this appeal, now that the value of their property has been so much enchanced by the discovery of rich silver veins in the vicinity of their locations. Failing this, your Directors see no alternative but either to make a forced sale of the lands, or have the 26,000 acres divided among the shareholders by a *tirage au sort*. By this method each shareholder will get a little more than half an acre of land for each share, and it will then be optional with him to pay the Government tax, or not, as he may deem best. After such an enormous outlay, your Directors cannot but contemplate such a winding up of the Company with regret, at the same time they consider it their duty to lay the matter clearly before the shareholders, leaving them to take such action therein as they may see fit.

The following gentlemen were elected Directors for the ensuing twelve months. Messrs. E. Burstall, D. C. Thompson, G. B. Hall, P. A. Shaw, Jos. B. Forsyth, and G. Veasey.

At a meeting of the Directors held on the following day, Mr. D. C. Thompson, was elected President, Mr. G. B. Hall, Vice-President, and Mr. Geo. Veasey, Secretary-Treasurer, of the Company.

Insurance.

FIRE RECORD.—St. Vincent Township, Grey &o.—Barn of R. S. Lynn, with 1,000 bush. wheat, wagons, &c.; loss estimated at $2,500 to $3,000; insured for $1,200 in a London and Mutual.

Aytown, Ont., July 7.—Shop of Mr. Leisner, and tavern, stables, shed, &c., of August Basler; no insurance on Leisner's property; Basler had a policy of $1,600 in some company.

Middle River, Nova &cotia, July 10.—Kerr & Son's Woolen Factory. The Eastern *Chronicle* says the loss will be $10,000; no insurance.

—The insurance companies interested in the late McGill fire at Hamilton have delayed the payment of the amounts of the respective policies, under the strong impression that there is "a nigger in the fence."

—Two of the crew of the schooner *Garryowen* reported lost near Cleveland, on July 1st, made affidavits before H. W. Heemans, British Consul, that the vessel was scuttled by the captain, as the vessel and cargo were insured. Underwriters are put on the guard until the Consul has closed the investigation.

—On the 14th inst., the barge Royal Oak foundered out of Port Dalhousie. She was being towed to Toronto, with the barge Enterprise, by the tug Young Lion. The cargo of the Royal Oak, valued at $600, uninsured, was lost. Both the barge and the wood belonged to Mr. Hutchinson, of Dunville.

THE INTERNATIONAL AND PRUDENTIAL.

Our readers will remember that at the beginning of last year the International Society entered into a deed of amalgamation with the Hercules Life Office, and consequent upon this, various Chancery proceedings were instituted, involving both companies in most expensive litigation. Subsequently both companies were ordered to be wound up under the supervision of the Court of Chancery. An agreement has now been entered into with the Hercules for the transfer of the life policy and annuity liabilities to the Prudential Assurance Company, subject to certain conditions. The most important of these conditions is that, on payment of £329,685 to the Prudential, the policies and annuities of the International would be undertaken by the latter company.

The difficulty of obtaining so large a sum being great, very considerable delay would necessarily arise before the transfer could be made and the security of the Prudential be given to the policyholders and annuitants. In addition to this, complications arose between the Hercules and the International, and it was feared that very heavy law expenses would be incurred. With the view

of affording immediate relief, negotiations were opened with the official liquidator of the International Life Assurance Society, which have resulted in the following agreement: "On the transfer by the International of certain securities, named, and on payment by the International, on the 20th July, 1869, of the sum of £65,937, being one-fifth of the above amount and interest, the Prudential will become bound to pay one-half of all annuities falling due since 30th January, 1869, and one-half of all claims on policies subsequent to the 30th January, 1869, with interest at 4 per cent. from the date when the payment should have been made up to payment. On each subsequent 20th July for four years, the International is to pay the Prudential another instalment of £65,937, being a further fifth of the said sum of £329,685 with interest, and on receipt of each instalment to pay or be responsible for one-eighth part more of the annuities and claims, together with interest at 4 per cent. on all arrears. All premiums and interest from 30th January, 1869, to be paid to the Prudential." The agreement has received the sanction of Vice-Chancellor Malins, who has made an order directing it to be carried out.

Immediately on receipt of the first instalment and interest, the fact will be notified to the policyholders and annuitants; and as soon as possible afterwards proper certificates, under the common seal of the Prudential, undertaking the above-mentioned liability, will be forwarded to the policyholders and annuitants. This relates to all policy-holders other than those in the United States of America, whose interests are also properly provided for. This arrangement places the policyholders and annuitants in a much more satisfactory position than might have been expected a short time since; and it is further beneficial to them, as it will save very protracted and expensive litigation, by which the interests of the creditors would have most materially suffered.

The following circular has been issued to the policyholders of the International Assurance Society:

In the Matter of The Companies Acts 1862 *and* 1867, *and of the International Assurance Society.*

Sir,—The affairs of this society being now arranged as regards the current life policies and annuity policies, I think it desirable to give to the shareholders and policyholders such information as I can regarding what has been done for the protection of their interests, and also as to the present position of the society. The society as you are probably aware, in May of last year transferred its business, and also the whole of its assets to the Hercules Insurance Company, a young office, that had not the means of carrying out its contracts, and which passed into liquidation early in the present year. Prior to the Hercules Company going into liquidation petitions had been presented to the Court of Chancery for an order to wind up the affairs of the International Society, and on the 19th of February the Court made an order for that purpose, and appointed Mr. Symes, the late chairman of the society, and myself official liquidators. Mr. Symes acted with me in that capacity for a short time, and then ceased to do so, whereupon his Honour Vice Chancellor Malins appointed me sole liquidator. I have succeeded in carrying out with the Prudential Assurance Company an arrangement for their taking over the liabilities of this society in respect of life policies and annuities and have seen a print of the circular issued by that company dated the 8th June inst., containing the particulars of the agreement entered into by me, and the same contains correct extracts from such agreement. For the information of the policyholders I may mention that the amount, £329,685 the sum at which the policy and annuity liabilities of the International had been recently valued by Messrs. Bailey and Sprague, two actuaries of great experience and reputation, and which valuation has been certified for my guidance by Mr. Robt. Tucker, the eminent actuary of the Pelican Assurance Company, and he recommended its adoption, and also stated that he considered the terms proposed by the Prudential to be more favourable to this society than were likely to be obtained from any other office affording a resonable prospect of being able to carry out their contracts. This agreement has been sanctioned by the Vice-Chancellor, and he has directed me to carry it out. This arrangement, having for its object to secure to the policyholders as much certainty with regard to their policies when they become claims as in the position of the Society's affairs it is possible to do, will, I trust, be regarded as satisfactory to all parties interested.

(Signed) FRED. MAYNARD, Official Liquidator.
London, 55 Old Broad St., E.C.

—*Insurance Record.*

A PRETTY LOT!—In 1866 the European Fire Assurance Society took over the fire business of the British Nation. In 1867 the Etna Fire (established 1866) took over the European fire business. In 1868 the Etna also took over the life business of the General Provident (established 1862), which had in 1864 taken over the business of the Confident (established 1862.)—The Etna, in 1868, becoming insolvent, was ordered to be wound up, and the fire businesses were transferred over to the United Ports and General, which had, singularly enough, just started, having agreed to take over the marine business of the Bristol Marine (established 1864) and the Amicable Mutual Life (established 1857. The amalgamation of the Progress will leave the United Ports the embodiment of no less than nine different companies. As the institution transacts fire, life, and marine business, and is unlimited, we cannot be at a loss for an opinion as to its future prospects.—*The Cosmopolitan.*

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

An average business has been done during the past week; the demand for most securities, however, exceeds the supply, and prices closed very firm.

Bank Stock.—Montreal has again advanced; sales were made at 159¾ and 160½; no sellers now under 161. Sales of British have been made at 104½, which price would still be paid. There are sellers of Ontario at 96, and buyers at 95½. Toronto is in good demand at 120½ to 121; small sales have been made at these rates, but holders generally ask an advance. Royal Canadian is asked for at 50; none in market. Commerce has been much sought after at last week's quotations, and buyers have advanced to 102; holders want a further advance. Buyers would give 39 for Gore; there are sellers at 40. Merchants' has been largely dealt in at 106 and 106½; buyers offer the latter rate, but the stock is held for an advance. There are buyers of Quebec at 100½. Sales are reported of Molsons' at 109½, at which rate there are buyes. Buyers offer 99¼ for City, with sellers at par. Du Peuple nominal at 108½ to 109, and Nationale at 107 to 108. No Jacques Cartier in market; buyers would give 108½. Small sales of Mechanics' were made at 93. Union sold at 105; none now offering under 105½.

Debentures.—Sales of Dominion Stock are reported at 107, 107½, 107¾ and 108; Fives and Sixes are asked for, but none on market. Considerable sales of Sterling Toronto Bonds were made at rates to pay 7 and 7½ per cent. County are asked for at 99.

Sundries.—City Gas is much inquired for; buyers would give 107½. No sales of British America Assurance since our last; buyers would give 54. Sales of Canada Permanent Building Society were made at 122½ to 122¾; it is in demand at the latter rate. Western Canada Building Society is in demand at 118, but none on market; buyers would advance ½ per cent. Freehold Building Society continues to be much sought after, but without attracting sellers. Small lots of Montreal Telegraph offer at 133. Sales of Canada Landed Credit were made during the week at 80. First class mortgages are readily taken to pay at 8 p. cent.

UNITED STATES CURRENCY.

The New York *Economist*, in a recent number says:—It is not our purpose to hazard any theory in regard to the currency; we merely design to present the facts, and leave our readers to frame their own theories. None but those familiar with the difficult nature of statistical inquiry can apreciate the great amount of labour compressed into the following table; although it will be perhaps enough to state that the information it contains was derived from a careful perusal of all the Treasury documents, Congressional Committee reports, and a large portion of all the statistical works published in the United States since 1830. Even as it is no complete authentic data for the years 1831 1832, and 1834 have been obtained.

Statistics of the Currency of the United States, including Bank Notes, Greenbacks, and Specie.

Year.	Currency.	C'y per Capita
1830	$93,000,000	$7 20
1833	119,700,000	8 50
1835	183,000,000	12 40
1836	205,000,000	13 30
1837*	222,000,000	14 00
1838	203,000,000	12 50
1839	222,000,000	13 40
1840	190,000,000	11 20
1841	187,000,000	10 70
1842	143,700,000	8 00
1843	128,500,000	6 90
1844	175,000,000	9 10
1845	186,000,000	9 40
1846	202,500,000	9 90
1847	225,500,000	10 70
1848	240,000,000	11 10
1849	234,70 ,000	10 50
1850	285,000.000	12 20
1851	341,000,000	14 20
1852	360,000,000	14 20
1853	380,000,000	14 50
1854	418,600,000	15 80
1855	444,600,000	16 40
1856	446,200,000	16 10
1857*	474,300,000	16 70
1858	406,600,000	14 00
1859	457,800,000	15 40
1860	457,000,000	14 50
1861*	443,400,000	13 70
1862	482,500,000	21 00
1863	672,000,000	27 40
1864†	743,000,000	28 50
1865‡	754,000,000	24 90
1866	850,000,000	23 60
1867	844,000,000	22 80
1868	839,000,000	22 00
1869	832,000,000	21 20

Glancing along this table, it will be observed that the currency was an increasing one from 183 to the time of the great suspension in 1837; th then it became a decreasing one until 1843, whe it again became an increasing one until 1857, agai a decreasing one until 1861, again an increasin one until 1864, and that it is now a decreasin one. These alternate movements of the currene may, with great propriety, be termed *crescen* and *diminuendo* movements. The crescendo p riods are all noted as eras of great commerci activity; the diminnendo ones are as eras of co mercial depression—thus:

Period.	Currency per capita.		Movement.	Characteristic
1830–37	$7.20	to $14.00	Crescendo.	Great activit
1837–43	14.00	" 6.90	Diminnendo.	Depression.
1843–57	6 90	" 16.70	Crescendo.	Great activit
1857–61	16.70	" 13.70	Diminuendo.	Depression.
1861–64	13.70	" 28.50	Crescendo.	Great activit
1864–69	28.50	" 21.20	Diminnendo.	Shrinkage.

*Suspension. Highest inflation during suspension
‡ Spring panic.

Mining.

Enormous Coal Deposits in Tennessee.—General J. T. Wilder, of Rockwood Iron Works, has been in the city for a short time. He informs us that the miners in his coal mines, are now at work upon a deposit of coal, which exceeds in thickness anything ever known in the world. An air course driven across the bed shows it to be over one hundred feet thick! This is more than twice the thickness of anthracite coal in Pennsylvania.—*Knoxville Press & Herald.*

Nevada.—White Pine Milling Operations.—The *News* says that in a short time the milling capacity will be increased to one hundred and eighty-five stamps, and will be doubled during the summer. Meanwhile, large stacks of ore are accumulating at the mine dumps. It is not unlikely the district will turn out $150,000 to $200,000 a week in a few months hence, and $500,000 is promised for July, to begin with. The shipments from this source will partly meet the enlarged demand for money created by the rapid industrial development of California and Nevada.

Giant Powder.—A correspondent asks: "What does giant powder consist of, and where is it made?" It is nothing but nitro-glycerine, reduced to dryness by combining it with hydrated silica. The latter substance may be obtained from *water-glass* by means of an acid which precipitates a gelatinous mass from it. This mass when dry is an impalpable powder, and such is found in natural deposits in California, where giant powder is manufactured, Mr. Nobel, who patented several explosive, also posesses a patent for this one. It is also manufactured in New York City, but we are not at liberty to publish the manufacturer's name without his permission.—*N. Y. Mining Journal.*

Gold at Eel River.—A gentleman who lately visited Eel River, and whose experience in mines and minerals is very extensive, favored us with a call at our office lately. He is a resident of Westmoreland and has no interest, whatever, in the Eeel River Gold Mines, or any other property there, and he has placed in our hands the following memorandum:—Accompanied by a highly respectable and intelligent gentleman, I visited "Eel River" on Wednesday last, and examined the gold formation lately discovered in that locality. The lode, where uncovered, is about four inches, and evidently gold bearing. The quartz has a matrix of slate enclosed by what I would call "Mountain Limestone," resembling in some degree the "Whin Rock," accompanying gold bearing quartz in Nova Scotia. I had a piece of quartz which was taken from the lode crushed and washed (about half pound weight) and which gave five-eighths of gold. I consider the prospects are sufficiently encouraging to warrant a judicious expenditure of capital in prospecting the property.—*St. Johns Telegraph.*

The Gillan Co.'s Mill, Madoc.—The machinery of this mill, formerly known as the Gilbert & Turley, has, since its removal to Marmora, been materially improved,—the alterations being adopted, after consultation with Mr. J. H. Dunstan, by Mr. Gilbert, who deserves great credit for the good and substantial manner in which the works have been erected. The building is 30 feet by 30, with an addition of 12 by 14 feet, for the office. In the main building there are three step floors, (like the steps of a staircase) of 10 feet each. On the top floor stands the stamps-battery, the frame of which is large enough to admit of ten stamps being erected, though only five are put in at present; on the second floor is, first, a copper-plated amalgamated *strake*, 6 feet long, which joins the battery,—and at the end of the strake is placed the grinding-pan; and on the bottom-floor are the settler and a copper-plated amalgamated shaking-table, on leaving which, the slime passes through sluices and traps to the outside of the mill. Thus the quartz has only to be fed into the battery, and needs no handling a second time, as every portion of the machinery clears itself completely. It consequently requires only one man on a tour to work the whole mill, which is driven by a 30-horse-power turbine water-wheel. The cost of milling, we understand, will not exceed one dollar per ton to the Company; this mill is superior to any yet erected in the country. Three weeks ago, the mill being very nearly completed, the Company sent for Mr. Dunstan, to examine the machinery and superintend the first run. The mill was ready to run, on the 29th of June. After working thirty tons of surface soil, quartz and everything that came from the shaft, he decided to clean up; and in presence of a large number of visitors, in a short time turned out a nice bar of gold which caused much rejoicing, the results of 30 tons being $6 per ton.—*Madoc Mercury.*

Lead.—We have been shown a specimen of lead from the Galway Mines which came down while the men were "drifting" a few days ago. It is perhaps 15 or 18 inches in diameter, flat, like a turtle somewhat, and weighs 33 lbs. It is almost wholly the genuine article, and verifies the extraordinary wealth of these regions behind us. We are glad to learn that the works will soon be advanced in greater force than heretofore. A steam engine is about to be set in motion, and with the encouragement now dropping down on the shareholders almost unsought, the Galway Lead Mines will speedily be more widely and favorably known than ever.—*Peterborough Review.*

The Eel River Gold Discovery.—In regard to this the Woodstock *Acadian* of Friday says:—"It is well that the very truth should be known. We understand that gold *has* been found in the locality named. Of the existance of extensive seams of quartz there can be no doubt. Whether this quartz contains gold in sufficient abundance to make its crushing a profitable business is the point, and it is a point which is as yet utterly undecided. But means are in operation by which the value of the quartz will be thoroughly tested, and that soon. Meanwhile it is scarcely worth while for any one to take the gold fever severely."

—The Chicora, from Lake Superior, brought down 16 packages of silver ore from the Thunder Bay Mining Co'y. valued at $20,000.

Railway News.

Great Western Railway.—Traffic for week ending July 2, 1869.

Increase	$7,492 81

Northern Railway.—Traffic receipts for week ending uly 10, 1869.

Passengers	$3,269 33
Freight and live stock	12,589 43
Mails and sundries	337 55
	$16,196 31
Corresponding Week of '68.	12,215 35
Increase	$3,980 96

Wooden Railways.—The *Sherbrooke Gazette* says:—At the Stratford and Garthby meetings of the 14th inst., $7,000 worth of stock was taken in the Sherbrooke and Kenebec railway; at Lambton, on Thursday, $25,000; North Winslow, $15,000; total $47,000. The Municipalities of Aylmer, Forsyth, Shenly, and Tring having a gross population of 66,000, will be good for $60.000 at least, as these municipalities are still further removed from market, and equally well accomodated by the proposed route as those who have already declared themselves by taking stock. Friday, South Winslow confirmed the impression made on behalf of wooden railroads versus iron. The belief is fast becoming fixed in the public mind, notwithstanding all efforts to the contrary, that in the present condition of a thinly settled country, such as that between Sherbrooke and Chaudiere river, a wooden, and not an iron road is the only financially possible solution to the problem of supplying the means of transit for these now insolated localities.

Law Report.

Marine Insurance—Unseaworthiness.—In this case the court, though of opinion that defendants were entitled to a nonsuit, granted a new trial, suggesting whether, if evidence were given of defendant's knowledge of the age, build, and materials of which the vessel was built at the time of the insurance, it might not be held to modify the condition as to unseaworthiness, so as to make it subordinate to the particular vessel being assured. On the new trial, one H was called by the plaintiff, who proved that he, as agent of the defendants, accepted the risk on the vessel in question; that he had seen, but did not examine her, but judged her wholly from the registry, and insured her as B 1; that a B 1 vessel would be insured as readily as an A 1, the charge on freight being the same, and the seaworthiness would be expected to be the same, though the A 1 would not be so likely to go to pieces.

Held, that these facts did not bring the case within the principle laid down in Burgess *v.* Wickham, 3 B. & S. 669, and Clapham *v.* Langton, 34 L. J., Q. B. 46, and therefore, that the new evidence did not alter the position of the parties, and that a nonsuit has been properly directed.—*Coons* v. *Aetna Ins. Co.*, 19. C. P. Rep. 239.

Warehouse Receipts.—When two partners, not carrying on business of warehousemen, have their partnership stock in their own cellar, a receipt given by one to the other for that stock, though in the form of a warehouse receipt, is not a warehouse receipt within the meaning of Con. Stat. of C. ch. 54.—*Ontario Bank* v. *Newton*, 19 C. P. Rep. 258.

Fire Insurance—Cancellation of Policy.—*Declaration* on a fire policy, averring an assignment of the policy with the assent of the defendants to H. B., and that the action was brought as well on behalf of H. B. as on plaintiffs' behalf.

Plea, on equitable grounds that H. B. was never interested in the insured property, and that before the loss the policy was cancelled by an arrangement between plaintiffs and defendants by which a policy on other goods was substituted and the unearned part of the premium credited by defendents to plaintiff on account of the new policy.

Held, on demurrer a good answer in equity also a good legal defence.—Miall *v.* Western Ins. Co., 19 C. P. Rep. 270.

Telegraph Enterprise.—Another great European telegraph project is on foot. A company just formed in London has purchased, with concessional rights, the following cables, namely: 1st, Denmark to England, from Sondervig to Newbiggin, actual distance 334 miles. 2nd. Denmark to Norway, from Hirtshalts to Arendal, actual distance, 60 miles. 3rd. Denmark to Russia, from Moen to Bornholm, and Bornholm to Libau, actual distance, 304 miles. 4. Norway to Scotland, from Egersund to Peterhead, actual distance, 270 miles. 5th. Sweden to Russia, from Grislehamn to Nystad, actual distance, 96 miles. Of these, the three first are already laid, and have been for some time working; the fourth is shipped on board ready for laying; and the arrangements for the fifth are in course of completion, and both the latter are to be laid at the risk and cost of the old companies. The new company undertakes the working, and will be entitled to the receipts from the first of June. The cost of purchase was $3,500,000. The ultimate intention of the company is a connection with North America by the Russian dominions.

THURSDAY, JULY 22, 1869.

THE INSPECTION OF TRANSFER BOOKS.

At the last meeting of the shareholders of the Bank of Montreal, a motion was made to the effect that the transfer books be opened to the inspection of shareholders within bank hours. The motion was opposed by the chairman, Mr. King and others, and finally shelved. The chief grounds of objection urged against opening the transfer books to shareholders were that it was illegal, inconvenient, not in conformity with English or Irish practice, and that shareholders might be imposed upon by fictitious sales. Mr. King considered the inconvenience depended entirely upon the number of shareholders who chose to look at the books. The double liability afforded no reason for shareholders making themselves acquainted with the details of the transfer book, as that liability is a protection to the public, and consequently on such ground the right to inspect would be in the public, not in the shareholders. The double liability principle, as the law now stood, he considered worth very little, and if he could influence legislation he would have it abolished altogether.

In so far as the legal right is concerned, it would seem to be clear that shareholders are entitled to inspect the transfer book. One counsel to whom the case of the Bank of Montreal was presented for his opinion sustains that view and considers there is nothing in the charter or the by-laws of the bank impairing the right. The only prohibition established by the charter as to the right of inspection by a shareholder, who is not a Director, is confined to the account of a person dealing with the bank. The charter itself, therefore, may be said to recognize, in effect, the right of such shareholders to have free access to the transfer books. Mr. Abbott also considered that there would be nothing illegal in opening the transfer books, but he thought that to do so was within the discretion of the Directors. In Smith on Banking it is laid down—that, "Fund holders and those who have an interest in the funds have a right, which the Court of Chancery will enforce, of inspecting and copying entries relating to the stock in which they are interested, and the transfers of such stock, and the bank is bound to furnish to such persons on application, a list of books containing entries relating to the stock in which they are interested."

Independently of the legal right, there are grounds of expediency which may fairly be relied upon in support of the position of those contend for a free inspection. This side of the case has been well put by Mr. Crawford in a letter to a Montreal journal. Promoters of all banking enterprises have drawn special attention to the names of subscribers as an evidence of good faith. Should confidence become impaired every prudent man would withdraw from the partnership and as it is desirable for one to know the character of those associated with him, the only means of acquiring that information is by first learning their names from the transfer book. The published annual list is regarded as a poor compromise for the book itself. The double liability furnishes a strong reason, as during monetary excitements it is well to take soundings from time to time respecting the general schemes of shareholders. Should a large order from England or elsewhere be transmitted to a bank to dispose of stock it is considered right to place it beyond the power of any one connected with the institution, either directly or indirectly, to speculate thereon. In the event of a disastrous failure or embezzlement being telegraphed to a bank, directors or managers should not be placed in a position by which they could reduce their own stock and advise their friends to do so likewise, to the detriment of the general shareholder. Should a bonus be resolved upon, the only effectual method of providing against the forestalling of the stock by those in the secret, is the inspection of the transfer book. Should directors lose confidence in themselves or grow tired of deceiving shareholders and the public by purchasing stock, the transfer book would reveal it.

From the above summary of the arguments for and against, it will be seen that there is a show of reason on both sides. But, on the whole, we are disposed to think that the unchecked license to inspect transfer books would be attended with so much inconvenience and so little real advantage that the present system of restraint had better be retained. Were the books kept open the possessor of one share might inflict considerable injury to individuals by noising abroad dealings which are now invested with a character of privacy, and also injure a banking institution very seriously. If any particular advantage would accrue from keeping the transfer book lying open it would be enjoyed by shareholders resident at or near the Head Office, perhaps to the prejudice of non-resident shareholders. It might, furthermore, give rise to speculation, to nominal sales, and to various devices for bulling and bearing the market successfully. If the book were kept open for general inspection, there would be nothing to prevent an eager crowd of speculators in stocks from creating a daily tumult in the bank premises. As to the vantage ground held by Directors, their position necessarily secures it to them and no inspection of transfer books will deprive them of it. A list of shareholders is now published annually; perhaps the more solid objections to the present system might be met by the semi-annual publication of the share list.

BANK OF TORONTO.

The report of the Directors of this Bank is one of the most satisfactory documents of the kind ever presented to Canadian Shareholders. We say it unhesitatingly, that no better exhibit is to be found among the records of Canadian banking. After providing for losses, &c., the net profits for the year amounted to $140,423; the rest was increased by $75,000, and a balance of $3,847.42 carried forward. The rest now amounts to the large sum of $300,000, or 37½ per cent. of the capital. The statement appended to the report will be found more explicit, and much more full than such documents usually are. We notice, with great pleasure, the item "rebate of interest on notes discounted $21,822," in its proper place among the liabilities.

This feature is somewhat novel, in Canada, but it has hitherto appeared in the statements of the Scotch banks, and of the Joint Stock banks of England. The neglect to include such rebate among liabilities, always appeared to us to be culpable. It will be observed, further that discounts current are distinguished from discounts overdue. This also is commendable.

The prosperity of this bank has a peculiar interest for Toronto. The assistance it lends to our most important branches of trade, renders its existence and welfare a matter of great importance, while the admirable character of its management supplies, the best answer to the self sufficient sneers of Montreal brokers, who circulate slanders about the banking skill of the west. The extensive knowledge of business, and business men, possessed by the President and Vice-President, have proved of great service to this Bank. Such knowledge wielded with the skill of a Cashier so accomplished as Mr. Hague, and so well versed in the science and art of banking may be regarded as the secret of the Bank's great success.

TORONTO AND NIPISSING RAILWAY.

The company which has undertaken to build this road has at length taken shape. On the 21st the election of directors took place, with the following result: George Laidlaw, 1,131 votes; W. F. McMaster, 1,116; Wm. Gooderham, Jr., 1,098; Joseph Gould, 1,086; Robert Elliot, 1,060; T. C. Chisholm, 1,008; J. C. Fitch, 998; James E. Smith, 992; John Shedden, 867. The meeting was harmonious, and congratulations were exchanged on the success which had crowned the efforts of those who have so energetically brought the project to a head. Mr. C. J. Fox was present, and expressed himself fully satisfied, after a personal inspection of the line of route, that the original estimate of $15,000 per mile would be ample.

Mr. Laidlaw, although placed at the head of the poll, declined to act as director. His resignation is to be regretted, but we can appreciate his motives, and respect him all the more for sticking to his determination. While on the subject, we may be permitted to say a few words respecting the man whose indomitable energy and perseverance, combined with an ability which was at first question, then admitted, and is now recognized and lauded, were the heart and soul of the enterprise. Few men are willing to devote themselves so thoroughly to a scheme such as this railway is, and still fewer are competent to bring it to a successful issue. The tact, the zeal, the perseverance displayed by him from the first, mark him out as one for whom a place on a board of directors is no fitting reward. With all the energy of the most enterprising of Yankees, he wrote, and spoke, and worked; with all the tenacity of a Scotchman, he held on his course, worrying enemies and hugging friends with a bear-like squeeze, until some how or other his recruits fell into line, submitted to their fate, and marched as joyfully as possible towards Lake Nipissing. At one time in the van, at another in the rear, but always sufficiently near to keep would-be stragglers up to the mark, Mr. Laidlaw was ever in motion—a veritable guide, philosopher and friend to his compatriots. Such men as he, in spite of their restless, uncomfortable energy, are those who bring progress to a country, and should have such rewards as public benefactors are entitled to receive. The new Board is made up of live men, and we hope that the enthusiasm of their inaugural proceedings will be but the herald of prompt and honorable action.

THE ROYAL CANADIAN BANK.

It is announced that Mr. Yarker, seeing the difficult position in which he was placed by the acceptance of the appointment as examiner, requested that he should be relieved of a portion of the task assigned to him, and that the directors invited Mr. Fisher, of the Ontario Bank, to co-operate with him. It is intended, we understand, that Mr. Yarker shall confine himself entirely to passing upon the paper and securities of the bank at the head office as well as at the agencies, and Mr. Fisher confine himself to the matters connected with internal management, such as deposits, cash, &c. This is all very well, but we cannot see the advisability of limiting Mr. Fisher's duties to the mere counting of the cash. The real work is that which Mr. Yarker has kept under his own control, and unless Mr. Fisher co-operate therein, of course, the report to be made will be that of Mr. Yarker exclusively. Mr. Fisher may tell us how much cash is on hand, but what the shareholders want to know is the value of the paper estimated by an impartial authority. This division of labour, if limited in its scope as above stated, does not meet the objections urged by us last week. The general impression is, that Mr. King wishes to buy out the Royal, and such transparent pieces of humbug as this division of labor is, serve but to confirm it. The purchase of the Commercial by the Merchants', and the rise of the latter to its present position, both in the east and west, show Mr. King that a rival of power and influence is on the heels of the Bank of Montreal. The Merchants' is increasing its business very fast, and with its new capital taken up (which will undoubtedly be the case), the Bank of Montreal will have to confront a rival firmly rooted in the good will of the people of Ontario. There is then good reason for supposing that, if the Royal is to go into the market, Mr. King will not be among the last to send up a tender. Mr. Yarker is his officer, and will learn exactly how it is with the Royal. Such information cannot but be of service in case of competition. Mr. King may wish the Royal to resume business; he has expressed himself to that effect. But, like every other zealous officer, he has the interest of his own institution at heart, and will be guided in his action by the dictates of expediency.

As outsiders, having no special information respecting the motives of the Board, we view the whole matter from the stand point of the public welfare and the interests of the shareholders. But we must say that the course pursued does seem to us to be unwise. Mr. Fisher is quite competent to pass upon the bank's paper, he is implicitly trusted by his own Directors and by the public and we fail to see why he should be asked merely to count the cash. We believe it will be found that reports of an exaggerated character have been circulated to the detriment of the Royal and an impartial investigation will reveal their incorrectness. It will be furthermore found that the details of management are in more perfect order than has been supposed by some, and it will be made apparent that the necessity for suspension arose entirely from a loss of public confidence not from want of ability to withstand ordinary pressure. If all this be made manifest, resumption will be but a question of expediency. We have heard that some large depositors have agreed to stand by the institution and that the Government balance will not be hastily withdrawn. However, that may be, there can be but one opinion relative to the nature of the investigation now being made.

The latest intelligence is to the effect that Mr. Fisher has declined to act. One can readily understand why that gentleman should be unwilling to place himself in a false position, as undoubtedly would be the case if he were to be hampered by the arrangement above referred to.

THE GORE DISTRICT MUTUAL.

The report of the Directors of this Mutual Fire Company will be found worthy of attentive reading. The system of "daily assessment" is practised by that company and, after two year's trial, the Directors claim that great benefit has resulted from it. Most, if not all, of the other Mutuals assess their policies up to a given day, say 31st December in each year. The Gore District assesses each of its policies yearly upon the day of

the month in which it was issued. The result is that under the "daily assessment" system an assessment for loss may be made on the very day of advice, while under the other system the assessment can only take place sometime after the occurrence of losses. Further, in one case revenue is constantly coming in, while, in the other, the bulk of revenue comes in during one or two months in the year. The working of the system is more clearly shown by the statement in the report.

There is a short reference to the discussion concerning the propriety of Mutual Companies adopting the Cash System which shows that the question is one of general interest. When the various Mutuals have expressed their opinions we shall treat the question more fully. We agree with the Directors in their estimate of the importance of united action in securing uniformity of rates and such statutory provisions as will place all companies on a common basis. At the meeting of the representatives of Mutual Companies held in Hamilton, on the 29th of April, this seemed to be generally acquiesced in.

The Gore District is evidently making good progress. The receipts for the last year exceeded those of the year previous by $2,000, with an expenditure less by $500. The company has now in force over one thousand policies more than it had in July, 1865. It was natural, in the face of such an exhibit, that satisfaction was expressed with the manner in which the Secretary, Mr. Simons, and the Inspector, Mr. McLean, had discharged their duties. Some objection was taken to the amount of salary paid these gentlemen, but, as Mr. McGill well put it, "good men should be well paid." It is false economy to pay inadequate salaries to efficient officers. Their value is soon learned by rivals, and competent, energetic, and trustworthy men always will command their price. As regards inspectors, there seems to be an idea abroad that they are to a degree superfluities. This is quite a mistake. As a class of men they are ill-paid, considering the temptations to which they are exposed and the nature of their duties. An inspector with a stinted salary may, if possessed of an elastic conscience, make considerable additions to it in the way of perquisites, presents, &c., to say nothing of the sums of money that might be got by questionable compromises. We have heard of an inspector who levied systematically on claimants, and almost furnished a house with articles obtained as thank-offerings. We conclude, therefore, and insurance men generally will coincide with us, that a fair salary to an inspector is the best safeguard against such practices.

The President of the Gore District is an excellent business man, intelligent and fully capable of discharging the duties of his office aright. He is surrounded by a Board of practical business men. The prospects of this Company are, therefore, on all hands, of the most satisfactory character.

It is not improbable that the British Government will sever its connection with the Bank of England. In a recent debate the Chancellor of the Exchequer announced that the Government contemplated making a new arrangement respecting the disbursement of the public funds. He spoke of the bank as "a private institution," whose sovereignty was baneful, and that it was largely maintained by means of the deposits of public money intrusted to the bank. It is objected that its management is illiberal, and that its whole policy seems to consist in embarrassing trade by making money artificially dear at the time when it should be cheap, and *vice versâ*. It is now claimed that the time has arrived for establishing free trade in money and in banking, the same as in other departments of business. This stirring up of the "old lady" will be interesting news to those wiseacres among us who sigh for a similar institution in Canada, and would have the Bank of Montreal lifted into that position.

GRAND TRUNK RAILWAY.

Mr. Brydges has parried a good many thrusts, but in few cases with more success than in his replies to the interrogatories of Mr. Creak, who may be called the leader of the opposition to those who at present control the management of the Grand Trunk Railway. Of course Mr. Creak, or any other shareholder in the company, is justified in getting all the information respecting the property in which he has an interest, and in taking all fair means to correct errors of management, but there is a limit beyond which such endeavours cease to be productive of good results. The following is the substance of Mr. Brydges replies:

Scoville never sent me a copy of the printed letter Mr. Creak refers to, and I know nothing of its contents. Scoville's price for wheels was $15 each from November, 1861, to April 1864, when he raised it to $16, at which it remained till December, 1865, after which we took what he made from materials he had on hand or had contracted for at $15 each up to June, 1867, when we ceased buying from him. In the early part of 1864 the Three Rivers concern got into difficulties, and we could not depend upon their supply. Scoville delivered all his wheels at Toronto, we carrying those used at Montreal, a distance of 333 miles, at our own cost. The consumption of wheels at Montreal is about five sixths of the whole. The carriage of Scoville's wheels from Toronto to Montreal added for bare cost at least 50c. to his price for each wheel. We got the first wheels from Montreal in the spring of 1865 at $15 each. Finding Scoville impracticable we agreed to buy all our wheels from the Montreal Foundry at $14.50 each, delivered where we use them. All those we take at other points besides Montreal are delivered at the places we use them at the cost of the makers, we paying only $14.50. We pay now $14.50 each wheel, which is fully $1 a wheel, less than Scoville's price, carriage included. I did refuse to make a contract with Scoville, because he declined to deliver anywhere except at his works at Toronto, which, as I have said, added $1 at least to his price, as compared with the Montreal rate.

The rise of wages in 1867 and 1868 is owing to the fact that the increase in the rate of American wages culminated or reached its highest point at the end of 1866. Wages in the States to-day are at the highest point they have ever been at in my experience of sixteen years. Our staff is not larger, but each man costs more now than he did in the first half of 1866 and previously.

The increase in fuel is owing to several causes—greater proportion of soft wood supplied by contractors, financial necessities causing stock to be low, and therefore necessitating the use of green wood; and the severe unusual cold of the winter of 1867-8, causing more wood to be burned to haul the same loads.

Very few complimentary passes are issued—the exceptions being the press and Americans whose interest as controllers of freight is important, and who are invariably passed on their own lines. No passes are given to M. P's or their families or other private parties.

A few rails in our own shops are repaired where it is economy to do so by our own men at day's wages. I have examined Baines plan, and do not consider, after careful consideration, that it is desirable to adopt it. I can give my reasons, of course if necessary, but I suppose that an opinion is all that is now needed.

The volunteer corps has not cost the company anything, the whole of the outlay being borne by the Government and the men themselves. Drilling did not and does not come out of the company's time, nor did it ever interfere with a single train. Full particulars will be found in my letters to the London office.

Old rails vary in price according to the markets in the United States, the prices ranging from $18 to $25 a ton. The charge of re-rolling at Toronto is $25.50 a ton in gold, at Portland $40 in greenbacks, and at Detroit $38½ in greenbacks.

Cleveland coal laid down at Lake Ontario ports will cost from $5.80 to 6.20 a ton in gold. It is not economy to burn it at the present price of wood. Coal is being used in the Western States very partially, and only in prairie countries where no wood can be had and seams of coal can be met with.

Experiments have so far proved that Pictou coal is not suitable for locomotives. For stationary engines, it is at least 25 per cent. less profitable than English coal.

The subsequent action of Mr. Creak, and those who support him, has been strongly condemned by the English railway press. *Herapath's Railway Journal*, referring to Mr. Creak's action, denounces it as un-English, and likely to be detrimental to the company's

welfare. It inquires: "Since the meeting at which Mr. Brydges attended and gave explanations, where he was very well and even cordially received, what has occurred to justify a renewal of the agitation against him? Fair play is a jewel, and we will be no parties to an agitation which will be simply annoying, and can do no good." The *Railway Times* says: "The circular is high-toned, well-written, but unfortunately not conclusive. It takes up a few of the mischiefs that have been so fully and so frequently descanted upon in these columns, but places in the foreground its disapprobation of the results of Mr. Brydges' exertions to produce a profit to the shareholders." The *Railway News* says: "The portion of the circular to which exception must be taken by every right-minded and honorable person, is that which refers to Mr. Brydges, and the persistent annoyance to which Messrs. Creak, Hartridge & Co. subject him. No sooner does he leave England to resume his duties in Canada, than the attack is renewed, and Messrs. Creak, Hartridge & Co. are so insensible to every feeling of fair-dealing and gentlemanly conduct, that in their circular they denounce the directors for not supporting a resolution calling upon Mr Brydges to resign."

By way of answer to certain newspaper comments on a recent discussion in the New Hampshire Legislature, Mr. Brydges has published the following:

"I have a copy of the report made by the Commissioners, and after stating that they find two-thirds of the road 'in good running condition and safe running order,' and that the other third needs repairs, they go on to state as follows:

"'We also find the superstructure of the 'road, the masonry and bridges are of the 'best workmanship, and we think cannot be 'surpassed in this State or the United States. 'This road has many disadvantages to con-'tend against. Snow is upon the track nearly 'six months of the year, and at times in such 'quantities as to nearly suspend travel. The 'road has but one track, and with so many 'long trains daily, leaves but little time to 'repair the track between trains. With all 'the contending elements incident to all 'roads, and especially to roads in this lati-'tude, we are of the opinion that there is no 'cause for serious alarm, nothing which may 'not be speedily remedied. We have the 'strongest assurance that the road will be 'put in a safe condition the present season. 'The ties are already upon the line of the 'road, and the Managing Director assures 'us that the iron is negotiated for, and will 'be laid immediately.'

"I may add, as a matter of fact, that the trains on the Portland line, since the snow disappeared, have been, and are, running with perfect regularity; that freight trains are not continually off the track; and that the number of passengers and amount of freight that is now passing over the road is largely in excess of last year, and much greater than ever before since the line was opened.

"There is no doubt about the fact that there are strong and powerful interests in Boston and some parts of the New England States who dislike to see the yearly increasing business which passes over the Grand trunk Railway, and who try to check that traffic by making false statements as to the condition of the "English Railway," as they call it.

"The New Hampshire Commissioners told me, after they had thoroughly inspected the line, that they found it in far better condition than the stories they had heard had led them to expect, and that in many important particulars it was far superior to any line in the New England States.

"I take the opportunity to add what are simple matters of fact, that the Grand Trunk Railway is throughout, at this moment, in a better condition than it has been at this time of the year since 1860; that its trains are throughout running with great regularity; and that, notwithstanding the general dullness of trade in Canada, the receipts of the railway are increasing at the rate of $20,000 a week, which is the best evidence of its increasing usefulness to the country."

There is no doubt that the Grand Trunk had to contend with unusually great difficulties last winter, and that allowances must be made for other troubles, including the exaggerated reports which competition sets afloat respecting the state of the line. But the road is improving, traffic is extending, and the country's demands upon its carrying capacity are increasing every day. Even if such were not the case, we do not clearly see what is to be gained by persecuting the Managing Director. He went to England, gave an account of his stewardship, and was sustained. Instead of calling on him by circular to resign, or to do impossible things, it would be better for the dissatisfied to devote their attention, if there be mismanagement, to the proper object of attack—the Board of Directors. Mr. Brydges has his hands full on this side of the ocean.

Commercial.

Petrolia Oil Trade.

(From a Correspondent.)

PETROLIA, July 19, 1869.

There are at present in the oil district of Petrolia 50 wells in active operation, producing daily 600 brls. of crude oil; among the best of which are:

McDougal, 1 well yielding	75	brls.	per day.
St. Catharines, 2 do. each.....	40	"	"
Parsons & Ellwood, 2 do.....	50	"	"
Laney, 3 do.	40	"	"
Noble, 2 do.....	50	"	"
Marshall & Goodrich, 1 do.....	40	"	"

Besides these, we have the two new strikes, viz.: McGarry and Lancaster, neither of which have been fairly tested; the rest will yield from 5 to 10 brls. per day each. There is a great difficulty in managing these wells, so that some of them are kept idle for three days in the week. We have also here four large refineries whose aggregate capacity amounts to 1,500 brls. per week; all these are entirely devoted to the export trade. We have also to note the refineries of London.

Duffield & Bro.,....capacity,	1,000	brls.	per week.
Spencer & Keenlyside, " ...	600	"	"
Waterman & Bro.	600	"	"

Together with the great works of Eaglehart & Co. (of New York), who have nearly completed a large refinery, capacity not given. All these have turned their attention to the export trade, adopting different treatments, some using Allan's, some Benjamin's, and some Nicol's. The Hamilton firm have already exported between 5,000 and 6,000 brls. with success; excepting a little drawback in color, their oil will fairly compete with any American No. 1.

The crude oil market here is controlled by a combination got up amongst the largest producers, who hold crude oil at $1.62½ per barrel, for home consumption, and $1.25 for export trade; parties buying for export having to give bonds that the oil will be sent out of the country. In my next I will give you an account of all the new wells at present being drilled, and give you the statement of their production or failure, as the case may be. Refined oil can be bought here, at about 20c. per gallon for No. 1.

P.

Toronto Market.

PRODUCE.—The continued prospect of a bountiful harvest tends to bear down the market for breadstuffs. During the past week the gain in prices noted the previous week has been to some extent lost; the general disinclination to operate in wheat and flour even at a concession on quoted rates shows that there is no confidence felt in the maintenance of prices. Still the ruling rates are very low rendering it probable that the influence of a large yield of breadstuffs upon the condition of the markets has already been discounted. With flour under $4 a barrel, farmers would find it more profitable to cultivate other products to the comparative neglect of wheat. *Wheat*—Receipts 7,220 bush. and 5,340 bush. last week. The market has ruled dull and weak the tendency of prices being downward; very little business doing. *Oats*—Supply light and demand active; as high as 57c. has been paid for western, and eastern sold at 53c. for car loads. *Peas*—Nothing whatever doing in lots; 70c. is paid on the street. *Corn* is nominal at 65c., being a little firmer.

FLOUR.—Receipts 1,760 brls. and 1,425 brls. last week; the market is dull and unsettled with few sales at reduced prices. There were some sales of No. 1 super. at $4.45 to $4.50; Fancy sold at $4.65 and extra at the same price. *Meal*—Oatmeal continues steady at $5.75 to $6 for small lots of choice; cornmeal is firm at $3.75 to $4.

PROVISIONS.—*Butter* has been offered more freely and has met with a fair demand for the Montreal market at quotations. *Eggs*—The market is steady and the supply small. *Cheese* is weaker owing to advices of lower markets in England. *Pork*—nominal as quoted.

GROCERIES.—*Sugars* are firm and about ¼c. higher on the week.

LIQUORS.—In consequence of the advance in corn spirits are somewhat dearer.

FREIGHTS—The Grand Trunk rates to Liverpool are:—Flour 4s. stg. per bbl.; wheat 8s. 6d. stg., per quarter; and boxed meats 55s. per ton.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Belleville to Lynn, inclusive 25c; grain, per 100 lbs., 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c, gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Halifax Market.

BREADSTUFFS.—July 13.—Our markets for Flours, up to Friday of last week, continued inactive, with a downward tendency, and disposition on the part of holders to effect sales. Some lots of Supers changed hands at $5.60. The more favorable reports from the west have given tone to the markets, and have advanced the views of holders. Supers are now held at $6.00 without buyers. Our stocks of Canadian are very light. Extras are in limited demand at quotations; Fancy inactive and nominal; No. 2 dull and unchanged.

We quote White Wheat Extra (Fall), $6.25; Fancy, $6.25; Superfine, $6.00; No. 2, $5,00; Cornmeal, (K.D.), $3.75; F. G., $3.00; Oatmeal, (N.S.) $5.50 to $6.00; Canada, $6.00 (dull).

Imports from January 1st to July 13th, 1868 and 1869—

	Bbls. Flour.	Bbls. Cornmeal.
1869.....	80391	19145
1868.....	92979	30964

West India Produce.—Sugars and Molasses continue inactive at nominal rates. Several lots of the former offered at auction were withdrawn, buyers and sellers being too far apart in their views. The disposition of the holders of Sugar is to realize, and favors buyers. Molasses has not been pressed on the market recently, as no outlet is presented at present, and transactions are limited. Rum is in fair demand—prices unchanged.

Fish and Oil.—Codfish continue in active demand for local wants, with light stocks. Pickled Fish are in request for shipment at full rates. The demand for Cod Oil continues active, and stocks are still light. Seal Oils are coming forward, and are offering at quotations without transactions. Petroleum dull and nominal, with large stocks.

Exchange.—Bank Drafts, London, at 60 days, at 13 per cent. Montreal sight, 4 per cent. St. John, N.B., 3 per cent. prem.—*R. C. Hamilton & Co.'s Circular.*

Demerara Sugar Market.

The following is from Sandbach, Parker & Co's. Circular, dated, Georgetown, Demerara, 23rd June, 1869.

Sugar.—We have no change to note in prices; since our last there has been a steady demand for America, and all good samples have been at once taken up; what little Sugar is coming forward is as a rule inferior, owing to the unfavorable weather we have had the past six months, which by stunting the growth of the Cane has injured the juice. Sales have been made at $7.25 for choice marks V.P., 18 D.S., and $4.75 for Muscovado, 12 D.S., no quantity of either, however, to be had.

Molasses.—There has not been a single good sample on offer during the fortnight; such as has been sold commanded 27 to 30 cents for Vacuum Pan, and 24 to 26 cents for Muscovado; but really good would command three to four cents more.

Rum.—No transactions in the Market to report.

Pennsylvania Oil Regions.

The following is from the monthly report of the Titusville *Herald*, for the month of June:—

The Production.—The production during the month under review, as ascertained from the shipments from the region, and the stocks on the first days of June and July, decreased about 100 barrels a day. This decrease was caused by the natural falling off in the product of the old wells having been greater than the enlargement occasioned by the striking of new and resuscitating of old wells.

The following table shows the production during June, the average per day, the production previously reported in 1869, and the average per day since January 1st; the product from January 1st to July 1st last year, and the average per day for the same time.

	BBLS.
Total shipment of Crude for June of bbls. of 45 gals. each	342,256
Add to reduce to bbls of 43 galls each.	15,918
Total shipment of bbls of 43 galls each	358,174
Stockton hand June 1st.....365,484	
Stock on hand July 1st.....309,246	
Deduct decrease on July 1st	56,238
Total production during June	301,936
Average per day for 30 days.....10,064	
Production previously reported	1,538,723
Total production since January 1st	1,840,659
Average per day for 182 days.....10,174	
Total production same time last year	1,689,565
Average per day same time last year, (181 days)	9,233
Average per day during June last year,	10,102

In most of the districts the production increased slightly, but the enlargement was more than counterbalanced by a falling off in other districts.

Stocks.—The annexed table shows the amount in iron tankage and the total stock at the dates named:—

	Amount in iron tanking	Total stock.
November 7, 1867, brls.	459,000	655,000
January " 1868, "	466,500	534,600
April " 1868, "	486,600	559,100
July 1, 1868, "	231,059	278,450
October " 1868, "	175,608	263,808
January " 1869, "	172,505	264,805
February " 1869, "	195,967	274,167
March " 1869, "	193,730	282,450
April " 1869, "	231,675	329,324
May " 1869, "	275,395	365,970
June " 1869, "	265,406	365,484
July " 1869, "	230,056	309,246

It will be seen by the above, that the stock on July this year was 31,000 barrels in excess of that on the same date last year.

The Shipments.—The shipments were larger during June than on any previous month this year. The daily average of crude, equivalent of 43 gallons per brl., was nearly 12,000 brls. against an average for the previous month of 10,000. The shipment of refined increased about 4,000 brls.

The following were the shipments from January 1st to July 1st, 1869, and the crude equivalent:—

	Brls.
To New York	494,705
Cleveland	489,771
Boston	60,932
Philadelphia	87,970
Pittsburgh	404,667
Portland	16,844
Other points	113,208
Total	1,668,097
Difference between Crude and the Reshipped	45,705
Shipment of Crude equivalent	1,713,802

British America Assurance Company.

Notice is hereby given that the Annual Court of proprietors of this Institution, at which the election of Directors for the ensuing year takes place, will be held in conformity with the Charter, at the House of Business of the Company, Church Street, city of Toronto, on MONDAY, the 2nd day of AUGUST, next.

The chair will be taken at twelve o'clock noon.

By order of the Board.

T. W. BIRCHALL,

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES."

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

For North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expense, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example:—

Articles.	Prices per ton.	Cash discount.
Canada Plates		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
Galvanized Iron—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the current number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust for the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order aud in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can he produced for $1.45 a ton, and with the improved imachinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, t was decided to offer one thousand shares of Stock iu Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, aud further information may be obtained by addressing

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (35-1y) DAVID HIGGINS, SECRETARY.

ZEPHANIAH PRESTON, VICE PRESIDENT.
LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $6,000,000.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
$140,000 deposited in Canada for the benefit of Policyholders.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

OFFICE - - - - - - No. 90 King Street East, Toronto.

HALDAN & O'LOANE,
12-1y Assistant Managers for Ontario.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Insurance.

Briton Medical and General Life Association,

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family,* and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

QUEBEC BANK.

The following is the report of the directors to the shareholders at their fifty-first annual general meeting, held June 7th, 1869:

The directors have to report that the net profits for the year ending 1st of June last, after paying current expenses, amount to.....		$149,626 36
From which have been paid —Dividend, 1st December, 1868.....	$51,742 25	
Dividend 1st June, 1869..	51,752 90	
		103,495 15
Leaving.....		$46,131 21

to be added to the account of profit and loss, which amounts to $120,665 95, and that sum the directors consider more than sufficient to cover any losses that may arise from debts overdue. In conformity with the wishes of the shareholders, the directors have made application to the Legislature of the Dominion for a renewal of the Charter of the bank for a period of twenty-five years, from the termination of the existing charter. The branches of the bank have been duly inspected, and the directors have to report favourably of their progress. The directors deeply regret the loss they have recently sustained by the death of their much esteemed colleague, David D. Young, late President of the bank, and they cannot make this announcement without recording their sense of the valuable services he rendered in promoting the interests of the bank.

JAMES G. ROSS, Vice-President.

Proceedings of the Fifty-first Annual General Meeting of the Shareholders.

C. Delagrave, Esq., in the chair. After the report had been read, the following resolutions were put and carried unanimously.

Moved by the Rev. W. B. Clark, seconded by George Hall, Esq., that a committee be appointed to draw up a minute expressive of the high opinion of the stockholders regarding the worth of the deceased President of this bank, David Douglas Young, Esq., and the obligations under which they are for the able, disinterested and successful manner in which he discharged the duties of his office, and that such committee be composed of Messrs. W. H. Jeffery, W. White, and the mover and seconder.

Moved by John Laird, Esq., seconded by Vital Tetu, Esq., that the thanks of the meeting be given to the Vice-President and directors for their services during the year.

Moved by S. J. Shaw, Esq., seconded by Geo. Hall, Esq., that the thanks of the meeting be given to the cashier, the managers, agents, and other officers of the bank, for the efficient performance of their respective duties.

Moved by J. W. Henry, Esq., seconded by T. H. Grant, Esq., that the ballot-box be now opened and remain open till two o'clock this day, for the receipt of ballot tickets for the election of directors, and that Messrs. George Hall and William Petry do act as scrutineers.

The committee appointed to give expression to the feeling of the shareholders on the occasion of the death of D. D. Young, Esq., late President of the bank, submitted as follows:—

The Shareholders cannot allow this meeting to separate without expressing their high sense of the character and worth of the deceased President of this Bank, the late David Douglas Young, Esquire, and whilst they would express their heartfelt sympathy with Mrs. Young and her family on the occasion of the irreparable loss which they have sustained in his death, they would record also the sense of the obligations under which they are to the departed for the disinterested zeal and unwearied attention which he manifested in the discharge of his duties as a Director and afterwards as President of the Bank.

It was then moved by His Worship the Mayor, seconded by H. S. Scott, Esq.:—That a copy of this expression of condolence and regard be transmitted to Mrs. Young.

The scrutineers having made their report, the following gentlemen were declared duly elected Directors for the ensuing year, viz:—His Excellency Sir N. F. Belleau, J. G. Ross, Esq., Wm. Withall, Esq., Henry Fry, Esq., J. H. Dunn, Esq., R. H. Smith, Esq., A. F. A. Knight, Esq.,

At a subsequent meeting of Directors, James G. Ross, Esq., was elected President, and William Withall, Esq., Vice-President.

GUELPH BUILDING AND SAVINGS SOCIETY.—The annual meeting of the Guelph Building and Savings Society was held on Monday, July 19th George Elliott, Esq., president, in the chair. The annual report stated that the funds of the Society were in such a condition as to require no more calls upon the members, there being a surplus of about $1,000 on hand. The total assets are $37,002.60; and the liabilities $35,800. The direc-

tors were authorized to sell all matured securities, with a view to a final closing of the Society's business at an early date. A sum of $200 was voted to the President, and $200 to the Secretary, as a token of the Society's appreciation of their services. The directors appointed were Messrs. Grange, Elliott, Higinbotham, Hazelton, Loghrin, Sandilands, Hadden, Fergusson, Logan and Dow. At a subsequent meeting, Geo. Elliott, Esq., was re-elected president, and E. Newton, Esq., Secretary Treasurer.—*Advertiser.*

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

Business has been quiet for the past week, and not much improvement can be expected for the next month; prices, however continue firm.

Bank Stock.—Montreal advanced in the beginning of the week to 162½, but subsequently declined, the last sales being at 160½. British is asked for at 104½. Sales of Ontario were made during the week at 95½, 96, and 96½, closing in fair demand at 96. Small sales of Toronto are reported at 121; holders generally ask 124. No transactions in Royal Canadian during the week; buyers offer a small advance on 50, but there are no sellers. Commerce has further advanced; sales have been made at 102½, 103, 103¾; buyers generally, however, do not offer more than 103. The shares of the Gore have been reduced from $40 to $24; stock may now be quoted as worth 62½ to 65 on the reduced share. Merchants' declined early in the week from 106½ to 104; it has since revived, and there are no sellers under 106. Small sales of Quebec at 100½, which rate would still be paid. The last sales of Molsons' were at 109½. Buyers offer 99½ for City, with sellers at par. There are buyers of Du Peuple at 109, and no sellers. Nationale nominal at 107. There are inquiries for Jacques Cartier at 108. Nothing doing in Mechanics'. There are buyers of Union at 105, with sellers at 105½.

Debentures.—Canada 5's and 6's, both Sterling and Currency, are asked for, but there are none on market; Dominion Stock offers at 107½. Toronto are offering to pay 7⅛ per cent. interest. County are in fair demand at about 99.

Sundries.—City Gas is much asked for at 107 and 107½; no sales for some time past. There are no sales of British America Assurance to report since our last. Small sales of Canada Permanent Building Society were made at 122½ and 123, and a slight advance might be paid for a round lot. Western Canada Building Society is in great request at 118 to 118½, but there is no stock offering. Freehold Building Society still continues in demand; there are no shares in market. Montreal Telegraph sold at 132, which would still be paid. Small sales of Canada Landed Credit at 80, at which rate there are sellers. Good mortgages are readily taken at from 8 to 9 per cent.

BANKING AND CURRENCY.

To the Editor of the Halifax Chronicle:

SIR,—When I formerly addressed you on the important subject of Banking and Currency, nothing was positively known as to the intentions of the Government. Much was surmised, but it was quite uncertain how far they would attempt to interfere with the existing bank note circulation. This state of uncertainty was removed when the resolutions of Mr. Rose were submitted to Parliament. Therein the policy of the Government was fully declared, and it was of a character so opposed to the best interests of the country that even stannch supporters of the Government felt compelled to oppose it. After the debate in which this opposition was so thoroughly and ably manifested, the resolutions were allowed to lie over; and it was only toward the close of the session, and after considerable discussion and difference of opinion in the Cabinet, that they were finally withdrawn. While thus reluctantly withdrawing his resolutions, Mr. Rose gave it to be understood that they were not abandoned, but only postponed; and he expressed the hope that they would yet receive the assent of the country. There can be very little doubt but that they will be brought forward next session, and that every influence will be used to secure their passage into law.

As is well known, the representatives of the banking interests gave to the resolutions of Mr. Rose their decided opposition. An attempt was made to shake their influence by endeavoring to create the impression that this was the result of entirely selfish motives, and that they were looking after their own interests alone, while indifferent to those of the public. On the other hand, Mr. Rose repeatedly assured Parliament, in the course of his speech, that the measure of the Government "was framed solely with a regard to the great interests of the country," and that they had no ulterior object in view. Mr. Tilley endeavored to prove that the public, as evidenced by the petitions presented, were, to a considerable extent, indifferent. Another member of the Government told me that whenever he saw so many bankers in opposition to the scheme, he was sure it was a good one for the country. Now I have no hesitation in asserting that it was because they thought the policy of the Government would be most injurious to our mercantile and industrial interests that the bankers were so unanimously opposed to it. True, there was a well grounded dislike to being compelled to invest a large portion of their capital in government securities of variable value, and which would not be available when required for the redemption of the notes. They also knew that whatever legislation might injuriously affect the mercantile community must react upon the banks. To this extent the bankers were selfish in their opposition. But it did not arise from any fear as regards their profits, as might be supposed, as these would be nearly, if not quite, as much under the Government scheme as they were at present, while some thought that if they had merely consulted their own interests they would have welcomed the proposed change.

The question in reality is one which mainly affects the merchant, the trader, the mechanic, the manufacturer, the lumberman, and the farmer, as it would be impossible for the banks under the proposed system to grant them anything like the same accommodation as they at present receive. The object of this letter is to draw attention again to the subject, and to show what the result would have been in Nova Scotia had the resolutions of Mr. Rose passed, and what there is in store for us should the Government hereafter succeed in forcing their policy through Parliament.

The plan of the Government, as explained by Mr. Rose, and embodied in his resolutions, was to compel the banks to purchase government bonds to an amount equal to their circulation, and to maintain besides a reserve of gold equal to twenty per cent of their circulation. The meaning of this is, that for every one hundred dollars of notes afloat the banks must originally possess one hundred and twenty dollars in gold, of which one hundred dollars were to be loaned to the Government, and twenty dollars held in their safe to meet any demand for specie payment. It will be seen at once that this was in reality, whatever it may have been in intention, a grand scheme for obtaining possession of a large amount of gold by a forced loan from the banks. The latter were also required to hold in gold, or legal tender notes, a further reserve equal to one-seventh of their call deposits. This was the entire reserve which Mr. Rose supposed to be necessary for safe banking; an opinion opposed to the views of most practical bankers. To show that this scheme would not be very detrimental to the commercial interests of the country, it was necessary for him to put the reserve at the very lowest point, which he accordingly did. And even with this very small reserve, he was obliged to confess that his scheme would withdraw at least $5,700,000 from the available banking funds of the Dominion.

The following calculation will show the effect on the banking funds of Nova Scotia. I have taken the figures as given in the returns of the chartered banks on the 31st July last, which is the latest date to which I have access, and have added one-fourth for the two private banks and the Bank of British North America. At that date the total circulation was $1,028,000, which according to the Government proposal, was to be withdrawn, and other notes, based on government securities, substituted. The banks were required to hand over to the Government $1,028,000 in gold for their bonds. They were also to keep a reserve of 20 per cent. in gold, and a further reserve of one-seventh of their call deposits. The total amount of specie thus required would have been $1,358 000, to meet which the banks held $703,000 in gold and government bonds, the difference, amounting to $655,000, they could only obtain by permanently reducing their discounts to this extent. This, be it remembered, is according to Mr. Rose's own method of calculation and yet it is equivalent to wiping out the capital of the Union Bank and half that of the People's Bank. But the calculations of Mr. Rose are defective in two particulars. He has not made provision for any reserve for deposits on interest, nor has he made any for the reserve of notes which banks must always hold in their tills, or which may be passing between the head offices and branches, and which are not in circulation. He has taken the amount of notes in the hands of the public alone as it stood on a particular day or on the average; but there may be, and are many days when it is considerably higher than on the day on which the returns are made up. A much larger amount than is made to appear in his calculations must be invested in government securities, and thus withdrawn from available banking funds. Adding to the $655,000 required to be withdrawn from discounts, according to Mr. Rose's mode of calculation, one-seventh say of the deposits on interest, or $225,000, and the very moderate allowance of one-seventh of the actual circulation for a reserve in the till, or $147,000, and we have, at the very lowest estimate consistent with necessity and prudence, $1,022,000 permanently withdrawn from the loanable banking funds in Nova Scotia, or more than the united capital of the Bank of Nova Scotia and the Union Bank. The following recapitulation will probably show the result more clearly:

Total circulation to be covered by Government bonds		$1,028,00
Reserve of 20 p. c. to be maintained in gold		205,00
Reserve of 1-7th of $877,000 call deposits		125,00
Total amount of gold required for circulation and deposits		$1,358,00
To meet this amount the banks held in specie	$620,000	
in government debentures	83,000	
		703,00
Making a deficiency to be taken out of discounts of		$665,00
To which add—		
Reserve in specie of 1-7th of $1,545,000 deposits on interest		220,00
Reserve of notes in till, viz., 1-7th of $1,028,000 actual circulation		147,00
Shewing the total amount to be withdrawn from discounts to be		$1,022,00

No scheme more injurious to the material interests of this Province could well be conceived than this with which we are still threatened. To conciliate the banks, if possible, and to prevent the damaging effects from being immediately felt, it was proposed to spread the operation over a perio-

of five years. Although this would lessen the evil for a time, it would go on growing year by year, until at the end of the five years the full blighting influence would be experienced. And if trade were to revive and increase in the meantime, there would be a contraction of means continually going on side by side with a growing demand, which would necessarily cause embarrassment, tighten the money market, and raise the rate of discount.

The main object professedly of the resolutions was to ensure the ultimate payment of bank notes after the suspension of a bank, and to make assurance doubly sure, Mr. Rose, in addition to compelling the banks to invest in government bonds, proposed to make the notes a first lien on the assets of the bank, which of itself is a full and sufficient protection to the note holder. But, as if this were not enough, he also proposed to render immediately available the clause in the charters by which the stockholders are liable for double the amount of their stock. For some reasons or other, by the way, which might be guessed at, the bank of British North America was to have been exempted from the double liability. By this means holders of notes of the Bank of British North America would have not felt so secure as holders of other notes. Still if it was considered desirable in the public interests to make the shareholders in the local banks liable for double the amount of their stock, there could be no valid reason why those of this foreign institution should not be equally liable. And if it were not considered necessary in the case of the latter, neither should it have been in regard to the local banks. However, these two provisions—the making the notes a first lien on the assets of the bank, and renderiag the double liability of shareholders immediately available after suspension—give undoubted and ample security without in any way curtailing the power of the banks to assist trade and commerce. And if Mr. Rose had merely looked at the interests of the public, he would have stopped there. But he went very much further, and, in order to assure a certainty, proposed a plan by which the reserves of the banks would have been reduced far below what the bankers of the Dominion now consider necessary for their own stability and the safety of the noteholder,- a plan which would not only have deranged our present monetary system and largely curtailed banking accommodation, but would have absorbed those resources which, if held by the banks themselves in times of difficulty, would enable them to meet their liabilities, and prevent suspension from taking place.

PETER JACK.

—The Bank of Montreal has opened an ageucy at Newcastle, N. B., for the convenience of the Government. The priucipal business transacted at this branch will be in connection with the Intercolonial Railway. Of course, the bank will transact any other business that may present itself. It will be under the supervision of Mr. Winslow.

—Mr. S. J. Scovil, the St. John banker, who made such a sensation some time ago in that city, and was held in custody in twelve cases, has been trying to obtain his release. The applications for a discharge uuder the insolvent act were granted in eleveu of the cases; in one it was refused, so that he remains in jail.

—The liquidation of Overend, Gurney & Co., proceeds most satisfactorily. The liabilities at the time of suspension were about £18,000,000, the whole of which, with the exception of one shilling in the pound has been paid to the creditors. The final payment has been deferred by arrangement till June of next year, when the whole will be liquidated with interest due at and since the stoppage.

STOCK SALE.—At W. M. Gray's stock sale in Halifax July 17, by J. D. Nash, the following prices were realized: £100 stg. Provincial Debentures 5¼ per cent prem.; shares in Halifax Library, $9 50 @ $10; Nova Scotia Electric Telegraph Company, $14; Strawberry Hill Gold Mining Company, 50c. and 51c.; Bank of British North America, £65 5s.; Acadia Fire Insurance Company, $22.50.; Halifax Fire Insurance Company £10 5s.

STATEMENT of the Dominion Notes in circulation, 7th July, and of the Specie held against them at Montreal, Toronto and Halifax:

Dominion notes in circulation—	
Payable at Montreal..... ..	$3,202,727
Payable at Toronto*.....	1,205,273
Payable at Halifax†.....	384,000
	$4,792,000
Specie held—	
At Montreal.....	$600,000
At Toronto.....	500,000
At Halifax.....	75,000
	$1,175,000
Debentures held by the Receiver Gen'l under the Dominion Note Act.....	$3,000,000

* Including $197,000 marked St. John.

† The Nova Scotia dollar not being equal in value to that of the other Provinces, the notes issued at Halifax are worth their face value in Nova Scotia only. They are stamped "Payable at Halifax" and are numbered in black ink. None but $5 notes are yet in circulation.

BANK OF ENGLAND.—The return for the week ending the 7th of July, gives the following results when compared with the previous week:

Rest.....	£3,351,510.	Increase. ...£173,805
Public deposits.	4,455,863...	Decrease...4,306,513
Other deposits	21,091,460...	Increase...1,941,734

On the other side of the account:

Gov't securities	£15,702,999...	Increase£1,548,626
Other securities	17,409,587...	Decrease 3,142,622
Notes unemploy'd.	9,748,680...	Decrease 482,190

The amount of notes in circulation is £23,996,330, being an increase of £603,225; and the stock of Bullion in both departments is £19,810,598 showing an increase of £29,822, when compared with the proceeding return.

Insurance.

FIRE RECORD.—A St. John correspondent sends us the following:—Prince William, York County, N. B., July 13.—The Rectory occupied by Rev. E. N. Harrington, was totally destroyed by fire, at 12 o'clock noon. Supposed to have originated by a spark from the cooking stove. Most of the furniture was saved. Building insured in the "Central," for $400; the furniture in the "Queen," for $400.

Kars, King's County, N. B., July 19.—James Dunlop's dwelling house was destroyed by fire; said to be partially insured.

Ashfield, Ont., July 7.—The house of James Mullen, with contents. The barn and stables, which were near the house, were also consumed, together with plows, harness, buggy, &c., &c. Total loss about $2,600; insured in the Agricultural Mutual for $1,300.

Brantford, July 21.—Oxley & Co.'s store, Market street, was damaged to to some extent; covered by insurance.

North Williamsburg, July 9.—The barn and sheds of D. McArthur were struck by lightning, and before the contents could be removed they, together with the buildings, were consumed. The loss amounts to some $750, made up of sheep, hogs, implements, &c., together with the buildings. Insured in the Beaver Mutual of Toronto for $5,000.

West Garafraxa Township, July 10.—Barn of Robert Kerr, 2nd con., was struck by lightning during the tornado on the 10th, and partly burned; the heavy rain saved it from utter destruction.

Cæsarea, Ont., July 19.—An exchange says: the steam sawmill of Mr. Martin, was destroyed by fire together with four hundred thousand feet of lumber. The mill was new. The origin of the fire is unknown, as everything was secure when left on Friday night. There is an insurance of $7,000 on mill and lumber. Loss, about $2,000 more.

Quebec, July 20.—A fire broke out in a one-storey wooden house in St. Croix Street, St. Lewis Suburbs, owned by J. Flanagan, and occupied by several families, the lower part by the proprietor as a grocery and tavern. Insurance in the Western of Canada for $600 on building; no insurance on stock or furniture.

A telegram says: a large part of the town of Canning, King's county, N. S., was destroyed by fire. The entire town was burned three years ago.

Victoria Barracks, Charlottetown, P.E.I., were destroyed by fire, which was the work of an incendiary; the building was fully insured.

—The Canadian barque E. W. Head, went down at Windsor laden with lumber, and to all appearance is in a disabled condition. Her topsail is badly split, while her square sail is by no means in a seaworthy condition.

—The barque John Breden, of Kingston, recently ashore near Port Washington, is found to be more damaged than it was at first supposed. Her bottom is "chawed" from stem to stern. She will require an entire new keel, and new bottom planking almost throughout. Her foremast is split, and foretopmast sprung, and her main gaff is broken. The work of repairing the hull and getting in the new spars will occupy two weeks time, and will cost in the neighbourhood of $5,000. The vessel is owned by the Folger Bros.

—Advices from Plymouth, 5th state that the ship Cavalier, Manson master, from Quebec for London (timber,) has put in there cut down several feet below the water's edge having been in collision the previous night, 15 miles S. W. of the Eddystone, with a brig-rigged steamer, bound up channel; the Cavalier filled immediately.

—Mr. F. W. Ballard, Secretary of the Security Insurance Company, New York, has proved a defaulter to the extent of $63,000. A few years ago the same company suffered severely from the defalcation of its president.

EDINBURGH LIFE.—At the annual meetiug o the Edinburgh Life Assurance Company at Edinburgh on Monday, 5th July, the report stated that during the year 750 new policies had been issued, assuring £353,219., and yielding in new premiums £10,841.

CHEAP INSURANCE.—The following is related as the experience of a farmer who insured in the Dumfries Mutual Insurance Company. If the insurance was insurance at all, it was very cheap: A person who had been insured for $2,000, and had given his note for $100, had to pay $5.75 during the last ten years, which is between ⅓ and ¼ per cent. on the sum insured for ten years. I am insured for $1,176—premium note $88.30. It has cost me nearly $3 for eight years, including policy and survey. My brother Robert insured in this Company on the 9th of April, 1864, for $1,700, and gave his premium note for $85. It has cost him $1 for policy, fifty cents for survey, and $1.91 for assessment during five years. Mr. Edgar is insured for $4,400; he told me it had not cost him $5 during ten years.

CHANCES OF DEATH BY DIFFERENT DISEASES.—Men pray to be preserved from murder and from sudden death; in other words, from what are called accideuts and wilful injuries. The London *Times* states that the chances are as one to twenty-nine that a man will depart this life from such causes. That he will die of zymotic disease is as one to six; that consumption will cause his death is as one to nine. Out of every 1,000 deaths in 1867, 195 were caused by zymotic disease, 192 by constitutional diseases, 402 by local diseases, 167 by developmental diseases, and 36 by accidental and other violence. 118,003 out of every million deaths were the result of consumption.

CANADA LIFE ASSURANCE COMPANY.

Statement by the Canada Life Assurance Company, in terms of sec. 14 of the Act 31 Vic., c. 48:

Assets of the company	$988,140 89
Liabilities of the company	138,226 07
Amount of capital stock	1,000,000 00
Amount paid thereon	125,000 00

Of what the Assets of the Company consist, viz.:

Cash on hand in banks, and receipts on collection in hands of agents since paid	$47,303 14	
Mortgages on real estate	293,264 95	
Real estate	116,192 19	
Municipal and other debentures, Dominion and other stock and accrued interest	439,020 22	
Loans on policies, debentures, stock and bonds	33,100 80	
Bills receivable	1.643 68	
Half yearly and quarterly premiums secured on policies payable within nine months	44,196 38	
Deferred half payments on half credit policies	30,512 89	
Office furniture	1,648 71	
Other assets	1,027 21	
	$1,007,910 22	
Deduct reserved on account of probable losses	19,718 53	
		988,140 89
Total premiums received during the year		164,910 32
Number of policies issued during the year, 831.		
Amount of policies issued during the year		1,156,855 00
Number of claims from death during the year, 35.		
Amount of claims from death during the year		61,300 00
Expenses of management, agencies, &c		34,657 76
Amount at risk on total policies issued in Canada		5,476,358 86

I, Alexander Gillespie Ramsay, of the City of Hamilton, Manager of the Canada Life Assurance Company, make oath and say:—

That the above statement is true and correct in every particular, to the best of my knowledge and belief.—So help me God.

Sworn before me, at Hamilton, this 22nd day of July, 1869.

Signed,) ROBERT RAY, J.P.

(Signed,)

A. G. RAMSAY, Manager.

THE CANADIAN MONETARY TIMES AND INSURANCE CHRONICLE *is printed every Thursday evening and distributed to Subscribers on the following morning.*

Publishing office, No. 60 Church-street, 3 doors north of Court-street.

Subscription price—

Canada $2.00 *per annum.*

THURSDAY, JULY 29, 1869.

CANADIAN CANALS.

VIII.

The mode in which the proposers of the Caughnawaga Canal submitted the project to public notice is deserving of respect, and the clearness with which their views are stated furnishes the material by which those views may be criticised. The scheme has not been taken up as a matter of private speculation, it has been advocated on public grounds alone, and the attention of the government was claimed for it on purely commercial considerations. Its promoters obtained a survey of the ground in 1854, and in order to avoid local influence it was considered advisable to call in an engineer from the United States; the ordinary duty of examination and surveying was properly enough done. In fact, it was hampered by no difficulty. The report by Mr. J. B. Jarvis on the canal as a question of commercial policy, is not so satisfactory. We must, for the moment, turn to the instructions given the latter by the Commissioner of Public Works. Although signed by Mr. Chabot, they were drawn up by the Hon. John Young, who in reality conducted the negotiations for the examination. A difference raised by Mr. Hincks having placed Mr. Young in the dilemma of accepting a commercial policy, which he had combatted for years, or of retiring from the ministry, he unhesitatingly accepted the latter course. Still the weight of his name turned the balance in favor of conducting the examination according to his views. In these instructions Mr. Young virtually shadowed forth the whole report of Mr. Jarvis, with the distinction, that Mr. Young states very clearly and in very few words, what Mr. J. B. Jarvis puts forth in an extended and confused form, combined with much irrelevant and obscure "padding." For this report Mr. J. B. Jarvis asked a fee of ten thousand dollars, and it was paid to him.

The day is not distant when the whole canal policy of Canada must be considered, consequently it cannot be too earnestly or too frequently inculcated, that no scheme of secondary importance should be allowed to interfere in any way with the project of developing the St. Lawrence to the maximum extent of navigation practicable. If the attention of the country be divided between local projects, and its strength frittered away on schemes, clashing with each other, because each is considered by the light of private enterprise only, we can hope for nothing more than zealous and violent partizanship, often, we fear, not too scrupulously exercised. Unfortunately, all this energy, so far from forming a healthy condition of public opinion acts in opposition to its establishment. No one can, for a moment doubt, that if Ontario with one voice, demanded a commission to examine the St. Lawrence, it would be granted. Accepting the view that the Executive was desirous of satisfying the demand, and of arriving at the right solution of the problem, the danger is that parliamentary combinations would engraft on the main inquiry many of the irrelevant side issues privately entertained. It is with the hope of keeping the St. Lawrence navigation a question unencumbered by such views that further attention is drawn to the Caughnawaga Canal. Although of a totally different character to the several proposed new connections between lakes Erie and Ontario and to the Ottawa navigation which, as a theory, is entirely to supersede the Saint Lawrence, it is advisable, clearly to establish that the Caughnawaga Canal is or is not quite distinct from the improvement of the St. Lawrence, and whether, if considered at all, it need be looked upon as a part of the scheme or as entirely subordinate to it. It is admitted that the canal would—

1. Extend very great facilities to the lumber trade.

2. That it is not impossible that western produce would seek its waters for the discharge of cargoes at Burlington on Lake Champlain.

The attempt has been made by the writer to argue these views with some closeness, and, it is hoped, that if error exist in the conclusions drawn, that, at least, it cannot be said that the premises have been strained or misrepresented. Two distinct issues remain to be considered and all argument with regard to it is then exhausted.

The anticipated result, that the canal would connect Lake Champlain with the sea

in other words, would make Burlington and Whitehall sea ports. It is proper to remark, that the interpretation of the letter of instructions may not go to this extent. They run "to open the districts upon that lake [Cham-"plain] to the sea *via* Quebec, and afford "them a shorter and cheaper route for im-"ports of coal, iron, salt fish, oil," &c. These articles can be generally purchased cheaply in Quebec, in consequence of a large amount of shipping entering in ballast, and accordingly they can be profitably purchased in that market. Fifteen years, however, have elapsed since this possibility was suggested, and if great advantages really presented themselves for this branch of trade, to follow the direction indicated, it may be said that even the narrow limit of the present Chambly Canal would have received some benefit from it. We find, however, by the returns published, [the latest for reference being up to the 30th June, 1867,] that of 364,609 tons of freight transported from the St. Lawrence to Lake Champlain, about 4,500 tons only did not consist of lumber in some form or other. It would seem, therefore, that a canal having in view breakage of bulk at Quebec or Montreal, for the supply of the Lake Champlain district, is not called for, because the want is supplied by the Railway connecting with Boston. On the other hand, were the Caughnawaga Canal adapted to sea-going propellers, the question is at once changed, and the argument based on the possible benefit to the western lake districts, applies with some modification to the State of Vermont and eastern New York. It is true that no return freight for Europe, or the Atlantic sea-board of the United States, is to be found in Lake Champlain itself. But the manufactures of Massachusetts and New Hampshire, delivered by railway on Lake Champlain, require transport to Chicago, and at that port the produce of the lakes has to be moved eastward, to the Atlantic sea-board or to some grain consuming country. This view of the theoretical utility such a ship canal would confer, may be said to command a certain recognition, but as to the extent of the trade, there must be difficulty in defining its limit. The remark, however, may be ventured, that its probable extent furnishes rather an incidental, than a main ground of argument of the necessity of the canal.

It now remains more succinctly to enter upon the view already expressed, that it is not possible to enlarge the Whitehall Canal to any extent. Until now the contrary fact has been assumed, and much time would have been saved if in answer to the desire of the Canadian Government, "to find a more desirable route for the great trade which passes between tide water in the Hudson River . . . . . and the Western States," the simple answer had been given, that it could not be found by Whitehall. Mr. J. B. Jarvis, on the contrary, never enters into the consideration, he assumes it to be perfectly feasible. Throughout the report, not in one or two, but in fifty places, he deals with the possibility as a mere matter of expense. One sentence is worthy of preservation. The italics are the writers. The passage appears under the head "Champlain Canal of New York enlarged to a Ship Canal," so there is no mistake on the subject.

"*No examination has been made to ascertain the cost of such work.* From what I have seen, and from information obtained from intelligent persons who have been well acquainted with it and the country through which it passes, *there is believed to be no serious and not much expensive work required for its enlargement*, and that six millions of dollars would be sufficient for its completion. To this should be added, for *improving the Hudson River for twenty miles below Troy*, probably from *one to two millions.*"

One fact is learned from this sentence, that the Hudson River, for the distance of twenty miles below Troy, is exceedingly shallow, and requires very great improvement to be fitted for a deep navigation. It is of no benefit to imitate Mr. J. B. Jarvis' random mode of writing, but it is very certain that a formidable expense in the Hudson River itself lies in the way of any improvement of the water navigation between that river and Lake Champlain. When we turn to this canal* itself, everything is suggestive that it can be but little improved. At present the depth throughout is but four feet; the locks are 110 feet long and 18 feet wide. Some few of them, however, require yet to be brought to these dimensions. It has three sources of supply. The first five miles from the junction with the Erie Canal at West Troy to a point one mile north of Waterford, are supplied from the Mohawk River at Cohoes; the second distance, 25 miles to the crossing of the Hudson River, 2¼ miles south of Fort Miller, obtains the supply from the Hudson at Saratoga dam; the remainder of the distance, 36 miles, is fed from Glen's Falls feeder and Wood Creek. From Fort Edward to Fort Ann, a reach of twelve miles, the summit of the canal proper is 81 feet above Lake Champlain. Fort Ann is twelve miles from Whitehall; Fort Edward forty-two miles from the junction with the Erie at West Troy. Accordingly the whole supply is practically from the Hudson at Glen's Falls, brought by a feeder descending, in seven miles, the height of 132 feet. It is perfectly true that a very large tract of country in eastern New York, extending over the counties of Essex, Hamilton, Warren, Saratoga, and Fulton, is drained by the Hudson. But the physical georgaphy of this district is suggestive of great variations in the flow of its rivers, and the map promises no mode by which an increased supply can be turned into the canal. As the strength of a whole chain is the power of resistance in its weakest part, so the capacity of a canal is to be determined at the most contracted point of its water supply. We have the Champlain Canal now with four feet of water. In 1860 the Legislature of the State of New York authorised that it should be deepened to five feet, but the work has not yet been carried out. What is essentially needed on the part of Canada is an examination, carefully and systematically made, as to the extent of improvement of which this canal is capable. Mr. J. B. Jarvis accepted the possibility that it could be deepened to 11 feet (pages 16, 40.) The inference to be gathered from the necessity of using three feeders in a navigation of sixty-six miles is, certainly, that the high level could not supply the water necessary for the present depth of four feet without this additional supply. Certainly it does not seem probable that it would be a wise policy for the navigation of the Hudson, in point of commerce the most considerable in the United States for its distance, to divert one-half of the supply from the most important of its head waters to Lake Champlain. Again, the physical aspect of the country is against the hope that the body of water could be increased. The evidence on which this opinion is grounded, it must be admitted, is sufficiently imperfect. Nevertheless, it throws the *onus probandi* on those who claim that the canal can be enlarged. It is they who must show that there is water sufficient for the purpose, for until that be done, the inference must remain that the present depth of four feet can be increased only in a very slight degree—a conclusion which at once puts all reasoning based on the enlargement to a ship canal out of court.

There is accordingly no ground for anticipating that the Caughnawaga Canal would have any bearing upon the commerce of Canada beyond exercising a moderate influence in the directions which we have pointed out. Accordingly it must be held to be a project in every way subordinate to the development of the Saint Lawrence navigation; however, it may be considered to be to some extent supplemental to it, it is not to be looked on as a positive requirement, for no special reason exists for its immediate construction. Still, it presents so many favorable aspects, that it may be said that financial circumstances permitting, there are strong reasons why the canal should be regarded as a work hereafter to be executed.

* It was the writer's intention personally to have examined the Hudson at Glen's Falls. It is a matter of regret that, from circumstances, he has been unable to do so.

THE INTERCOLONIAL RAILWAY LOAN.

When Mr. Holton and others in the Canadian House of Commons were led, by mere party spite, to make unpatriotic comments on what they were pleased to term the misapplication of trust funds by the Minister of Finance, we considered the explanation then afforded by the Government relative to the use made of the Intercolonial Railway loan so satisfactory as to call for no further remark. Although the strictures of the Opposition were calculated to do little except, perhaps, injure our credit, yet these were justifiable on constitutional grounds. We are, however, not disposed to extend the same leniency to those in the Imperial Parliament who undertook to lecture Canada on financial management. The speech of Mr. Monsell not only provoked an angry rejoinder from our Premier, but gave rise to a correspondence between the Dominion and Imperial Cabinets. Although the correspondence was not placed before the English House of Commons, a member of that body, Mr. Aytoun, thought fit again to bring the subject forward; and, forgetting that under the Act of 1867 Canada is not bound, in the slightest degree, to render an account of the way in which she manages her finances to Great Britain, moved a resolution—

"That this House is of opinion that the application of money raised under the Imperial guarantee, in pursuance of the Canada Railway Loan Act, 1867, to a redemption of a portion of the debt of the Canadian Dominion, is contrary to the intention of that Act; and that no further guarantee should be given by the Commissioners of Her Majesty's Treasury under the above Act, except in such form and manner as shall insure the direct application of the money so guaranteed to the construction of the Intercolonial Railway."

This resolution was intended to be a vote of censure on the Government of Canada. Mr. Hunt, in reply to Mr. Aytoun, put the matter in a clear light. He said:

"The Act imposed no duty on the Imperial Government to see to the *ad interim* investment of the money, and he maintained that it was no part of the Imperial Government's business to impose on the Canadian Dominion any conditions on that point beyond those contained in the Act. Supposing they were satisfied that all the prescribed conditions were fully complied with, it appeared to him that it was the duty of the Imperial Government to give an absolute guarantee. That was the view taken at the Treasury at the time, and he had no reason so suppose that it was not a sound one. What appeared to be the intention of the Act was, that there should be a separate account kept, and that all the money invested should be invested for the purposes of a railway; and if these investments were made in good securities until the money was wanted for the railway, and a proper account were kept, it seemed to him that the Act would be satisfied."

Mr. Baring showed that when the loan for the making of the railway was proposed to be guaranteed by the Imperial Government, the idea was "scouted" that the Imperial Government should exercise any interference in the disposal of the money. He thought Mr. Rose had acted very judiciously in the way in which he had employed the money, and the whole amount had been placed in securities on which he could borrow again or sell, if desirable. If the guarantee had been accompanied by such restrictions as the mover of the resolution thought desirable, either the guarantee would have been declined, or, if accepted on those terms, it would have been made more onerous for Canada to carry the arrangements into effect, and more difficult to fulfil the objects of the Act. In consequence of the operations of Mr. Rose, the charge incurred in consequence of the loan would be much lightened, and the general result of the transactions was extremely successful. Mr. Gladstone said—

"He was extremely desirous of saying that as far as Canada was concerned, there was no imputation against her whatever in regard to the pecuniary operations. Indeed, he should no more think of casting doubt upon the good faith of the Government or Ministers of Canada than he should of casting doubt on the good faith of the Government or Ministers of this country. In that place both Governments ought to be recognized as standing on one and the same footing, and topics of such a nature ought to be excluded from discussions like the present. It was perfectly true, however, that there was such a thing as punctuality in complying with the provisions of an Act, and any neglect in such compliance might deserve the censure of the House."

The Imperial Government was made aware, as a matter of courtesy, of Mr. Rose's intentions, and had laid before it in May a statement showing the absolute safety of the loan, and that the whole guarantee fund could be repaid without the slightest inconvenience. Canada had $2,750,000 in the hands of their bankers, a further deposit of $1,500,000 at 4 per cent., $2,900,000 in the hands of Baring & Glynn; India bonds lodged with Barings worth $750,000, Great Western Preferential securities, $2,700,000; deposits by insurance companies, $1,500,000; receipts for post-office savings banks, $600,000; bonds purchased in anticipation of the requirement of the Intercolonial sinking fund, $270,000. And over and above the foregoing means, special credits for the express purposes of meeting any possible call on Intercolonial account, rest with Messrs. Baring & Glynn, $1,250,000; the Bank of Montreal, $2,500,000. The entire guarantee fund only amounted to $10,431,983.18, from which must be deducted $388,739.68 expended on works and negotiating loan; so that to cover the balance of $10,000,000, the Dominion had assets readily convertible, or cash credits to the extent of $16,670,000.

PROVINCIAL INSURANCE COMPANY.

The annual meeting of this Company will be held shortly and every preparation is being made for a thorough overhauling of its affairs. There is great dissatisfaction with the management—no one who has read our remarks upon it will be surprised at that—and, so far as we can learn, there is a determination, in more than one quarter, to have a change or precipitate liquidation. When we think of the chances that the Provincial had, of the influence of its proprietary, of the large sections of country controlled by that influence, of the outrageous mistakes made from the outset of its career, of the absurd management which has characterized it up to the present moment, we can but attribute its misfortunes to an imbecility of the intensest character, an imbecility so astonishing as to be unique. In 1859, the Provincial had a subscribed capital of $1,986,080, in 1868 that amount had dwindled down to $470,760. We understand that its business has fallen off to a serious extent. No wonder. When we first appealed to the management to set their house in order, our advice was treated with affected contempt. Had a proper effort then been made, we should have a better state of affairs to-day. Although disposed to deal leniently with a local institution our motives were aspersed and when we were forced by the appearance of statements manifestly intended to hoodwink the public, to prick the bubble, we were answered by threats of prosecution for libel. Notwithstanding, we are not inclined to gloat over a falling antagonist. The consciousness of having performed a disagreeable duty will compensate for temporary misconstruction of motive, and if the shareholders will only take the trouble to attend the meeting about to be held and insist on a thorough investigation of the Company's affairs, we shall feel that we have not written in vain. The day of artificial figures and dissolving-view statements has gone by, and the public have been deceived too often of late to patronize an insurance company in which they cannot have confidence, no matter how respectable its directors may be. If the company has life in it, stir it up; if not close up at once. The half-dead and-alive system of doing things has brought a great deal of contempt on some Toronto undertakings.

The annual meeting of the Gore Bank will be held next week. It is said that the question of immediate liquidation will be brought up for discussion and settlement.

THE CANADA LIFE.

We give in another column the statement furnished by this Company to the Government in terms of 31 Vic., cap. 48, sec. 14. As we shall have occasion next week to examine the annual report and chronicle the proceedings of the annual meeting, we reserve further comment until then. We understand the report will shew that this Company has done the largest Life business in Canada; that the interest upon its investments has largely exceeded the year's claims by death; that the expenses of management have been decreased, and that a dividend of five per cent. may be declared. The results of the year's business indicate great activity on the part of the Company's officers and agents, and testify to the excellence of Mr. Ramsay's management.

THE ETNA OF DUBLIN.

A correspondent asks for information respecting the affairs of the Etna. All the information procurable has been published in our columns. So far as we know the United Ports has paid no losses in Canada. The most tangible security claimants have is the Etna's deposit with government, but when that will be distributed is a moot point. If any of our English cotemporaries can throw some light on this very dismal subject, claimants in Canada would be very much obliged by their doing so. We can only advise patience, and more carefulness when about to insure.

It is not improbable that the Royal Canadian Bank will resume business in about a fortnight.

Narrow Gauge Railways.—The Directors of the Toronto and Nipissing Railway have elected Mr. Robt. W. Elliot, one of our soundest merchants, to the office of President, and Mr. J. E. Smith, Collector of Customs, to the office of Vice-President of the Company. The daily papers have published a correspondence between Mr. Geo. Laidlaw and Mr. C. J. Brydges, Managing Director of the Grand Trunk. In response to the invitation, by Mr. Laidlaw, to subscribe stock in the narrow gauge roads, Mr. Brydges, while objecting strongly to the gauge, has taken $2,500 each in the stock of the Railways.

Operating in Wall Street.—The occasional stringency of Wall Street affords such tempting opportunities for the profitable use of money, that numbers of the country National Banks are represented there, and find that they can reap larger profits than by staying at home, and discounting notes for their customers. In a New York paper, referring to the condition of the money market some time ago, the following appears:—At a quarter to three the scarcity of money became suddenly quite noticeable, and the interest rate advanced through the intermediate fractions of 1-32, 1-16, $\frac{1}{8}$, $\frac{1}{4}$, and $\frac{3}{8}$ until $\frac{1}{2}$ per cent. was paid, in order to get money with which to make accounts good at bank. This is the rate of 182½ per cent. per annum. It is the inducement of such rates as these that keeps so much money of the Bank of Montreal employed in Wall Street, Mr. King falling a victim to the same temptation that influences the managers of many of the United States country banks. The shareholders, no doubt, appreciate this sort of financing more highly than the customers of the banks. The recent usury prosecutions may somewhat restrict this class of operations, though the probabilities are that means will be found, as always hitherto, of evading the penalties of usury.

The English Government and the Telegraph.—By the 1st of January next the telegraph wires of the United Kingdom will, it is expected, pass into the hands of the government. The necessary issue of securities to raise funds will be authorised by a bill now before Parliament. The amount of £5,715,047 will have to be paid the companies for their properties, and the extinction of their existing rights. It appears that the business of the companies is increasing, probably at an average rate of 10 per cent, though in the case of one company the rate was as high as 32 per cent per annum. The purchase of the lines is made on the basis of 20 years profits, nearly the whole amount of the purchase money being on account of these future profits, the existing plant costing less than half a million sterling. The government expect a gross revenue of £673,838, an expenditure of £359,484, and a profit of £314,354, which, after paying interest on the purchase money, would give a surplus of £60,000 to £75,000. The additional facilities to be given the public by the change, are claimed to be the creation of offices of deposit, so that every letter box, and every pillar box would be an office of deposit, where messages would be received to be sent to the telegraph office, to be forwarded to their destination. The next facility would be to bring the wires into the money-order office in every town and district, thereby bringing the telegraph into the centre of a population, instead of its remaining, as it frequently did at present, in the outskirts. The third facility was the extension, in many places, of the number of hours during which the telegraph would be accessible to the public. It is expected that there will be an increase in the messages of 15 per cent. Telegraph messages are now divided into several prices: some are sent at 6d, others at 1s, others at 2s, at 3s, and at 4s. Those varying tariffs it is now proposed to assimilate to one uniform tariff of 1s. for 20 words. Taking the number of telegrams at 6,250,000, which was supposed to be the annual rate, from June this year the established number of messages in the first year would be 8,815,443. As a considerable number of these telegrams would consist of more than 20 words, each telegram had been estimated as producing 1s. 2d and at that price these 8,815,443 telegrams would yield a revenue of £514,234. The government would serve 3,376 places, instead of 1,882 now served by telegraphs and railroads, they would have 842 branch offices, as compared with 247 existing at present. There is now one telegraph office to every 13,000 of the population; the government would have an office to every 6,000 of the population.

The government will have an entire monopoly of the telegraph business of the United Kingdom.

Communications.

ETNA INSURANCE COMPANY.

Editor of the Canadian Monetary Times.

Dear Sir,—The settlement of claims in Canada by the Etna insurance Company, of Dublin, is of much interest to the many claimants in Canada, who know literally nothing of the doings of the Company, or that the liquidators have taken the first step towards settling a claim or paid a first dividend. Could you make space for this letter or give us any information in the matter?

1. Has the Company paid a dividend?
2. Are the claims large at home?
3. How could the Company sell out to the United Ports when in the midst of liquidation and without funds to pay for taking existing risks off their hands?
4. Has the Canadian manager transmitted the funds he had at time of failure to the head-office, or does he by arrangement retain these to settle claims since the 30th October last, in the name of the United Ports Company?
5. Has the United Ports Company made any provision or arrangement to open a business in Canada, as advertised by the Canadian manager?
6. Has the United Ports Company paid any of the Etna losses since 30th October last, as advertised and guaranteed by the Canadian manager they would?
7. Did the United Ports Company pay Mrs. Trotter's loss of $3,000 at Ottawa, which has been stated is the case?
8. Have the liquidators no agent in Canada, or is Mr. Griffith their agent?
9. Is it true that the United Ports Company is substantially the Etna under a new name, with same officers, stockholders, &c.

Yours truly,
Clinton, July 26, 1869. A Claimant.

RISE IN GRAND TRUNK.—*Herapath's Journal* says: "The whole of the Preferences of the Grand Trunk have sprung considerably in the week. The 1st Preference has gone up 2, the 2nd Preference 4, the 3rd Preference 3, and the 4th Preference 1¼. The large increase in the traffic, and the fact of the Chairman going to Canada and devoting months of his time to looking closely into the management of the line, also the probable payment this year of the 1st Preference dividend in cash, are the causes of the spring in the prices. Indeed, we shall not be surprised to see the 1st Preference presently above 60, and the other Preferences advanced in proportion. If all go well the proper price of the 1st Preference is 80, at least, for after 1872 the interest rises from 5 to 6 per cent., and surely a six per cent. bond is worth 80.

A WIRE RAILWAY.—*Herapath's Journal* speaks of an invention now in use in Leicestershire, England, which obviates the necessity of cuttings, embankments, tunnels, viaducts or bridges, no matter how hilly the country to be travelled. It is a wire tramway, which consists of endless wire rope, supported on a series of pullies, carried by substantial posts, ordinarily about 150 feet apart, but which may be extended to 600 feet. One of the ends of this rope passes round a Fowler's clip-drum, worked by a portable steam engine, and this drives the rope at a speed of six miles an hour. Boxes are hung on the rope at the loading end near the station by a pendant, which is ingeniously arranged to preserve a perfect equilibrium, and at the same time to pass without hindrance over the supports. Each of these boxes is loaded with a hundred weight, and the delivery is at the rate of two hundred boxes, or ten ton per hour, for a distance of three miles. This description applies to a wire extending that distance to some stone quarries in Lancashire. Already wire tramways on the same plan are said to be in course of erection in France, Italy, and Spain, and it is probable, (says the Journal) that this generation may see goods carried by wire as commonly as messages. The tramway is not unlike an exceedingly stout electrical telegraph; and there is something exceedingly droll in the sight of a regiment of well-laden trucks or boxes passing gravely along it at stated intervals and at a regular pace, much as if they were at aerial drill.

THE PATENT ACT OF 1869.

The new Act which makes the law respecting patents uniform throughout the Dominion took effect on the 1st of July. Any person, a resident of Canada for at least one year before his application, having invented or discovered any new and useful improvement on any art, machine, manufacture or composition, not known or used by others before his invention or discovery and not in public use or on sale in any of the Provinces, may obtain a patent granting an exclusive property therein. An original and true inventor or discoverer is not deprived of his right to a patent by reason of having taken out a patent for his invention or discovery in any other country at any time within six months and preceeding his application here. The patent may be granted to any person to whom the inventor or discoverer has assigned his right of obtaining it.

Any person, having been a resident of Canada for at least one year next before his application, and who has invented or discovered any improvement on any patented invention or discovery, may obtain a patent for such improvement, but shall not thereby obtain the right of vending or using the original invention or discovery, nor shall the patent for the original invention or discovery confer the right of vending or using the patented improvement.

In cases of joint applications, patents shall be granted in the names of all the applicants; an assignment from one to the other shall be registered.

The applicant for a patent shall make oath or affirmation that he verily believes that he or his assignor is or was the true inventor or discoverer, that he is or the assignor was a resident of Canada for one year before the application. The petition shall specify the domicile of the applicant, the title of the invention or discovery, its object and a short description of it and distinctly allege all the facts necessary under the Act to entitle him to the patent and accompany it with a written specification in duplicate, describing the invention or discovery in such full and exact terms as to distinguish it from all contrivances or processes for similar purposes.

The application shall correctly and fully describe the mode of operating contemplated by the applicant; shall state distinctly the contrivances which he claims as new, and for the use of which he claims an exclusive privilege; shall bear the name of the place where it was made, the date, and be signed by the applicant and two witnesses —in the case of a machine the specification shall fully explain the principle and the several modes in which it is intended to apply and work out the same; in the case of a machine or in any other case where the invention or discovery admits of illustration by means of drawings, the applicant shall also, with his application send in drawings in duplicate showing clearly all parts of the invention or discovery; and each drawing shall bear the name of the inventor or discoverer and shall have written references, corresponding with the specification, and a certificate of the applicant that it is the drawing referred to in the specification; but the Commissioner may require any greater number of drawings than those above mentioned, or dispense with any of them, as he may see fit; one duplicate of the specifications and of the drawings, if any drawings, shall be annexed to the patent, of which it forms an essential part, and the other duplicate shall remain deposited in the Patent Office.

The applicant shall also deliver to the Commissioner, unless specially dispensed from so doing for some good reason, a neat, working model of his invention or discovery, whenever the invention or discovery admits of such model, and shall deliver to the Commissioner specimens of the ingredients, and of the composition of matter sufficient in quantity for the purpose of experiment, whenever the invention is a composition of matter.

An intending applicant for a patent who has not yet perfected his invention or discovery may file in the Patent office a description of his invention so far with or without plans. This document, called a *caveat*, is to be preserved in secrecy by the Commissioner until the patent issues. If application be made by any other person for a patent with which the *caveat* may interfere, the Commissioner shall give notice to him who filed the *caveat* and such person shall within three months after such notice take the other steps necessary in the application for a patent, unless the person filing a *caveat* shall within four years from the filing have made application for a patent the *caveat* shall be void. Under certain circumstances the Commissioner may object to grant a patent, but his decision is subject to appeal to the Governer in Council.

In case of interfering applications for any patent the same shall be submitted to the arbitration of three skilled persons one to be shown by each of the applicants and the third by the Commissioner whose award shall be final. If either applicant shall fail to choose an arbitrator the patent shall issue to the opposite party.

No letters patent shall extend to prevent the use of any invention or discovery in any foreign ship or vessel, where such invention or discovery is not so used for the manufacture of any goods to be vended within or exported from Canada.

Every person who, before the issue of a patent, has purchased, constructed or acquired any invention or discovery for which a patent has been obtained under this Act, shall have the right to use and vend the specific article, but the patent shall not be invalid as regards other persons by reason of such purchase, &c., by the first named or those to whom he may have sold the same; unless the purchase, &c., was made more than one year before the application for the patent or the use extended for a longer period than a year.

Every patent shall be assignable either as to the whole interest or as to any part by an instrument in writing. Any grant and conveyance of an exclusive right to make and use and to grant to others the right to make and use the invention or discovery patented within the Dominion or throughout any one or more of the Provinces or any part of the Provinces shall be registered in the office of the Commissioner. Every assignment affecting a patent shall be void as against a subsequent assignee unless such instrument before prescribed is registered before the registering of the instrument under which such subsequent assignee may claim.

The fees payable to the Commissioner of Patents, are:—

On a petition for a patent for 5 years	$20 00
" " extension for 5 to 10 years	20 00
" " " 10 to 15 years	20 00
On lodging a caveat	5 00
On asking to register an assignment	2 00
" " attach a disclaimer to a patent	4 00
" " for a copy of a patent with specification	4 00
On petition to reissue a patent after demand and on petition to extend a former patent to the Dominion, for every unexpired year of duration of patent	4 00

The patent when granted shall be issued for five years, renewable for a second and third period of five years each; but every patent is subject to the condition that it shall cease at the end of three years unless the patentee shall within that period have commenced and shall after such commencement carry on in Canada the construction or manufacture of the invention or discovery patented in such manner that any person desiring to use it may obtain it or cause it to be made for him at

a reasonable price at some manufactory or establishment for making or constructing it, in Canada, and that such patent shall be void if after the expiration of eighteen months from the granting thereof, the patentee or his assignee or assignees for the whole or a part of his interest in the patent, imports or causes to be imported into Canada, the invention or discovery for which the patent is granted.

Patents granted under the laws of the various Provinces remain in force and may be extended over the whole Dominion on proper application and payment of fees.

Commercial.

Oil at Petrolia.

(From our own Correspondent.)

PETROLIA, July 26, 1869.

Since my last the well put down by Mr. Hill has struck a splendid show of oil. This is on lot 11, 11th concession of Enniskillen.

The Reliable (Harry Prince's) enterprise, near the station, although drilled to the usual depth, has not as yet shown symptoms of being a strike, only faint indications of oil showing themselves; it is cousidered a failure. The same may be said of the Spencer No. 1.

The Hyde well, near the station, has not turned out as well as was expected; and the Dunlop and Polly, in which the tools were fastened, is uot yet clear, but is nearly so. This well is close to the eastern end of the station.

There is a new well going down near the famous Lougheed, and another quite near the former, being put down by Captain Tyler, the later by Spencer, Prince & Co. A Mr. Wallen is also putting down a well nearly opposite these. which, together with some three others, are all the wells at present going down. I shall more particularly enumerate and describe them as they mature.

The crude oil combination met last night, with a full attendance of the producers, our most esteemed and enterprising friend, Mr. Noble, in the chair. A very satisfactory statement of affairs having been submitted and approved of, it was unanimously agreed to place the price of erude oil at $1.25 per barrel. This may appear to some a reduction in price, but it really is not, as up to this time, although the price has been nomially $1.62½ per barrel, still, when we take into consideration the fact that a larger quantity had previously been sold by said combination at 75 cents per barrel, the equalized price of the whole never exceeded $1.25.

The great still of Messrs. Duffield, Higgins & Co., of this place, has been run off with perfect suecess, making a prime white distillate of the finest quality; and, in fact, coming up in every particular to their most sanguine anticipations.

I quote—Crude Oil, very firm at $1.25 per brl.; Refiued, 20c. per gallon.

The production of crude this week is about 4,500 barrels. M. P.

Toronto Market.

PRODUCE.—*Wheat*—Receipts 2,090 bushs., and 7,230 bush. last week. The market has been unsettled during the greater part of the week, but closed firm and 2 to 3 cents higher. There is a fair enquiry and sales are reported of a lot of Spring at $1.03, early in the week, and a lot of 2,000 bushs. at about $1.05. 2,300 bushs. Fall sold at $1.07 f.o.b. Holders are firm in their views. The prospects of the crops continue good, although the weather is too wet and greatly retards the ingathering of the hay crop. *Oats.*—Receipts 1,800 bushs. Prices are firm and the demand active, prices closing with a downward tendeucy, Numerous car loads of eastern have sold at 52 to 54c; no sales of western, they are worth 57c. *Peas.*—Nothing doing in lots, ou the street 70c. would be paid.

FLOUR.—Receipts 1,410 bbls., and 1,760 bbls. last week. The market is firm and tending upwards. Sales were made of a number of lots at $4.55 to $4.80 of No. 1 Superfine, the market closing with holders asking $4.75. Spring wheat extra sold at $4.80, and 200 bbls. extra brought the same price at Weston. *Meal.*—Oatmeal is nominal, car lots are probably worth $5.50 to $5.75; small lots of cornmeal sell at $4 to $4.25.

PROVISIONS.—Receipts are reported good and the demand fairly active with an upward tendency in prices. *Cheese.*—Considerable amount are to hand. Makers ask 10 to 11c.; shippers offering 9 to 10c; prices are easier. *Eggs.*—There are good supplies in market, packed are worth 14 to 15c. *Pork.*—Centinues in good demand with light stocks, a lot 90 brls, extra prime, sold at $19. *Salt.*—There were two cargoes of American landed during the week.

WOOL.—The receipts were lighter and the market is dull; 9,000 lbs sold at 31c. which is now the ruling quotation.

FREIGHTS.—The rates for grain to Oswego is unchanged 3c. U.S. Currency; to Kingston 2c. gold. Flour to Montreal 20c. Lumber to Oswego $1.50 per M. Coal, Erie to Toronto, $1.35 to $1.40.

FREIGHTS—The Grand Trunk rates to Liverpool are:—Flour 4s. stg. per bbl.; wheat 8s. 6d. stg., per quarter; and boxed meats 55s. per ton.

The following are the Grand Trunk Railway Company's summer rates from Toronto to the undermentioned stations, which came into force on the 19th ult.:—Flour to all Stations from Belleville to Lynn, inclusive 25c; grain, per 100 lbs., 13c; flour to Prescott, 30c; grain 15c; flour to all stations between Island Pond and Portland, inclusive, 75c; grain, 38c: flour to Boston, 80c, gold; grain 40c; flour to Halifax, 90c; flour to St. John, 85c.

Halifax Market.

BREADSTUFFS.—We have to report a moderatively active market for Flours during the past week, with considerable irregularity in prices. Several lots of Canada Extra, consigned to parties here outside the trade, were thrown on the market at from 30 to 40 cts. per bbl. below their actual value, (to the injury of the general trade). $5.90 was accepted for some lots of above. Supers are in light supply, with good demand. Fancy in limited request at quotatsons. Extras are without enquiry, with stocks in excess of requirements. No. 2 inactive and nominal, with good supply of American.

Imports from January 1st to July 20th, 1868 and 1869—

	Bbls. Flour.	Bbls. Cornmeal.
1869.....	82301	20407
1868.....	94336	33516

WEST INDIA PRODUCE.—Molasses continues unchanged, without transactions. Sugars are being pressed for offers, and continue nominal. No transactions of any moment, are reported; the trade being confined to retailers.

FISH AND OIL.—Codfish in active request for shipment and local wants. Receipts light. We have favorable reports from various outports of catch, both as to quantity and quality; and the general impression is that low prices will be seen this Fall. Pickled Fish unchanged. Cod Oil active and improved. Seal Oil unchanged.

EXCHANGE.—Bank Draughts, London, at 60 days, at 13¼ per cent. Montreal sight, 4 per cent. St. John, N. B., 3 per cent. prem.—*R. C. Hamilton & Co's. Circular.*

Imports of Groceries at Montreal.

Imports of following Groceries for fiscal year ending 30th June, 1869:

46-10t. H. S. LEDYARD.

Montreal Telegraph Company,

NOTICE is hereby given, that a Dividend of FIVE per cent. for the half-year ending THIRTY-FIRST MAY, has been declared upon the Capital Stock of the Company, and the same will be payable at the offices of the Company, on and after FRIDAY, the NINTH JULY.

The Transfer Book will be closed from 1st to 9th JULY.

By order of the Board,

(Signed) JAMES DAKERS,
Secretary

The European Mail for North America,

WITH WHICH IS INCORPORATED

"WILMER & SMITH'S EUROPEAN TIMES.

(Established in 1843.)

A Full and Complete Summary of

HOME AND FOREIGN NEWS.

Published Weekly for despatch by the Mail Steamer.

THE EUROPEAN MAIL.

FOR North America, with which is incorporated 'Wilmer & Smith's European Times,' is published in the interest of the mercantile and general community.

In each issue is to be found all the reliable information commercial and general, that can in any way prove of value to our subscribers. The greatest possible care has been, and will continue to be, taken by the Proprietors to obtain, regardless of expeuse, a faithful record of all market transactions in which our friends are more particularly concerned, up to within three hours of the closing of the Mail.

We furnish our readers with quotations of articles staple not generally noted in ordinary lists, of which the following is an example :—

Articles.	Prices per ton.	Cash discount.
CANADA PLATES		
Staffordshire (in L'pool) f.o.b.	£18 18 6	2½ per ct.
Glamorgan " "	19 15 0	"
GALVANIZED IRON—		
Corrugated Shts., 20 gauge fob.	17 0 0	"

The latest shipping intelligence, comprising arrivals, departures, sailings, and loadings, alphabetically arranged, is laid before our subscribers; and the tabular form adopted in the cnrrent number will be adhered to throughout—every casualty being regularly noted, and the state of the freight market duly advised.

Agricultural, Legal, and Medical news, of interest is given in detail.

We publish a list of Military and Naval Stations, and all changes are promptly noted.

The proprietors of the EUROPEAN MAIL urge the great advantages of this Journal, and trust foi the friendly co-operation of all who think it of importance that the Old and New World should be more closely associated by those reciprocal ties resulting from a mutual furtherance of their material interests.

The subscription is 52s. or $13 (gold) per annum, payable in advance.

EDWARD A. C. PEW, Esq.,..... .....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,
IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETARY.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of divideuds paid the members since its organization, $6,000,000.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
$140,000 deposited in Canada for the benefit of Policyholders.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assu ance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Meetings.

CANADA LIFE ASSURANCE COMPANY.

The twenty-second annual meeting of this Company was held in Hamilton, on the 3rd of August, 1869.

REPORT.

It is gratifying to the directors to be able to intimate that the transactions of the past financial year have been of the most satisfactory character. The number and amount of new assurances have been nearly twice as great as those of any former year; and by its larger business in Canada than any other life office there, the company continues to maintain its lead among such institutions. During last year, 993 applications, for assurances of $1,390,655, were made to the company. Of these, it was thought advisable in the interests of company to decline 73, for assurances of $106,500; and of the balance of 920 policies which were issued for $1,284,155, 831 were taken up for $1,156,855 of assurances, yielding a new annual premium income of $46,928.71. The number of policies which became claims by death during the year was 35, upon 31 lives for assurances of $61,300, a sum which is less than that of either of the previous two years, although the amount at risk last year was very much larger than it was during these years. The business in force at 30th April, 1869, amounted to $5,476,358.86 of assurances, under 3,650 policies on 3,286 lives, yielding a premium income of $164,670.58, with 3 annuities for $842.33 and a deferred annuity of $9.50. The investments of the company continue to receive the most careful attention of the directors and the manager, and it will afford the shareholders satisfaction to notice by the accounts that they have proved highly remunerative. The interest account is largely increased, having alone much exceeded the year's claims by deaths, while the percentage of the company's expenses is again this year materially reduced. A dividend of 5 per cent upon the paid-up capital is recommended, payable 1st September next. During the past year Mr. Donald Murray, of Montreal, was appointed general agent for the company in the Province of Quebec, and the directors have pleasure in saying that that field has already been productive of considerable benefit to the institution, and it will without doubt continue to add to the general success of the company. By the charter of incorporation, the following gentlemen, being at the head of the list of directors of the Co., vacate their seats at the board, but are eligible for re-election:—Messrs G. H. Gillespie, Rev. G. M. Innes, D. McInnes, John Ferrie, and F. W. Gates.

(Signed) JOHN YOUNG, President.
A. G. RAMSAY, Manager.

AUDITOR'S REPORT.

Gentlemen,—I have respectively to report the completion of my audit of the financial affairs of the company, for the year ending 30th April, 1869. All the different securities in which your assets are invested have been carefully examined and verified—every debenture (with its coupons) mortgage, or loan on a policy, has been checked in detail—and the amount compared with the figures in the company's books. And bearing in mind how large a proportion of your business passes through the hands of agents, I have given careful attention to this branch of my audit. All cash and bank transactions have been verified; and the various books of the office have been audited in detail. As the result of my labors, I submit herewith, duly certified, firstly, a statement of receipts and expenditure for the past fiscal year; and, secondly, a general abstract of the estimated assets and liabilities of the company at 30th April, 1869, these returns exhibiting in a comprehensive and plain form the position of the Company's affairs at the close of the books for the year. It affords me much pleasure to observe the large and healthy increase in the company's business during the past twelve months; and I may well congratulate both shareholders and insurers on the marked success which has attended your transactions during that period, as well as on the sound foundation upon which the company rests. I have to acknowledge the attention which the manager has shown to every request I have had occasion to make for information during the audit; and I have to express my satisfaction with the accurate and neat manner in which the books have been kept by those in charge of that duty. I remain, gentlemen, your obedient servant, (signed,) G. A. BARBER.

	$2,128,080 80	

*NOTE.—In the valuations upon which the divisions of Profits are based, only the net or pure Premiums are taken into account.

The President, John Young, Esq., in moving the Report, said, the Report was of such an exceedingly favorable character that he felt it unnecessary for him to make any lengthened remarks. It might be well to briefly compare the figures of the year's business with those of the year before. The applications showed an increase from 539 in 1868 to 993 in 1869, an increase of 84 per cent., while the increase in amount was 105 per cent. The Policies issued showed an excess over the previous year of 86 per cent. and 103 per cent. in amount, while the income from Premiums had increased in the year 156 per. cent. The interest income on investments had also very largely increased, and now reached the handsome sum of $68,318 per annum.

The claims from death had also this year been much lower than the estimated amount, and less than the year previous. They were in

1867	39 policies on 32 lives	$68,295
1868	40 " 37 "	62,200
1867	35 " 31 "	61,300

this year some $7,000 less than the interest earned by the Company on its investments.

The adoption of the Report was seconded by the Hon. John Hillyard Cameron, M.P., who said that the Report was remarkably satisfactory, and the statements so exceedingly clear that he felt it unnecessary to do more than second the Report, which he had much pleasure in doing.

Mr. John W. Bickle, seconded by Mr. Geo. A. Young, moved a vote of thanks to the Directors for their valuable services and attention to the interests of the Company.—Carried.

On motion of Mr. John Ferrie, seconded by Mr. G. H. Gillespie, a vote of thanks to the General Agents of the Company was passed.

Mr. Sheriff Thomas said he rose with much pleasure to move a vote of thanks to their Manager, Mr. H. Ramsay. His thorough capability for the duties of his position, and his unwearied devotion to the interests of the Company, were known to them all.

Mr. Tristram Bickle seconded the motion. He had never expected that a man so perfectly fitted in all respects for the situation could be found, and he could not think otherwise than that the Company was extremely fortunate in having the services of such a Manager.

The President, in putting the motion, said he heartily concurred in all that had been said by the Sheriff and Mr. Bickle. The interests of the Company could not be better served than they had been by Mr. Ramsay.—Carried.

Mr. Ramsay briefly thanked the meeting for the gratifying appreciation just given of his labors in their service, and said he hoped to merit their good opinion in the future as in the past. He felt it due to the other officers of the company to bear testimony to the diligence and ability of these gentlemen.

Mr. F. W. Gates moved, seconded by Dr. Hamilton, (West Flamborough), that Messrs. George A. Young and John W. Bickle be scrutineers in taking the ballot for election of Directors, to fill the places of the five who retire this year. Carried.

Mr. Sheriff Thomas said that on a former occasion, when they had at their meeting a large attendance of policy-holders as well as shareholders, and when a long and animated discussion had taken place, the view had been expressed that gentlemen were holding the position of Directors while holding but small amounts of the Company's stock. The Board had duly considered this complaint, and had come to an arrangement amongst themselves by which ten shares of the Company's stock was made the minimum qualification for a Director, a change which he hoped would give every satisfaction.

The ballot was then taken, after which the scrutineers reported that the five retiring Directors had been re-elected, viz: Mr. G. H. Gillespie, Rev. G. M. Innes, Mr. D. McInnes, Mr. John Ferrie, and Mr. F. W. Gates.

On motion of Mr. Gates, the president left the chair, which was taken by Mr. Sheriff Thomas.

Dr. Hamilton then rose to move a vote of thanks to the President for his valuable services as the head of this Company. During many years his able conduct in that capacity, and his close attention in the company's business, had been well known.

The motion was seconded by Mr. Sheriff Thomas in putting it from the chair.

Mr. Young briefly expressed his thanks, after which the meeting adjourned. At the meeting of directors subsequently held, Mr. John Young was re-elected President, and Mr. John Ferrie, Vice President.

BRITISH AMERICA ASSURANCE COMPANY.

The Annual Meeting of this Company was held on the 2nd instant, in Toronto, the Governor in the chair; the Accountant read the following:

Annual Report, 1869.

The charter of the British America Assurance Company very properly providing for an annual meeting of shareholders on the first Monday of the month of August of each year, the Directors, in conformity with the Act, have much satisfaction in submitting to the proprietary, on this, the thirty-fifth anniversary of the institution, a full exposition of the affairs of the company for the twelve months ending 30th June.

The following particulars are embodied in the balance-sheet:

The Assets comprise,		
Government deposit	$50,000	
Accrued interest thereon	750	
		$50,750 00
Debentures and mortgages on real estate		161,485 27
Bills receivable		18,885 80
Office building and other real estate		13,128 15
Sundry accounts receivable, and other items		8,343 80
Cash in bank and agents' hands		29,948 11
Total		$282,541 17
The paid up capital amounts to	$200,000 00	
Dividends unclaimed, and No. 51, not payable until July	9,981 63	
Losses under adjustment, and other liabilities	25,519 52	
Total		$235,501 15
Balance		$47,040 02

The profit and loss account shows:

Interest on investments	$14,079 59	
Premiums received in Fire Department	116,659 77	
Premiums received in Marine Department	41,958 20	
Profit on investments redeemed	697 90	
Total receipts		$173,395 46

Fire losses	$65,395 13	
Marine losses	26,838 01	
Agents' commissions and other charges	35,673 15	
Premiums on re-assurance	4,410 46	
Total payments		$132,316 75
Net profit of the year		$41,078 71
The Rest, or surplus fund :		
Balance from last year's statement	$21,961 31	
Profit of year ending 30th June, 1869	41,078 71	
		$63,040 02
Fifteith dividend at 4 per cent	$8,000 00	
Fifty-first dividend at 4 per cent	8,000 00	
		$16,000 00
Balance at credit of fund		$47,040 02

By an examination of the foregoing items, it will be seen that the transactions of the company for the past year have been of a very satisfactory character, enabling the Directors to declare the usual half-yearly dividends at the rate of eight per cent. per annum on the paid-up capital, besides adding the sum of $25,078.71 to the Rest, or surplus fund.

In the spring of the present year, an arrangement was entered into between the Montreal Assurance Company, the Western Assurance Company, and the British America, for the prosecution, share and share alike, of ocean insurance business from Canada to Great Britain, the West Indies and South America. Thus far the transactions have been of a satisfactory although limited nature ; but there is good ground to infer that the business will in time become one of importance, and, in its results, profitable.

Canadian commerce having been greatly augmented since confederation, and the intercourse between the various provinces much facilitated, an extension of the company's transactions, has been commenced under certain well considered conditions to and from the principal ports of the Dominion.

A legal enactment having been obtained at the last session of the Legislature, enlarging the powers of the shareholders by By-Law, for the appointment and regulation of the officers of the company, a draft of such By-law is herewith submitted for their approval and adoption.

All which is respectfully submitted,

(Signed) GEO. PERCEVAL RIDOUT, Governor.

(Signed) T. W. BIRCHALL. Managing Director.

per JOHN EVANS, Accountant.

The following Stockholders were elected to serve the Office of Director for the ensuing year:—G. P. Ridout, Esq., Toronto; Peter Paterson, Esq., Scarboro; E. H. Rutherford, Esq., Toronto; Honorable William Cayley, Toronto; George J. Boyd, Esq., Toronto; Honorable George W. Allan, Toronto; Thomas C. Street, Esq., M.P., Clark Hill; Peleg Howland, Esq., Toronto; A. Joseph, Esq., Quebec.

At the first Meeting of the Board, the undermentioned were unanimously re-chosen for the respective Offices:—Governor, George Perceval Ridout, Esq.; Deputy-Governor, Peter Paterson, Esq. *Trustees*:—E. H. Rutherford, Esq., Honorable William Cayley, G. J. Boyd, Esq.

GORE BANK.

The President, Edward Martin, Esq., was called to the chair, and Thomas Muir, Esq., was appointed Secretary.

Report of the Directors for the year ending 30th June, 1869.

1. The directors report that in accordance with the resolutions to that effect, passed at the special meeting held on the 2nd Nov. last, they have obtained from the legislature the desired amendments to the bank's charter, and the paid up capital of the bank is now reduced to $485,568, the shares standing at $24 each, instead of $40, as heretofore; the accompanying statements show the manner in which the balances mentioned in the statement submitted at the last annual meeting have been dealt with, and the position of the bank at the above date.

2 After mature consideration it was deemed advisable so close the branches at Woodstock, Galt and Simcoe, which has been done and the amounts transferred to the head office.

3. The assets of the bank have been recently carefully valued, every debt deemed bad written off and due allowance made for those considered doubtful. The whole of the Bank of Upper Canada certificates were disposed of and the Real Estate reduced to $3,265.95; where it was deemed necessary the value of mortgages and other items included in the statement submitted by the Board in November last, have been reduced from the sums at which they were valued in that statement. Since the 30th of June sales of Real Estate have been closed, which leave the balance at the debit of this account at $1,900.

4. The charges for management during the past year were materially increased by the expenses consequent on the realization within that period of a large amount of doubtful assets, (the accumulation of many former years' business) the expenses of closing the six branches, the salaries of the staff at these branches, for many months, and other exceptional items are also included in the amount at the debit of expenses.

5. The necessity for holding large sums to meet the demand of depositors which existed when your directors assumed office has passed away, but the doubts which subsequently prevailed as to the future operations of the bank prevented the realization of as large profits as would otherwise have been secured.

6. Dr. McQuesten having resigned his position as a director, Mr. G. J. Forster was selected to fill the vacant seat.

7. In February last, Mr. Samuel Read, then manager of the Bank of Montreal at Brantford, was appointed cashier in place of Mr. Cassels, who had previously resigned.

8. The amended act provides that the shareholders may change the name of the bank to that of the Bank of Hamilton, reduce the number of directors from 7 to 5, and alter the scale of voting so as to give a vote to each share. These questions will no doubt be fully discussed at the meeting. Signed on behalf of the Board.

EDWARD MARTIN, President.

Hamilton, July 19th, 1869.

S. READ, Cashier.

T. C. Street, Esq., moved the adoption of the report, which motion was seconded by Dr. Clarke, and carried.

The former gentleman addressed the meeting in respect to a proposition made by other banks

to amalgamate their stock with that of this institution; and in view of such proposition having been made, Mr. Street thought it would be well that the meeting should adjourn until the last Tuesday in August, which would be the 31st inst., in order that they might ascertain how much money they would get for their stock. He also advocated the appointment of a committee of the shareholders to confer with the Board, in the meantime, in regard to these negotiations—the whole matter, of course, to be ratificld by the adjourned meeting of the shareholders. He advocated the re-election of the old Board of Directors until the expiration of the month, and that the election of directors could then take place at the adjourned meeting. By a recent Act of Parliament, the Board of Directors could legally be reduced from seven to five. He advocated the reduction. The expenses would thereby be materially reduced, and there would be as much efficiency as if there were seven on the Board. This question would not come up at present, but would be considered at the adjourned meeting. From the report of the bank it would be seen that the property of the bank is worth $500,000; consequently our assets are worth 62½ cents on the dollar on the old stock. This was not taking into consideration the outlying circulation, $107,000, of which a large amount would never come into the bank to be redeemed. Although this sum could not be fixed at any particular amonnt, it would undoubtedly be considerable, and should work in their favor in regard to negotiations with other banks. He was unfavorable to any lengthy discussion in regard to the property of the bank until the adjourned meeting, when the whole matter could be considered. Mr. Street closed his remarks by moving that the meeting stand adjourned until twelve o'clock, noon, of Tuesday, the 31st day of August, inst.

The resolution, after some discussion, was adopted.

It was moved by Mr. Æ. Irving, seconded by Mr. James Watson, that the following named gentlemen, Messrs. T. C. Street, J. Davidson, D. Campbell, Murray (of Montreal), by power of substitution by him in his own case; Dr. McQuesten and Dr. Billings, be a committee to confer with the directors upon any changes of the affairs of the bank which may be proposed between this day and the adjourned meeting to be held on the 31st of August inst.

This motion was also carried.

Dr. Clarke gave notice that he would at the next meeting introduce a by-law to reduce the number of directors from seven to five, and that the necessary notice be given.

The following gentlemen were elected directors: Messrs. John Waldie, Edward Martin, Wm. Hendrie, G. J. Forster, Thos. McIlwraith, Hon. S. Mills, and Wm. McMillan, being the return of the old board. At a meeting of the board, Hon. Samuel Milis was elected president and Mr. Waldie, vice-president.

THURSDAY, AUGUST 5, 1869.

ORILLIA RAILWAY.

A meeting was held at Barrie, on the 27th ult., to consider the project of continuing the Northern Railway to Orillia. Mr. Robinson, the President of the Northern, and Mr. Cumberland, the Manager, were present, and expressed their hearty approval of the proposed branch, and signified the readiness of the company to stock it, besides affording every encouragement in furthering an undertaking so full of promise. A resolution moved by Mr. McConkey, M.P., and seconded by Judge Gowan, was carried, appointing an influential committee to ascertain how far the municipalities interested would be disposed to assist such an undertaking. Barrie is therefore prepared to do its part, and it is assumed that Oro, Medonte, and Orillia townships will be favourable. Difficulty is anticipated with Orillia, as that village has in a measure committed itself to the Port Hope scheme. But as Mr. Cumberland shewed, the road from Orillia to Toronto *viâ* Barrie, is by many miles shorter than that by way of Port Hope. Port Hope and Barrie are about equal distances from Toronto. The tariff on the Northern Railroad, per 100 on first class goods, 94 miles, is 5 cents less than on the P. H. & L. Road of only 42 miles; so that, in the same ratio, freight from Toronto to Orillia, via Port Hope, would cost double the amount of that via Northern Railway and Barrie to the same point. The speaker expressed himself in favour of a gravel road from Barrie, running through to the townships north, by which the trade now diverging to Stayner might be secured. The principal reason urged against the extension is, that villages would spring up along the line, and absorb the business which Barrie now gets. But the *Advance* puts the matter with great fairness when it states that "there must be a give and take in such matters," and while there might be some loss, there would be manifold gain. Open up the country is the watchword of the party of progress. Let the farmer get free access to the best markets and there is no fear that we shall all be the better off. Mr. Cumberland paid a high compliment to Barrie, when he stated: "He did not believe there was a town in the Dominion where more real solid stability and prosperity were apparent than here." The country thereabouts is only beginning to be developed, and Barrie should look to it, that it be not deprived of the benefit of a traffic which must rapidly extend.

THE CANADA LIFE.

The report of the Directors of this Company, which will be found in another column, presents many features of a very satisfactory character; indeed, we think that a greater degree of jubilance than the management thought fit to exhibit might have been indulged in with perfect propriety. We are not prepared to go into ecstacies over success, but we are ever ready to do it justice.

The business of the company has been steadily increasing. Last year, the largest amount of life business done by any one company in Canada was secured by it. An increase of new business in one year of 8 per cent. in number of policies, and 105 per cent. in amount insured, is certainly not bad. While the policies have increased both in number and amount, the claims by death have decreased so that the interest on investments has paid the claims, and left seven thousand dollars to spare. The investments show a yield of over seven per cent. One may fairly prophecy that, with such small a mortality such fertility in the investments, and a steadily progressive business, the profits to be declared next year will be handsome. The cash liability of the company, including the capital stock, but excluding the valuation of insurances of 1865, is placed at $138,226.07. It may be noticed that the liability last year was $154,153, and the question may arise, why the diminution in liability with an increase of business? But in last year's account the unsettled claims stood at $28,379, while there are, this year, but $12,537.63. While, on the one hand, the value of the assurances is disregarded, on the other the value of the premium income is omitted, and $988,1 stated as cash assets. This is done, we suppose, because a correct estimate cannot be given of the value of the policies, as an annual valuation is not made, A valuati

will be made next year, when the profits will be divided. The item $138,226 does not, of course, embrace the amount required to re-insure, and it would be useless to guess at the sum required in the absence of proper *data*.

Taking the statement as a whole, we think that policyholders will peruse it with great satisfaction. The lives have apparently been selected with care, or life in Canada must have a great deal in its favor. The number of lapsed policies appears to be small. Notwithstanding the competition which exists here and the comparitively limited field for operations, the Canada has every reason to congratulate itself on the results it has achieved, owing no doubt to the zeal of its agents and the ability of its Manager. As a Canadian Company we wish it the greatest possible success. Were it not out of place to make invidious comparisons, we might show considerable that would tend to the advantage of the Canada, but as its agents are, doubtless, fully able and willing to do it themselves, we merely indicate the salient features of the report and express our confidence in the soundness of the Company.

THE BRITISH AMERICA.

On the 2nd instant, the Directors of this Company presented their report to the stockholders, on the year's business. The premiums received in the fire department amounted to $116,659.77, and the losses where $65,-95.31, or 55 per cent. The premiums were $41,958.20, and the losses $26,838, or 63 per cent. During the year before, the ratio of fire losses to fire premiums was about 63 per cent., and of marine premiums to marine losses, 90 per cent., while as large an amount of business has not been done this year. What has secured resulted in a greater profit. The net profits of the year are placed at $41,078.71 as against $17,355 of last year. Two dividends of four per cent., have been declared having at the credit of reserve the sum of $7,040. The arrangement between the Montreal, the Western and the British America, with reference to ocean marine, has been found to be satisfactory. The advantage of close personal supervision on the part, of the much respected Governor of this company is clearly seen, in the care with which business is conducted and the confidence which the company commands.

THE GORE BANK.

It will appear, on a comparison of this year's statement with the estimate of loss arrived at on the investigation which took place at the instance of the shareholders, that there is difference between the two of $89,-071. That amount has been written off over and above the estimate. From what occurred at the annual meeting we judge that the bank will not continue in business. The agencies have been closed, and the uncertainty that has prevailed, respecting the bank's future, of course, interfered seriously with its operations. Two offers have been made for the purchase of the institution; one by the Bank of Montreal, the other by the Bank of Commerce. On the 4th a deputation came to Toronto and had interviews on the subject, with one or both parties. The new board were elected on the understanding that they would resign, if required, on the 31st August. A great deal of substantial work has been done in realizing the assets, and matters are now in a fair way for any emergency.

MR. KING IN NEW YORK.

As the Bank of Montreal is the depositary of the Government and custodian of the gold held for the redemption of Dominion notes, it must expect to have the vagaries of its manager watched with considerable closeness. It appears that Mr. King has been operating pretty extensively in the New York gold market, and has, by some cool operations, gored severely, if we may judge by the press strictures, not a few of the bulls and bears The *World* of the 29th said :

"The price of gold has been advancing steadily, until it reached 137¾ yesterday, when the agent of a Canadian bank forced the price down by sales to the extent of $3,500,000. Besides forcing sales of this amount of gold, this Canada bank manager made forced sales of its sixty-day bills of exchange on London at ⅛ to ¼ per cent. below the market quotations, and in round amounts to leading prime bankers, whom this speculative Canada agent had ascertained were about to ship specie to Europe. The Canada bank bills, being a cheaper remittance than specie, took its place, and the banks, at the last moment, withdrew the specie they would otherwise have shipped. Exchange was quoted weaker, although none of the prime bankers will draw sixty-day sterling under 110⅛ to 110¼, and sight 110⅜ to 110¾."

The *Express* takes up the cry, and is responsible for the following :

"In the Gold Room yesterday afternoon, it was freely reported that the steamer *Cuba*, sailing early to-day, would not take out any specie, whereupon the price of gold suddenly fell to 136½. At this crisis came a counter report that the *Cuba* would take nearly $1,000,000, which started gold up again to 127¼. In proof of the last report, it was cited that $750,000 were already on a dray in front of one of the Wall-street banks, ready to go on board. This was actually the case, and the small kegs of double eagles were paraded up and down Wall street on the dray until the shades of evening threw its mantle over this "Kingly" *coup d'état*, when the gold was quietly returned to the bank vaults. The confiding community of speculators went home with golden visions of an advance in the premium on shipments to-day ; but alas ! they awoke only to find that they had been taken in by a shrewd, speculating "Kanuck" lately arrived from the Royal Dominion. This story formed the gossip of the street to-day, and is regarded as the sharpest piece of financiering, in a speculative way, that Wall street has witnessed for a long time."

On the 30th, the *World* again returned to the charge.

"The bills of the speculative Canada bank manager were offered freely through different brokers at 110 for sixty day sterling, while the manager was engaged in buying back the gold he had sold. There were no purchases, however, reported of the Canada bank's bills even at 110, although none of the prime bankers were willing to draw under 110⅛ at the time.

"The average price at which the gold was sold was about 136½, and it was all bought back again yesterday and to-day without any loss or profit. The profit or loss on a gold gambling transaction is not, however, the point for the stockholders in a bank to consider. The question is 'whether gold gambling in New York comes within the scope of a legitimate Canada banking business,' and, 'if so, how long will the capital of the bank remain intact?' Any departure from legitimate banking on the part of the manager of any bank will naturally injure its credit, and, as all experience has shown, generally ends in disastrous losses."

The *Times* of the 29th, gives its version of the affair:

"The Bank of Montreal agency made one of the shipments of gold coin of Saturday last, $500,000 in amount. The President (!) of the Bank, who is the city, made no further preparations to ship this week, as, by certain speculators in the Gold Room, it was supposed he would do. The story is that yesterday morning he turned his gold into currency, at 137½ per cent., in place of shipping, and drawing against it on a more reluctant exchange market than he had anticipated. This would strike most people as a pretty shrewd banking operation, and the result, at all enters is, that he could now replace his gold at a good profit, if he chooses to do so, in place of waiting until the price runs down to 135 per cent. or less. But our very irascible neighbor of the *World* arraigns this 'first-class' exchange drawer as being no better than he should be; from which we infer that there was some disappointment yesterday somewhere in the neighborhood of the gold buying clique, around which our neighbor delights to revolve and to do knightly service for. Having of late broken a lance with the Browns and now another with the Bank of Montreal, we suppose he has one or more in rest for Belmont or Pickersgill, or our amiable friend of the Bank of British North America; these being the traditional 'five names' of the sterling market, against which, until the *World* took them in hand, there was believed to be no reproach."

We suppose that Mr. King has a good deal of exchange to disposo of just now, when he is drawing against the Intercolonial loan, and we cannot quarrel with him for seeking a market for it wherever he will do best with it. But, at the same time, we do not see clearly why he should go down to New York

to measure wits with the speculators of the gold room, or demean himself by playing tricks, the parallels of which Chicago alone can furnish. Mr. King is certainly not above shrewd dodges if we may judge from the sly test he put on Mr. Paton's sagacity at one time, and the bold manœuvre he indulged in with the Merchants' Bank at another. If the story given above be true, we are disposed to credit Mr. King with a cool audacity, which, were it not so dangerous to his bank, might afford "Canucks" a good deal of amusement. We can scarcely afford to chuckle over the tale of the dray drawn pretentiously along Wall Street, when we remember that Canadian money was its load. The laugh might be rather turned against us if the mock shipment failed in its object. We have not too much money in Canada. There is use for every cent we can beg or borrow. Where banks are given great privileges by charter, or by favor, we do not expect that they will play at gambling in New York.

£1 NOTES.

In 1797, the Bank of England began to issue one pound notes, and the practice was immediately followed by the country banks, but in 1821 she withdrew them. In 1826 the circulation of these notes was prohibited in England and Wales, and since 1829, no notes for less than five pounds have been allowed to be issued. It was proposed at the same time to suppress one pound notes in Scotland, but the measure met with such opposition from the people there, that it was abandoned. They became unpopular in England, because they were in the hands of the poorer classes, and when the small issuers failed, during panic, much misery was caused. A Mr. Delaharty, an Irish member of the Imperial House of Commons, who considers that one pound notes are at the bottom of much of the Irish misery, recently gave the House the benefit of his views on the subject, justifying his opinion with a vast deal of economical authority. The Chancellor of the Exchequer not only differed with him but even said, that one pound notes were as good as other bank notes, and under good regulations, very good things indeed. If any bank notes are good, why not one pound notes? The question is not hard to answer, but Mr. Low's defence of the one pound note is regarded as a bold emancipation from an old and well established prejudice. He stated that the taste for metallic currency generated by former legislation had cost the country a great deal. This was proved by Prov. Jevons, who says:

"The sovereigns in circulation amount to £64,500,000 at the most, of which 31½ per cent. are below the legally current weight. In short, about 20,000,000 of sovereigns require to be withdrawn if we desire to maintain the credit of our currency on its present footing, together with 11,500,000 of half sovereigns, in all 31,500,000 coins. The cost of this recoinage may be estimated at £348,000.

His estimate of the total annual cost, without including the accidental loss of coins, is as follows:—

Annual wear of 64,500,000 sovereigns	£22,000	
Annual wear of 24,000,000 half-sovereigns	13,000	
Expenses of the Mint, including wear of silver coin	42,000	
		77,000
Interest on £95,000,000 of gold, silver and copper coin, at 3 per cent.	2,850,000	
		£2,927,000

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

There were limited sales of Montreal Bank at 160½ to 162; British Bank enquired for at 104½ but none in the market; there were considerable sales of Ontario at 96 to 96¼, and buyers still ask for it at the latter rate; there were small sales of Toronto Bank at 123, and that price would still be paid. Early in the week a brisk demand arose for Royal Canadian and sales were made at 50½ 51 and 51½, there are now buyers at 52 with no stock in the market. Large transactions in Commerce at 103, 103½, 103¾ and 104. Gore is asked for at quoted rates but none offers. Merchants' has been sold at 104½ and 105. There are buyers of Quebec at par. Molsons' is nominal at 109 to 110. Buyers offer 99½ for City Bank but sellers want par. Du Peuple is in demand at 109, but no sellers. Nationale would command 107½, but none on market. Jacques Cartier is inquired for at 107½. Sales of Union at 105½ are reported. Toronto Gas is in demand at 108. British America Assurance has been largely dealt in at 55½, 56 and 56½ and there are still buyers at the latter rate. Buyers have advanced their offers to 119 for Western Building Society, but there is no stock procurable. Freehold is sought at 118½; a small lot sold at 120. Sellers want 133 for Montreal Telegraph; there have been small sales at 132. Large sales of Canada Landed Credit have been made at 79½ and 80, and buyers have advanced to 82. There are no Canada debentures in market. Dominion stock is heavy at 107. City of Toronto debentures have been sold to pay 7 per cent. interest, and are still in demand. 99½ is offered for many first class County debentures. A few good mortgages are offered at 8 per cent. For this season of the year, there has been a very large business done in most of our leading stocks, and, as a rule, at advancing prices. For all good securities, the demand far exceeds the supply.

The Provincial Accounts.—The settlement of the accounts between the Provinces of Quebec and Ontario and the Dominion is now in a fair way, it appears, of being completed soon. The Premier of Ontario, Mr. Sandfield Macdonald, and the Treasurer, Mr. Wood; the Premier of Quebec, Mr. Chauveau, the Treasurer, Mr. Dunkin, and the Attorney-General Mr. Ouimet, with Mr. Rose, the Finance Minister, and Mr. Langton, the Auditor of the Dominion, have been engaged on accounts at Montreal, and have made satisfactory progress; it was thought probable they would have completed their labors during last week.

Dominion Investments.—A correspondent of a Quebec journal writes respecting the application of the Intercolonial loan, as follows:—First, what fund is charged with the construction of the Intercolonial railway; Construction Fund with its trustees duly appointed, or the Consolidated Fund of the Dominion of Canada?

Answer,—The Consolidated Fund of Canada, with its three trustees, the ministers of the Dominion, for the time being. The money invested by Mr. Rose has therefore been rightly placed for construction purposes.

Next, what fund is charged with the duty of repayment of the money borrowed?

Answer,—The Consolidated Fund already named along with a sinking fund, to be gradually formed out of it.

As such sinking fund will be duly formed by its certain stipulated instalments, the Finance Minister in at once placing this cash to the credit of the Consolidated Fund, has given it its right destination, and observe, by the payments which he has made he has done neither more or less than place it to the credit of the fund. If the consolidated fund of Canada had not been considered trustworthy for the construction of the railway, and (in conjunction with its sinking fund to be formed,) for the subsequent repayment of the money borrowed, the requisite means would never have been lent, or guaranteed by the British Government. If a higher security than this consolidated fund had been required, it would certainly have been stipulated for. Neither men or government are in the habit of lending their money with a sentimental hope that better security will be afforded than the one asked for and put into the agreement accordingly.

The disposition of the money which has takeu place has in practice only been the means of strengthening the very fund from which the repayment of the amount borrowed will in the due and ordinary course have to be made.

Express Business in the United States.—From reports in American papers, it would seem that the express business in that country, which heretofore has been considered profitable has for the last few years undergone material change, owing in part to rival companies, and in part to the high rates exacted by the railway companies. The stocks of the principal express companies are now selling in New York at from ten to fifty cents on the dollar; one large company after sinking over $5,000,000, being obliged to succumb, and the stockholders of another defunct concern are being sued individually for the debts of the company—thus demonstrating the fact that the business, although an important one, cannot be extended beyond a certain limit.

—Mr. Scovil, the St. John defaulter, broker, who has been imprisoned for about eight months in the jail at Kingston, N. B., has been released from custody after an examination before two judges of the Supreme Court. During the period of nearly eight months, Mr. Scovil did not set his foot outside the precincts of his prison.

—The Ontario Carbon Oil Company of Hamilton, have received from the Provincial Secretary letters patent of incorporation, with power to carry on business in the counties of Wentworth and Lambton, and with the nominal capital of $50,000.

—Mr. D. S. Eastwood, of the Ontario Bank, was presented with a very flattering address on the occasion of his removal from Peterborough to Ottawa.

—A Montreal paper asks why Mr. Rose sold out, recently, his two hundred shares of Bank of Montreal stock.

—Tenders were obtained for $80,000 of Halifax City Water Works, and $30,000 were allotted at rates ranging from 2½ to 5 per cent. premium.

Railway News.

GREAT WESTERN RAILWAY.—Traffic for week ending July 16th 1869.

Passengers	28,526 86
Freight.....	30,564 03
Mails and Sundries.....	1,967 23
Total Receipts for week.....	$61,059 12
Corespondiug week, 1868...	56,103 73
Increase	$4,954 39

PASSUMPSIC RAILWAY.—The net carniugs for the year ending May 31st, 1869, exceeded any previous year by $8,500. Some 13,000 more tons of freight and 5,000 more passengers were transported thau last year.—Newport Station, which gets most of the Canadian freight, showed 1,313 more tons than any other station, and St. Johnsbury the largest number of passengers. The rolling stock, building and road bed have been added to and improved during the year and all reported in good condition. No fatal accidents have occurred during the year. Two dividends of 3 per cent. have been paid amounting to $129,-691 50. The bonded debt was reduced by the sum of $53,800 and notes payable $99,000 leaving outstanding in bonds and notes $795,000, which does not mature until 1876. In regard to Northern extension, the Directors say:

The necessity of a northern connection has been eonsidered of vital importance to this corporation, and in accordance with a resolution passed at the annual meeting of the stockholders, July 31, 1867, the directors have entered into a contract with the Massawippi Valley Railway Company to lease, when completed, their road, connecting ours with the Grand Trunk at Lennoxville, Province of Quebec, for the term of 999 years, on terms satisfactory to both corporations. The Massawippi Valley Railway is now under contract to be completed, ready for use, July 1, 1870. A large force is now employed in grading and bridging. The iron is all purchased, and some 1,800 tons delivered.

ILLINOIS CENTRAL RAILWAY.—The following is the report of the Illinois Central Railroad Company for the month of June, 1869:

Land Department.

Aeres eonstruction lands sold	5,157.51	for	$50,296.34
Acres interest fund lands sold	79.32	for	820.10
Acres free lands sold	1.009.52	for	14,172.76
Total sales during the month of June, 1869....	6,246.35	for	$65,289.20
To which add town lot sales			435.00
Total of all	6,246.35	for	$65,724.20
Cash collected in June			$187,351.18

Traffic Department.

Receipts from freight	$390,796.00
Receipts from passengers	134,800.85
Receipts from mails.	6,358.33
Reeeipts from rent of road.....	4,000.00
Receipts from other sources	80,000.00
Total reeeipts in month of June, 1869.	$615,955.18
Total receipts in month of June, 1868.	543,018.60
Estimated earnings in the month of June, on the D. & S. C. R. R., not included above	$124,993.80
Corresponding month of 1868	83,271.38

PETERBORO' AND HALIBURTON RAILWAY.—The Peterboro' *Review* says that an appeal to the new townships on the Bobcaygeon road for aid to this enterprise has been so far encouraging. Four of the counеils applied to have already passed by-laws through the first and second readings, in order that they may at once be submitted to the vote of the ratepayers. The proposed bonuses are as follows: Dysart, &c., $25,000, Minden, $6,500, Snowden, $3,500, Lutterwerth, Anson, &c., $4,000; tetal, $39,000. Besides these, the meetings in Stanhope and Harvey, each unanimously requested their councils to submit by-laws for in Stanhope, $1,000; Harvey, $10,000; making in all a total of $50,000.

—Mr. Hurlburt, builder of the Clifton wooden railway, N.Y., has been awarded the contract for the Quebec & Gosford Railway.

—The principal Prussian railway companies are about to raise a loan on joint account of 100 million thalers for the construction of new lines.

—The stock sheet of the Levis and Kennebec Railway, is being fast filled up, and the commencement of operations is looked forward to at an early date. An English company have offered to build the road for half in cash, and half in stock. The town of Levis will subscribe $50,000.

CHANGE OF GUAGE.

Thirteen hundred and fifty men were arranged along the three hundred and nine miles of the Missouri Pacific Road, on Saturday last, with orders to change the guage from 5 feet 6 inches to 4 feet 9 inches, during the interval of rest afforded to the regular traffic on the road by the occurrence of Sunday. The change was effected in sixteen hours, and on Monday morning the new rolling stock passed over the road as usual. This shows what the modern organization of railway labor can do on an emergency. Had the change been from 5 feet 8½ inches or 5 feet 10 inches to 5 feet 9 inches this celerity would have been impossible. But the old spike holes were so far off from the new ones as not to interfere. As soon as the bridge at St. Louis is completed the same cars can pass from Philadelphia to the western borders of Kansas, and, in a few months more, to Denver City. The ehange of guage from 4 feet 8½ inches to 4 feet 9 inches, and from 4 feet 10 inches to 4 feet 9 inches, is taking place on many roads to suit the so-called compromise wheels. The guage of 4 feet 9 inches will probably become universal. It is a great pity that President Lincoln did not decide for 5 feet when he fixed the gauge of the Union Pacifie, for it was understood by railroad men that the guage of that road would determine the future guage of the whole country. Since writing the above we learn by telegraph that the South Pacific Railway, which runs from St. Louis to the Southwest corner of Missouri, changed its guage on Thursday to conform with the Missouri Pacific, which runs from St Louis to Kansas City. The Kansas Pacific, from Kansas City and Leavenworth to the west Kansas line, retains its original guage of 4 feet 8½ inches.—*U. S. R. R. Journal.*

—The Simcoe *Reformer* says a meeting of the Directors of the Norfolk Railway Company was held in this town on the 24th inst. We are not in posession of a report of the proceedings, but understand that arrangements are being made for opening stock books at once. George Laidlaw, Esq., of Toronto, was appointed Secretary of the company. The Directors express themselves as sanguine that the work of building the road will soon be in progress, and rapidly pushed forward to completion. We need not say that we sincercly trust their hopes would be realized.

Insurance.

FIRE RECORD.—Canning, Nova Scotia, July.—The *Chronicle* says the fire commeneed in the store lately occupied by B. & l. Bigelow, and extended east to stores of Charles Dickie and G. E. Eaton & Co., and west to the stores of J. R. Kennedy, Sheffield & Wickwire and M. Reddy, burning in all eight buildings, three of them three stories in height. The loss in buildings is heavy; nearly eovered by insurance. The goods were mostly saved, and mostly insured in the London, Liverpool and Globe and other offices. The fire engine purchased since the last fire, did good service, and saved a general conflagration, J. H. Clark's three-story store had caught fire, which was extinguished by it, and kept the devouring element from crossing the street, as it did in the former fire of July, 1866. There may be other sufferers, but up to the hour of going to press we were unable to learn further particulars.

Fall river Bathrust 16th July.—The saw mill of Playfare & Steadman.

North Eastern Township, July 22.—The barns of Robert McLarty were struck by lightniug. Both buildings were totally destroyed, together with all their contents, consisting of a mowing machine, farming implements, buggy, cutter, harness, &c. Mr. McLarty's loss is estimated at about $3,000, and he was only insured for $400.

Princeton, Ont., July 22.—The barn belonging to Mr. McCrow, near Princeton, was destroyed, with its contents, by lightning. The property was insured for $1,000.

INTERNATIONAL LIFE OF LONDON.—The *Insurance Times* says:—Jay Cooke, Esq., the eminent Banker, has made a proposition to the receiver of this company, to re-insure its risks in the National Life of the United States of America, on a basis of 6 per cent. The terms have been submitted to the Prudential of London, which company assumed the risks of the International, and as there are sufficient funds in the department belonging to the International to re-insure at 6 per cent. the 400 policies still held by Americans in this company, it is to be hoped that Jay Cooke's offer will be accepted.

CAPTAINS *vs.* UNDERWRITERS.—"An Underwriter" in Halifax, has addressed the following letter to the editor of the *Chronicle*:—I may say that it has almost become a bye-word with underwriters, "what is to be done to protect our interests?" There is hardly a day but what the loss of some vessel is reported, and in many cases these losses are far from creditable to the masters, as gross carelessness, to say the least, is often the cause. I could give some of the most glaring instances, not only of carelessness, but actual fraud, which have come under my own notice, which should have sent the master to stand watch on the quarter deck of a ship that does not require a compass, but is navigated by a hammer and stone.

A day or two ago three vessels were reported lost on the coast, in one of which cases at least, gross carelessness to the interests of the underwriters was manifested. I allude to the brig *Foyle*, which got ashore at Bridgeport, and before an agent could be appointed by the underwriters even by telegraph, a notary and the captain had condemned and sold her, while with very little trouble, the purchaser got her afloat in a few hours. Now, I ask underwriters if nothing can be done to bring such a "captain" before them. A man who would abandon a fine vessel under such circumstances, counseled by a notary, who probably can hardly tell an anchor from a cooking stove, should never be allowed to take charge of another. Yet he, like many others before him, equally culpable, will probably take charge of another vessel, and will get insurance effected at as low rates as the best.

Now, were a board of underwriters formed, and a proper agent appointed, who would do his duty, and bring such men to book for every loss, I feel satisfied that the lead would go over the side a little oftener when vessels are standing in for the land in thick weather; and shipmasters might be taught to attend to their own business, instead of running off to the first notary they can find, to fix their papers to stand law. If his certificate were in danger, he would probably attend to running an anchor and chain out, and in many cases save his ship.

It is not an unusual case when a vessel is running off her class, to get her restored again, or

paid for by the underwriters, and in some cases add a hurricane deck and call her new. When away from home, a master has great power, and can call as a survey on a vessel, many men who will report as he pays them, and thus defraud underwriters.

The Ætna Insurance Company was incorporated in 1819, with perpetual succession, and commenced business on the 17th August, in the same year. Its original capital was $150,000, which has been increased at different intervals, as follows: December 1822, $50,000; January, 1846, $50,000; October, 1849, $50,000; December, 1854, $200,000; July 1857, $500,000; January, 1864, $750,000; February, 1866, $750,000; aggregate, $3,000,000. Of this existing three million capital, $2,805,000 represents savings from the company's business, or dividends which were paid in stock. The total cash dividends paid to stockholders of the company, since its organization, amounts to $4,189,950, which with the stock dividends, foots up $6,994,050, as the entire savings from $40,647,317, the aggregate premium receipts. The total amount of losses paid by the company during the same period, is $24,389,453. From these figures we deduce the following average of results: Percentage of losses to premium receipts, 59.90; percentage of expenses to premium receipts 20.27. It should be observed, however, that this calculation takes no account of receipts from interest upon investments, or from appreciation of securities.—*Spectator.*

—An attempt was made one night last week to burn the Royal Hotel in Orillia. The fire was discovered in time and extinguished. The *Expositor* says that on examination it was found that the paper used by the incendiary consisted in whole or in part of a bundle of the circulars of an insurance agent named Colin Campbell, who was boarding at the Royal Hotel. It was subsequently ascertained that this individual having for some cause became incensed at Mrs. Johnson, had threatened that he would be revenged. At the excursion on Monday evening, he told a youth not to sleep at the hotel that night, "for he intended to make it warm for them before morning." It was also found that he was not in his room at the hotel. Campbell was arrested, and at the preliminary examination he was unabled to give a satisfactory account of his whereabouts during the night. There being a strong chain of circumstantial evidence against the brisoner, he was sent to Barrie for trial.

—A survey was held here yesterday upon the sch Lafayette Cook, damaged on the Charity Shoals, which resulted in an opinion that repairs upon her would be required to the amount of $1,200 to $1,500. She is insured in the British and Ætna companies.

—Mr Fackler, the Actuary, in a communicaton to the New York *Times*, says that some of the life companies have made fraudulent statements for years to Superintendent Barnes, and that the latter "shuts his eyes and publishes them without criticism." This is a charge of the gravest character, and we hope it has not much foundation.

Mineral Paints.—Some excitement has been created in the village of Washington, in the county of Oxford, by the discovery near that place of a valuable and extensive mine of oxide of iron, from which several kinds of paints have been successfully manufactured. The paint mine was discovered last fall, and is now being worked by the lessee and proprietor, Mr. D. Winter. Five distinct colours are manufactured, namely—yellow ochre, light and dark red, and light and dark drab, umber. A trial of the manufactured article has been made by the painters of Washington and Plantsville, who pronounce it to be of a superior quality.

—It is stated that Mr. Cummins, of Brampton, has discovered a bed of soapstone on his lot, on the town line between Madoc and Elzevir.

Madoc Mining Intelligence.—The second cleaning up at the Gillen C.o's mill was completed last week, the result being nearly 7½ oz. of gold. Although more than a week had elapsed since the first ingot was obtained, the above yield is estimated as equal to a week's actual work; the difference being accounted for by one of the stamps breaking down, and by some deficiency in the mill-dam impeding operations. We hear that owing to the promising aspect of affairs at the Gillen Co.'s property, it is in contemplation to remove the Caldwell mill for its present site to that neighbourhood; and also a rumour that the Toronto and Whitby Co.'s mill may be removed from Bannockburn to Marmora.—*Mercury.*

—A St. John's paper says the Caledonia and the Budroe free stone quarries in Rockland, N. B., are in a flourishing condition, and are doing a very large business. The Caledonia Quarries owned by Messrs. Daniel & Boyd, of St. John, and Messrs. Smith & M'Kelvey, of Sackville, employ upwards of 75 men, and have manufactured and shipped to the United States, during the last five months, 800 tons of stone. The Budroe Quarry employs 96 men, besides horses, and turns out 2,500 tons of stone yearly. The latter quarry is owned by a New York Company, and it is larger than the Caledonia Quarry, and turns out more stone.

—Large quantities of spruce and pine wood are being shipped from Rockland, N. B., to Philadelphia, for the purpose of manufacturing it into paper. Mr. William Chapman has shipped during the summer 460 cords, and has orders for as much more.

Commercial.

The Harvest of 1868.

Arrived at the first week in August we should be well able to estimate the seasons crop of cereals, with some degree of certainty, but such has been the state of the weather that harvesting has been delayed a fortnight; it will therefore be necessary to wait that much longer before knowing what is in store for us. The subject is one of prime consequence, but unfortunately the information to be had is of the most vague and disjointed character. Even under favorable circumsnances it is next to impossible to get reliable intelligence. It has to be derived from many separate sources, and each report partakes of the hopeful or desponding views of its compilers. In the United States, with a tolerably well organised corps of informants, the reports of the Bureau are looked upon as just about as valuable as the opiuion of any single intelligent man on the same subject, and are so trusted. In Canada we cannot produce anything so authoritative as an official report; but from the collected information of leading mercantile firms, who watch the subject with the greatest interest, and who are regularly advised by their customers—men as capable of judging, and as deeply interested, as any class in the community—we can glean facts from which certain general conclusions may be drawn with great safety.

The bulk of the hay crop is now gathered, but the work has been uncommonly tedious and expensive, owing to the ever-interrupting showers; a good deal is yet out and will have to take its chance till the earlier wheat and barley is cared for; much of it will be inferior in quality from being badly saved or too ripe; still since it coverd the earth as a thick carpet and yielded quantities almost without precedent, there will be a great abundance. The root crop has not been so good for many years; this is a universal tale. There is a tendency to grow too much to the tops, instead of filling out at the roots, but time will set this all right. With plenty of hay and roots comes also plenty of beef, mutton, butter, tallow, wool, &c.,- staples second only to our leading cereals and lumber.

Turning to the wheat crop, there is a great diversity of opinion. The most gloomy accounts are from the newer and recently most productive sections of the country, and the most favorable from the older sections. The boot seems fairly to have got upon the other foot. Three years ago no wheat worth talking of could be found, near Toronto, because of the midge, which the northwestern section of Ontario grew it in great abundance, and knew nothing of that pest; now it is unknown here, exeept by recollection, while there it is dealing deadly destruction over a wide area. With so much wet there must be, and is, rust, with plenty of it. A large breadth was sown and, taking all in all, a fine crop will be reaped; but not so large as was estimated a month ago, by the most reliable authorities; probably before all is over there will be still less than we now expect. A great growth of straw is liable to deceive, and this deception becomes apparent on thrashing day. Oats and barley, enough and to spare, will be harvested. Peas eannot yet be judged; the bug may take the conceit out of them before they are in the grainery.

On the whole the prospect is delightful, "yellow fields of waving corn," full of promise and wealth, cover immense tracts of the most fertile soil, on the face of the broad earth; the shout of "harvest home." will soon ring throughout the land; millions of graineries will be filled as they have seldom been filled before. All this points to enhanced agricultural and commereial prosperity; it brings good news for the great earrying trade of the country; it will nourish and stimulate every other interest in the Dominion. And it is pleasant to add that the same hopeful story comes to us from almost every country the world over.

Boot and Shoe Trade.

The shoe business of Lynn, Mass., is steadily increasing. The total nuumber of eases of boots and shoes manufactured in and sent away from Lynn during the six months ending July 1st, was 114,480—of which the first quarter of the year gave 62,911 cases, and the second 51,569 eases. For the first six months of 1868 the shipments were 98,361 eases, showing a gain of 16,089 eases this year. The total number of pairs of shoes manufactured and shipped during the past six months was 6,868,800, having a value of nearly if not quite ten million dollars.

Disasters on the Lakes.

The statistics of the passenger travel and the disasters during 1868 are as follows: Passengers carried 900,000; lives lost from fire, 73; from collision, 51; from wreck, 26; from explosion, 1; making a total of 151. The accidents were 19 in number, as follows: Collisions, 8; fire, 6; striking on sandbars or rocks, 3; foundering, 2. Of the fires, five were of vessels burned at night, while lying at the dock.

Oil at Petrolia.

(From our own Correspondent.)

Petrolia, Aug. 2, 1869.

A number of new wells are about being put down, viz.: Mr. Noble, near the large still, two wells; Mr. Shields, of Inland Revenue Department together with Frank Smith, near large still, one well; Samuel Stokes, north of Pithole station, 1 well; Mr. Walker, south do, one well; Col. C. B. Parsons, near his own well, one well; Mr. Lauey, near his own well, one well; Mr. Woodward, in King Fenceton, one well; besides some 8 or ten others. The old wells have done admirably this week and will average some 800 barrels per day. Sixteen ear loads of erude oil left Petrolia station on Thursday last, and there were two more which could not be taken. Business is very brisk and there appears to be a certainty of an increased price for crude.

The export trade has now assumed an important item in Canadian eommeree and it appears doubtful whether, after the accumulation of crude oil is worked off, we can supply enough to furnish the demands of the exporters. This, doubtless, will stimulate and has to a certain extent stimulated the production of oil, and caused the putting down of so many new wells. There is nothing to

hinder Canadian competing successfully with American oil. At present our oils are shipped through American ports, but I think, before long, the St. Lawrence will prove a far more profitable channel for exportation.

Petroleum.

The following shows the exports of Petroleum from the United States from January 1 to July 20:

	1869.	1868.
From New York.....galls	34,321,892	26,687,376
Boston.....	1,241,003	1,286,606
Philadelphia	13,777,943	17,578,125
Baltimore.....	753,953	1,053,886
Cleveland.....	.....	214,508
Total export from the U. S.	50,194,796	46,820,501
Same time 1867		32,286,385
Same time 1866		29,159,711

Crude Oil Association.

At a special meeting of the Oil Producers' Association, held the 21st, a report was presented, showing the business done for the half year ended June 30th, as follows:—Oil delivered during the six months, 69,813 brls. Sold for following prices:

31,322 brls.	Oil,	at	$0 75	$23,491	50
2,164 "	"	"	1 07½.....	2,326	40
1,116 "	"	for	....	1,464	00
23,857 "	"	at	1 00	23,857	00
7,208 "	"	"	1 25	9,010	00
4,146 "	"	"	1 62½.....	6,737	25
Amount received				$66,886	05
Paid Producers.....			$63,670	40	
" Expenses.....			1,687	85	
Balance on hand.....			1,527	80	
				$66,886	05

Advance in Freights.

A meeting of the ship-brokers at Buffalo was held the other day, at which a union was formed, and the rates of freight advanced. The following is the tariff for the present, as fixed by the union: Coal—Erie and Cleveland to Chicago, down town dock, $1.25, free of handling; Erie and Cleveland to up-town dock, Chicago, $1.91, free on board; Buffalo to Chicago, $1 free; Buffalo to Milwaukee, 87½c., free; Erie and Cleveland to Milwaukee, $1 00 free; Buffalo to Toledo, Detriot and Cleveland, 75c. f. o. b. and trimmed. Iron—Buffalo to Chicago and Milwaukee $1, free. Water Lime—Buffalo to Toledo, Erie, Cleveland and Detroit 10c. per brl.; slate $1 per ton; stone $3 per cord; marble $1 per ton, free.

Tobacco.

The cultivation of tobacco is increasing in Indiana. It is stated that the weed is raised on almost every farm in Dubois, Orange, Green, Davies, Pike, Gibson, and Martin counties. In Huntingdon, Dubois county, there are four large tobacco stemmeries, which shipped last year 700 hhds. of tobbacco, worth $350,000.

The Wine Trade.

The trade in Port wine for the past six months as evinced by the shipments from Oporto, presents a very satisfactory increase upon the past two years; some of the small shippers show most conspicuously by their increased trade. Trade at home and abroad continues quiet. Advices from the wine-growing districts are of rather a grumbling nature, but it is as yet premature to speak positively on the subject. Quotations—Common young 22*l.* to 28*l.*; stout fair, 30*l.* to 40*l.*; vintage 1863, 45*l.* to 65*l.*; vintage 1864, 36*l.* to 50*l.*; vintage 1865, 40*l.* to 55*l.*; superior old, 50*l.* to 60*l.*; very fine, 65*l.* to 85*l.*

The trade in brandy continues in a state of almost unprecedented dulness, which will not be improved whilst the present weather continues. There is every prospect of an abundant, if not an early, vintage. The absence of export demand causes brandy of the 1868 vintage to be neglected. Older vintages continue to hold their own, but are slow of sale.—*London Grocer.*

Beet Root Sugar Crop.

The last issue of the Sugar Makers' *Journal* of France says that real autumn weather has set in and that the heat has proved favorable to the beet harvest. Reports of the crop continue to vary according to the locality. In a number of districts it is generally in fine condition, in others not so good, and in some places there are great complaints of the white worms which are attacking the beet with all their destructive powers. The smaller beets, which are expected to form the greater portion of the harvest, require frequent watering, and they must have very favourable weather if they are to turn out well. The fine promises of spring have vanished, and a good medium harvest is all that can be expected, but it will not nearly approach to the 300 million kilogrammes of sugar which we looked forward to at the commencement of the season. The temperature, which has greatly improved in Germany, has produced a radical change in the growth of the beet, and has quite dissipated all the fears which we entertained as to the approaching harvest. According to the more recent estimates taken in all sugar producing conutries in Europe, the production on the quantity of beet sown will be 10 per cent. more than last year.

Crops in England.

Mr. A. K. Jackson, of Mark Lane, London, who has been traversing the great wheat-growing region of England, along the east coast, writes to the *Times* under date of June 16, that although May and June have been very wet and cold, the prospect is good for a reasonably fair crop of wheat; barley is not so good, while oats, with good weather, will yield very largely, and beans and peas are remarkably promising. He reports the crops in other European countries as "uneven but not small," and says that the Algerian harvest is good, and the French barley-cutting has begun well. The price of wheat in England is less by one-third than it was one year ago, being then 69s 1½d a quarter, and now only 45s 8¼d. Mr. Jackson says that the wheat in Cambridgeshire is expected to bloom by June 25, in average years; this year it was a week later, though many fields in Kent were in bloom at that date. Hot weather was much desired, as it has been here, showing that the cold rains we have had here prevailed also in England.

An English journal, believed to be well informformed, says of the crops:—1. That the wheat is, on the whole, a deficient one. 2. That barley is also a deficient crop to, at least, the same extent as wheat. 3. That the crop of oats, though not so generally deficient as that of wheat and barley, is considerably below an average. 4. That beans and peas are an excellent crop, and very much above the average. 5. That potatoes are a good crop. 6. That mangolds and turnips give promise of being a good crop. 7. That clover is a fair crop, and hay an extraordinarily great crop.

The great practical deduction to be drawn from the above is that there will be a short supply of the cereals which come most into use as as the direct food of man, while there will be an abundance of those meat-making products which are consumed by our live stock. These reports will, in some degree, be affected by the certainty, which the report assures us of, that the harvest will be at least three weeks later than usual, and will be a prolonged one, owing to the backward districts being much more than three weeks behind the usual period with harvest. The stocks of grain will have to be drawn upon for about an additional month's consumption now; but, on the other hand, should we have harvest at the usual period next year, the crop of this year now growing will only be called upon to meet the demand for twelve instead of thirteen lunar months.

English Goods Markets.

Huddersfield.—Both English and foreign buyers of the fancy goods produced in this neighbourhood have shown a fair amount of activity. Almost every scrap of summer fabric being cleared out from the wholesale department, and merchants are storing themselves fully with the choicest novelties that are close at hand. Not less extensive have been the operations in the same departments of the Canadian buyers. The Continental buyers may have imitated them on but a small scale, yet the clearance of fancy trouserings and coatings for shipment has been satisfactory to the makers.

Leeds.—There has been a slight increase of business in some departments of the cloth-halls. So many out-town houses were not represented as earlier in the month, but the shipping trade shows a fair amount of animation. There is more buying in the way of speculation than has been noticeable since the beginning of the year, and there is a growing confidence as to the success of the fall and winter trade so soon to open. There has been in the coloured cloth-hall a fair inquiry for tweeds, meltons, and coatings. The former have changed hands to about an average extent, and there have been large deliveries to order. The market for plain cloths, as also for beavers and goods of that class, is steady, and not worse than it has been for two or three weeks past. There is more inquiry for black unions than for some time past, the medium and low-priced qualities forming the bulk of the sales. Hair lists and white mediums did not attract much attention in the white cloth-hall, but it is well known that the makers never were busier, having engagements for delivery to time at the warehouses.

Manchester.—Though there has been more activity, there is no substantial improvement to report. Early in the month, through the stronger tone in Liverpool, a marked improvement in the demand here was manifested, leading to an increased production, which has been fully absorbed. The middle of the month showed a lull, but during the last week, owing to the renewal of large transactions in cotton, this market has again become stronger, and the month closes with prices ruling, on the average, from 2½ per cent. to 5 per cent. higher than those current at the end of May. More failures have occurred during the month, showing further the disastrous position of the manufacturing interest here. Unless the new American cotton crop show a material increase—which cannot be ascertained for some time to come—we may have to pass through another year with the same unhappy results as have characterised the last twelve months. In Twist there has been rather an active business done during the greater part of the month, at hardening prices. The principal operations have been for East India and China, and in descriptions adapted for those markets, transactions of fair extent have been entered into. Buyers for the Home trade have also purchased pretty freely. The German merchants have operated cautiously, being discouraged by the poor accounts from the Continental markets, and their purchases have only been moderate. The general demand has absorbed the production, which has rather increased this month, and stocks continue very light. Prices have gradually advanced, and now rule about 1d per lb higher than at the close of last month. In the Goods market there have been few large transactions, but a fair general business has been done, and although buyers have been reluctant to follow any material advance, still current rates are higher than they were a month ago. Stocks generally are not heavy, and have rather diminished than increased during the month.

Condition of Trade in Great Britain.

The close of the half-year seems to be an appropriate period, not only for briefly reviewing that portion of 1869 which it was believed by so many (whose wish was the father to the thought) would see a material improvement in commercial and mouetary affairs generally, but also for looking forward into the future and endeavouring to form some opinion by the existing indications, of what we may reasonably expect to see during the second half of 1869. First, then, the six months that

are drawing to a close have witnessed a lull in the activity in one department—and not the least important part of the business which is carried on between the nations of the earth—in that of borrowing and lending. England saves faster, and has more to lend, than any other country, because her people make profits quicker; and when a general stagnation sets in throughout Europe in consequence of a break down at the great centre, a vast deal of capital accumulates, as we have seen, independently of the savings, and is one of the greatest dangers in times of stagnation, as affording the most direct encouragement to engage in the kind of speculation which caused the collapse. The only approach to transactions of magnitude in any of the ramifications of trade beyond the importation of foreign bonds, has been in iron, and as part compensation for the loss which the country recently suffered by overshoooting the mark as usual, our share in furnishing railway material to Russia, Austria and Hungary, America, and in a minor degree to some two or three other countries, may be mentioned. The extent to which the investment in foreign bonds was carried will be indirectly productive of good at least to this country, although it is not generally seen. Without the assistance which has thus been rendered to the Government of Russia more particularly, the lines of railway which it may safely be predicted will henceforth prevent the prices in Mark-lane ever reachingagain what they have been could not have been constructed for years to come. Upon the completion of the lines which are being hurried forward, the produce of the great corn districts of the Baltic provinces will be no longer dependent upon the means of transport to Western Europe which hitherto have been barred by the ice, shortly after that period when the harvest yield of those nations which can pay the best price is accurately known. Beyond the partial revival in the iron districts which has thus been caused, we look in other directions in vain for indications of a similar nature; and the best proof that the immediate future prospects afford but little encouragement to the hundreds of unemployed is found in the stream of human beings which now sets in the direction of the United States and Canada from these shores.—*Morgan's Trade Journal.*

British Metal Market for the Quarter ended June 30.

A glance at the trade of the metal market during the last three months does not afford the satisfaction and encouragement which all had fairly looked for. Spring has come and gone, and in spite of peace everywhere, a low rate of discount, and other favourable circumstances, trade has been only steady—a steadiness, indeed, approaching dulness and inactivity. During the last part of the quarter there has been a slight movement for the better. In the early part of April, manufacturers were somewhat busy, owing, probably, more to the accumulation of orders during the Easter holidys than to any permanent revival in trade. In a week or two, business became dull again, and so it remained during the rest of the month, and also throughout May. Trade, the manufacturers reported, did not reach the average for that time of the year. During the early part of June, trade remained dull, but towards the end of the first fortnight, there came a better feeling. The reduction of the rate of discount from 4½ to 4 per cent. doubtless stimulated business, and gave rise to a hope that a better trade would soon be experienced. Nor has the expectation been altogether unrealized. The tone of the market is improving. Orders, of greater value than have lately found their way out, are now being regularly received; and as they embrace the general kinds of metals they lead to the inference that buyers are more disposed to enter into negotiations than they have been for some time. Prices are a little firmer, and there is every probability that they will become still more in favour of vendors.

Copper is decidedly improved, and prices are stiffer.

Iron.—In the general kinds of Staffordshire iron there is hardly so much doing, except in iron for constructive purposes, and for bridge and girder building. The demand for rails continues active, and other makers will, it is expected, enter the trade when they have watched how those makers succeed who have adapted their mills to this kind of work. The Welsh makers are well engaged upon Russian and American rail orders. Pigs are mostly firm.

For *Steel* there is a better foreign enquiry.

Both English and Foreign *Tin* keeps in small demand. Only little is done in Straits at the price quoted, and English, saving refined, is sold under the price named.

Tin Plates are somewhat increasing in demand.

The market is quiet for *Lead*; but for *Spelter* the market is firm, although the transactions have not been large.—*Morgan's Trade Journal.*

Stocks of Provisions at Liverpool.

The following is a statement showing the stocks of provisions at Liverpool at the close of the half-year ending June 30, as compared with that of the two previous years:—On July 30, 1869, 25,881 tierces beef (including 17,348 tierces old and Texas), 3,812 barrels pork, 10,645 boxes bacon (including 3,284 hams and sholders), 350 tons lard, 11,274 boxes cheese, and 4,164 packages butter. On June 30, 1868, 16,636 tierces beef, 5,212 barells pork, 16,612 boxes bacon (including 616 hams and sholders), 1,100 tons lard, 9,116 boxes cheese, and 65 packages butter. On June 30, 1867, 3780 tierces beef, 5,396 barrels pork, 7813 boxes bacon, 253 tons lard, 11,461 boxes cheese, and 4580 packages butter.

Wool.

A Buffalo paper says—There is danger that the Canadian buyers of combing wool will sustain heavy losses. Agents of the Pacific Mills, the largest establishment in the country, are said to be now in England, where they can obtain combing wool on more favorable terms than in the Canadian markets.

The Currant Crop.

A letter from Patras, dated July 8, says:—"Although this has been subject to many vicissitudes on account of the continued prevalence of unusually moist weather, yet we may, on the whole, expect a moderately abundant yield. The weather appears now fixedly hot and fine—facts most conducive to the maturity of the currants."

British America Assurance Company.

THE Thirty-fifth Annual Court of Proprietors of this Institution was held on Monday, the 2nd Instant, as prescribed by the Act of Incorporation, when the following gentlemen were elected for the ensuing year, viz.:

GEORGE PERCIVAL RIDOUT, ESQ., of Toronto.
PETER PATERSON, ESQ, of Scarboro'.
E. H. RUTHERFORD, ESQ., of Toronto.
HON. WM. CAYLEY, of Toronto.
HON. G. W. ALLAN, of Toronto.
GEORGE J. BOYD, ESQ., of Toronto.
THOS C. STREET, ESQ., M.P.P., of Clark Hill.
PELEG HOWLAND, ESQ., of Toronto.
A. JOSEPH, ESQ., of Quebec.

At a meeting of the Board, this day, the undermentioned were unanimously re-chosen for the respective offices:

Governor—G. P. RIDOUT, ESQ.
Deputy-Governor—PETER PATERSON, ESQ.
Trustees—E. H. RUTHERFORD, ESQ., HON. WM. CAYLEY, GEO. J. BOYD, ESQ.

By order of the Board.
F. W. BIRCHALL, Manager,
Per JOHN EVANS, Accountant.

British America Assurance Office, Toronto, 3rd August, 1869. aug 5-1t

Western Assurance Company.

NOTICE is hereby given that the Annual General Meeting of the Shareholders of this Company will be held at the Company's offices, Church Street, Toronto, on Tuesday the 21st day of August next, at 12 o'clock, noon, to receive the Directors' reports, with the Financial Statements for the year ending 30th June last, and also for the Election of Directors to serve during the ensuing year.

By order of the Board,
BERNARD HALDAN, Secretary.

Western Assurance Company's Office, Toronto, 31st July, 1869.

Arthur Jones,
Land Surveyor and Timber Agent.

IMPROVED and unimproved lands for sale, in the Counties of Kent, Essex, Lambton, Middlesex, and Elgin.

Chatham County, Kent, Ontario

Northern Railway of Canada.

THE half yearly meeting of the proprietors of this Company will be held in their offices, Brock Street, on

WEDNESDAY, THE ELEVENTH DAY OF AUGUST,
At TWELVE o'clock, noon, precisely,

when the Report of the Directors and the Financial Statements for the half year, ending 30th June last, will be submitted.

By order,
THOS. HAMILTON,
Secretary.

Toronto, 27th July, 1869.

NOTICE.

Office of the Toronto, Grey and Bruce Railway Company.

A GENERAL Meeting of the Subscribers to the Capital Stock of the Toronto, Grey and Bruce Railway Company will be held at the office of the said Company, No. 46 Front Street, in the City of Toronto, on TUESDAY, the 10th day of August next, at TWELVE o'clock noon, for the purpose of electing Directors and organizing the said Company.

W. SUTHERLAND TAYLOR,
Toronto, July 7, 1869. Secretary.

Western Assurance Company.

NOTICE is hereby given, that a dividend for the half-year, ending the 30th ult., at the rate of EIGHT per cent. per annum, upon the capital paid-up stock of this Company, has been declared, and will be payable at the Company's office, on and after Friday, the 9th inst.

By order of the Board.
BERNARD HALDAN.
Secretary.

Western Assurance Co.'s Office,
Toronto, 1st July, 1869.

Morton & Smith,

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ...Ottawa.
EDWARD A. C. PEW, Esq.,... .....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq..... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1.375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (36-1y) DAVID HIGGINS, SECRETARY.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.

SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.

ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $6,000,000.

ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.

ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.

The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.

$140,000 deposited in Canada for the benefit of Policyholders.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

OFFICE - - - - - - No. 53 King Street East, Toronto.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Insurance.

Briton Medical and General Life Association,

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introdueed by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family,* and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.

Meetings.

TORONTO, GREY AND BRUCE RAILWAY.

The first annual meeting of the Shareholders of the Toronto, Grey and Bruce Railway was held in Toronto on the 10th inst., the following gentlemen were present:—Messrs. Hon. D. L. McPherson, H. S. Howland, George Laidlaw, W. S. Lee, John Baxter, W. D. Mathews, A. R. MeMaster, John Shedden, John Brown, James Bain, John McNab (Lyman McNab,) John Gintey, John Burns and Wm. Thompson, of Thompson & Burns, C. J. Campbell, J. L. Blackie. John Canavan, James Bennett, James Graham, T. C. Chisholm, S. M. Jarvis, W. T, Mason, John Morrison, A. W. Leander, M.P.P., W. H. Beatty, Thomas Lailey, R. W. Elliott, Capt, Perry, Ald. Dickey, John Buchan, L. R. Boulton, J. H. Ince, Noah Barnhart, Isaac Harris, Caledon; Thos. Bell, Caledon; Nathan Clarke, Jackson Potter, Caledon; R. H. Brett, Mono; W. H. Hunter, Reeve, East Garafraxa; Maitland McCarthy, Orangeville; Wm. Gillespie, do.; W. J. Middleton, do.; Patrick McGlanchlin, Mono Mills; L. R. Boulton, Bonlton Village; John Guardhouse, Boulton, and others.

On motion of Mr. A. R. McMaster, Mr. W. S. Taylor was then appointed Seeretary, and Messrs. C. J. Campbell and John L. Blaikie were appointed Scrutineers.

The Chairman, J. G. Worts, Esq., then stated that he had great pleasure in taking the chair under such favorable auspices. They had most auspicions weather, bomtiful crops, and everything to help forward, the great project commeneed to day. He was happy to say that stock to the amount of $311,511 had been subscribed, a sum considerable over that required by law to organize the company. He had also great pleasure to inform them that Mr. Fox had been as far as the Caledon Mountains and found that instead of having the difficulties he expected they were not one half what was expected, and he even told them that they were not half as serious an obstacle to be overcome as at the Rouge on the Eastern line. Mr. Fox still confidently assured them that $15,000 a mile will cover the whole expense of the road, and he need hardly tell them that the trade of the County of Bruce is well worth competing for; and if they had seen the papers lately, as they no doubt had, they would read of the exertions made by Hamilton to secure it. He had the opportunity of travelling through the county of Bruce on the business of the road some time ago, and a finer country he never saw. He felt perfectly satisfied that so far as the cutting the first section through was all the company could do at present, but they shonld, nor would they, he said rest satisfied till they went to Southampton. The railway would pay in one year in the difference between the getting of barley to market and leaving it over till the spring, to be brought 80 or 90 miles slow travelling. He thought they would see that this of itself was an important item, and one that would induee us to build the road. They saw the exertions of the Hamiltonians, and there was no doubt that when they used such efforts they must anticipate some advantage. He thought the present fine weather would do more for the road than anything else. Every day would add to the stores in the farmer's barns, and if the present weather eontinued for two or three weeks Canada would never see a more prosperous season. He had pleasure in telling them also that Mr. Laidlaw had consented to aet on the board and still continne a working member. (Cheers.) This, he felt wonld be reeeived with pleasnre by everyone, for Mr. Laidlaw they knew was a modest man; (cheers) they all knew that if it was not for Mr. Laidlaw the project would never have been as far advaneed as it is. The question was now open for the election of Directors, and he would be happy to hear any expression of opinion in regard to the matter.

The following gentlemen were elected Directors:—George Laidlaw, John Shedden John Gordon, George Gooderham, Thomas Lailey, Noah Barnhart, James E. Smith, A. R. McMaster, H. S. Howard.

NORTHERN RAILWAY.

The semi-annual meeting was held on the 11th; the President in the chair. The Managing Director submitted the following Report;

1. The Canadian Directors have the pleasure to submit their Report for the half-year ending 30th Jnne, 1869, embracing the usnal returns of Income and Expenditure, Details of Accounts, and Auditors' Reports.

2. The Gross Traffic Receipts, from all sourees, have amounted to $310,012.69 (£63,701 4s 9d stg.) as against $275,073.34 (£56,521 18s 4d stg.) for the corresponding period of 1868, being an increase of 12.70 per cent. in favor of 1869.

3. The ordinary Working Expenses of the half-year have amounted to $168,094.89 (£34,640 0s. 11d., stg.) as against $173, 412.31 (£35,632 13s. 3d., stg.) in 1868, being at the rate of 54.22 per cent. of the gross earnings, as in comparison with 63.04 per cent. in 1868, or a decrease of 8.22 per eent. in in the half-year now reported.

4. The additional outlay for works of extension, as Rolling Stock, Buildings, Wharves, &c., necessary to provide for the demands of an increasing traffic, has been $62,020.08 (£12,743 17s. 1d., stg.) as eompared with $23,938.39 (£4,918 16s. 11d., stg.) for similar services in 1868.

5. The Net Revenue of the half-year, available for dividend, has amonnted to $79,897.72 (£16,417 6s. 9d. stg.) as against $75,335.40 (£15,479 17s. 7d., stg.) in 1868. After payment of current Interest Dividends on both classes of the Company's bonds, a balance has been carried forward of $36,458.34 (£7,491 8s. 10d. stg.) to the credit of Interest Dividend account.

6. Considerable additions have been made to the Rolling Stock and other equipment of the line, during the past half-year; but these provisions are yet wholly inadequate to the increasing traffic, and the Directors reeognize the necessity for adding more largely, and at the earliest possible moment, to the outfit, so that the transportation service of next year may be relieved of the embarrassments from which it has hitherto snffered.

7. The constrnction of the New Grain Elevator, Wharf, and approaches, at Toronto, is proceeding satisfactorily, and every effort is being made to ensure its completion in time for the winter storage of the present crop.

8. The Directors have been invited to consider the project of an extension of this Railway from

Barrie to Orillia. Such an enterprise, to be successful, must be initiated by the people themselves acting unitedly together, and contributing by Municipal and other aid such assistance as, with the cordial co-operation of this company, should secure an early, substantial and remunerative execution of the work. Awaiting such an efficient organization between all the local interests as will warrant practical measures, the Directors have expressed their entire approval of the project, and their readiness to promote it by whatever assistance or influence they can command.

(Signed) Fred. Cumberland, Man'g Director.

(Signed) John Beverley Robinson, President.

The President moved the adoption of the report, which was seconded by J. D. Ridout, and unanimously carried.

Moved by G. H. Wyatt, seconded by D'Arcy Boulton, and unanimously carried, that Mr. E. Osler be appointed one of the auditors of this company in the place of Mr. James Brown, whose resignation is accepted with regret; and this meeting desires to express to Mr. Brown its appreciation of his faithful and efficient services as auditor of this company.

Insurance.

Fire Record.—The saw mill with shingle and lathe machinery attached, belonging to Mr. Cane, fifth concession East Gwillimbury, was consumed on the 11th August, and between four and five thousand dollars worth lumber destroyed. Total loss about $15,000. No insurance.

Coverdale, Albert County, N.B.—The dwelling house of John Mitton, Esq., of Coverdale, was burned to the ground with all its contents; also a new house in the course of erection and nearly completed; together with all the tools of the contractor. Origin of the fire unknown. Loss estimated at $2,500. No insurance.

The Douglas Steam Saw Mill, owned by Z. Ring Esq., and others, situate on the Nashwaakisi River, N.B., was totally destroyed by fire, on the 3rd inst. There is little doubt that the incendiary has been at work, as the Mill, though in good order, has not been in operation these four or five years.

The dwelling house and barn of Mrs. Chapman, situated at North River Railway Crossing, Salisbury Parish, N.B., was destroyed by fire one night last week. The fire caught in the barn, and was said to be the result of drinking and smoking. No insurance.

The fire at Fredericton, on 31st ult., destroyed the M'Lean & Dowling Warehouse, occupied by Mr. Moarn; two houses belonging to Mrs. M'Lean, and occupied, one by Mrs. M'Manus, the other by Mrs. M'Leod and several tenements; and two dwellings and outbuildings occupied respectively by Mr. Wright and Mr. Tattersall. Much more damage would have been done, but for the steam fire engine, which was now fairly tried for the first time. The Centeral office loses $1,200—$400 on the M'Lean & Dowling Warehouse, and $800 on the Tattersall house. The Queen had risks amounting to $1,700—$1,200 on Mrs. M'Leod's two houses, and $500 on Mr. Wright's house. Mrs. M'Manus' loss in furniture is considerable. Moarn's loss in goods in Warehouse is about $250. Wright lost about $100 in harness, sleds, and furniture. Some others lost more or less.

London Assurance Corporation.—This Company has replaced its provisional deposit of British 3 per cent consols by the deposit of Cash, invested in Dominion Stock $99,873; Canada, 5 per cent. consols held under the old Insurance Act, now transferred into the name of the Minister of Finance, in trust, under the new Act, 31 Vic., cap. 48, $50127; total, $150,000 and has been licensed to do a life as well as a fire business in Canada.

MARINE INSURANCE.

In writing upon the hulls of vessels, which for the most part is done by the year, though in some instances for a single voyage, the rate charged is governed largely by the place of building a vessel, and the name of the builders; for some firms build vessels to sell, and they are largely built of unsound or unseasoned timber; then the size or tonnage, and whether single, double or three decked; her model and draught of water, and fitness for the service in which she is engaged; mode of construction as relates to the manner of fastening, and metal used for that purpose; her age, and if old, when last overhauled, examined and re-coppered; the character of the owner or agent, and his reputation for keeping vessels in good sailing trim; his ability to pay for repairs when needed, at home or in a foreign port; the moral and professional reputation of the master; the number and efficiency of the crew—all these points enter into the determination of the rate of premium.

A few years ago the opinion prevailed among practical and scientific men, that the speed, as well as the safety of vessels on the ocean were in proportion to their size, and that the larger the ship the better; and this idea culminated in the Great Eastern; but lately, since pleasure yachts and a mere raft have crossed the Atlantic in safety, this idea has been materially modified; for their strength has not been increased in proportion to their size. Again the forces of nature in wind and wave are too great for feeble man to control; and the difficulty of handling a ship, and the constant liability to disaster, increase rapidly as her dimensions are increased beyond a certain point, and render the risks taken on them the least profitable to the underwriter.

Steamers, whether side-wheel or propellers, possess many advantages, in the estimation of the underwriter, over vessels propelled wholly by sails; the ease with which a steamer may be turned about, and thus enabled to shun a situation, which would prove inevitable destruction to a sailing vessel; the fact that the voyages are shorter; that the officers and men are of a superior grade to those commonly found on a sailing craft, need hardly be mentioned in proof of this point.

The nature of the cargo has a natural weight in determining the rate of premium; as the loss of the vessel by fire, or by foundering, almost necessarily involves the loss of the cargo. If bar or railroad iron form the cargo, up to or beyond the registered tonnage, it may strain and cause the vessel to leak and founder: hence the premium on this freight is from ¾ to even 7 per cent., according to the character of the vessel and amount of cargo and season of the year. Grain in full cargo in bulk is also considered very trying to a vessel, being liable to shift its position in heavy weather, and to choke the pumps; which occurrences may lead to the total loss of both vessel and cargo. Grain in sacks is a very desirable risk; but on grain in bulk the premium varies from 1 to 4 per cent. Articles likely to spontaneous combustion, or to be ignited by concussion or friction if stowed in the hold of a vessel, especially when the voyage is a long one, materially affect the hazard on all interests. The mode of packing merchandise, and the manner it is stowed away, have an important bearing upon the rate of premium charged. Matches, oil clothing and powder, placed in juxtaposition, from their inherent nature, may at any moment produce combustion, and occasion an instantaneous destruction of the entire vessel; and on this account it has been deemed of sufficient importance for the enactment of penal law concerning the stowing of such articles. Perishable articles, like green fruit and vegetables, are usually insured "free of particular average," or claim for depreciation in value, on account of damage; for no rate the owner might pay, would compensate the underwriter for the absence of this exemption. The facility with which a cargo may be saved, in case of the stranding of a vessel, affects the premium. Heavy articles placed in the hold, are not often recovered, while lighter, though more valuable, articles are saved. An advanced rate is charged during the stormy seasons of the year, as well as that portion subject to epidemics in the latitudes to be visited.

A vessel is usually considered missing, after the lapse of twelve months from the date of the latest intelligence from her; but in short voyages, the loss is anticipated at the end of six months. The practice of insuring vessels out of time, at very high rates, is not so common in this country as in Europe. Missing vessels are insured at Lloyd's when even the chance of loss is so great, that 50 or 60 per cent. is charged: but such practices are considered illegitimate, and are rare in this country. As business becomes extended, and the number of vessels navigating the ocean multiplied; the danger of collision on the more frequented tracks of commerce is greatly enchanced; and since all vessels take the shortest and quickest route, they are frequently brought in dangerous proximity. However, the improvement of lights on the vessels, and fog signals have prevented many accidents, like that still so fresh in the memory of all, the "loss of the Arctic."—*Philadelphia Underwriter.*

THE MANAGEMENT OF LIFE INSURANCE COMPANIES.

(SUGGESTED BY J. HOOPER HARTNOLL.)

Most of our readers must be well acquainted with the nature of what is called a "Life Table." They are familiar with the title of the Northampton Table, prepared by Dr. Price—the first brought into use for life assurance purposes; but afterwards, from its defects, superseded in many offices by the Carlisle Table, compiled by Dr. Milne, which, in its turn, is being driven out of the field by the English Life Tables constructed by Dr. Farr, from the returns of births, marriages and deaths, made to the Registrar-General relative to the entire population of the Kingdom. By these tables it is shown how many deaths will take place, year after year, out of so many born in any large community of persons. For example, according to the English Life Table No. 1, out of every 10,000 born, 5,585 will be alive at the age of 37. Of that number 66 will die during the next year; and consequently only 5,519 will reach age 38. Of the survivors, only 939 will reach the age of 80. At 90 there will be only 114 alive; and 2, possibly 1 only, will live to the age of 100.

Out of this table arises another, showing the "Expectation of life at all ages;"—that is to say, How many years an individual who has arrived at a particular age, say 37, and who is in good health, may expect to live. At that age the "Expectation" will be 29 years; and it is on the basis of such "Expectation" that the tables of rates of premiums are prepared.

Let us suppose 285 individuals who have arrived at age 37 to form themselves into a life assurance society, for the purpose of securing for the family of each assurant the sum of £500 to be paid at the member's death, out of the funds of the society. It has been carefully ascertained that, supposing the transactions of the association to be carried on without any expense whatever, an annual contribution of £12 10s. by each member, being at the rate of £2 10s. for every £100 assured (the money, as received, being invested at 3 per cent. compound interest), would be sufficient to provide for the several payments; and that at the death of the last member of the 285, the sum of £500 would be in hand available for payment to the person or persons entitled to receive it. This is life assurance pure and simple.

From what has been stated, it is beyond all doubt, or disputation, that if the fund arising out of these annual payments and invested at 3

per cent. is not tampered with, but is held safely in the hands of responsible trustees, "and is not applied to any other purpose than that for which it was created, nothing on earth can disturb the security of the members." In the first year of the society's operations the premium receipts would amount to £3,562 10s.; and during the year three members would die, occasioning a withdrawal of £1,500 in payment of claims. The fund in hand at the end of the first year would, therefore, be £2,062 10s. together with the sum received for interest. There would then be a second year's premiums due by 282 members, producing an addition to the fund of the sum of £3,525, carrying interest; and at the end of the year there would be a second withdrawal of £1,500 on account of the like number of deaths; and so on for the third and fourth years. In the fifth year the number of deaths that annually take place will be increased to 4, and at that number they will continue for twelve years, when they will have increased to 5; in five years more to 6 deaths annually; in four years more to 7; and in seven years more to 8; at which number the annual death-rate will be stationary for nine years, when the rate will gradually diminish until the society has fulfilled its original purpose, and has become extinct, by the death of the whole of its members.

But the business of a life assurance office is not carried on without expense; and in order to meet the charges of management, rent, taxes, &c., and to provide for various contingencies, an addition is necessarily made to the net premium. This addition is ordinarily at the rate of one-fifth, or 20 per cent. on such net premium; so that at age 37 the rate of premium charged by a company, whether mutual or proprietary, would be 3 per cent. instead of the £2 10s. mentioned in the preceding example of a mutual society of 285 individual conducting their business among themselves without expense. This sum slightly varies in different offices; but it may be adopted as the standard rate. In a well-conducted office, the marginal charge above the net premium will always be found sufficient not only to cover the management expenditure and to pay a liberal dividend to the shareholders in a proprietary company, but to produce, from time to time, large surpluses applicable to appropriation among the policyholders, in proportion to their several interests.

We now come to our plan for the security of the last-named class of persons—the shareholders may be left to take care of themselves. It is of the simplest possible kind; easy of accomplishment; as unimpeachable as an axiom in Euclid; and as safe in its results as the operations of the Bank of England—namely,

"Never allow, under any pretext whatever, one shilling of the net premium to be made use of for any other purpose than that of meeting policy claims."

And why should the principle not be acted upon—honestly acted upon? Every pound withdrawn from the net insurance fund, except for the legitimate purpose of meeting death claims, is a species of fraud against the policyholders. It may eventually be restored, either out of the surplus percentage on the premiums, or by calls on capital, if a proprietary company; but until that is done the abstraction would be a fraud, inasmuch as that the shareholders, under such circumstances, would be carrying on their business for their own benefit with the policyholders' money. The plea of liability to make repayment out of the unpaid-up capital of a company does not alter the character of the transaction. An apprehension of approaching troubles may induce shareholders to get rid of their shares, and they may be succeeded by men of straw, which has been known to be the case in hundreds of instances with public companies. It may therefore be asked, —Who will there be to make restitution then?

In order to show with what facility the plan we have suggested may be acted upon we will give an example of its operation in the supposed case of a proprietary life assurance company being formed with a paid-up capital of £10,000; that 285 policies for £500 each are issued to new assurants every year, instead of a single issue of that number, as in the former example;—that the age at entry is, in every instance, 37;—that the net premium is £2 10s. per cent.;—and that the additional office charge, or, as it is sometimes called, loading, is 20 per cent. on that sum—raising it to a gross premium of £3 per cent. In practice, uniformity of age at entry would never occur; but it is adopted for convenience of explanation. The same results would arise, whatever might be the difference in ages and the consequent increase, or decrease, in the rate of premium. The death-rate at all ages may be ascertained by reference to pages 255 and 256 of the new edition of the "Insurance Guide and Hand-book." We have previously exhibited what that rate is, for any number of individuals arrived at age 37;—and now the reader is fully prepared to understand the details and object of the following table:—

Year.	A No. of Policies	B No. of deaths.	C Gross Premiums.	D Office Margin.	E Net Premiums.	F Interest on insurance fund.	G Premiums and interest in hand.	H Claims thereon.	I Fund in hand after payment of claims.
			£	£ s.	£ s.	£ s.	£ s.	£	£ s.
1st	285	3	4,275	712 10	3,562 10	——	3,562 10	1,500	2,062 10
2nd	567	6	8,505	1,417 10	7,087 10	274 10	9,424 10	3,000	6,424 10
3rd	846	9	12,690	2,115 0	10,575 0	510 0	17,509 10	4,500	13,009 10
4th	1,122	12	16,830	2,805 0	14,025 0	810 0	27,844 10	6,000	21,844 10

6th	1,664	20	24,960	4,160 0	20,775 0	1,596 13	54,818 0	10,000	44,818 0
					73,450 0	4,369 3		33,000	

Explanation of the several Columns in the preceding Table.

Column A.—Number of policies in force in each succeeding year, on the assumption of 285 new entrants in each year, of whom a certain number will die in that year, and in each succeeding year, increasing periodically with the age of the individuals up to a certain point, and then, from diminished numbers decrease in the manner previously shown.

Column B.—Number of assurants who die in each year.

" C.—Gross amount of premium received in each year.

" D.—One-sixth of gross premium applicable to management expenditure, payment of a dividend to shareholders and for appropriation for bonus to policyholders when a sufficient surplus arises for the purpose.

" E.—Net premium, to be added annually to the assurance fund; which is the sole property of the policyholders.

Column F.—Interest annually received on the amount available for investment after payment of the death-claims of the preceding year.

" G.—Amount of net premium and interest at end of each year.

" H.—Amount of claims in each year.

" I.—Amount of assurance fund that ought to be found safely invested at the end of each year. Upon the inviolability of the amounts in this column the security of the policyholders mainly depends.

The several sums in each of the columns E, F, and H, in the preceding table, have been added up for the purpose of testing the reliability of the plan. The fund in possession at the end of every year ought clearly to be the amount of the whole of the net premiums and interest thereon, minus the total amount of claims that have arisen and have been paid. By adding £73,450 (net premiums, col. E) to £4,369 (interest received, col. F,) we get a total of £77,819; and by adding £33,000 (claims paid, col. H) to £44,818 (invested funds, col. I,) we get a total, £77,818. The difference of £1 arises from neglecting shillings and pence in some of the items.

We have not yet dealt with the paid-up working capital. We have already supposed it to be £10,000, and we will further suppose, for convenience of argument, the annual expenditure of every kind with which it is chargeable—even payment of interest to which there could be no valid objection—to be £5,000. These annual payments would be reduced in amount by the sums in col. D, Table 1; the only column in which the shareholders have a present financial interest, and the only one over which the Directors ought to be permitted to exercise the slightest control, except as to the safe custody and judicious investment of the sums in cols. E, F and I. We will now exhibit, in a tabular form, the action of col. D on the capital:—

Year.	A Marginal Premium.	B Office Expenditure.	C Capital diminished to	D Deficiency of Capital.
1	£712 10	£5,000	£5,712 10	.....
2	1,417 10	5,000	2,130 0	.....
3	2,115 0	5,000	.....	£755 0
4	2,805 0	5,000	.....	2,950 0
5	3,487 10	5,000	.....	4,462 10
6	4,160 0	5,000	.....	5,302 10

It will be seen by col. D that at the end of three years the £10,000 paid-up capital will be exhausted, and that there will be a deficiency of £755, to be provided for by a further call of capital. The deficiency, it will be observed, increases annually; and it will continue to do so up to the end of the eighth year, when it will begin to decrease rapidly, from the growing excess of the sums in col. A over the £5,000 annual expenditure.

It is to be borne in mind, however, that the sums in col. F, Table 1, are less than those that will arise in practice, from a rate of interest much higher than 3 per cent., and that the expenditure in the earlier years may be kept down to a much less sum than £5,000 per annum. The deficiencies in the proceeding table, to be provided for by the shareholders, will, consequently, be much diminished in amount, and the time for their being reduced and extinguished by the increasing marginal profits in col. A, will much sooner arrive.

REPORT ON INSURANCE BUSINESS.

The report of the Massachusetts legislative committee on insurance published in the *N. E. Insurance Gazette* reviews the history of insurance since the late war; speaks of the reckless competition as seen in the numerous fires which especially obtained from 1862 to 1867, and instances the great Portland fire of July 4. 1866. During this period many companies succumbed. Hazards are now increasing from the greater use of petroleum products, phosphorus, nitro-glycerine, and other chemicals. The increase of the crime of arson; the practice of over-insurance; the depression of trade and diminution of profits; are dwelt upon, as well as the bad system of brokerage in use. The fire losses from 1st January, 1859, to 31st December, 1868, amount to 59.26 of the premiums; the average running expenses being 30 per cent., leaving only a margin of 10 per cent. for profit, deducting the earning of vested capital, which is stated at 9 per cent.; the report concludes that only 1.23 per cent. is the real profit of insurance business.

Equally unfavorable, says the report, are the results of the insurance business in New York State, in which during the last three years, the 164 fire and fire-marine insurance companies, which do business in that State, received $110,-720,700.28 in premium receipts on fire and marine risks; and disbursed $111,519,470.20, or $799,-769.93 excess of disbursements over current receipts in a three years' business.

It is true that these companies during that period paid out $11,760,184 in the shape of dividends, or an annual average sum of $3,829,061. Their total assets for the three years exhibit an average of $72,902,576. Hence their net earnings, from all sources, were only 5.33 per cent., or but little more than one-half the general average. But even these small dividends were not derived from the profits of current business—which as we have seen was really a losing one—but were borrowed from the interest accruing on their surplus funds.

The following calculation of percentages will be interesting:

Percentages of total losses to total premium receipts	60.93
Percentage of total commissions to total premium receipts	11.81
Percentage of total management expenses, exclusive of commissions and taxes to total premium receipts	14.14
Percentage of total taxes to total premium receipts	5.14
Total	101.29
	100.00
Percentage of excess of current expenses to current receipts	1.29

The facts disclosed in the above tabular statement are both significant and suggestive. They show that 164 leading American insurance companies doing a fire and fire-marine business paid out, during the years 1865, 1866 and 1867, $12,-500,000 more than their premium receipts; that of $125,000,000 of total income for three years, less than $2,000,000 were reserved for additions to surplus, that the proportion of premium receipts saved for dividends is less than the amount thereof paid for taxes.

THE PRUDENTIAL AND INTERNATIONAL.

The whole of the revelations about the *Hercules* are of the most extraordinary nature. They disclose a course of business which might be deemed incredible. The company undertakes the liabilities of the *International*—a concern which for years was understood to be in a bankrupt state—relying apparently solely on the judgment of Mr. Shrubb, general manager and secretary of the *Hercules*, but who is known to have had no actuarial knowledge whatever; and this they do on terms so monstrous that actuaries would have been aghast at the bare suggestion. True, the affairs of the *International* were valued by Mr. Woolhouse, the eminent mathematician, before the transfer took place; but he seems not to have acted on his own independent judgment, for he assumed a basis of five per cent. instead of the usual three or three and a half, and of course his valuation was in consequence utterly unsound. But nobody seems to have suspected this. Mr. Shrubb was not likely to find it out, and can hardly be suspected of having done so, especially if his assertion that he never received a penny over the transaction is correct; the board relied on their secretary, and so the whole mischief was done.

Yet it is marvellous that it could have been so. What were the directors about? Was it so small a matter, this buying up the business of another company, that it was not considered worth their attention, or was it so complicated that they could not fathom the mysteries of it? Mr. White, the official liquidator in the winding up of the Hercules, very properly points out, that had the effect of purchasing on a valuation, not of pure net premiums, but of gross premiums, at five per cent., been seen and considered by the board, they never could have been parties to such a transaction. "Yet," he adds, "it must be apparent to any shareholder (let alone a director) who has the least knowledge of insurance business, or of finance, in any form, that as it is nearly impossible to invest considerable sums of money so as to obtain more than £5 per cent.—and it is indeed very hard to invest large sums to obtain uniformiy even that amount—that the Hercules must have realized a heavy loss year by year upon the business it had taken.

There was no margin out of which one penny of direct profit could be made by the investment of the International funds, nor indeed, was there any possibility of getting a single penny of margin to cover the whole expense of working that International business with its costly agencies in several parts of England, in Paris, Brussels, New York, Montreal, Halifax, Nova Scotia, and other places. Assuming (which is impossible in fact) that every shilling received from premiums, or otherwise, under the International transfer could have been invested at interest at £5 per cent., the moment it was received, so that not a fraction of interest was lost, the Hercules would then have had to bear, out of its own proper and independent resources, all the expenses incidental to the conduct of the International business.

Even this was not the worst of the case, for an attempt was made to show that the Hercules would, by profits on International policies bought on advantageous terms, be able wholly to turn the scale, which is mere moonshine. Looking at it altogether, it must be admitted that the Hercules has landed itself in a hole through one of the most amazing transactions in insurance history. The only parties who seem to have been benefited by the transfer are Mr. John Sheridan, the negotiator of the business, who netted £8,000 for his trouble, and Mr. Richardson, the Secretary of the International, who seems to have received £15,-000. This sum of £23,000 was paid away out of the assets of the International, reducing the funds by that amount, though its position was at the moment utterly hopeless. We question whether if the Court of Chancery were appealed to the whole of this money would not have to be refunded. If it be not, the unfortunate shareholders will have to make it good, besides a deficiency of some hundred thousands which they will have to subscribe to enable the Prudential, which has taken over the Hercules business, subject to certain conditions, to carry out this portion of the contract.

So far as the *Prudential* is concerned, it seems to have acted up to its name in the way in which it has set about acquiring the business of the two unfortunate companies. It has had their affairs valued by two competent actuaries, and has agreed to indemnify the policy holders of both companies in case the deficiency in the assets is subscribed. It could hardly have set to work in a more straightforward way. Meanwhile the whole affair in regard to the absorbed offices, now that it has been fully exposed by Mr. White, cannot be too closely scrutenised or strongly condemned. It reads more like a page in a novel than an incident in real business life. The *Hercules* directors appear to plunge into a difficult and delicate negotiation, wholly in the dark; they voluntarily "shoot Niagara," and elect to do so with their eyes shut. The thing affords a striking lesson to shareholders when called on to suffer their interests to be transferred from one company, to glide from comparative prosperity to ruin, from success to catastrophe at a single step, and especially in transactions of this sort. "But," it will be said, "the safety valve is the actuary's knowledge and experience. If he is not to be relied on, what security have we? How are simple shareholders to satisfy themselves and to secure their own interests unless by this means?" The question is far more easily asked than answered. The whole position of shareholders in public companies is, in truth, most unsatisfactory. They cannot all be suffered to take an active part in the transactions of business. That would never do. And even were it practicable in other respects, incompetency would furnish an effectual bar in nine cases out of ten. What are they to do then? Why, they must place reliance on those who are elected to sit at the board-table. The directors must have extensive powers and exercise a large discretion, under the advice of accredited and competent officers.

This state of affairs cannot be altered by any legislative or other device. Given complicated and extensive business arrangements on the one side, and a large body of interested but ignorant men on the other, and the present system is the only system which will work. There may, of course, be checks and counter-checks; Government actuaries may revise the calculations of private actuaries; accounts may be submitted to Government inspection or published for general information. Fifty different expedients may be resorted to; but the difficulties lying in the way will never be got over, and the more complicated the machinery, especially if there is to be a government spoke in the wheel, the more likely is the whole thing to get out of gear. All that the shareholders can do is to regard with suspicion and scrutinise as cautiously as possible all the propositions of an extraordinary nature submitted to them, demanding the fullest information, and insisting on the most stringent precautions their sagacity or experience may suggest. Let them not rely too surely on representations made to them, even when backed up by the advice of an actuary, who may not be a free agent, as we are willing to believe was the case in this instance.

The secret of the whole thing seems to be that the International was absolutely rotten—that it could not stand much longer; and that, therefore, at all hazards it must get rid of its liabilities to some unwary concern. For some years it had been in the market without finding a flat to purchase until the Hercules, utterly ignorant of actuarial science, and probably fearing the result of an investigation, entered into negotiations, on its own behalf, and bad as it was itself, actually consented to take over that which could only make it worse. The negotiator of this scandalous piece of business pocketed £8,000, and the officials of the Intercolonial netted an amount which seems almost fabulous. As these parties, excepting perhaps the lawyers, were the only ones that would be benefitted by the transaction, their desire to carry out the transfer *per fas et nefas* is easily understood.—*Insurance Record.*

NEW EXPERIENCE TABLES.—Twenty Companies recently contributed their experience to the Institute of Actuaries. The total number of lives assured was discovered to be as follows:

	Entered.	Died.	Discontinued.	Existing Dec. 31, 1863.
Healthy lives, male	130,243	20,521	35,024	74,698
" female	16,604	3,335	5,507	7,762
Both	146,847	23,857	40,531	82,460
Diseased lives, male and female	11,146	2,456	3,365	5,325
Lives exposed to extra risk from climate & occupation, male and female	2,433	409	1,480	544
Total	160,426	26,721	45, 476	88,329

The average duration of each life was over nine years, which, taken into consideration with the total number of entries—160,426—was sufficient to allow of several valuable classes of tables being formed.

A volume has been published containing the whole results of the valuable data thus collected.

Railway News.

GREAT WESTERN RAILWAY.—Traffic for week ending July 23rd 1869.

Passengers	27,317 61
Freight	29,866 00
Mails and Sundries	2,078 00
Total Receipts for week	$59,261 61
Coresponding week, 1868	45,330 25
Increase	$13,931 36

CANADA CENTRAL RAILWAY.—The Ottawa *Times* urges that encouragement be given to this company to construct the section between Ottawa and Carleton Place; considering that if this were done the line would soon be extended east and west and Ottawa assured a good position in relation to the trade of the North-West.

WELLINGTON, GREY AND BRUCE RAILWAY.—The great quantity of rain which has fallen has kept back work on this road. Mr. Naismith has the contract for the heavy cutting between the Roman Catholic Church, in Elora, and the Grand River. The contract for building the road between Fergus and Harrison was let to Messrs. Robertson & Reekie, who are making the road from Guelph to Fergus. A correspondent of the Hamilton *Spectator* suggests that the Directors should include in their scheme a branch line from Durham through Normandy to some point near Harrison.

PORT HOPE, LINDSAY & BEAVERTON RAILWAY.—The official authorities of this road went to Orillia on the 3rd August to hear overtures regarding the extension to Beaverton. One speaker considered that rafted timber *via* Toronto for the east sustained its greatest risk in the waters near that city, whereas by communication with Port Hope harbor that was avoided and the distance to Montreal and Quebec lessened; and further that if the Port Hope line were extended to Orillia it must go to Hog bay. The meeting is said to have been enthusiastic.

—The surveyors on the Missisquoi Railroad from Newport to the Troy line, find the route a very feasable one.

—A meeting of the Directors of the Eastern Counties Junction Railway is called for the 17th instant, at Knowlton, when the result of the survey will be laid before them.

—Mr. O'Brien, agent of the Grand Trunk Railroad, has received a despatch from the Manager of the Union Pacific Railroad to reduce the fare. Passengers can go through from Montreal now in about seven days to San Francisco, and at a less rate, both first and second class than by steamer from New York.

RAILWAY EXTENSION TO ORILLIA.—Mr. Cumberland, Manager of the Northern Railway, has addressed a resident of Orillia, substantially as follows: There are three possible projects now under consideration. 1st. The Nipissing narrow guage, in direct connection with Toronto, to which objection has been suggested on the ground that as it has only just been organized, and as all its strength will be required for and absorbed in the construction of its main line, any branches additional thereto would seem (for the present at least) to be difficult if not hopeless of attainment. 2nd. The proposed extension of the Port Hope, Lindsay and Beaverton Railway—and 3rd. The proposed extension of the Northern Railway from Barrie. Referring to these two latter projects it would seem to me that Orillia would prefer her own county town at Barrie—say 28 miles—to the county town of Victoria at Lindsay—say 54 miles, for public business will necessarily attract to Barrie, which, moreover, as a market and place of business, is also far superior in every way to Lindsay. Again, by the Beaverton route Orillia would be 151 miles from Toronto, while by the Barrie line it would only be 91 miles, and these differences of distances of course represent to passengers and freight a very large difference in the cost of transportation, even assuming (which is not the fact) that the tariffs on the two routes were similar mile for mile, of their lengths. But there is a very wide difference in the tariffs, that of the Northern being very low in comparison with the Port Hope and Lindsay. For instance, take the tariff from Port Hope to Lindsay for 43 miles in comparison with the tariff from Toronto to Bradford—which is the same distance—we find the following charges respectively on merchandise per 100 lbs:

	1st class.	2nd.	3rd.	4th.
Port Hope to Lindsay, 43 miles	35c.	20c.	15c.	nil.
Toronto to Bradford, 43 miles	20c.	16c.	14c.	9c.
Toronto to Barrie, 64½ miles	26c.	22c.	19c.	11c.
Toronto to Collingwood, 94 miles	30c.	25c.	20c.	12c.

Showing that we actually carry first class goods 94 miles, 5 cents less per 100 lbs. than is charged for 43 miles on the Port Hope line. Whilst it is also a fact that our present through rate (rail and boat) from Toronto to Orillia, is 36c. per 100, being only one cent. per 100 lbs. more than is charged on the same goods from Port Hope to Lindsay. Of course the sagacity of the Orillia people will lead them to compute the probable rate which would be charged for 93 miles if 35c. is now charged for 43 miles; and remembering that they now only pay us 36c. from Toronto, they will probably conclude that one cent. per 100 lbs. additional to the present Lindsay rate would scarcely pay for building and running 50 miles of road, from Lindsay to Orillia, and that even if competition kept the Orillia rate just as it is, Port Hope is not Toronto, but 58 miles away from it.

SOREL & ARTHABASKA RAILWAY.—Mr. Hemming, M. P. P., has been elected President and J. B. Govemont, Vice-President of this road. The Municipalities have subscribed $75,000 of the $300,000 required, and the government guarantees $120,000. Subscription books have been opened, and it is expected that the Directors will be in a position to commence operations early next spring, and to complete the road by the fall of 1870.

INTERCOLONIAL RAILWAY.

The line starts directly from the station of the Grand Trunk Railway, and at a very short distance crosses the Riviere du Loup by a bridge 300 feet in length, immediately above the falls at that place. Directly after crossing the river the line runs round a sharp curve, and through a heavy rock side hill cutting, after which, it descends to a level terrace, and runs through a well settled

French country. A good force of men are at work on the rock cutting, and gangs of men and horses all along this contract of twenty miles. In all about 500 men are at work upon this contract. Many culverts and water courses are already completed, and many in progress. A considerable quantity of grading is in active progress, several long cuttings and embarkments being in a forward state. The next important structure to the bridge at Riviere du Loup is at Isle Verte, where the work is actively progressing.

Heavy work has to be done at Trois Pistoles. This is on contract No 2. The grading throughout the whole of contracts Nos 1 and 2 is in a forward state, and except at two or three heavy places will be completed it is expected this fall. Upwards of 500 men are employed upon No. 2 and Messrs. Worthington, who are the contractors for one and two, about 40 miles in all, are pushing forward the work with great energy. They have been fortunate in finding good stone for the culverts in close proximity to the work, and consequently they have already got a considerable part of this work in a forward state.—All the culvert work appears to be done in a very satisfactory manner. A large 15 foot arch culvert, about two miles east of Trois Pistoles, has one of its walls already completed up to the course from which the arch will spring and is as fine a piece of solid, well executed work as is to be found in Canada. The length of this culvert is about 75 feet. Competent inspectors are appointed to overlook the masonery, and from the character of the work executed so far, they appear to be thoroughly doing their duty.

The heaviest work upon contracts one and two is at the crossing of the Trois Pistoles river, about one mile and a half west of the village of that name. The river and the valley through which it runs are about 1,100 feet wide at the point where the line crosses them, and the railway will run at a height of about 70 feet from the bed of the river. This crossing is the heaviest work between Riviere du Loup and the Metis, a distance of about 90 miles, On the west side of the river the line is carried for nearly two miles across a number of gorges in which there will be several culverts and a number of side-hill embankments. The bridge, which will be 500 feet long will start at the west bank, and be carried nearly half-way across the flats, thus placing the bridge across the main channel, and allowing no check to the flow of the river. The bridge is approached on the west side by a heavy embankment about 40 feet deep, made from a cutting of the stiffest kind of blue clay. This bank will be about 800 feet long, and is being actively constructed, The material on both sides of the river is the same, and is very difficult to work, coming out in large blocks of blue clay. On the east side of the river the embankment will be about 1,400 feet long and about 65 feet high at the deepest point. Large gangs of men and horses are at work on both sides of the river, and the contractors are preparing to put in tramways and tip wagons, as soon as the haul gets long enough to use them with advantage. An excellent stone quarry for the piers of the bridge has been found on the St. Lawrence, about 9 miles from Trois Pistoles, to which point the stone is now being brought in scows. One of the Worthington's lives at Riviere du Loup, and the other at Trios Pistoles. They have now at work on these two contracts upwards of 1,000 men. and are pushing forward the work with great energy and skill.

Bic is the headquarters of contract No. 5, which was awarded to Mr. Haycock, of Ottawa. He took the contract about the end of April, and has already made considerable arrangements for carrying on the work, having now 350 men at work grading the line at several points. There is not much bridge or culvert work on this contract, but the large part of the grading is rock. No. 5 ends at Rimouski. The village is large and prettily situated. Work is going on, on both sides of the river, which will be spanned by a bridge 300 feet in length.—The country from Riviere du Loup is like a continuous village, very similar in its general characteristics, to that between Chaudiere and Riviere du Loup.

From Rimouski the line will run through a very level country for about 22 miles, to the Metis crossing, the Metapedia Road. The course of the line from Metis to the mouth of the Metapedia has been a source of considerable labor to the engineers, who after careful examination of the country, have found a moderately easy line, with favorable gradients throughout. The railway will cross the Metis about four miles from its mouth, and ascend by easy grades the highland between the St. Lawrence and the Restigouche. It then descends to the level of Lake Metapedia; then runs along the banks of the Metapedia river, which it crosses once instead of fourteen times as proposed originally by Major Robinson.

The scenery along the line through the valley of the Metapedia and Restigouche, and alone the shores of the Bay of Chaleurs will be the finest of any railway on this continent; about five miles from Bay of Metis the line will reach its highest level above the St. Lawrence.

Mining.

SEMI-ANNUAL REVIEW OF GOLD MINING IN CALIFORNIA.

Among the chief events in the gold mining industry of California in the last six months have been the general recognition of the superiority of giant over black powder for ordinary blasting purposes, the strike of Grass Valley league against the use of giant powder, and the consequent stoppage of some of the leading mines there. In the New Almaden Mine it was found that to cut a yard of one of the tunnels cost $65 with black and $45.45 with giant powder, showing a saving of 30 per cent.; in the Oaks and Reese Mine a hundred feet of drifts that would have cost $7,500 with black powder were made under contract for $4,437 50, a saving of $40 per cent.; and in the Empire Mine it was found on a long and fair trial that the extraction of a ton of ore cost $5.39 with black and $2.09 with giant powder, showing a saving of 61 per cent. by the use of the latter. These are a few of the most noteable results that have been obtained in cases where precise comparisons have been made. At Smartsville it was found that with giant powder derricks were no longer needed in the hydraulic claims for lifting large boulders, which can now be shattered at one blast into pieces small enough to be carried down through the sluices. The Cornish miners at Grass Valley refused to use giant powder, ostensibly because the fumes were poisonous, but the real reason is supposed to be because the single-hand drilling for giant powder requires only half the number of men, gives greater facilities for paying by the amount of work done instead of by the day, is not so fatiguing and demands less experience.

The Eureka Mine at Grass Valley has continued to yield munificently. It produced in June more than $47,000, of which, however, $4,500 were from sulphurets collected in previous months. The total yield of the first half of the year was $285,-109.14 from 9,000 tons of quartz, making an average of about $32 per ton. The expenses were $102,000, leaving $183,000, or more than $1,000 per day net, and $20 per ton net. The number of men employed is about one hundred and fifty. The Idaho Mine, which adjoins the Eureka on the east, although it had begun to do very well in November last, did not prove its value as a first class mine till this year. It is now paying from $15,000 to $20,000 per month in dividends, and has a large stock of ore in sight. The quartz yields $17 per ton gross. The North Star, the Empire and the Banner have been interrupted in their workings by the miners' strike, and we have no figures from them. Work has been resumed in pumping and clearing out the Allison Mine, and preparing for the extraction of rock; and the mill has done well by working up selections from the old dump pile, thrown out as not rich enough to pay.

The Sierra Buttes Mine yielded $95,084 gross and $54,000 net in the five months, inclusive, from January to June. The average gross product per month is $19,000, the same as it was last year. The Independence Mine adjoining the Sierra Buttes claim, is yielding well, but is hurthened with debts, resulting chiefly from the damage done by the snow slides of winter before last, and is paying no dividends. The Keystone of Sierra, on the mountain opposite the Sierra Buttes, also suffered severely by avalanches, but seems to have not only recovered but to have gained a much better position than it ever had before. It now promises to become one of the leading quartz mines of the State. The gross yield was $17,000 in May and $20,000 in June.

The returns of the Amador Mine for June have not yet been received, but the average gross yield had been about $63,000 per month from February to May, inclusive. At the present rate of production the mine will turn out nearly, if not quite $750,000 for 1869. The production for the first five months of this year was $47,861.53, $65,-670.98, $61,720.65, $66,346.52, and $61,576.70. The number of tons reduced averages about 2,950 per month, every ton yielding more than $20. The dividends for each of the last five months was $10 per share.

The working of the mines of the Mariposa Estate has been resumed. There are now 60 stamps crushing at the Benton Mills, and a new 60-stamp mill has been commenced. The Merced River furnishes abundant power to drive all the mills with little expense; and the supply of pay quartz in the Josephine and Pine Tree Mines is large. The average yield of the rock on which the mills are now at work is about $20 per ton. The Mariposa Mine has been pumped dry, and some good quartz has been taken out, in readiness for the mill which is being remodelled to crushing, Four Ryerson amalgamators are running at the Benton Mills, and they give such satisfaction that no other mode of separating the gold from the quartz is to be used on the estate. The Princeton Green Gulch and Bear Valley Mines are lying idle.

The Oaks and Reese Mill is yielding about $12,-000 gross, and $6,000 net per month, with sixteen stamps, and twelve more are being added. From September, 1866, to May, 1869, inclusive, $170,-000 were produced, and all that, and $60,000 additional, were expended, so that the mine was fully opened and the mill put in good condition.

The Oneida Mine of Amador has been incorporated; the Jefferson mill has been moved away from Brown's Valley and the mine abandoned, for a time at least. The Gimcrack, or Erie Mine, in Nevada County, was in a fair condition to pay well, but the mill was burned down by some villains who had been employed in the mine, and were angry with the owners for stopping work because the miners would not use giant powder. Some further experiments have been made with the Hagan furnace, but it is not in use anywhere, nor, so far as we know, is there any intention to use it. About the multitude of other quartz mines which are being worked we have no facts worthy of mention in this brief summary. In placer mining there has been little change since December, save that of the gradual exhaustion of the richer claims, the continuous decline in the total yield, and the consequent decrease in the value of property in the placer mining counties. The burden of taxation to pay debts incurred in flush times is very heavy. The opinion is gaining ground that the valuable unoccupied lands in the mineral districts should be sold without reference to its mineral or agricultural character.

The French Atlantic Cable.—The gutta-percha employed for insulation was brought direct from Singapore, as it left the hands of the natives,

in the shape of unsightly idols, deformed quadrupeds, caricatures of patriarchs, dogs, ships'-birds, and was made into a paste for protecting the electric core. The copper wire was received from the wire mills in hanks of fifteen or twenty pounds each; each hank being tested on its arrival to ascertain its conductivity, none below a certain standard being allowed to be used. The conductor consists of a strand of seven wires, 0.56 inch in diameter, or a little less than one-sixteenth of an inch, six being twisted round the central wire. The seven wires are rendered perfectly compact by the coating of the central wire with an adhesive matter known as "Chatterton's Compound." The weight of the complete strand in four hundred pounds per nautical mile. It is is lengths of about one mile, and wound on reels ready to be covered with gutta-percha. The strand is passed through a vessel of Chatterton's Compound, and through a die corresponding to the size of the first coating of gutta-percha, which is forced round the strand as it passes through the die. Four successive coats are thus applied, and between each coating the wire receives a film of the compound, which improves the insulation and binds the coats together. The total weight of the core is eight hundred pounds per nautical mile, equally divided between the copper and the gutta-percha. The total length of the cable for the section between Brest and St. Pierre is 2,788 nautical miles, with smaller wire consisting of a conductor of one hundred and seven pounds per nautical mile, and a covering of one hundred and fifty pounds per mile. The cable thus prepared is finished with a serving of jute yarn and ten wires of homogeneous iron, each of which is covered with manilla yarn steeped in tar.—*Mining Journal.*

Goderich Salt Wells.—The Goderich correspondent of the Guelph *Mercury* says:—"Since my last our town has been quite excited over the salt question. I mentioned then that in a few days Platt's Patent Evaporator would be thoroughly tested in two of the wells. Since then the test has taken place, and the result is that the Evaporator is doing all that the inventor claimed for it before it was applied. The Maitland well, with a pan of 94 feet in length by 8 or 9 feet in breadth is now producing, every twenty-four hours, 90 barrels of first-class salt, with a consumption of six cords of wood, and the labour of seven hands, they working 12 hours, that is, three hands for the day and one man to attend the engine while pumping, which usually works from 12 to 14 hours in the twenty-four, and three hands for the night. Under the new system a saving of at least nine cords of wood is effected, besides the labor of two or three hands, in the production of 90 barrels of salt. In the Goderich well, as yet, the pan is a failure, owing to the want of draught in the chimney; but, doubtless, when the defect is remedied, the Evaporator will be as great a success in the Goderich as in the Maitland well. Mr. Platt, the patentee, gave, through the *Signal* the result of the working of his pan, claiming that by it salt could be produced at such a figure as to defy competition by our neighbors over the line in every place west of Kingston, and even to send it to Chicago, and pay the duty of 70 cents in gold."

Peat.—The Hodge machine set to work at Welland by the Anglo-American Peat Company was found to be defective in some of its arrangements, and an engineer from Montreal is now engaged in putting it to rights. The machine takes the peat out clean five feet deep. The Ontario Peat Company have a number of men at work and have made a large quantity of peat; as they press their peat into bricks, they are enabled to manufacture despite the wet season.

Eureka, N. S. Gold Mining Company.—Mr. McDonald the Vice-President of this company has just returned from Halifax. He had a special blast made while he was on the company's property and had a crushing, the result of which was over 5 oz. to the ton.

THURSDAY, AUGUST 12, 1869.

ANNEXATION TO THE UNITED STATES.

Many of the writers for the press of the United States are fond of harping on the subject of the annexation of Canada to the republic which overshadows us with its greatness. They break out, again and again, in thread-bare hyperbole over their greatness and our littleness, their progress, and our inertness, and express their astonishment at our stupid indifference to the glory we might achieve. The advantage of reciprocal trade will be conceded by all of us, and we do not deny but some parts of the Dominion would benefit greatly by such an arrangement as the old reciprocity treaty was based upon. But it has been shewn that we can get on very comfortably without reciprocity, and after an experience of several years, we find that our prosperity is not dependent on their forbearance or our existence endangered by their hostile tariffs. The closing of old channels of trade did affect various branches of industry, but taking everything into consideration, we cannot consider that the lesson of self-reliance was too dearly purchased. We did not know our own strength, and the various provinces which now constitute the Dominion were as distinctly separated as if they lay in different quarters of the globe. Political economy has in it little of what is called sentiment, but a desire for nationality begot confederation, produced sentimental results which cannot be ignored, and which the political economist, as well as others, must acknowledge. Interests clashed, selfishness ruled, the power which unity of purpose gives lay dormant. Now interests are reconciled, selfishness is swallowed up in the recognition of a common future, and we have got our hands on the rope, pulling all together at the car of progress. A provincial boundary surrounded ambition; now we talk without boasting, of a domain bathed by either ocean, and have visions of imperial greatness. This may be to some but an indication of folly, yet it certainly proves that we have been awakened from lethargy and have received new ideas.

A country without enthusiastic hope is like a man lacking in respect for his own ability. We were kept in leading strings by the Mother Country, until we became a by-word. Travellers made comparisons between us and our neighbours, greatly to our prejudice, or ignored us altogether. Shrewd go-a-head Yankees laughed us to scorn. While half the population were engaged in chopping down trees, the other half were either in office or trying to get in, afraid of sullying their gentility by work, but not ashamed to live on the hard earnings of the toilers of the forest. Many an immigrant who would, if landed in the States, have taken off his coat and gone to work, when he settled down in Canada exhausted more time and energy in finding out who his neighbour's grandfather was, than would have sufficed almost to earn a competency. Then again, the political fever seized us, and for years our people tinkered the constitution of the country, until one day we woke up and discovered that the rivets were loose, and the whole political fabric so much out of joint as to be incapable of successful working. Politicians berated each other with such heartiness as to leave almost every one under the impression that his neighbour was a rogue, and the members of the Government unfaithful stewards. Instead of wholesome legislation, we were overwhelmed with speeches. According to one political party, the country was going to the dogs, it was bankrupt, it was ruined; according to the other, everything was in perfect trim, our credit was good, our prosperity certain, so much, indeed, as to call for no useful measures. However, when both sides united in a coalition and began to look around, it was

ascertained that, although a great deal was to be done, things were not so irretrievably bad as they seemed. Such political squabbles may be regarded as the measles and whooping cough of nationality, but with us the attack was so severe as to do material injury to the country. However, of late years, legislation has pulled up wonderfully, and our politicians have, for the most part, seen the error of their ways.

Notwithstanding these adverse influences, Canada has not been sluggish in her movement. The statistics for Ontario and Quebec for the last twenty years exhibit evidence of prosperity. In 1850 the total value of exports and imports for these two Provinces was under thirty millions of dollars; for the year 1860 the amount was over sixty-eight millions; while for the year ended 30th June, 1867, it had risen to upwards of one hundred and seven millions of dollars. During nine years the imports into Ontario and Quebec increased upwards of 81 per cent.; into Nova Scotia, 62, and New Brunswick 38 per cent.; while the exports of Ontario and Quebec increased 44 per cent.; Nova Scotia 20 per cent. and New Brunswick 25 per cent. The deposits in banks increased from $8,358,437 in 1859 to $31,600,000 in 1868. During the last three years the deposits in banks and savings' banks increased from $32,600,000 to $37,500,000. The railway traffic shewed an increase from $4,620 per mile in 1866, to $5,020 in 1868. In one year the value of assessed property in Ontario increased $3,588,000. The repeal of the Reciprocity Treaty did not work such great harm as some suppose. During the last year of the treaty the exports to the United States from all the Provinces of the Dominion, amounted to $21,340,000; in 1868, to $20,061,000, showing a decrease of a little over five per cent. But inter-provincial trade received a great impetus. In 1866-7 there were sent to Nova Scotia and New Brunswick 403,000 barrels of flour; in 1867-8 443,000 were sent, showing an excess of about 33 per cent. The demand for Nova Scotia coal is manifesting itself more strongly in Ontario and Quebec, and though the increase last year was about 17 per cent. over the previous year, the figures for the present year will be found to be much larger.

The average annual increase in population has been in Ontario 4½ per cent., Quebec 2½, New Brunswick 2½ and Nova Scotia 2. In 1868, a comparison was made as to the amount of debt the other British Colonies have to bear in proportion to population as well as annual charges with that of Canada The result was, New Zealand, $6.02 per cent. per head; Queensland, $4.97; New South Wales, $3.21; Victoria, $2.88; Canada, $1.12½. The total taxation is an annual charge of a little over $5 per head instead of $45 per head as in New York and the debt less than $28 per head as compared with $158 in the State of New York.

Notwithstanding the enterprise of our cousins across the lines, despite their genius for competition and their high and hostile tariffs, we have done pretty well for "Britishers," and we can afford to hear with complacence their patriotic boasts, while our patriotism manifests itself in a quiet satisfaction and a determination to go ahead. We have but 3,900,000 of a population. Ere long we shall have a territory, at the least, over two millions of square miles in extent. While we bear rule over so much land we claim to rank third among the maritime countries of the world.

A great deal has been said about the number of people who leave Canada for the States. It is true a great many young men do go there, but it is also true that many come back. For that matter, a great many Americans come and settle in Canada; but this proves nothing more than that people will rove about. Canada never witnessed such an era of progress as at the present time. Railways are being built in all directions; new branches of industry are being developed; new territory is being opened up; and we have organized a system of immigration which has already borne good fruit. We have a new and fertile West for our young men, where their adventurous spirit can sate itself. Each Province is vieing with the other in economy. Our people are comfortable, and well satisfied with their political institutions. When we say that we have the freest country upon earth, it is no idle boast, for we challenge contradiction. Indeed, our American neighbors are the readiest to confess it; and none are more earnest in their advice that we should retain our identity than those who have experienced the evils which the better educated classes in the States labor under. On the whole, we think that Annexation, even as a topic of discussion, had better be postponed.

MARKED CHEQUES.

The paying teller of a bank which has an active business does not enjoy a sinecure. Not only is his honesty put to the test, but the nature of his duties places his good name and his prospects at the mercy of others, sometimes even at the mercy of chance. He, like everybody else, is liable to errors in calculation; but, unlike everybody else, he has to bear their full consequences. When he pays out two bank notes instead of one, or a roll of sovereigns instead of silver, the excess is not lost to the bank, but forms a set-off for so much against his own salary. Few will envy a teller who finds his cash in excess; certainly none will begrudge him the worry which results when his cash is short; the weary retracing of the day's business—the anxious tax of memory—the fruitless search after a mistake which defies every effort at discovery—the hesitating confession—the meek acceptance of rebuke, and the submission to loss. The general rule respecting payments over the counter is, that mistakes must be rectified at the time, before the sufferer leaves the bank premises, but in practice it can scarcely be said to be strictly followed. Were it imperative and irrefragable, one could scarcely say that it is unjust; for a teller has to do with a great number of people who are strangers to him, and might be cheated time and again, if liable to be called on to open up transactions, all trace of which has been obliterated in a multiplicity of payments.

The rule referred to is supposed by some to justify the keeping of all that one gets from a bank clerk, whether entitled to it or not. Such a conclusion savours little of morality, and we are glad to believe that but few act upon it. There are, however, persons, who can retain, with a chuckle of satisfaction, an extra five or ten dollars over the amount they are entitled to receive from a bank, and yet would repudiate the name of thief, and would consider their honesty unimpeachable.

The Quebec *Gazette* puts forward the following state of facts as the particulars of a case which recently occurred in Toronto :— A presented B's cheque to the ledger-keeper of the Ontario Bank, and it was marked good, in the usual manner; but before A left the premises, the ledger-keeper discovered that he had made a mistake, and requested him to return the cheque, in order that the acceptance might be corrected. A refused to do so, but brought his action, and got judgment, subject to a motion for non-suit. We quite agree with our contemporary when it says:— If a man occupying a respectable position in society is permitted to possess himself of $70 by the accident described, and to be declared legally entitled to retain the money, we do not see why another individual, who may see a person drop his pocket-book containing $700, and who picks it up, should not be allowed to keep it. The two things are very much alike; and we do not see that the man who "found" the porte-monaie, and insisted upon appropriating its contents, would be more to blame than he who, by the miscalculation of a bank clerk (of which he was immediately informed), possessed himself of a sum of money, or of its equivalent, in the way we have stated. This view commends itself as the right and proper one to take of such a transaction.

But this is not a correct statement of the the case. It appears that the cheque was drawn by a firm, one of whose members absconded on Saturday night; and on Monday morning the other member of the firm called at the Bank and forbade the payment of the cheque. The ledger-keeper did make the mistake mentioned, but the whole matter was referred to the cashier, who, under the circumstances, sustained the teller in his refusal to pay. This may not be all the particulars, but it embraces all those material at present. When the case came up in Court, the question arose whether the marking of the cheque constituted an acceptance, and whether there could be any such thing as an acceptance of a cheque. The presiding Judge ruled, we believe, that the ledger-keeper was the duly authorized agent of the bank, and that his marking the cheque was an acceptance, such as would bind the bank. There was evidence given by experts. The manager of the Montreal Bank, we think, considered that the ledger-keeper's initials on the cheque were of no value, as regards parties outside the institution, they were merely intended for the information of another officer of the same institution, and should not be taken as an absolute indication to the public that the cheque would be cashed. We can understand how such a conclusion is arrived at. If the ledger-keeper, by initialing cheques, is to bind the bank, then, certainly, we have a ledger-keeper who shares with the cashier and the president the power of acceptance. What is to prevent that clerk from issuing any number of such acceptances, and involving the bank in difficulties. Cheques so nearly resemble bills of exchange, that they are frequently spoken of without discrimination. Story, in pointing out the differences between cheques and bills, states that cheques require no acceptance, as distinct from prompt payment. It must be admitted that it has become a usage to receive marked cheques as cash, and unless it be decided that such marking by a bank ledger-keeper is an acceptance, the business community will have to look to it that they be not deceived for the future. If Mr. Yarker is right, a marked cheque is no more valuable than an unmarked one.

NORTHERN RALWAY COMPANY.

It will be seen by reference to the semi-annual report that this company is again enabled to show a favorable balance sheet. The gross traffic receipts for the past half-year show an increase of 12.70 per cent. over the corresponding period of last year. The working expenses have decreased 8.82 per cent. and are now at the rate of 54.22 per cent. of the gross earnings. After providing for the demands of an increasing traffic, and payment of current returns on both classes of the company's bonds a balance of $36,458 has been carried forward to the credit of interest dividend account.

This number closes the second Volume of this Journal. An index of contents will be issued to subscribers. Those desirous of completing their file of the paper had better send in their orders.

Personal.—Mr. Burnett Superintendent of the Foreign business of the North British and Mercantile Insurance Company of London, with Mr. Thomas Davidson, General Agent of the Company, Montreal, have arrived in this city, to inspect the Western Agencies of the Company. We observe that in Montreal the Fire Brigade was paraded for inspection by Mr. Burnett, who expressed himself in the highest terms as to its efficiency. This expression coming from a high London authority is certainly flattering to the fire organization of a Canadian city.

The Philadelphia Underwriter.—We have received the first three numbers of this new insurance journal, and have to express great satisfaction with its typographical appearance and its contents. Mr. Cohen has our best wishes for its success.

Commercial Bank of New Brunswick.—A meeting of shareholders was held on the 3rd inst. at St. John. The liabilities had been reduced by $368,799, and the assets by $382,231. After some discussion, in which a Miss Ladd, of Halifax, distinguished herself by some severe comments on the management, the meeting adjourned.

Communications.

CANADA LIFE INSURANCE REPORT.

To the Editor of the Monetary Times.

Dear Sir,—Official reports of insurance companies, in Canada or elsewhere, to be fair comparisons with each other, or of value to the public, should be made as uniform as possible, both in the character of the items and as to the date of the returns. It is a very great pity that the Canada Insurance Act did not provide for returns relating to the calendar years only, or that the several companies cannot all see the advisability of making their returns in that way. If some make returns of business for the year ending 31st December, and others choose to exercise the right of stringing their returns all the way along through the following year, the sooner the Act is either amended or repealed, the better for all concerned—except the Government printers.

Most of the offices, this year, complied with the request of the Finance Department, and sent in their returns at the commencement of the year, but there were some exceptions. The consequence is that instead of the Government report upon the returns being ready for distribution during the sitting of the Legislature, as it should have been, and as other departmental reports are, it has not yet made its appearance, and its contents are now nearly valueless through lapse of time.

As to the equity between the several companies, in placing their returns side by side, the want of uniformity in date could affect none of them favorably, or otherwise, except in relation to one item. viz.—"Total amount at risk in Canada." A company delaying its return until six months' additional business has been placed upon its books, must, of course, thereby place itself in the position of holding an unfair advantage over companies that made prompt and early returns. And if it be allowed always to thus delay its returns, it must continue to hold an undue advan- in reporting the "Total amount at risk," as well as in making "*Memorandums*"—if I may be allowed to coin a word—relating to this alone, out of all the other items composing the returns.

While on the subject of returns, and since your columns have given to the public the Auditor's Report and Government Return of the Canada Life Insurance Company, allow me to call the attention of those interested to some discrepancies upon the face of the two documents.

Both the Auditor's Report and the Government Return are evidently made up to the same date, and should, therefore, substantially agree with each other. They do agree as to most items, but but under the head of "Expenses of Management, &c., &c.," the "$34,657.76" found in the return is greatly exceeded by the actual disbursements reported by the Auditor. The following are the two statements as they appeared in your columns, omitting irrelevant matter:

AUDITOR'S REPORT.

By Expense Account		$32,874 58
" Vote for Board		1,600 00

GOVERNMENT RETURN.

By expenses of Management, Agency, &c., &c	$34,657 76

Now, if the Auditor's Report is correct, the amount that would seem to have been expended in management and agency charges was $50,393.35, instead of $34,657.76.

No doubt there are reasons, and perhaps very good ones, for not placing the last three items above quoted from the Auditor's Report in the return to the Government; but they are not reported as having been given at the annual meeting of the company, and in their absence the two statemements seem to seriously disagree.

Very truly yours, I. C.

Montreal, Aug. 8.

PETROLIA OIL TRADE.

(From our own Correspondent.)

Petrolia, Aug. 9, 1869.

The production of crude for the last week has not exceeded 4,000 brls., and this is caused by a partial failure of what is called the King Territory. The Hamilton export firm are still busily attending to their trade, and everything seems to be right with them, for they can now manufacture a distillate that will make an oil equal toif not better than than any American brand; they are now running their full capacity. Mr. Craise, of this place, has commenced running the High Well, which is yielding some 30 brls. per day. Things at present are just on the *qui vive*. A number of new wells are being drilled, and should the most of them strike oil, it is a comfort to know that they cannot over stock the crude market, for several new firms would engage in the exporting business if they could obtain the crude, and be sure of an ample after supply; for, as the refiners now stand, (there are some 60 of them spread over Western Canada)—the Standard, the Higgins, the Buffalo, and the Spencer, and the Waterman—could distil every drop of crude now produced, with ease.

The town of Petrolia looks very lively just now, and lots of new faces appear every day. I am preparing a description of the different oil territories near this, which I will send you for next week.

The quotations are for crude... $1 25 per brl.
Refined ..... 0 20 " gall.

Eagle & Hart are taking away a large amount of crude just now. I have not heard of any new sales effected this week. M. P.

Financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

There has been a good business done during the week in favorite stocks, and, in most cases, prices have slightly advanced. The supply is still far short of the demand.

Bank of Montreal has been sold in small lots at 162, 161½ and 161, there being still buyers at the last-named rate. Small lots of British at 105½ have been offered. Ontario has been sold at 96 and 96¼; there are buyers at the former rate, and sellers at 96½. Sales of Toronto Bank at 123¾ are reported; but though that rate would now be given, there are no sellers. There is a demand for Royal Canadian at 52, with no sellers. Bank of Commerce has been largely dealt in at 103½, 103¾ and 104, and there are now buyers at 104½. There have been considerable sales of Gore at 68 and 68½ on reduced stock. Sales of Merchants' at 104½ and 104¾ have occurred; the market closed firm. There are buyers of Quebec at 100½ to 101. Sales of City at 100½ and 101 have been made, and there are buyers at the latter rate. Of Du Peuple there are buyers at 109½, with no sellers; of Jacques Cartier 108½; of Union at 104½. There is no Toronto Gas Stock in the market; buyers would give 108. There have been sales of British America Assurance at 56½ and 57, and there are still buyers at the latter rate. Canada Permanent B. S. commands 123½. There is a demand for Western Canada B. S. at 119½; sales have occurred at 118½, 119 and 119½. Buyers would give 119 for Freehold, but there is none on market. There have been sales of Montreal Telegraph at 132 and 132½. Canada Landed Credit is in demand at 82. Short dated Sixes of Canada Debentures are offering at 103½, and Dominion Stock at 107. Fives and long-dated Sixes are in demand. Considerable sales of Toronto Debentures have been made to pay 7 per cent. interest, with a continued demand. County Debentures have sold during the week at 99 and 99½. Mortgages have been placed at from 8 to 9 per cent.

POST OFFICE SAVINGS' BANK STATEMENT FOR JUNE.—

In hands of Receiver General 24th July, 1869...		$727,910 23

—The construction of a ship canal from New Orleans to Lake Pontchartrain, it is asserted, would diminish the port charges in pilotage and towage alone by the sum of $1,800 on a vessel of one thousand tons burden. At present it costs $2,555 to bring a vessel of that size from the mouth of The Mississippi to New Orleans. The charges to bring a vessel of one thousand tons burden from the ocean to the wharves amount to $570 at Boston and $676 at New York. It is argued, therefore, that a ship canal at New Orleans would place that port on an equality with Northern cities.

— A short time ago Mr. L. Shickluna launched, at St. Catherines, the bark Thomas C. Street. She is 143 feet long; depth of hold 11 feet 4 inches; breadth of beam 26 feet 3 inches; 400 tons burthen. The *Journal* says:—It is expected that she will carry 20,000 bushels of wheat through the canal. She will be commanded by Capt. Reuben Wynn, now of the St. Andrews, and her first trip will be to Chicago with a cargo of wood. Shickluna has another vessel and a propeller on the stocks, both of which will no doubt be afloat at the proper time.

—It is proposed to start a Gas Company in Peterborough.

—The Halifax *Reporter* advises Toronto to look sharp after the Coal trade with Nova Scotia, else Montreal will take the lead in it, and by consequence in the flour trade. Our contemporary adds:—If our coal-owners were to combine and appoint agents in Toronto and Montreal and other places, and then enter into the carrying trade themselves, a valuable impulse might be given to inter-provincial trade. Coal yards in Montreal and Toronto would help to introduce our coal among the people of the Upper Provinces.

—A telegram from Shanghai communicates the sailing of the first tea ships this season for England—namely, the Titania and Huntly Castle, sailing ships, and the Agamemnon and Erl King. Their cargoes in the aggregate amount to 6,000,000 lbs. of tea.

—The manufacture of wine in California is rapidly increasing. The vintage of 1867 is estimated at 3,500,000 to 4,000,000 gallons.

—The wheat crop in the county of Grey is suffering severely from the ravages of the midge; so we are informed by a reliable correspondent. As this is one of the largest wheat growing counties in Ontario, the failure of the crop there will materially lessen our exportable surplus, and go far to disappoint the high anticipations that have been formed of the harvest.

Commercial Travellers.

The number of commercial travellers in the United States is stated at fifty thousand. These are employed by firms in different parts of the country, divided as follows:—Boston and the New England States, 10,000; New York, 20,000; Cincinnati, Chicago and St. Louis, 10,000; Pennsylvania and Maryland, including Philadelphia, Pittsburg and Baltimore, 10,000.—Total, 50,000.

Arthur Jones,

Land Surveyor and Timber Agent.

IMPROVED and unimproved lands for sale, in the Counties of Kent, Essex, Lambton, Middlesex, and Elgin.

Chatham County, Kent, Ontario.

Western Assurance Company.

NOTICE is hereby given, that a dividend for the half-year, ending the 30th ult., at the rate of EIGHT per cent. per annum, upon the capital paid-up stock of this Company, has been declared, and will be payable at the Company's office, on and after Friday, the 9th inst.

By order of the Board.

BERNARD HALDAN, Secretary.

Western Assurance Co.'s Office, Toronto, 1st July, 1869.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give PUBLIC NOTICE that they are now prepared to receive Tenders for five other Sections of the line.

Contract No. 8 will be in the Province of Quebec, and extend from the easterly end of Contract No. 5, at Rimouski, to a point near the Metis River, about twenty and a half miles in length.

Contract No. 9 will be in the Province of New Brunswick, and extend from the easterly end of Contract No. 6 towards the Town of Bathurst, about twenty and a half miles in length.

Contract No. 10 will be in the Province of New Brunswick, and extend from the centre of the Chaplin Island Road, near the Court House, at New Castle, towards Bathurst, about twenty miles in length.

Contract No. 11 will be in the Province of Nova Scotia, and will extend from the easterly end of the Eastern Extension to the westerly end of Section No. 4 (including the bridge across the Missisquash River, except the western abutment), about three and a half miles in length.

Contract No. 12 will be in the Province of Nova Scotia, and extend from the easterly end of contract No. 7, at Folly Lake, to a junction with the existing railway at Truro, about twenty-four miles and a half in length.

Contracts Nos. 8, 9 and 10 to be completely finished before the 1st day of July, 1871. Contract No. 11 to be completely finished by 1st July, 1870.

That portion of contract No. 12, east of Folly River to Truro, to be finished and ready for laying the track by the 1st day of October, 1970, from Folly River to a point opposite the Londonderry Iron Works by the 1st January, 1871, and the remaining portion of said contract by the 1st day of July, 1871.

Plans and profiles, with specifications and terms of contract, will be exhibited at the offices of the Commissioners in Ottawa, Rimouski, Dalhousie, St. John, Halifax, Toronto and Quebec, on and after the 13th September next, and sealed tenders addressed to the Commissioners of the Intercolonial Railway, will be received at their office in Ottawa, up to 7 o'clock p.m., on the 18th October, 1869.

Sureties for the completion of the contract will be required to sign the tender.

A. WALSH,
ED. B. CHANDLER,
C. J. BRYDGES,
A. W. McLEAN,
Commissioners.

THE ONTARIO PEAT COMPANY.

CAPITAL, ... $120,000.

THIS COMPANY is PROVISIONALLY organized as follows:—

DIRECTORS:
HENRY S. HOWLAND, Esq., ... Toronto. | LARRATT W. SMITH, Esq.,..... Toronto.
JOHN FISKEN, Esq., ... Toronto. | ALFRED TODD, Esq., ...Ottawa.
EDWARD A. C. PEW, Esq.,..... .....Welland.

TRUSTEES OF THE LANDS:
PELEG HOWLAND, Esq..... Toronto. | CHARLES J. CAMPBELL, Esq.... Toronto.

TREASURERS:
CHARLES J. CAMPBELL, Esq., ... Toronto. | WALTER G. CASSELS, Esq..... Toronto.

BROKERS:
MESSRS. CAMPBELL AND CASSELLS,.....92 King Street, Toronto.

SOLICITORS:
MESSRS. SMITH AND WOOD, ... Wellington Street, Toronto.

SECRETARY:
JOHN WEBSTER HANCOCK, Esq., ...22 Toronto Street, Toronto.

The lands of the Company are 1,375 acres, in the County of Welland, of the purchase value of $55,000.

The owners of the land have taken stock to the amount of.....	$44,000
It is proposed to reserve for future contingencies.....	20,000
And to put upon the market the balance of.....	56,000
	$120,000

Nearly 20,000 of the said balance is already subscribed, and the rest is in the hands of the Brokers of the Company.
A Charter of Incorporation is being applied for, and the operations of the Company will commence very soon.
Subscription Books for the Stock not yet taken up lie at the office of Messrs. Campbell and Cassels, 92 King St., Toronto.
May 19, 1869.

ANGLO-AMERICAN PEAT COMPANY.

CAPITAL, ... $200,000,

IN 8,000 SHARES—$25 EACH.

President—WM. EDGAR, Esq., Hamilton. Vice-President—ROBERT REFORD, Esq. (Messrs. Reford & Dillon), Montreal.
Secretary-Treasurer—A. McK. COCHRANE, 388 St. Paul Street, Montreal.

THIS COMPANY, with machinery now in working order and in course of construction, will be able to manufacture this year FROM TEN TO TWELVE THOUSAND TONS OF GOOD FUEL. Actual working shows—

I. That the fuel can be produced for $1.45 a ton, and with the improved machinery, at a much less cost.
II. That, for steam purposes, one ton of it is superior to one cord of wood, in the proportion of 31 to 27.
III. That, for domestic purposes, it is equal to wood or coal, and leaves very little ashes—about five per cent.

At the annual meeting of the Company in Montreal, it was decided to offer one thousand shares of Stock in Toronto. Mr. Isaac C. Gilmor has been appointed agent of the Company in Toronto, and is authorized to receive subscriptions for the Stock.
Prospectus, Map of the Property, and further information may be obtained by addressing

ISAAC C. GILMOR, 58 Colborne Street, Toronto.
Or A. McK. COCHRANE, Secretary-Treasurer, 383 St. Paul Street, Montreal. 30-35t

EDINBURGH LIFE ASSURANCE COMPANY.

FOUNDED 1823.

AMOUNT OF ACCUMULATED AND INVESTED FUNDS—OVER ONE MILLION STERLING.

HEAD OFFICE—EDINBURGH.

PRESIDENT—The Rt. Hon. the Earl of Haddington. MANAGER—D. Maclagan, Esq. SECRETARY—Alex. H. Whytt, Esq.

CANADIAN OFFICE ESTABLISHED 1857. WELLINGTON STREET, TORONTO.

CANADIAN BOARD—Hon. John Hillyard Cameron, M.P., Chairman. J. W. Gamble, Esq., L. Moffatt, Esq., Hon J. B. Robinson, C. J. Campbell, Esq. David Higgins, Secretary.

THE Edinburgh Life Assurance Company offer to the public the advantages of a Canadian as well as a British Company. They have invested a large amount of money on securities in this country, and the Toronto Local Board have full power, by an Imperial Statute, to take risks, make investments, and settle claims in Canada, without reference to the Head Office, Edinburgh. Some of the old Policies in the Company, which became claims during the past year, were settled by payment of amounts double of those originally insured, in consequence of the large bonuses that accrued on the Policies.

Every information that intending assurers may require can be obtained at the Company's Office in Toronto, or at any of the Agencies which have been established in the principal towns in Canada.

J. HILLYARD CAMERON, CHAIRMAN. (39-1y) DAVID HIGGINS, SECRETARY.

NATIONAL LIFE INSURANCE COMPANY

OF THE

ZEPHANIAH PRESTON, VICE PRESIDENT.
LUCIAN S. WILCOX, MEDICAL EXAMINER.

Organized in 1846. Charter Perpetual.

The Largest Mutual Life Insurance Company. Numbering Over 59,000 Members.

BEING A PURELY MUTUAL COMPANY ITS ASSETS BELONG EXCLUSIVELY TO ITS MEMBERS.

ASSETS, $25,000,000.—Acquired by prudent and economical management of twenty-two years, without the aid of a single dollar of original capital.
SURPLUS ASSETS, $7,361,967—All profits divided among the members. Each policy holder is a member. There are no stockholders.
ITS DIVIDENDS—Have averaged over 50 per cent. annually. Total amount of dividends paid the members since its organization, $6,000,000.
ITS SUCCESS UNPARALLELED—It has arrived at the extraordinary condition where the income from annual interest alone is more than sufficient to pay all the losses. Total amount of losses paid by the Company, $8,500,000.
ITS RESPONSIBILITY—For every $100 of liabilities it has $154 of assets.

LAST YEAR'S PROSPEROUS BUSINESS.

Amount insured fiscal year, 1867 .....$45,647,191 00 | Income received fiscal year, 1867.....$7,530,886 19

During its last fiscal year this Company paid to its living members, and to the families of deceased members, nearly $2,000,000, and at the same time added more than four millions to its accumulated capital.
The whole record of this Company has been one of prudent management and prosperous advancement. Among the older and leading Life Insurance Companies its average ratio of expenses to income has, through its entire history, been the lowest of any.
$140,000 deposited in Canada for the benefit of Policyholders.

MEDICAL REFEREES—J. WIDMER ROLPH, M.D.; H. H. WRIGHT, M.D.

OFFICE - - - - - - No. 53 King Street East, Toronto.

LIFE ASSOCIATION OF SCOTLAND.

Invested Funds Upwards of £1,000,000 Sterling.

THIS Institution differs from other Life Offices, in that the BONUSES FROM PROFITS are applied on a special system for the Policy-holder's personal benefit and enjoyment during his own lifetime, with the option of large bonus additions to the sum assured. The Policy-holder thus obtains a large reduction of present outlay, or a provision for old age of a most important amount in one cash payment, or a life annuity, without any expense or outlay whatever beyond the ordinary Assurance Premium for the Sum Assured, which remains intact for Policy-holders' heirs, or other purposes.

Insurance.

Briton Medical and General Life Association,

with which is united the

BRITANNIA LIFE ASSURANCE COMPANY.

Capital and Invested Funds.....£750,000 *Sterling.*

ANNUAL INCOME, £220,000 STG. :

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the BRITON MEDICAL AND GENERAL to be almost unparalleled in the history of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family*, and a more valuable security to creditors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra charge made to members of Volunteer Corps for services within the British Provinces.
